Given all these developments, we are looking at one of the best opportunities we have had in many years to move toward an agreement. We should not squander this opportunity.

Mr. President, yesterday marked the 41st anniversary of Hiroshima. It was also the day that the Soviet Union's unilateral moratorium was scheduled to end. But yesterday, the Soviet Deputy Foreign Minister stated that the Soviet leadership will not immediately announce its decision whether to resume testing or whether to continue the moratorium. I think it would be instructive for the Senate to hear what Deputy Foreign Minister Kaptisa had to say on this subject:

> Many foreign statesmen, political and public leaders are addressing the Soviet Government on the question of an extension of the unilateral moratorium on nuclear testing. This question will be decided with due consideration of both these appeals and how seriously the United States is prepared in our estimation to discuss the question of ending nuclear tests.

It is fair to conclude that this debate and this vote will carry some weight inside the Kremlin as to whether the moratorium on testing should be continued or whether it should end.

I do not say that the views of the Soviet leadership and what possible actions they might take as a result of this vote or this debate should guide the Senate as it makes its decision on this resolution. I do say, however, that a comprehensive test ban is strongly supported by the American people. In this vote today, we must give voice to the hopes of the American people—and of all humanity—that it is time to get time to get talks underway between the Soviets and the Americans on resolving our differences and achieving a comprehensive test ban treaty. It is time for us to speak clearly and forcefully to give voice to that message.

I have faith that President Reagan, once he understands the depth and breadth of the feelings, will himself embrace the challenge of ending nuclear testing.

Mr. President, Senator MATHIAS and I feel that the administration needs to get our message, again, that a comprehensive test ban should not be merely a "long-term objective" but we should start real talks now. We urge our colleagues to vote in favor of this amendment.

Given the action of the House of Representatives last spring, I would hope we would move toward support of this particular amendment.

I reserve the balance of my time.

Mr. MATHIAS addressed the Chair.

The PRESIDING OFFICER (Mr. STEVENS). The Senator from Maryland.

Mr. MATHIAS. Mr. President, I feel very deeply and personally about the subject of this amendment. We are this week observing the anniversary of the dropping of the bombs on Hiroshima and Nagasaki. A few weeks after V-J Day I visted Hiroshima and Nagasaki and I saw what a nuclear bomb could do to a city. I was there. I saw, I think, perhaps one of the most moving things as I walked down the street, a little tricycle, in the middle of the street, where obviously some child had been bicycling, tricycling down the street at the moment of impact. And it was a twisted wreckage of the tricycle there, but the child was not.

I could tell other stories of things I saw that day. But the point is that we have to put an end to the scourge of nuclear war. So I consider it an honor to join with Senator KENNEDY once again in offering this amendment, urging the President to take meaningful steps toward ending nuclear testing.

Senator KENNEDY has already said his amendment, which is now pending, is identical to the amendment that the Senate adopted to the defense authorization bill 2 years ago by an overwhelming vote of 77 to 22. Seventy-seven Members of this Senate thought this amendment was a good idea 2 years ago. It is still a good idea. I hope it still has the support of 77 Members of the Senate.

It calls upon the President to submit the Threshold Test Ban in the peaceful nuclear explosions treaties for ratification and to resume comprehensive test ban negotiations.

I might note that in the other body this past February there was an identical measure which passed by a bipartisan vote of 268 to 148.

So we are talking about a measure which has historically been supported in this Chamber, and supported in the other body which is right.

One of the objections that has been raised is that a test ban is unfair, but it is our belief and I think the belief of those who are far more expert than I that what needs to be done is to work out an acceptable onsite verification arrangement. There is also an objection that a test ban would reduce our stockpile reliability. But that ignores the fact that only a very small portion of the tests conducted for the purpose of testing reliability and nonexplosive means are available in those cases.

There is one argument which is raised, I think correctly, that a test ban could prevent the proliferation of nuclear weapons. That is not an undesirable end in itself.

So on the basis of the record that has already been established in the Senate, on the basis of the need to do something about the continued expansion and proliferation of nuclear weapons, I urge the Senate to adopt our amendment.

I yield 5 minutes to the distinguished Senator from Rhode Island.

Mr. PELL. Mr. President, I very much hope that the Senate will give a strong, clear endorsement of the amendment being offered by the Senators from Massachusetts and Maryland [Mr. KENNEDY and Mr. MATHIAS].

Earlier this year, the House of Representatives gave an overwhelming endorsement to comparable legislation, as did the Senate in 1974. It is time to put the whole Congress on record in support of ratification of the 1974 Threshold Test Ban Treaty and the 1976 Peaceful Nuclear Explosions Treaty, as well as resumption of negotiations on a comprehensive test ban.

Late last year, the Senator from Missouri [Mr. DANFORTH] and I introduced a new test ban resolution, Senate Joint Resolution 252, which endorsed the actions called for in this amendment, but which also introduced in legislation the concept of moving toward a total ban through a series of significant, intermediate steps.

Specifically, the Pell-Danforth resolution urges the President, at the earliest possible date, also to:

Call upon the Soviet Union to join in a further agreement reducing the permitted yields of explosions, as specified in the Threshold Test Ban Treaty and the Peaceful Nuclear Explosions Treaty, to the lowest possible verifiable levels which advances in seismic detection and other verification capabilities will allow; and

Seek Soviet agreement to facilitate negotiations by declaring at the earliest practicable date a mutual moratorium of finite duration on nuclear explosions.

Mr. President, in May and June, at my request, the Committee on Foreign Relations held three hearings on test ban issues. Those hearings reinforced my view, first, that there is no solid reason why we cannot proceed toward a complete ban, and, second, that intermediate steps may well be necessary to pave the way and to demonstrate to skeptics that we can move toward and achieve a test ban without in any way endangering our national security.

Accordingly, I fully intend to continue seeking steps which will move us toward a total ban. As ranking democratic member of the Committee on Foreign Relations, I expect to press

for steps which will gain strong bipartisan support and lead to significant progress. At this point, however, I believe a sound, intelligent course is for the Senate to reiterate its support for the concepts set forth in the amendment now under consideration.

I regret very much that the administration, to date, remains opposed to attainment of a comprehensive ban. At the same time, I am encouraged that administration officials have met with the Soviets in Geneva and will meet again soon with them in Moscow. I trust and hope that the two sides can find ways around the impasse over verification, which has stymied test ban progress during both terms of this administration. If we can reach mutual agreement on some significant moves during this administration, I believe the way will be open for truly significant steps. In any event, progress soon would reduce the terrible possibility that the sides would be so foolish and wrongheaded as to take steps which could destroy chances for real progress in the next few years.

Mr. President, it is clear that steadily improved controls on nuclear testing, culminating in a ban on all nuclear explosions, offer many critically important benefits:

Over time, confidence in the reliability of our warheads would erode, although there is no reason whatsoever that actual reliability should not remain high for some time. There is no doubt, however, that the reliance we and the Soviets place upon nuclear weapons would decline over time. That diminishing reliance would be to everyone's benefit.

Modernization of nuclear warheads in the arsenals of both sides would be curbed. This could well prevent the Soviets from developing new, smaller warheads with high weight-to-yield ratios to be proliferated on their missile forces. Early controls could also impede the development of new technologies, such as x-ray lasers driven by nuclear explosions, as well as other unwelcome, unneeded additions to the nuclear Pandora's box.

Pressure on the French and Chinese to halt their testing programs would be increased, as would the incentives for other nations not to start nuclear testing programs.

Finally, the resolve of the 127 nations which have foresworn nuclear weapons would be reinforced. Indeed, a nuclear test ban to which all nations would be welcome to become party, could give new and vitally needed vigor to efforts to stop the further spread of nuclear weapons.

Mr. President, I believe the case for early progress toward a comprehensive test ban is compelling. The case against such steps is simply not compelling. Unfortunately, the history of the test ban issue demonstrates once again that it is often akin to the labors of Hercules to push a good idea through various obstacles to success and substantially easier to thwart the good ideas of others.

We must recall that the idea of a test ban has stood the test of time. Beginning with the Eisenhower administration, every American administration until and except for this one has supported achievement of a ban. The objective has been set forth in treaties to which we are party.

Against this background, I find it simply outrageous that we have allowed the Soviets to appear to have the high road on a number of arms control issues, including test ban initiatives. Rather than spending our time thinking up reasons to justify claims that the Soviets are not serious, we should have been putting them to the test. I hope that recent developments indicate that we are smart enough to put them to the test now. We should make our adversaries put up or shut up. We should be doing our utmost to get their agreement to strong, verifiable arms contol agreements.

The amendment now under consideration would put the Congress on record on an issue central to arms control. If the advice contained in it were accepted and pursued by the administration, it would provide real proof that we are at last getting arms control back on track. I urge adoption of the amendment.

Thank you, Mr. President.

□ 2110

Mr. GOLDWATER addressed the Chair.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. GOLDWATER. Mr. President, I rise in opposition to the amendment by my colleagues from Maryland and Massachusetts on nuclear testing. On April 29, 1986, the Committee on Armed Services conducted a hearing on the military implications of nuclear testing limitations. The committee received testimony from administration officials and public witnesses on this important subject.

In these hearings, we discussed the implications of various proposals to limit the U.S. Underground Nuclear Test Program. These hearings demonstrated that constraints on our Nuclear Test Program like those contained in the pending amendment would have profound implications for U.S. national security.

In May, the Foreign Relations Committee conducted a separate hearing on this issue which was chaired by my colleague from Washington, Senator EVANS. I would like to commend the chairman and ranking minority member of that committee, Senators LUGAR and PELL, for their leadership in scheduling this hearing. Proposals to limit nuclear testing would have significant ramifications for U.S. foreign and arms control policies as well.

Adm. William J. Crowe, Jr., the Chairman of the Joint Chiefs of Staff, testified at the Foreign Relations Committee's hearing. As this Nation's senior military adviser, his views about the need for continued nuclear testing carry extraordinary weight. Admiral Crowe explicitly linked limitations on nuclear testing to the achievement of effective verification provisions. He stated that:

> Moscow continues to maintain that agreement on methods of verification and compliance will not be difficult if we ignore problems associated with the Threshold Test Ban Treaty and move on to a more comprehensive moratorium on nuclear testing, a maneuver that would completely ignore effective verification concerns in a regime where these factors are even more critical and demanding.

Mr. President, U.S. verification concerns must be addressed before we can proceed with ratification of the Threshold Test Ban Treaty. Likely Soviet violations of the treaty's 150-kiloton yield limit and violations of other important arms control agreements make effective verification and enforcement measures essential.

I would like to commend the President for the initiatives he has taken to encourage the Soviet Union to join us in resolving these concerns. The President's policy on nuclear testing limitations has begun to bear fruit. After rejecting several Presidential offers to exchange technical delegations, the Soviets recently agreed to such a meeting. During the week of July 28, 1986, United States and Soviet delegations met in Geneva to discuss nuclear testing issues. It is my understanding that these discussions went well, and that further meetings are planned. I hope these discussions will lead to Soviet agreement to improvements in verification provisions so that we may proceed with ratification of the TTBT and PNET agreements.

In this regard, it is important that any action taken by the Congress on this important subject be fully supportive of the President's efforts. In my considered judgment, adoption of the amendment before us would undermine U.S. efforts in this area. If we recommend ratification of these agreements before our verification concerns are resolved, little incentive would remain for the Soviets to be forthcoming in addressing our concerns if any.

In his testimony, Admiral Crowe relates nuclear testing limitations to U.S. arms control policies. He points out that due to asymmetries and potential instabilities in the evolving military balance between the United States and the Soviet Union, a comprehensive ban on nuclear testing should only take place following a radical reduction in strategic nuclear weapons. In his own words:

Overall, I believe we stand a better chance of achieving near-term progress in nuclear disarmament by approaching weapons reductions directly rather than obliquely through a comprehensive test ban.

Mr. President, I commend to my colleagues the full text of Admiral Crowe's statement before the Foreign Relations Committee on May 8, 1986, and request that it be included in the RECORD at this time.

There being no objection, the statement was ordered to be printed in the RECORD, as follow:

STATEMENT OF ADM. WILLIAM J. CROWE, Jr.

Mr. Chairman and members of the Committee, I appreciate this opportunity to contribute to your deliberations on various proposals to ban the testing of nuclear weapons.

You have asked me to address the issue of nuclear testing broadly and comprehensively, with emphasis on:

The relationship between nuclear testing and defense policy;

Linkages between testing and deterrence, the prime mission of our nuclear forces;

The military impact of nuclear arms reductions and associated proposals for a comprehensive test ban;

Safety, security, reliability, and effectiveness considerations embedded in the technical aspects of nuclear testing; and

Issues surrounding compliance with and verification of existing limits on nuclear testing.

NUCLEAR DETERRENCE

To begin, I share the view of many on this Committee that the world would be better off without nuclear weapons. But until that occurs, some of us have to mind the store, making sure that we have a nuclear deterrent as reliable and as credible as we can make it, with minimum risk to our national security. As Secretary Weinberger stated in his Fiscal Year 1987 report to the Congress:

"We seek to prevent war by persuading potential adversaries that the cost of attacking us will exceed any gain they could hope to achieve. This is the core of our defense strategy today, as it has been for most of the postwar period."

I am not sure that the Soviet military establishment looks at deterrence in exactly the same context. I do know that we and they approach the strategic balance in far different ways.

For their part, the Soviet Union takes a very robust and multifaceted approach toward this balance:

An unusually large mix of nuclear offensive forces: ten types of ICBMs, three classes of ballistic missile submarines, six types of SLBMs, six types of nuclear-capable bombers, five cruise missile variants, two types of long-range intermediate-range missiles, and a host of theater nuclear-capable weapons positioned to strike across the Warsaw Pact front with NATO;

An air defense system with extraordinary radar coverage and interceptor density around the nation's periphery;

The world's only operational ABM system featuring interceptor missiles with both conventional and nuclear warheads;

An antisatellite system operational for more than two decades, including missiles with a conventional warhead designed to blast satellites out of the sky;

A shield of earth, rock, concrete, and steel around many of their nuclear forces, coupled with a concurrent program hardening command, control, and communications facilities and equipment.

A heavy emphasis on damage limitation through civil defenses.

Thus, while the Soviet Union has pursued a comprehensive nuclear testing program over time, that program is only one component of a military strategy, forged around a massive array of offensive and defensive forces. These forces are composed of conventional and nuclear arms which support a doctrine concerned with the essence, purpose, and character of a possible future war and the preparation of the country and its armed forces for conducting such a war.

For our part, we have never tried to emulate the Soviet "fortress" mentality. Nor do we replace our strategic offensive forces at the same pace as one sees in the Soviet Union.

Instead, we have historically let our deterrent rely heavily on the incremental modernization of existing launch platforms with recurring emphasis on nuclear weapon technologies. To illustrate this point:

Over the years, we could have emphasized large ICBMs and megatonnages in warheads; instead, we leaned toward more accurate missiles and new warheads of lower yields.

We might have moved, more quickly, toward an entirely new design for our ballistic missile submarines, featuring larger tubes or more missiles per submarine, or a larger inventory of SSBNs; instead, we applied the multiple independently targetable reentry vehicle (MIRV) solution.

Similarly, in the mid 1970s, a decision not to replace the aging B-52s was accompanied by development of an entirely new weapon system centered around cruise missiles.

For better or worse, many of these decisions were made on the basis of fiscal constraints. Sometimes, they were accompanied by an illusion that nuclear disarmament was just around the corner. In any event, improvements to our systems placed proportionately greater emphasis on weapons rather than proliferation of basic platforms. This in turn led us to rely on a comprehensive nuclear testing program. We know it, and the Soviet know it. That is why they have pushed weapons and nuclear testing to the foreground in propaganda and in recent nuclear disarmament proposals.

Today, of course, we are forced to replace aging platforms with the new TRIDENT submarine, the B-1 bomber, and the PEACEKEEPER. We fully expect that these new platforms will be around for a long time—the mainstay of our nuclear deterrent force. In turn, we must retain the flexibility to make incremental improvements in weapon systems designs and validation of such designs through the nuclear testing program in order to ensure that these systems remain an effective and credible deterrent.

THE STRATEGIC BALANCE

Because the U.S. and Soviet Union approach the strategic balance in such different ways, we also find occasional confusion over where the two sides stand in that balance.

When one limits the discussion to offensive nuclear arms, it is possible to conclude that we lead the Soviets in some areas and they lead us in others, resulting in a situation perceived by some as rough nuclear parity.

But if we consider the totality of Soviet military forces and capabilities—offensive nuclear arms, together with other nuclear, conventional, chemical, and biological warfare components of their strategic posture—we find that the U.S. and its allies are considerably underpowered in comparison with the USSR.

To restore and stabilize the strategic balance—and in seeking to reduce our current reliance upon offensive nuclear arms—we are moving ahead with efforts to determine the technical feasibility of a strategic defense. In the interim, the need to maintain an effective Triad is clear. We must leave the door open for the incremental improvements necessary to ensure that effectiveness.

SOVIET NUCLEAR DISARMAMENT PROPOSALS

As you know—and might expect—nuclear testing figures prominantly in recent nuclear disarmament campaigns and proposals by the Soviet Union.

With respect to nuclear testing in general, the Soviet Union has been reaching for the high ground in political and social rhetoric, condemning in particular the U.S. program. In reality, however, the official Gorbachev proposals of mid-January do not contemplate a worldwide ban on nuclear testing until the late 1990s—more than a decade from now. In the interim, these proposals suggest only that the U.S. and Soviet Union join in a moratorium or delay in nuclear testing—an arrangement which can be broken and which, in fact, worked very much to our disadvantage in 1961 when the Soviets broke out of a three-year moratorium with the most intensive nuclear test program in history. Even their recent suspension of nuclear testing seems to have been a temporary expedient. They are now gearing up for a resumption of such tests.

NUCLEAR DISARMAMENT AND NATIONAL SECURITY

You also will find that the Soviet proposals of mid-January weave the whole issue of nuclear testing into a much broader package which, through the year 2000, would enhance their security and flexibility while undermining the foundations of U.S. and allied security.

We should not expect otherwise. But even if we are able to find a more equitable road to nuclear disarmament, that road will have its own asymmetries, uncertainties, and potential instabilities in the East-West military balance.

As the process evolves, both sides can be expected to place a premium on the survivability, reliability, and effectiveness of that last component of their nuclear capability. In this regard, General Secretary Gorbachev was correct when he noted, "the interrelationship between offensive and defensive arms is so obvious as to require no proof." What he did not mention are some very obvious efforts by the Soviet Union to strengthen such linkages within their own force structure, including but certainly not limited to an earth and space shield for many of their nuclear strike forces, national command structure, and communication assets. For deterrent purposes, it is absolutely essential that we be able to place such protected targets at risk. To do this we must be able to perfect our nuclear weapons, as necessary, and that in turn requires continuity within the nuclear testing program.

We also face major uncertainties surrounding the mix of launch vehicles apt to evolve from a nuclear disarmament process. We don't know whether the Soviets will emphasize mobile or hardened ICBMs, more dispersed and sheltered bombers, or ballistic missile submarines, some of which may be

berthed in coastal tunnels. In any event, uncertainties surrounding the evolving mix and location of Soviet offensive forces underscore the importance of remaining flexible in weapon system design and validation of such designs through testing.

Lastly, the whole process of eliminating nuclear weapons on a worldwide basis is fraught with extraordinary problems of compliance and verification. We do not know, in the first instance, whether nuclear disarmament is an achievable proposition by the year 2000. Further, we have no way of knowing whether a nuclear disarmament treaty, even one pursued diligently by the United States and the Soviet Union, will capture the last weapon on earth. Thus, we will have to maintain a deterrent to nuclear attack right down to the last moment and, from a U.S. and allied security perspective, we want that deterrent to be as effective and credible as possible. Nuclear testing is required to guarantee this.

To put all of this in perspective:

A comprehensive ban on nuclear testing, now or later, will contribute absolutely nothing to nuclear disarmament. It will not eliminate a single nuclear weapon.

Conversely, continuation of a comprehensive nuclear testing program can assure that we go down the road of nuclear disarmament with minimum degradation in the safety, security, survivability, reliability, and flexibility of our nuclear deterrent and, in turn, minimum risk to our national security and that of our allies.

TECHNICAL REQUIREMENTS

Thus far, I have focused upon the strategic and military requirements for nuclear testing. Let me now turn to the technical side.

In general, the design and development of a nuclear weapon represents a great extension beyond the usual engineering experience of any technology on which we depend:

Temperatures of 100 million degrees or hotter than the surface of the sun;

Pressures higher than in stars;

Operations measured in millionths of a second; and

Internal velocities of 100 kilometers per second.

*Safety and security*

These characteristics demand, first and foremost, the highest standards in safety and security. We can never rest on our oars. Similarly, we must ensure that all of the complex mechanisms of achieving safety and security do not, in some unexpected fashion, degrade the reliability of that weapon as part of our strategic nuclear deterrent. We can satisfy ourselves, on that score, only by maintaining a nuclear testing program.

A strong emphasis on safety and security also reinforces our concerns about nuclear arms control. We go to great lengths to minimize the possibility of unauthorized access or tampering, radiation exposure to troops engaged in weapon maintenance, and hazards associated with an accident during storage or transportation.

Further, the basic precept that American-built products should be put through a program of rigorous testing is deeply entrenched in our industrial culture and in laws of the land. We insist that a vast range of commercial goods possess a requisite degree of safety and reliability, and we ensure this through testing at the factory, by the National Bureau of Standards, or some other independent agency. Similarly, the Department of Defense is under constant pressure to assure that conventional weapon systems—tanks, fighting vehicles, aircraft, missiles, and so on—perform as designed and expected on the battlefield. In this context, I frankly do not understand why Congress would want to suspend testing on one of the most critical and sophisticated elements of our nuclear deterrent—namely, the warhead.

*Weapons reliability and effectiveness*

With respect to weapons reliability and effectiveness, we are dependent upon the testing program in five distinct ways:

It gives us confidence in our existing stockpile of nuclear weapons. Our hope is that we will never have to use such weapons, but like other systems not used over many years, we must be sure that they will perform as designed—and that our potential adversaries are aware of this fact. We require this same confidence of our conventional war reserves (ammunition, missiles, etc.). It is inconceivable that we would place weapons, constructed of the most exotic materials known to man and incorporating the most advanced physical principles, on the shelf for an indeterminate period of time without ascertaining the indiscriminate effects of aging.

It provides information essential to the effective employment of nuclear weapons—confidence that the right weapon is applied to the right target. The lethality of nuclear weapons, theirs and ours, against hardened targets is one of our major concerns. So too is the expected survival and performance of such weapons in a nuclear environment, featuring the synergistic effects of blast, high intensity radiation and electromagnetic pulse (EMP).

It enables us to determine critical nuclear effects on such non-nuclear systems as surveillance, command, control, and communications systems. For example, it is common knowledge that radiation can be a serious problem. We must continue to explore the nature of the entire spectrum of nuclear effects problems and develop fixes to deal with them.

It helps us to verify that a weapon modified for reliability, security or safety reasons, or a weapon tailor-made for a new delivery system, such as cruise missiles, the Peacekeeper, or the Trident D-5, will emerge as a reliable and effective component of our nuclear deterrent forces. At one time, for example, we had to recall all of the POLARIS warheads because of reliability problems which degraded inventory effectiveness by as much as 75 percent. Only nuclear testing allowed us to verify that Polaris modifications has solved the problem.

It helps us design entirely new weapons of smaller size and weight for a given yield. For years, the U.S. has led the world in this aspect of nuclear technology with considerable savings in the size and cost of delivery systems. But each new delivery system and associated weapon requires thorough testing before it can be counted as part of our strategic or tactical nuclear deterrent.

Overall, nuclear testing is a bargain in the maintenance and modernization of our nuclear forces. But the lack of testing can make this process more costly over the long haul. To illustrate this point, if we had to assess weapon reliability and survivability upon paper calculations, unsupported by empirical tests, we would encounter a number of unacceptable uncertainties and unknowns, the nature and extent of which we would be unable to determine. One could conceive of these unknowns translating into compensatory measures that could result in markedly different types of weapons or, possibly, a requirement for more weapons per target than we plan today. That's an expensive proposition no matter how you look at it.

In all of this, I would emphasize that we do not detonate a weapon underground simply for stockpile reliability, weapons development, or physics studies of new concepts. The Department of Energy and the Defense Nuclear Agency have a broad-based schedule of scientific and technical observations, supported by an extensive array of measuring devices, to study effects on the various non-nuclear components of our strategic deterrent forces as well as those incorporated in command, control, communications, and intelligence systems. While I do not want to go into details, it is not uncommon for these tests to produce technical surprises—something not predicted in either simulations or computer-based analyses.

I believe that the Soviet military has a similar range of technical requirements. Certainly, this was suggested by General Secretary Gorbachev's statement last March that "during seven months of nontesting the Soviets had paid a price militarily" and their subsequent decision to resume testing. Thus, on purely military grounds, I suspect both sides agree that nuclear testing is essential. In turn, this tends to push the whole issue of testing toward compliance with existing agreements.

VERIFICATION AND COMPLIANCE

As this Committee is aware, the U.S. Government has been trying for several years to get its arms around the verification and compliance problem. So far, objective results are not very assuring.

Most government experts agree that seismic techniques, used to estimate the yield of a Soviet nuclear test under the Threshold Test Ban Treaty, are inadequate to ensure effective verification and compliance.

Others have testified that, even with seismic sensors, it is possible to circumvent this technology by testing in cavities, thereby decoupling the energy of an explosion from the surrounding medium; or testing in outer space, in remote areas, or in the atmosphere above parts of the world, areas where attributing the test to a particular country would be extremely difficult.

In the interest of exploring the technical side of verification, the President has repeatedly sought an honest exchange of views with the Soviets. They have been invited, for example, to measure the yield of U.S. nuclear test using any instrumentation devices they deem necessary. But they have refused to participate in this relatively straight-forward approach to the problem.

Additionally, the President offered to demonstrate in the third week of April 1986, a new direct yield measurement technique, known as Corrtex, which U.S. scientists believe will enable both the U.S. and USSR to improve verification and ensure compliance with the current Threshold Test Ban Treaty.

The Corrtex method has a number of features important to understand. It does not replace remote sensing by seismic detectors; rather it would eliminate some of the uncertainties associated with remote sensing by on-site measurement of specific nuclear tests. The U.S. Government does not intend that such measuring be accomplished by a third party. Americans would monitor Soviet tests, and citizens of the Soviet Union would monitor our tests. The Soviet

Government turned aside the President's latest proposal.

Instead, Moscow continues to maintain that agreement on methods of verification and compliance will not be difficult if we ignore problems associated with the Threshold Test Ban Treaty and move on to a more comprehensive moratorium on nuclear a maneuver that would completely ignore effective verification concerns in a regime where these factors are even more critical and demanding. I have trouble with their "good faith" approach, particularly when other aspects of their nuclear disarmament package envision a continuing military struggle for world power and influence. I doubt the Soviet Union will ever be able to square this circle. Thus, we must assure that verification and compliance mechanisms, surrounding any nuclear testing arrangement, to as direct, straight-forward, and objective as possible.

SUMMARY

To sum it up:

I believe that the U.S. way of managing its nuclear deterrent and the strategic balance is far less burdensome on our society and our economy than the Soviet way. But you must recognize that our approach to nuclear deterrence puts a premium on high technology rather than brute force. So too does our effort to develop a strategic defense, unaccompanied by a government and a people digging in for survival.

In defense planning, we are drawn toward nuclear testing by one simple fact: we expect to achieve effective deterrence from a relatively small mix of strategic nuclear forces in service over a relative long period of time. To maintain that effectiveness and credibility over time, we must have a weapons modernization and maintenance program, supported by rigorous underground testing—the only environment left to us. We cannot assume, even in view of the Soviet proposals, that nuclear disarmament is just around the corner.

For something as exotic and potentially lethal as a nuclear weapon, such testing also is embedded in the highest standards of safety, security, and survivability, as well as reliability. We should regard with the utmost concern any suggestion that we could allow our nuclear weapons stockpile to "gracefully" degrade over time.

Further, virtually everything about the nuclear disarmament process—asymmetries, uncertainties, and potential instabilities in the evolving military balance—suggests that a comprehensive ban on nuclear testing should only occur toward the end, rather than at the beginning of this process. Certainly, this is the case for the U.S. and its allies, if not for the Soviet Union.

Overall, I believe we stand a better chance of achieving nearterm progress in nuclear disarmament by approaching weapons reductions directly rather than obliquely through a comprehensive test ban. The U.S. has formally proposed such reductions in both theater systems and strategic systems. The JCS fully support these proposals and would welcome a constructive response by the Soviets to them.

Mr. GOLDWATER. In conclusion, I again urge my colleagues to oppose the Kennedy/Mathias amendment.

Mr. LUGAR addressed the Chair.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. Mr. President, I rise in opposition to the Kennedy-Mathias amendment on nuclear testing. Nuclear testing is an issue in which various Senators have been interested throughout this Congress. I believe this interest springs from a genuine desire to see if there is some way to speed the arms control process along toward nuclear disarmament. The Committee on Foreign Relations has been actively involved in exploring the possibilities which some limits on nuclear testing might offer. This included a set of comprehensive hearings on the issue.

On May 8, and again on June 19 and 26 our committee heard from distinguished representatives of the administration, scientists, former diplomats and former Government officials. Adm. William Crowe, Chairman of the Joint Chiefs of Staff, our Nation's highest military officer, told us how important nuclear testing is for our national security. We also heard the testimony of Richard Perle, Allen Holmes and Robert Barker from the Departments of Defense, State and the Arms Control and Disarmament Agency. On the 19th and 26th of June we proceeded with testimony covering a wide range of experiences, political views and expertise. We heard from Ambassador Paul Warnke, former Director of ACDA. Dr. Carson Mark, a retired physicist from the Los Alamos National Laboratory shared his insights with us. Dr. Mark has been critical of the way we design our weapons, and advocates some type of test ban. We heard from Dr. Donald Kerr, former director of Los Alamos, and from Dr. Richard Wagner, former Assistant Secretary of Defense for Atomic Energy. I will not go on to name each witness, but I am sure my colleagues will agree that these hearings covered the full range of views and expertise available.

I regret to say that our hearings did not show that a test ban, or some other proposed restrictions on testing, would be viable paths toward nuclear disarmament. We rely on our nuclear weapons to maintain peace through deterrence. Therefore, we must maintain a reliable, safe and secure force which credibly meets the evolving challenges.

Dr. Robert Barker, Deputy Assistant Director of the Arms Control and Disarmament Agency, effectively outlined the purposes which our current, limited testing program serves. Let me summarize them briefly.

Reliability tests check to see that new weapons will perform as designed, or that older weapons still work as expected.

It is also important to test the effects of a nuclear environment on our own systems. This does not mean just weapons. To maintain a credible deterrence, we must believe, and the Soviets must believe, that our command, control and communications systems will work, even when subjected to radiation and electromagnetic impulse.

Then, we test to modernize our forces. We do this to proceed with programs such as the Trident D-5 missile and Midgetman. During our hearings I was struck by the fact that almost all witnesses agreed that a test ban would be tantamount to a qualitative freeze. No significant nuclear weapons development could take place under a ban.

Finally, Dr. Barker pointed out, testing has a role in improving the safety and security of our nuclear forces.

Mr. President, Dr. Barker's testimony is an excellent primer on nuclear testing issues and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

TESTIMONY BEFORE THE SENATE FOREIGN RELATIONS COMMITTEE

(By Dr. Robert B. Barker)

Good morning, I am happy to appear before this Committee for the purpose of providing an overview of the technical foundations for the Administration's views on nuclear test limitation treaties.

Careful study led us, over four years ago, to conclude that the Threshold Test Ban Treaty, in its current form, is not effectively before verification improvements can be negotiated, ratification of this tready before with the Soviet Union is not in the national security interest of the United States. The United States must stand by its standard of effective verification with respect to the Threshold Test Ban Treaty; anything less would undermine our ability to demand effective verification in this and other treaty areas, as well as being a disservice to the objectives of the TTBT.

The President has stated to Soviet General Secretary Gorbachev that he would be prepared to move forward on ratification of both the Threshold Test Ban Treaty and the Peaceful Nuclear Explosions Treaty as soon as agreement is reached on the use of an effective verification system. He has described to General Secretary Gorbachev a technical system, using a technique known as CORRTEX, which we believe will determine yield with an acceptable level of uncertainty.

Thorough evaluation has also led the Administration to reaffirm that a comprehensive test ban remains a long-term objective of the United States; an objective which we will seek to pursue within the context of broad, deep and verifiable arms reductions, substantially improve verification capabilities, a greater balance in conventional forces and at a time when a nuclear deterrent is no longer as essential an element as currently for international security and stability. There is much to be accomplished with respect to each of these objectives; it is not yet time to undertake negotiation of a Comprehensive Test Ban Treaty.

A nuclear-testing moratorium, such as that which was proposed by the Soviets, is an invitation to a comprehensive test ban with no semblance of verification. The lack of verification alone is sufficient basis for rejection of a moratorium. Moratoria are never acceptable substitutes for negotiated, effectively verifiable arms control agreements. Further, the reasons for rejecting a

moratorium are identical to those for rejecting the negotiation of a comprehensive test ban at this time.

President Kennedy's 1962 statement on a nuclear testing moratorium, on the heels of the bitter experience with the nuclear test moratorium of 1958–61, details his extensive appreciation of the threat which is posed by such a moratorium.

"We know enough about broken negotiations, secret preparations, and the advantages gained from a long test series never to offer again an uninspected moratorium. Some may urge us to try it again, keeping our preparations to test in a constant state of readiness. But in actual practice, particularly in a society of free choice, we cannot keep top-flight scientists concentrating on the preparation of an experiment which may or may not take place on an uncertain date in the undefined future. Nor can large technical laboratories be kept fully alert on a standby basis waiting for some other nation to break an agreement. This is not merely difficult or inconvenient—we have explored this alternative thoroughly, and found it impossible of execution."

With this country's experience with a nuclear-testing moratorium it is almost incredible that any, even the current Soviet leadership, could believe we would find a moratorium to be a serious alternative to real arms control.

Other variations on the nuclear test limitation theme which are sometimes heard include the possibility of quotas or nuclear test yield thresholds lower than the current 150 kiloton limit. Either of these concepts, if implemented, would adversely limit our ability to maintain a credible and effective nuclear deterrent. From a verification perspective, a quota presents all the problems associated with a comprehensive test ban; one cannot verify compliance with a quota unless one can detect and identify even the lowest yield nuclear test. Effective verification of a 150 kiloton threshold is not yet a reality; verification of a lower yield threshold will not be any easier.

In the remainder of my statement, I will go into some length in discussing the technical basis for the U.S. nuclear testing program, in order to make clear why nuclear testing is for the foreseeable future, critical to the maintenance of a credible and effective deterrent. I will also address the exent of U.S. efforts to establish a technically sound basis for effective verification of any future comprehensive test ban and describe the technical foundations for an effectively verifiable Threshold Test Ban Treaty.

NUCLEAR TESTING

In a recent letter to Senator Dole, the President stated:

"Any limitations on nuclear testing must be compatible with our security interests and must be effectively verifiable. Because of the continuing threat that we face now and for the foreseeable future, the security of the United States, its friends and its Allies must rely upon a credible and effective nuclear deterrent. A limited level of testing assures that our weapons are safe, effective, reliable and survivable and assures our capability to respond to the continued Soviet nuclear arms buildup. Such testing, which is conducted underground, is permitted under the existing agreements on nuclear test limitations, all of which the United States fully complies with—the TTBT, the PNET, and the Limited Test Ban Treaty (LTBT)."

The nuclear tests of the United States fall into four general categories: stockpile reliability/confidence tests; weapons effects tests; development tests; and tests designed to further understanding of the fundamental physical processes which occur in a nuclear explosion. Each category contributes to assuring that our deterrent is safe, effective, reliable, and survivable.

*Stockpile reliability/confidence tests*

Each year a small number of tests are directly conducted for stockpile reliability/confidence reasons. These tests can confirm that a recently produced nuclear weapon will perform properly or determine whether an older weapon is still performing as expected.

The use of the word "reliability", in conjunction with the need for nuclear testing, has confused many people. In every day usage, reliability is associated with a statement about probability—such as 99 out of 100 weapons will operate properly. Thus, apparently, many people assume that a concern about nuclear weapon reliability is a concern that today's possible reliability of 99 percent may degrade to 95 percent or 90 percent sometime in the future. This is not what concern for nuclear weapon reliability is about! What we must be concerned about is a fault in the design which dramatically reduces the expected yield or makes a nuclear weapon unsafe. Such faults could be accidently built into a weapon during the production process or could be a result of chemical changes that occur as weapons grow old.

Such problems are not imaginary nightmares; the actual cases are all too real. While much still remains classified about problems with the U.S. nuclear stockpile, a great deal is revealed in a 1983 paper produced for the Department of Energy, authored by Jack W. Rosengren, and entitled "Some Little-Publicized Difficulties with a Nuclear Freeze." The paper discusses a half-dozen significant stockpile problems which required nuclear testing for their identification and/or fixing. This paper revealed that one time 75 percent of one type of warhead designed for our Polaris submarines would have produced zero yield—no yield—if detonated. This is the kind of catastrophy that is the basis for our concern about nuclear weapon reliability, and, therefore, the reliability of our deterrent.

At the current time, a representative warhead, one of each new type produced, is tested to make sure that weapons from the production line will meet their design requirements. Every kind of military materiel, from boots to ammunition to tanks, planes, and submarines must be similarly "proof-tested", to ensure that the government is getting what it paid for—only in the case of nuclear weapons do some suggest such testing is unnecessary. While these critics of nuclear testing may believe that the computer calculations of nuclear weapon scientists are sufficient for a reliable nuclear deterrent, the Directors of the nation's nuclear weapon design laboratories are firmly on record stating that they cannot—in the absence of testing—retain confidence in the performance of weapons that their laboratories have designed.

In addition to tests of newly produced weapons, the category of stockpile reliability tests also includes the rare tests whose purpose it is to confirm that an older weapon from the U.S. inventory will still perform its function or to confirm a "fix" for a serious stockpile problem. Representative samples of older nuclear weapons are disassembled on a routine basis. Those parts of a weapon which can be fully tested in the laboratory—such as the electronic components—are so tested. The components which would produce nuclear yield are carefully examined by scientists and engineers from the nuclear weapons laboratory which was responsible for the initial design. Nuclear weapons are not immune from corrosion and decay. These scientists and engineers are asked to evaluate whether the changes wrought by time will adversely affect performance. Routinely their answer is that performance will not be compromised by the changes that have occurred.

But should changes be observed from which it is concluded that performance may be adversely affected, then a nuclear test will be devoted to determining the true situation. If there is a problem, a solution will be designed, tested in a nuclear test, and the entire inventory of that weapon will be recalled to install the design change.

What is unique about this process of stockpile evaluation is not that a test may be required—all military materiel is routinely tested to ensure that age has not unacceptably degraded its performance. What is unique is that testing for the effects of age is so rare. A nuclear weapon destroys itself in a test and each weapon and test are expensive items. Therefore, rather than conduct routine tests of the aging nuclear weapon, we depend upon the judgment of a very few nuclear weapon scientists and engineers to tell us whether everything is in order. Why should we trust the judgment of these people? Because, these same scientists and engineers are involved in the ongoing nuclear weapon design and testing program and are constantly having their judgments about design validated repeatedly by the results of undeground nuclear tests.

Thus we see that while we categorize only a very few nuclear tests as stockpile confidence or reliability tests, in reality every nuclear test is a reliability test—because every test contributes to the competence of those upon whom we ultimately depend for assurance that our deterrent is reliable.

*Weapons effects tests*

The second category of nuclear tests is weapons effects tests. Again this is a small number of tests in any given year but it is these tests which establish another critical aspect of a deterrent in which we can have confidence. For our deterrent to be real we must believe, and so must the Soviet Union, that we will achieve sufficient warning of an attack to maximize the survivability of our deterrent and to ensure a response unacceptable to the Soviet Union. This requires that we design our space-based advanced warning systems and our space-based communication systems to be sufficiently hardened against the effects of nuclear detonations so that they cannot be too easily disabled. We also protect our military equipment against nuclear radiations and electromagnetic impulse—again so that the Soviet Union cannot calculate that our forces would be easily destroyed in a nuclear attack.

We convince ourselves that we successfully achieved our hardness goals for our warning, communication, and all other relevant military materiel by exposing samples of these equipments to nuclear radiations in specially designed weapons "effects" tests managed by the Department of Defense's Defense Nuclear Agency. While small in number these tests are vital to ensuring the effectiveness of the U.S. deterrent.

*Development tests*

Development tests comprise a major part of the nuclear tests conducted by the

United States each year. Some of these tests contribute to the engineering of a specific new nuclear weapon for a specific new weapon system; other tests investigate concepts which might have utility in some future U.S. weapon system or which might be employed by the Soviet Union and, therefore, need to be protected against. Typical concepts under investigation include improved nuclear weapon safety and security features as well as concepts important to the evaluation of the Strategic Defense Initiative, such as the x-ray laser.

Modernization of U.S. nuclear weapons delivery systems has been an ongoing process. Weapons systems based on newer technology replace those that have lost effectiveness because of obsolescence; for example, air-launched cruise missile carriers and B-1 bombers are to replace penetrating B-52s. Weapons systems whose survivability may be threatened are replaced with less vulnerable systems; thus the Trident missile system is replacing the Polaris and Poseidon systems.

In every case to date, the replacement system has required a nuclear weapon different from the weapon in the system that was replaced. In some cases, physical dimensions alone preclude use of the older weapon. In other cases, existing warheads cannot survive the heat, acceleration, vibration and other environmental extremes that a new nuclear weapon will meet in the stockpile or during delivery. Even the yield requirement of the new system may be different from that of the system it replaces. As J. Carson Mark, retired head of the Theoretical Division of Los Alamos, has noted the *Bulletin of the Atomic Scientists*:

"The nuclear explosive and its carrier constitute a "weapon system" of which neither part is of much use without the other . . . The weapons, tailored for . . . [its] particular delivery mode, cannot easily be used in any other way."

The Navy designed its C-4 missile to have a longer flight range, thereby permitting the Poseidon and Trident submarines to operate in larger ocean areas. No existing Navy reentry body could survive the harsh reentry environments associated with the greater missile range: a new reentry body with a new warhead made the C-4 system possible. The B-1 bomber will replace the B-52 in its role as a penetrating bomber. For the new bomber to fulfill its mission of deterrence, it must credibly be able to penetrate Soviet air defense, deliver its weapons and escape. Accordingly, bombs delivered by the B-1 must be able to withstand release at greater speed, survive a more stressing ground impact, and delay detonation while the aircraft flies out of range of the bomb's explosion. The criteria are very different from those for bombs designed for delivery by the B-52. The weapons labs have developed new nuclear designs to enable the B-1 to fulfill its mission.

In the area of tactical nuclear weapons, new development work has established the survivability of nuclear weapons in long-range artillery. The original nuclear artillery shells were designed to withstand the acceleration associated with the range of the 8-inch and 155-mm howitzers of the 1960's. In the following decades, U.S. and Soviet artillery doubled in range. Without new nuclear shells, capable of withstanding the acceleration associated with the longer ranges, U.S. nuclear artillery would be "outranged" and therefore vulnerable to destruction by conventional weapon fire.

While concern for survivability is the primary motivation for modernizing nuclear weapons, systems, there are other important reasons for doing so. The military effectiveness of established systems has declined as the hardness of intended targets has increased. To reestablish past destructive capability requires new nuclear weapons systems. Another motivation for modernization comes directly from developments in the area of nuclear weapons design. In the last decade the nuclear weapons laboratories have developed the technology to increase dramatically the safety and security of nuclear weapons.

*Improved safety and security*

In the laboratories' work on nuclear weapons safety, the concern is not that of an accidental nuclear explosion. As Mark has stated:

"The high explosives which have been mostly used in connection with nuclear weapons . . . can reliably withstand the jolts and impacts encountered in normal handling, even if they should be dropped from modest heights, but they might detonate on falling on to a hard surface from a plane, for example. The concern is not that a full-scale nuclear explosion would result, since that requires a thoroughly symmetric detonation of the explosive which could not be induced by impact at one point."

In fact, two aircraft accidents have caused the high explosives in nuclear weapons to detonate: in 1966 at Palomares, Spain, and in 1968 in Thule, Greenland. In both cases there was no nuclear chain reaction, but the explosions dispersed plutonium, requiring extensive cleanup operations to eliminate the hazard to health.

As a result of developments at the nuclear weapons laboratories, it is now possible to preclude accidents that disperse plutonium. There are some relatively insensitive high-explosive mixtures that can survive quite violent impacts. The laboratories are now in the process of incorporating such explosives in new weapons systems as they are modernized. Due to the number of different nuclear weapons designed in the U.S. stockpile, it will be many years before all the weapons with insensitive explosives are based on new designs that differ substantially from those using older explosives, nuclear testing must be conducted before the features are incorporated in the U.S. stockpile.

Security is another area where recent developments in design are leading to dramatic improvements. Again, as weapons systems are modernized, features are being included that make it impossible for unauthorized persons to make use of a nuclear weapon. These features are an intimate part of the nuclear design and require nuclear tests to ensure that only authorized use would result in the expected performance.

*Technical surprise*

One long-standing mission of the nuclear weapons laboratories is to understand all means by which a nuclear explosion might be of military use. In part, this represents a desire to understand all the ways in which the U.S. might employ such explosives to enhance its security. It also represents a desire to avoid surprise from the advantages others might obtain from nuclear weapons developments.

The evolution of nuclear weapons design is not a one-dimensional process; there is no unique path that a nuclear weapons state must follow from its first nuclear explosion to subsequent developments. One cannot be confident that findings by the United States match those of the Soviet Union. With the maturity of the U.S. nuclear program, new concepts are less frequent, but they do occur. Nuclear testing is critical to determining whether a new concept will work.

Verification that a concept is feasible does not imply that it will be incorporated into weapons in the U.S. stockpile—far from it. But establishment of feasibility does permit the evaluation of the threat to this country should the Soviet Union have already incorporated it into its nuclear arsenal.

*Physics tests*

The fourth category of nuclear testing includes those tests which are devoted to improving the basic understanding of nuclear weapon performance. Despite the lengthy history of nuclear weapons testing in the United States, weapons scientists do not fully understand some fundamental phenomena that bear on the performance of nuclear explosives. The nuclear weapons laboratories possess the country's largest computer resources and a very impressive cadre of theoretical physicists. Yet, sometimes substantial discrepancies exist between calculation and experimental results; the mathematical models are just not yet adequate to predict reality. Economic considerations alone motivate the nuclear weapons laboratories to maximize the role of calculations in order to husband the scarce and expensive resource of nuclear tests. Thus, the objective of some nuclear tests is to improve calculations by exploring fundamental phenomena that are not yet understood, and which may be the cause of the discrepancies between calculation and experiment.

A further very real consideration since 1958 has been the recognition that a comprehensive test ban may some day preclude testing, leaving the laboratories with calculation as the sole tool for meeting their obligation to maintain confidence in the U.S. nuclear weapons stockpile. We are not now at the point where we can maintain current confidence requirements with calculation alone. Even in the last few years we have been surprised at the results of nuclear tests of weapons in production and have had to modify designs as a result of such tests.

VERIFICATION

*Comprehensive Test Ban Treaty*

Effective verification is also a necessary condition for a Comprehensive Test Ban Treaty (CTBT). Today it does not exist. The U.S. has spent hundreds of millions of dollars on research to establish the basis for verifiable nuclear test limitations. This Administration is continuing that search. As part of that effort we have actively supported multilateral involvement in nuclear test ban verification studies at the 40-Nation Conference on Disarmament in Geneva.

A specific example of this research effort is U.S. support for the Norwegian Regional Seismic Array (NRSA) which uses a cluster of seismometers to detect and locate the sources of seismic disturbances—even those so weak that background noise would normally obscure them. Many of the features of NRSA would be expected to be incorporated into the in-country seismic stations which would be required as part of any future CTBT verification regime. The data from this seismic array is shared with the international community. It was dedicated in 1985 in a ceremony with international participation following its development and installation with funding provided by the Department of Energy and the Department of Defense's Advanced Research Project Agency.

The geophysical characteristics of the Norwegian site are such that the array is particularly sensitive. The research effort that will be required before such stations could be meaningfully applied to CTBT verification include: evaluation of the reliability of the instruments at the NRSA site; determination that sufficiently sensitive sites for in-country location of such arrays exist within the boundaries of potential signatory countries; and much better understanding of the transmission of weak seismic signals within the boundaries of signatory countries.

While only one example, NRSA demonstrates our commitment to establish a basis for effective verification should the other conditions established by the President for Comprehensive Test Ban negotiations be achieved.

*Threshold Test Ban Treaty*

There is almost universal acceptance in this country that true treaty verification cannot be based upon trust. Yet the TTBT, in the name of verification, offers only an exchange of data which, while appearing extensive, contains not a single meaningful element that can be independently validated by the United States. There is no ability for us to independently measure any of the important parameters upon which our estimates of Soviet yield are based.

Those who negotiated and signed the TTBT, with today's hindsight, were optimistic. They believed that our understanding of the science of seismology was good enough for us to determine Soviet nuclear weapon test yields to an accuracy sufficient to protect U.S. security. They also expected that the Soviets would comply with the treaty. Since 1976, when the Soviet Union claimed that it would abide by the provisions of the TTBT, two things have happened to change that earlier perspective. First, we have had to recognize that we cannot determine Soviet nuclear yields with the accuracy required for effective verification. Secondly, we have had to conclude that it is likely that the Soviets have violated their legal obligation with respect to the TTBT. As reported by the President in 1984 and twice in 1985, in the Congressionally mandated reports on Soviet noncompliance with arms control agreements, while ambiguities in the pattern of Soviet testing and verification uncertainties continue to exist, evidence available leads to the conclusion that Soviet nuclear testing activities for a number of tests constitute a likely violation of the 150 kiloton limit.

The TTBT cannot now be effectively verified. The Soviets are in likely violation of their legal obligation to limit test yields to 150 kilotons and below. Verification must be improved before the President could in good faith determine that this treaty is in the national security interest of our nation and before he could thus seek the advice and consent of the Senate to its ratification.

The Administration has not been passive on this issue. In 1983 and 1984 we sought on a number of occasions to engage the USSR in discussions on verification improvements for the TTBT and PNET. In addition, in his address to the United Nations General Assembly on September 24, 1984, President Reagan proposed an exchange of visits to allow Soviet experts to come to the U.S. nuclear test site and U.S. experts to go to a Soviet nuclear test site to measure directly the yields of nuclear weapons tests. We recognize that any improvements to verification of the TTBT must be mutually arrived at—must be negotiated. They cannot be dictated by the United States and imposed upon the Soviet Union. For this reason we have not approached the Soviets with a unilateral, non-negotiable demand; we have instead sought an honest exchange of technical views on how verification can be improved.

In March of this year, the President made clear that he is prepared to move forward on ratification of both the TTBT and PNET as soon as we and the Soviets can reach agreement on the use of an effective verification system. We have described to the Soviets a technique that we call CORRTEX (Continuous Reflectometry for Radius Versus Time Experiment), which can provide acceptable uncertainty in estimating the yield of high yield nuclear tests consistent with the 150 kt threshold. CORRTEX will measure yield without compromising other potentially sensitive information about the performance of the nuclear explosion.

CORRTEX is a hydrodynamic yield measurement technique that measures the propagation of the underground shock wave from an explosion. This technique uses a coaxial cable which is shorted out by the shock wave as it propagates from the center of the explosion. The coaxial cable is emplaced in a hole parallel to the device emplacement hole. Precise measurements are made of the length of the cable by timing the return of low energy electrical pulses sent down to, and reflected from, the cable end. When the nuclear device is detonated, a shock wave emanates through the ground, crushing and shortening the cable. The rate by which the cable length changes is recorded via measurements of the changing pulse transit times. This rate is a measure of the propagation rate of the explosive shock wave through the ground which is, in turn, a measure of the yield of the nuclear explosion.

CORRTEX has been shown to be accurate to within 30 percent of more direct, radiochemical yield measurements for tests of yield greater than 50 kilotons and in the geological media of the U.S. test site. This is based on over 100 tests with the sensing cable in the device emplacement hole and four tests with cables in a satellite hole. The accuracy of the technique is believed to be relatively independent of the geological medium, provided the satellite hole measurements are made in the "strong shock" region near the nuclear device explosion. At greater separation distances, the properties of the medium become much more important factors. A satellite hole separation distance of 14 meters (46 feet) is appropriate for a test near 150 kt.

The electronic device that provides the timing signals is a battery-powered suitcase-sized unit that may be remotely controlled. All equipment for power, recording, and data reduction can be contained in a small trailer.

The President invited the Soviets to send technical experts to our Nevada Test Site to observe CORRTEX measurements with the hope that this could begin the process of agreeing to its implementation as a basis for an effectively verifiable TTBT.

The test to which we invited the Soviets has already occurred—without the presence of a Soviet technical team. We hope that the Soviets will ultimately respond positively and observe similar measurements on a future U.S. nuclear test.

Today the Soviets may perceive a lack of unanimity—a lack of commitment—within the American government on the issue of TTBT verification. They can have no doubt about the Administration's position—effective verification must precede ratification. But thus far the Soviets have not heard Congressional endorsement and support for the Administration position on the strengthening of verification of measures; S.J. Res. 252, S. 2220, H.J. Res. 3 do not now call upon the Soviets to join us in seeking verification improvements to the TTBT.

Congressional support for the Administration's position and the President's most recent proposal for verification can only enhance the prospects for a positive Soviet responsive which would lead to ratification of the TTBT and PNET. Your support for our efforts to enhance verification would be most helpful and most welcome.

Mr. LUGAR. Although our hearings brought out some wide divergences, I was struck by how much our witnesses agreed on certain things. First, most agreed that a test ban would put an end to significant weapons development. Some, like Dr. Mark, thought this desirable, but the point is inescapable: a test ban would be a qualitative freeze on our nuclear forces. They would become less reliable and less able to meet evolving challenges. We should bear in mind that our nuclear deterrent must be modernized in response to Soviet nuclear and nonnuclear developments. It is Soviet air defenses which have made the B-52 obsolete, not Soviet ICBM's. But to proceed with the B-1 and the advanced technology bomber, we must proceed with our limited testing program.

The second area of convergence seemed to be that a true comprehensive test ban would be unverifiable. Thus Dr. Mark said, "I do not think we should ban something we cannot lay our hands on."

He recommends a threshold of 3 kilotons. The point here is that expert proponents of further test limitations are talking about a lower threshold, not an outright ban. I do not know if lowering the threshold is a good idea for arms control or national security. My distinguished colleague, Senator PELL, has advanced the concept in his resolution. Perhaps it is an idea worth looking at. I believe he has done us a service by bringing this idea to our attention. We should study it, but I doubt any of us knows enough to endorse it today. If we lower the threshold, as what level would we damage national security? If we stay about it, what arms control purpose would be served? If we go below it, is that not the qualitative freeze we must avoid?

Finally, all seemed to agree that ratification of the Threshold Test Ban and Peaceful Nuclear Explosions Treaties would be a good first step. Some placed more emphasis on verification than others. I agree with President Reagan that effective verification is essential.

The President has offered to negotiate, and he invited the Soviets to observe one of our tests in Nevada. They

were told they could use their own equipment or use our Corrtex hydrodynamic system. These offers were to no avail until a few weeks ago. Then the Soviets agreed to meet in Geneva on nuclear testing issues without preconditions. We listened to their views and they exhibited much interest in ours. They asked many questions about the Corrtex system, and said they might even have some suggestions on TTBT verification. The Soviets are finally paying attention to our verification concerns, and the Geneva meetings will resume on September 4. If we succeed in negotiating effective verification, President Reagan is committed to moving forward on TTBT. I look forward to giving the Senate's advice and consent to ratification of TTBT under those circumstances. I believe that the Kennedy-Mathias amendment now would undermine this effort. The timing of it is unfortunate.

I also believe that many Senators are engaged in an earnest search for some nuclear testing limitations which would genuinely contribute to national security and arms control. Our hearings answered some questions, but also brought forth some ideas like that of my colleague from Rhode Island. Therefore, at the appropriate time, I will propose an amendment which encourages the President to pursue and expand the Geneva meetings so that we might soon ratify TTBT and PNET. It also would ask the President to explore with us some new ideas for nuclear testing limitations. Naturally, it also endorses what must be our main objective and that is a need for reductions of existing nuclear weapons.

Our months of work on the Foreign Relations Committee, and our extensive hearings lead me to believe this is the most responsible approach.

Mr. President, if I may have the attention of my colleagues, my understanding of the parliamentary situation is that the distinguished Senator from Massachusetts offered an amendment; the distinguished Senator from Maryland has offered a second-degree amendment, thus creating a tree, of sorts, which makes it impossible for me to offer a substitute at this juncture. My understanding, however, for the information of my colleagues, is that when the hour time limit runs out, three amendments are still in order under the unanimous-consent agreement.

I ask this parliamentary question of the Chair: Is it in order for me to submit my amendment at this time with knowledge that it will not be in order until an hour has elapsed and there has been some disposition of the two amendments now before the Senate?

The PRESIDING OFFICER. The Senator may submit his amendment to the desk. It would not be pending until the time has expired or is yielded back.

Mr. LUGAR. Mr. President, I send an amendment to the desk under the conditions the Chair has stated.

The PRESIDING OFFICER. The amendment will be received and will be stated when the conditions are proper to have it before us.

Mr. LUGAR. Mr. President, I yield the floor.

Mr. KENNEDY. How much time remains, Mr. President?

The PRESIDING OFFICER. The Senator from Massachusetts has 19 minutes. Senator Lugar has 14½ minutes.

Mr. KENNEDY. I yield 4 minutes to my colleague.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KERRY. Mr. President, I thank the Chair and I thank my distinguished colleague. I rise in support of the amendment of Senator MATHIAS.

I have listened with interest to the distinguished chairman of the Foreign Relations Committee. As a member of that committee, I sat through those hearings and listened. I must say that I think that, at least for this Senator, this administration is without credibility on the issue of trying to find a means of verification for a test ban or really caring about verification as a legitimate stumbling block to the signing of a comprehensive test ban.

I think the truth is that when examining the current star wars program, the x-ray laser bomb, and other arms control questions, it is clear that there is a perception by this administration that it is better to build. They have turned their back on opportunity after opportunity to eliminate nuclear testing in a mutual fashion.

In December 1982, when given the opportunity, we had the chance to lead the world toward that kind of agreement. Instead, we were the lone nation to vote at the United Nations against a resolution which said that all testing should be outlawed. The final tally of that vote was 111 to 1, the United States being the 1.

Last summer, during the 40th anniversary of the Hiroshima explosion, opportunity knocked again when Secretary Gorbachev announced a unilateral moratorium on testing and offered to extend the moratorium indefinitely if the United States would only agree to follow suit. President Reagan chose to ignore the offer. Secretary Gorbachev extended the moratorium nonetheless, and opportunity is still knocking if only we were in a position to take advantage of it. If only we followed the courage of President Kennedy in his move on the test ban in the early 1960's.

Opportunity knocked in October, Mr. President, when six nonaligned nations offered to monitor a comprehensive ban on underground tests. India, Sweden, Argentina, Tanzania, Greece, and Mexico would all have worked for greater verification of testing agreements, if only we would agree to the basic principle of banning nuclear tests. Still we ignored the opportunity.

In May, 2 months ago, opportunity knocked when Secretary Gorbachev proposed to meet with President Reagan on the testing issue, and offered to begin a bilateral moratorium on underground testing. The administration rejected the offer.

Somehow we are pretending that by offering the Soviet Union the opportunity to come and watch one of our tests, that is a constructive move toward getting rid of tests.

Today, we are all fortunate enough to have opportunity knocking again. A mutual moratorium on nuclear testing represents yet another chance for this Nation to carry on the spirit of President John Kennedy's Limited Nuclear Test Ban Treaty which outlawed all nuclear testing in the atmosphere, underwater, and in outerspace. A comprehensive nuclear test ban is straightforward. There are no formulas on the size or capability of weapons. No formulas on throw weights. This amendment would simply allow this country to respect the wishes of 111 nations, to enhance the unilateral moratorium which the Soviets have upheld, and to ensure the safety of the world without reducing our nuclear stockpile. This is a risk-free opportunity. Because the Soviets have maintained the ban unilaterally, we have nothing to lose.

I listened very carefully at those hearings and I must say I heard different things from those who testified. Admiral Crowe, distinguished as he is, came before the committee and said he did not even support the limited test ban anymore and thought we could not verify that.

I listened carefully while more extraordinary statements were made. They testified that we cannot verify the Threshold Test Ban Treaty that we negotiated in 1974 but in the very next breath, they said, we know for a fact that the Soviets have violated it. How can you know for a fact they have violated it when you cannot verify it?

Then they said the comprehensive test ban would not prevent the creation of nuclear weapons. In the next breath they said, no, we cannot have a comprehensive test ban because if we do we are not going to be able to develop the x ray laser for star wars programs; that will be stopped. On the one hand, it will not stop the creation of new nuclear weapons; on the other hand it will stop the very new program they want.

When they talked about safety, they said our nuclear weapons today are reliable. They said no American is

threatened by the safety problem of our nuclear program today. The record will show that. They said our weapons will be reliable for the next 20 years yet in the next breath they say a nuclear test ban will make nuclear stockpiles unsafe. Everybody in the business knows you can adequately test every single component of a nuclear weapon right up to the point of firing without actually firing and know that you have adequately tested the safety of that weapon.

It has been more than 40 years now since we fired that first weapon and we have an opportunity to take an action which this administration clearly does not want to take, will not take, and which it has left to the Congress of the United States to take for it. I hope we, for once and all, do away with this myth, this illusion, this game, this chicanery, that somehow suggests that the administration is really worried about safety, that it is really worried about our ability to verify.

□ 2130

The Soviet Union has said it will talk about onsite inspection. The Soviet Union has said it will have in-ground implantation of seismic devices, but nothwithstanding that we are not even talking about it. I hope we will take this step toward moving us to a safer world. I yield.

The PRESIDING OFFICER. Who yields time?

Mr. KENNEDY. Mr. President, I yield 4 minutes to the Senator from Maine.

The PRESIDING OFFICER. The Senator from Maine.

Mr. MITCHELL. Mr. President, yesterday, August 6, we observed two important anniversaries in the history of atomic weaponry. One of these anniversaries served to remind us of the terrible consequences should we fail to regain control over these awesome agents of destruction we have created. The other bore testimony of our failure to date to do so, but also offered hope that we might yet escape the nuclear quandary in which we have placed ourselves.

Forty-one years ago, as the war in the Pacific reached its climatic stage, the world entered the atomic age with the sudden devastation of Hiroshima. What was immediately apparent was that never again could mankind accept the prospects of atomic warfare with anything other than horror. No more the equanimity with which our fathers and grandfathers viewed the outbreak of war in 1914. No more the clamor for battlefield glory which marked the weeks before the United States declaration of war against Spain in 1898.

Yesterday's other anniversary recorded a far less epochal event, but a potentially important milestone nonetheless. One year ago the Soviet Union began observing a unilateral moratorium on all nuclear explosions, including the testing of nuclear weapons. In the intervening months Moscow has repeatedly challenged the United States to match the Soviet ban with one of its own.

It is this latter anniversary about which I wish to speak tonight. Thus far the Reagan administration has steadfastly refused this Soviet challenge. A comprehensive test ban remains a long-term objective, administration spokesmen tell us. But then they quickly add that we're not yet ready for such a step. So while Moscow has refrained from testing for the past 12 months, and even extended its moratorium three times, the United States has conducted more than a dozen tests.

More and more this attitude is revealed as terribly shortsighted. It is clearly to our advantage that the Soviets not resume their testing. A test ban would inhibit the development of new Soviet weapons and maintain the current United States superiority in warhead design. A test ban would stabilize the nuclear balance between the United States and the Soviet Union. A test ban would help in slowing the arms race.

And a test ban would enhance deterrence by reducing the possibility of a sudden technological breakthrough that could conceivably lead one superpower or the other to fear for the safety of its retaliatory forces.

A comprehensive test ban would not free us from the threat of nuclear holocaust. But it could provide a significant impetus toward addressing many of the dangers of a nuclear world.

The American people and their elected representatives realize this. Opinion polls show impressive majorities of Americans favoring the negotiation of a test ban. Both Houses of Congress have produced overwhelming bipartisan votes in support of a test ban. Two years ago we in the Senate voted by a 77 to 22 margin in favor of resuming negotiations looking toward a verifiable ban at the earliest possible date. Every President since the early 1950's, Republican and Democrat, has endorsed such an accord. But this administration has repeatedly spurned opportunities to work for an agreement halting nuclear tests.

Those of us who disagree with this stance have tried to understand the reasons behind this stubborn opposition to an agreement. But frankly, we have not seen or heard much that makes the White House position more intelligible. Administration officials, for instance, speak of the impossibility of verifying a test ban. But their actions belie their words. Were the administration seriously concerned about verifiability questions, the Arms Control and Disarmament Agency would not now be spending on test ban research only one-tenth the amount it spent in 1979. In truth, the administration maintains that a test ban is unverifiable only because it wants a test ban to be unverifiable.

Other administration officials tell us that we need to continue testing in order to insure the reliability of our current nuclear stockpile. But we in the Senate have heard mountains of testimony to the effect that nuclear explosions are not needed in order to confirm stockpile realiability. Sample weapons can be disassembled and their components subjected to nonnuclear tests. Or weapons can be detonated without their nuclear components, while nonexplosive tests are available for determining whether the nuclear components have deteriorated during storage.

In the past these techniques have successfully identified reliability problems, and there is no reason why they cannot be used in the future. Questions about stockpile reliability, it turns out, are only a red herring.

To be fair, it should be noted that the administration has in recent weeks shown somewhat greater flexibility on the issue of a test ban. Perhaps this represents a sincere change of heart on the part of the White House, perhaps only a cynical acknowledgment of the overpowering demand in the country for a more forthcoming attitude. Last month, as we all know, United States experts met in Geneva with their Soviet counterparts to discuss, for the first time since President Reagan took office, issues relating to monitoring and eventually banning nuclear tests. All of us were encouraged by reports out of Geneva that the sessions had been largely free of the bitterness that has characterized many Soviet-American arms control exchanges in recent years. The announcement that the meetings are to resume in September can be viewed as another hopeful sign.

But sharp, even fundamental differences between the two sides remain. The Soviet Union gives every indication of wanting to arrange a total ban on nuclear testing, while United States negotiators insist that they wish to talk only about improved methods of monitoring the very tests the Soviets want to abolish. Whether this basic disagreement can be bridged remains to be seen.

Recently there has also been welcome new movement on another old sticking point—on-site monitoring. During the Geneva talks last month the Soviets reportedly displayed greater interest than ever before in United States proposals for on-site inspections. Equally intriguing is an arrangement Moscow recently negotiated with a private team of American scientists. Under the terms of this agreement the Americans have installed a dozen seis-

mic devices at a Soviet nuclear test site in Kazakhstan. This is the first time Soviet authorities have ever permitted foreign scientists to set up monitoring stations in Soviet territory.

Does this mean that Moscow is now willing to deal? Frankly, we don't know. But we should move expeditiously to explore just what the Soviets are prepared to accept.

And this gets us back to the amendment under consideration. I support that amendment, and I encourage my colleagues to support it. Its terms are perfectly straightforward. It calls upon the President to seek ratification of the Threshold Test Ban Treaty and the Peaceful Nuclear Explosions Treaty, and it urges the President to resume comprehensive test ban negotiations.

These are not radical requests. They do not seek to dictate the nature of negotiations with the Soviet Union, nor the outcome of those negotiations. They simply acknowledge the reality that Hiroshima made evident with such force: That in the nuclear age it is better to talk with our adversaries than to fight nuclear wars against them.

Unfortunately, time is running out. We have allowed an entire year to slip away since the Soviet ban on testing went into effect. Moscow has not announced whether it will continue its unilateral restraint now that its moratorium has expired. We must hope that it does. But we must equally insist that the Reagan administration awake to the advantages of negotiating a mutual and fully verifiable CTB.

Nearly a generation ago we faced an opportunity much like this one when, in the aftermath of the Cuban missile crisis, the leaders of both the United States and the Soviet Union concluded that they had better resolve their differences over the bargaining table. The result was the Limited Test Ban Treaty of 1963.

It is now time to build upon that agreement. The Limited Test Ban Treaty was a useful start, but it failed to go far enough. Had we banned all nuclear testing in 1963, instead of simply driving it underground, neither we nor the Soviets would ever have developed MIRV's or long-range cruise missiles. Nearly everyone agrees that the proliferation of these weapons in recent years has had a tremendously destabilizing impact upon the nuclear balance. We are all less secure today than if we had managed to forego their development.

We are now on the verge of a new generation of destabilizing weapons—the so-called third generation weapons. Now is the time to slow efforts to develop these even more destabilizing instruments of destruction. Now is the time to finish the work first begun with the Limited Test Ban in 1963.

Incredibly, we have allowed the Soviet Union to seize the high ground on this issue. American national interests—and world peace—require that Moscow not resume its nuclear testing. The President should declare an immediate halt to U.S. testing and initiate serious talks with Moscow on a comprehensive test ban treaty.

And Congress should do its part as well. Let us once more demonstrate our endorsement of a comprehensive test ban by supporting the amendment currently before us.

Mr. President, three decades ago President Eisenhower, one of the great military heroes in our history, and a man who knew war as few Americans ever have, established as our national policy the achieving of a comprehensive ban on nuclear activities. Five Presidents who followed him, Republicans and Democrats alike, endorsed that policy and took steps to move the United States toward that objective. The current President and the current administration are the first in the nuclear age to reject that policy and to seek to move the United States not toward that ojective but away from it.

A result is that we are engaged in an unrestrained nuclear arms race which has not enhanced our Nation's security and will not, so long as it is pursued, enhance that security.

It is an illusion to think that if both sides merely pile nuclear weapon on nuclear weapon either is more secure. The opposite is the sad reality. I urge the Senate to support this amendment—a modest step toward the beginning of what we all know must come, and that is the beginning of restraint in the nuclear arms race, to preserve our society, to preserve societies throughout the world.

Mr. KENNEDY. Mr. President, I yield a minute to the Senator from California.

The PRESIDING OFFICER. The Senator from California is recognized for 1 minute.

Mr. CRANSTON. Mr. President, many issues are important, issues that we deal with constantly in this body, issues that confront people of our country—the environment, the economy, equal opportunity, and many others. But if we fail to prevent a nuclear war, none of those issues will matter. It is time for us in the United States to take a strong position of leadership on the vital issues of war and peace in the nuclear age and nothing is more important than moving toward a ban on the testing of weapons.

I strongly urge support for the Kennedy-Mathias approach which would put us strongly on record in favor of our country providing the leadership and taking the steps that can lead to a reduction and ultimately the end of the threat of nuclear annihilation that hangs over us and that, worse, hangs over our children, darkening their days and filling the nights of the youngest of them with fear.

The PRESIDING OFFICER. The Senator's time has expired. Who yields time? The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, it will be my intention to yield 4 minutes to the Senator from Illinois and then to yield back the time that I had with the idea that we would vote on our proposal, and, should it be successful, to use the remaining time to debate the proposal offered by the Senator from Indiana.

The PRESIDING OFFICER. Will the Senator suspend. The Chair wishes to inform the Senator from Massachusetts that neither side need yield back their time in order to dispose of the Mathias amendment.

The agreement which was entered into, the Chair is informed, would permit the vote on the Mathias amendment or the disposal of the Mathias amendment without having yielded back or utilized the time allocated to both sides.

Mr. KENNEDY. If I could have the attention of the Chair. The way we are constructed now, if we act and the Kennedy-Mathias amendment is accepted, under the existing parliamentary situation there would be no time for the Senator from Indiana. I would suggest that we work out a method of ensuring that the Senator from Indiana would have the time remaining on this particular amendment to argue for his substitute, and that I would have whatever time remains after that to express my views on the substitute.

The PRESIDING OFFICER. The Chair would inform the Senator from Massachusetts that the Senator from Indiana has 14½ minutes roughly and the Senator from Massachusetts 10½ minutes roughly. That time need not be yielded back in order to vote or dispose of the Mathias amendment.

Mr. KENNEDY. I understand that.

Mr. LUGAR. Mr. President, a parliamentary inquiry. Mr. President, is it not the case that after the Mathias amendment is disposed of, then a substitute is in order for the underlying Kennedy amendment?

The PRESIDING OFFICER. The Senator is correct.

Mr. KENNEDY. I yield 4 minutes to the Senator from Illinois.

The PRESIDING OFFICER. The Senator from Illinois is recognized for 4 minutes.

Mr. SIMON. Thank you, Mr. President.

I commend my colleagues, Senator MATHIAS and Senator KENNEDY, for this amendment. Two fundamental questions. One, if I may pose it in the negative, why not have it? One argument is verification. I was a delegate to the United Nations special session

on disarmament in 1978, 8 years ago. Eight years ago we had the technology to verify. I have had the Arms Control Disarmament Agency people in to tell me why we cannot do it now, and they come up with things like, "Well, maybe there is an earthquake somewhere and it will look like it is a nuclear explosion." We are straining at gnats to try and find a reason on verification. The reality is we can verify, and everyone who examines the question seriously knows that is the reality.

The second reason for not doing it is one that has been published in some newspapers and journals. I am not revealing any classified secrets. We want to test certain kinds of warheads, particularly laser warheads, and just as certain as I am standing in front of you if we go ahead with those warheads inevitably the Soviets are going to do the same. It just is not rational not to go ahead.

Now, why go ahead? We all know if we sit back and think about it a little we are on a collision course with history with this unbelievable power.

One of the interesting things for me is to talk to a Rotary Club and you may have a question about a nuclear explosion; Talk to a college group and you are likely to have one; talk to a high school group and you are much more likely to have one; talk to a group of fourth graders, my friends, and the question that is going to dominate the discussion is where we are going and whether we are going to blow up this world. That is the reality that these fourth graders somehow sense more than those of us who sit in this Senate, because we get so tied up in all the details of our day-to-day existence and day-to-day legislation.

One illustration. And some of you have heard me use this before over in the House. When I first understood what kind of a world we are living in was about 4½ years ago down in Arkansas, an Air Force sergeant was walking along, accidentally dropped a wrench, it fell through some boards, broke a little aluminum tube, a series of things happened, and a Titan II missile went up in the air and landed in a wooded field some miles away. The warhead did not explode, but the newspapers reported it was a 9 megaton warhead. I called the Congressional Research Service, and I said, "Tell me in terms I can understand what the heck 9 megatons is."

They gave me two answers. No. 1, if you take all the bombs of World War II, including Nagasaki and Hiroshima, they total 2 megatons. Or, No. 2, if you read in El Salvador or Lebanon or Northern Ireland or someplace about a car blowing up, ordinarily that is 1 or 2 or 3 pounds of TNT.

□ 2140

In TNT equivalency terms, a megaton is a railroad freight train loaded with TNT 300 miles long; 9 megatons, 2,700 miles long—almost from Washington, DC, to Los Angeles, CA.

As my friends on the Armed Services Committee know better than I, we have a lot of warheads a lot bigger than 9 megatons. The United States has roughly 10,000 strategic warheads, the large warheads; the Soviets have roughtly 9,500. We have between us, in addition, about 30,000 tactical, smaller nuclear warheads. We have the ability, in a matter of hours, to create a world in which never again is the laughter of a child going to be heard, never again is a deer going to run through a forest, never again is a blade of grass going to grow. Somehow, we have to move away from that. This amendment is a practical way of moving us in that direction.

We are like a car that has passed a detour sign that says: "Warning! Cliff Ahead;" and everybody is saying, "We're going all right now; we haven't passed over the cliff yet." I do not know where that cliff is, but it is down the road, and we have an opportunity, in a responsible way, to halt and say, "Let's move back." I hope we do the responsible thing.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. LUGAR. Mr. President, for the benefit of Members, let me describe the situation currently. Senator KENNEDY has offered an amendment and Senator MATHIAS has offered an amendment to the Kennedy amendment which is virtually identical. In that way, they have blocked the substitute. However, the unanimous-consent agreement calls for the three amendments, so eventually my substitute will be heard. Whether the Mathias amendment is voted up or down, the three will be unblocked, and my amendment will be eligible.

I recommend defeating the Mathias amendment which is identical to the Kennedy amendment. In any event, because the time is limited, I want to give Members an idea of my substitute, so that they will have a good recollection as we come to voting on it.

The amendment I will propose reads as follows:

(1) Ratification of the Threshold Test Ban Treaty (TTBT) and Peaceful Nuclear Explosions Treaty (PNET) with effective verification would be in the national security interest of the United States;

(2) Resolution of compliance questions arising from current verification shortcomings is essential to creating a climate in which TTBT and PNET could contribute to national security and the furthering of arms control objectives;

(3) Technical experts on nuclear testing from the United States and USSR have met in Geneva to discuss each side's views, and Soviet delegations expressed interest in pursuing U.S. concerns on TTBT verification;

(4) The Geneva technical experts meetings will resume in early September of this year;

(5) These meetings represent the best opportunity for moving forward with limitations on nuclear testing;

(6) The President is committed to moving forward on ratification of TTBT with PNET, if effective verification provisions can be negotiated;

(7) The Congress remains interested in the possibilities which may be afforded by a Comprehensive Test Ban (CTB);

(8) In examining the CTB question, innovative ideas have been brought forth which merit the serious attention of the Congress and the Administration; and

(9) Achievement of effective verification and ratification of TTBT nd PNET would be a major breakthough in US-Soviet relations upon which the President should seek to conclude further arms control agreements, especially those for significant reductions in existing nuclear weapons.

B. Sense of Congresss. It is the sense of Congress that:

(1) The President should be commended for bringing about the recent Geneva meeting on nuclear testing issues;

(2) The President should do everything possible to further the current Geneva talks of nuclear testing experts, including taking into account Soviet views;

(3) The President should seek to expand the experts meeting to the political level as soon as possible in order to negotiate effective verification of TTBT and PNET;

(4) The President should raise this as an issue of high priority with General Secretary Gorbachev at the next summit; and

(5) If effective verification is agreed, the President should seek Senate advice and consent to ratification of TTBT and PNET immediately.

C. *Report.* By February 1, 1987 the President shall submit a report to the Chairman of the Committee on Foreign Relations of the Senate and the Speaker of the House of Representatives. This report shall detail:

(1) Whether a CTB, or a ban on tests above the lowest verifiable yield, would contribute to U.S. national security, including our arms control objectives. If the Administration reports that they cannot, the report shall explain why;

(2) Whether a CTB, or a very low permitted yield could ever contribute to U.S. national security, including our arms control objectives, and if so, under what conditions;

(3) Whether a permitted yield below 150 kilotons could contribute to U.S. national security and arms control objectives, and under what conditions; and

(4) Whether an annual quota on tests could contribute to U.S. national security and arms control objectives.

D. *Coordination of the Report.* The President's report will be coordinated by the Director of The Arms Control and Disarmament Agency, with the Secretary of Defense, Secretary of Energy, Secretary of State, Director of Central Intelligence and all other responsible officials.

Mr. President, that is the substitute that I look forward to offering at the appropriate time. I hope that all Members will carefully consider the fact that negotiations are about to proceed. The substitute I am prepared to offer gives encouragement to all who are involved in those talks because very genuine bipartisan basis for furthering

the aims of the talks was evident during the hearings of the Foreign Relations Committee.

Mr. KENNEDY. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 5 minutes and 4 seconds.

Mr. KENNEDY. I yield myself 4½ minutes.

Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. KENNEDY. Mr. President, the chairman of the Foreign Relations Committee described his substitute. I would like to do the same for the proposal that the Senator from Maryland and I offer. It reads as follows:

(a) FINDINGS.—The Congress finds that—

(1) the United States is committed in the Limited Test Ban Treaty of 1963 and in the Non-Proliferation Treaty of 1968 to seek to achieve the discontinuance of all test explosions of nuclear weapons for all time;

(2) a comprehensive test ban treaty would promote the security of the United States by constraining the United States-Soviet nuclear arms competition and by strengthening efforts to prevent the proliferation of nuclear weapons;

(3) the Threshold Test Ban Treaty was signed in 1974 and the Peaceful Nuclear Explosions Treaty was signed in 1976, and both have yet to be considered by the full Senate for its advice and consent to ratification;

(4) the entry into force of the Peaceful Nuclear Explosions Treaty and the Threshold Test Ban Treaty will ensure full implementation of significant new verification procedures and so make completion of a comprehensive test ban treaty more probable;

(5) a comprehensive test ban treaty must be adequately verifiable, and significant progress has been made in methods for detection of underground nuclear explosions by seismological and other means;

(6) at present, negotiations are not being pursued by the United States and the Soviet Union toward completion of a comprehensive test ban treaty; and

□ 2150

I would point out, here that the so-called expert negotiations that took place in Geneva last week are not on the subject of a comprehensive test ban. The administration is simply not interested in talk on a CTBT.

To continue:

(7) the past five administrations have supported the achievement of a comprehensive test ban treaty.

(b) SENSE OF CONGRESS.—It is the sense of Congress that at the earliest possible date, the President of the United States should—

(1) request advice and consent of the Senate to ratification (with a report containing any plans the President may have to negotiate supplemental verification procedures, or if the President believes it necessary, any understanding or reservation on the subject of verification which should be attached to the treaty) of the Threshold Test Ban and Peaceful Nuclear Explosions Treaties, signed in 1974 and 1976, respectively;

Let me point out that, if the President has concerns about verification of the TTBT or PNET and wants additional verification provisions, we invite him to submit those additional verification requirements to the Senate of the United States in the form of a report.

(2) propose to the Soviet Union the immediate resumption of negotiations toward conclusion of a verifiable comprehensive test ban treaty.

In accordance with international law, the United States shall have no obligation to comply with any bilateral arms control agreement with the Soviet Union that the Soviet Union is violating.

Mr. President, the immediate resumption of CTB negotiations is supported by a large number of distinguished American Nobel laureates in a number of fields. I ask unanimous consent that a letter of support for the CTBT dated April 6, 1986, from these distinguished Americans be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

APRIL 8, 1986.

President RONALD REAGAN,
*The White House, Washington, DC.*

DEAR MR. PRESIDENT: We are writing to urge you not to abandon the historic opportunity that now exists to end nuclear weapons testing for all time. We implore you to suspend all U.S. nuclear tests until the next summit meeting or until the Soviet Union resumes testing. We also urge you to resume trilateral negotiations with the Soviet Union and the United Kingdom, suspended since 1980, which could lead toward the swift completion of a Comprehensive Test Ban Treaty.

Nobel laureate signatories:

Philip W. Anderson, Physics Department, Princeton University.

C.B. Anfinsen, Department of Biology, Johns Hopkins University.

Baruj Benacerraf, Department of Pathology, Harvard Medical School.

Paul Berg, Willson Professor of Biochemistry, Stanford University School of Medicine.

Owen Chamberlain, Lawrence Berkeley Laboratory, University of California at Berkeley.

S. Chandrasekhar, Laboratory for Astrophysics and Space Research, Chicago, IL.

Sheldon Lee Glashow, Professor of Physics, Lyman Laboratory of Physics, Harvard University.

Walter Gilbert, Biology Department, Harvard University.

Roald Hoffman, Department of Chemistry, Cornell University.

Robert W. Holley, Salk Institute for Biological Studies.

David H. Hubel, Department of Neurology, Harvard Medical School.

Polykarp, Kusch, Professor Emeritus of Physics, University of Texas, Dallas.

Fritz Lipmann, Professor of Biochemistry, Rockefeller University.

William N. Lipscomb, Jr., Department of Chemistry, Harvard University.

S. E. Luria, Institute Professor of Biology, Massachusetts Institute of Technology.

Linus Pauling, Formerly Chair, Division of Chemistry and Chemical Engineering, California Institute of Technology.

Edward M. Purcell, Lyman Laboratory of Physics, Harvard University.

Glenn T. Seaborg, Lawrence Berkeley Laboratory, University of California at Berkeley.

Emilio Segre, Department of Physics, University of California at Berkeley.

Herbert A. Simon, Professor of Computer Science and Psychology, Carnegie-Mellon University.

James Tobin, Department of Economics, Yale University.

George Wald, Biological Laboratories, Harvard University.

Steven Weinberg, Department of Physics, University of Texas.

Kenneth G. Wilson, Laboratory of Nuclear Studies, Cornell University.

Robert W. Wilson, Head, Radio Physics Research Department, Bell Laboratories.

Mr. BIDEN. Mr. President, the Reagan administration is the first since the Presidency of Dwight Eisenhower to fail to make any effort to make progress in the domain of nuclear testing.

The administration's record is dismal. It has refused to resume comprehensive test ban negotiations. It has failed to request Senate approval of the still unratified Threshold Test Ban Treaty that was signed in 1974 and the Peaceful Nuclear Explosions Treaty that was signed in 1976. It has, in the face of strong public opposition, resumed nuclear testing just when the Soviets, however, cynically, appear to be demonstrating more interest in a testing agreement.

The fact is that the administration wishes to continue testing because, as I stated during the SDI debate on the floor several days ao, it intends to continue its arms buildup. And it specifically wants to preserve the right to test such exotic weapons as the x-ray laser which are critical to the development of its Star Wars Program.

There is now substantial consensus in the technical community that the administration's allegations about frequent Soviet violations of the 150 kiloton threshold limit on testing that is now in effect were due to measurement error. Both the Soviet Union and the United States have in fact tested several times over the threshold. But if the roof on your house is leaking, you do not tear down the house. You attempt to improve upon its construction. So too with arms control. We must strengthen the commitment not to test, not weaken it.

The amendment offered by Senators KENNEDY and MATHIAS calls on the administration to seek ratification of the two extant treaties and to resume negotiations toward a mutual and verifiable Comprehensive Test Ban Treaty. While a test ban is not a substitute for the limitations on offensive and defensive systems that I have repeatedly called for, a test ban would be an important component of a comprehensive arms control regime between the two superpowers.

COMPREHENSIVE TEST BAN

Mr. LEAHY. Mr. President, if President Reagan and Mr. Gorbachev are to succeed in devising a formula to reduce and ultimately eliminate nuclear weapons, they must take the fundamental step of making a commitment to negotiate a comprehensive test ban.

A verifiable CTB with onsite inspection could pave the way toward a freeze on the production and deployment of nuclear weapons. It could help put an end to the constant parade of destabilizing nuclear innovations which have failed to enhance our security. Combined with deep reductions in offensive forces and tight restraints on the development, testing, and deployment of defensive weapons, a halt in nuclear testing could be a major contribution toward halting and reversing the nuclear arms race.

As a first step, we should immediately ratify the Threshold Test Ban and Peaceful Nuclear Explosion Treaties. These treaties, negotiated by Presidents Nixon and Ford, ban nuclear tests above 150 kilotons and contain precedent-setting verification procedures, including Soviet acceptance of the principle of onsite inspection and the use of data exchanges to calibrate the size of Soviet tests. Though these treaties have not been ratified, both superpowers have agreed to informally observe them.

The administration has refused to allow the Senate to proceed with a ratification debate on these treaties, citing likely Soviet violations of the TTBT and the inadequacy of its accompanying verification protocol.

Let's take a moment to evaluate the basis of the administration's refusal to verify these treaties.

First, according to recent press reports, the Central Intelligence Agency has changed its procedures for estimating the yield of Soviet nuclear tests because its previous estimates were too high. Seismological experts outside the Government have long argued for such a change. As a result, on the basis of seismic information, the Soviet Union's likely violations may have never been violations at all. In fact, under the old methodology used by the administration to allege likely Soviet violations, it is entirely possible that some U.S. nuclear weapons tests may have themselves appeared to the Soviets to exceed the imposed 150 kiloton limit.

With regard to verification, there is no doubt that uncertainties involved with the monitoring of either a low yield arms control regime or a comprehensive test ban can today be reduced to acceptable levels with readily available technology for onsite monitoring at Soviet and United States test facilities. The question, then, is how to proceed to implement such a program of effective monitoring.

After ratifying the TTB and PNE Treaties, the second step is for both superpowers to join in a mutual moratorium on all nuclear testing. Such a moratorium could be imposed for a limited period of time, or as long as the Soviet Union continued to refrain from testing, while we negotiate and implement more rigorous nuclear testing verification procedures.

Mr. President, such an opportunity has been available to the United States since last August, when the Soviet Union began its moratorium on nuclear testing. The administration has refused to join the Soviets, citing the risks that a moratorium could pose for the reliability of our nuclear weapons stockpile. It argues that without testing, the United States could not diagnose and remedy potential problems in the safety of our nuclear stockpile or the reliability of our nuclear weapons.

The fact is, few U.S. nuclear tests have ever been dedicated specifically to identifying design flaws in nuclear weapons. Rather, the overwhelming majority of tests are for validating nuclear weapons designs and testing new concepts for future weapons development.

Certainly, the safety and reliability of the nuclear stockpile cannot be ignored. However, this issue can be adequately addressed through an arms control agreement which, for example, might permit a very small quota of low yield tests for the purpose of ensuring the safety and reliability of remaining weapons.

The final step would be to resume comprehensive test ban negotiations.

Prior to United States withdrawal from CTB negotiations in 1980, the Soviets had accepted a United States plan for onsite inspections to help resolve compliance questions. In another major breakthrough on verification, the Soviets also accepted a United States proposal for development of a network of sophisticated automatic seismic monitoring stations on their territory. Such seismic facilities inside of the Soviet Union, combined with our impressive existing national technical means of verification, would give us a very effective basis for verifying a CTB.

Mr. President, negotiating the elimination of nuclear testing is largely a matter of political will, and not of inadequate verification technology or procedures. Verification should not be used as an excuse by the administration to block CTB negotiations.

It is ironic that a group of U.S. scientists from the National Resources Defense Council have recently succeeded where our Government has failed. The NRDC has concluded an agreement to deserve Soviet tests which might actually enhance the prospects of verifying a comprehensive test ban.

On May 28, 1986, the NRDC and the Sovict Academy of Scientists entered into an unprecedented agreement to establish three seismic monitoring stations near the Soviet nuclear test site in Kazakhastan and our Nevada test site.

History's first private sector peace initiative could result in the collection of invaluable data on the seismological characteristics of the Soviet Union. It might help remove an important obstacle in the verification myth used by the administration in opposing a comprehensive test ban.

Finally, Mr. President, in recent days we have been encouraged by promising developments between Soviet and American negotiators in Geneva on the question of nuclear testing. They concluded their deliberations with the promise to meet again. But we have been encouraged in the past, only to be disappointed. The time for action is now in moving toward an end to all nuclear testing.

● Mr. LEVIN. Mr. President, my colleagues have discussed several important aspects of the Comprehensive Test Ban [CTB] Treaty issue. My remarks will concentrate on the relationship of a CTB Treaty and negotiations to the arms control treaty most of us seem to forget: The Nuclear Nonproliferation Treaty [NNPT]. In 1991, a short 5 years away, we may be rudely awakened to the continuing importance of the NNPT, for in that year the over 100 nations that have pledged not to develop their own nuclear arsenals will decide whether to renew their pledges. Obviously, the security of this small planet will be even more seriously threatened if the six nuclear nations we now know of are joined by the dozen other nations capable of developing a nuclear device, and another two dozen who might be able to develop one by the end of the century. The sole legal obstacle to such a dangerous future is the NNPT.

The NNPT, signed in 1968 right here in Washington, and ratified by the Senate in 1969, sealed a three way bargain. The nonnuclear signatories promised not to develop nuclear weapons. In exchange, they were promised access to peaceful nuclear technologies. All nations which signed it agreed to adopt International Atomic Energy Agency [IAEA] safeguards to prevent clandestine development of weapons and to set international standards of inspection and safety measures for their reactors. All this has come to pass. The third aspect of the bargain is contained in article six of the treaty: "Each of the Parties to the Treaty undertakes to pursue negotiations in good faith on effective measure relating to cessation of the nuclear arms race at an early date and to nuclear disarmament, and on a treaty on general and complete disar-

mament under strict and effective international control." This is clearly an undertaking by the nuclear weapons states to negotiate an end to the arms race as their part of the bargain, at an early date. Seventeen years later, what progress can we point to in this regard? Five years from now, this is the question the patient, peaceful nonnuclear states will be asking us: Have you kept the NNPT bargain?

And, Mr. President, in 1969, disarmament had a very precise meaning. There were no SALT or START talks at the time. There was only the Atmospheric Test Ban Treaty. In fact, this treaty which is cited in the preamble of the NNPT, had as its ultimate goal "the discontinuance of all test explosions of nuclear weapons for all time." Clearly by this reference disarmament in the NNPT context has as one of its ultimate goals a comprehensive test ban. We signed this treaty understanding this. And for years, through the Threshold Test Ban Treaty of 1974 and the Peaceful Nuclear Explosions Treaty of 1976, we were good to our word. These modest steps toward a CTB were achieved. But this progress came completely to a halt with the Reagan administration.

Our current administration policy is that a CTB, regardless of our solemn international obligations, is not in the national interest. I'd like to examine the administration's arguments against a CTB one by one, remembering that weighty pledge we have made in the NNPT. Do any of these reasons justify our refusal to negotiate in good faith on a CTB? That is the question. First, verification. Due to advances in the technology of verification, it is now the consensus of experts in the field that nuclear explosions can be verified certainly at the 10 kiloton level and very probably at the 1 kiloton level. Yet Assistant Secretary Perle, as recently as this March, still maintains that the 150 kiloton limit of the Threshold Test Ban Treaty [TTBT] cannot be adequately verified. On a related issue, onsite inspection, a scientific team from the Natural Resources Defense Council has just visited the Soviet Union to begin a civilian monitoring effort of Soviet tests. It is no longer adequate for the administration to cite this as a realistic obstacle. The Soviets are willing to allow onsite inspection. We can verify the TTBT, and we should begin serious discussions of CTB verification procedures, beyond the low level expert contact recently begun in Geneva. This is a bare minimum effort.

A second argument against the CTB is the need to test a nuclear pumped x-ray laser, a third generation nuclear weapon, a test which clearly violates the spirit of the NPT. We are supposed to negotiate a cessation to the arms race, not invent an even more sophisticated weapon for its continuation. We've heard no solid strategic reason to develop the x-ray laser.

But let's get to the heart of the issue. Many Senators will be rightly alarmed by statements that continued testing is needed to maintain the reliability of our arsenal. This is the import of the annual arms control impact statement. And it is the basis for a recent letter from Deputy Assistant Secretary of Defense Frank Gaffney to Representative MARKEY. I'd like to refer to this letter in greater detail: It lists our current design criteria for nuclear weapons. These are: Safety; modifications for compatibility with new delivery vehicles—that is modernization—minimum probability of any plutonium dispersal in the event of accident; operational reliability; yield testing; conservation of nuclear materials; minimum maintenance costs; and simplicity.

Reading between the lines, these criteria mean that we want to modernize, and we want to continue producing different yields. These goals also clearly violate the spirit of the NPT and its call for cessation of the arms race. Moreover, two very feasible goals do not appear in these criteria. One is the design of nuclear weapons so they do not require further testing. This was our policy until the 1970's. A second criteria might be simple compatibility with our NPT obligations. They amount to the same idea: We can develop weapons that do not require proof testing of their reliability. In fact, a very small proportion of our nuclear tests today are conducted for this purpose. The individual nonnuclear components, including permissive action links, can be tested readily in the laboratory or with conventional explosions. All that is lacking is the policy guidance to require it. So don't be deceived by the often stated argument: We must test for reliability. That is not the reason for the vast majority of our tests.

Finally, let us examine the most contradictory argument of all. It is said that reduced confidence in our arsenal would lead to a decision to launch even more weapons in the event of a nuclear conflict. The whole rationale of an SDI is to reduce confidence in the opponent's ability to attack our silos. Gradual deterioration of both side's arsenals would in fact perform the same function as an SDI. The administration seems to want it both ways, depending on the context of the argument. They want SDI, they don't want a CTB. This completes the pattern of disregard for logic and the capabilities of the most modern technologies in verification and warhead design. I wish the administration would turn this skeptical scrutiny on SDI. If we can indeed develop an impenetrable shield to make these terrible weapons impotent and obsolete, we can certainly use the available technology to comply with a CTB!

The American people are indeed uncomfortable with the no-win theory of deterrence. We live in anxious and all too dangerous times. A CTB would serve as a valuable first step to a true cessation of the arms race; it would effectively prevent modernization on both sides. Over many years, 20, 30, 50, it would render our arsenals slowly impotent and obsolete without costing anyone a dime. The confidence that might be bred between our two nations as this slow and steady miracle occurred could materially change the climate of our relations with the Soviet Union. And we would be spared that looming danger on the horizon, that the many nonnuclear nations who signed and have compiled with the NPT would not be tempted to develop additional arsenals. The moment of truth for the NPT will occur in 1991. What will we say to them? What will they say to us?

At the recent NPT review conference, in August 1985, I was told over and over by representatives of our allies: "Keep your commitments to sit down and negotiate." And, "You hurt yourself and give the Soviet Union a great propaganda victory by refusing to talk to them about a comprehensive test ban." It is extremely hard to argue against that position. And the fact that the Soviets have suspended their testing for more than a year now just makes these remarks more urgent. Such a self-inflicted wound can be avoided, however, if the President will listen to our allies keep our commitments and promptly state a willingness to resume CTB negotiations. For this reason, I support the amendment.●

Mr. KENNEDY. Mr. President, I am prepared to vote.

The PRESIDING OFFICER. The Senator has 1 minute remaining.

The Lugar side has 26 minutes remaining.

The Senator from Maryland.

Mr. MATHIAS. Mr. President, I am also prepared to vote.

I just point out this has not only been supported by the past five administrations, including, as the Senator from Maine noted, President Eisenhower, but it is today supported by a majority of the American people. The Gallup Poll that was taken on June 8 showed that a clear majority of Americans favored the test ban.

It is an urgent subject. It is one on which I think the record is clear.

I urge the Senate to adopt this amendment, and I ask for the yeas and nays on the amendment.

Mr. KENNEDY. Yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. NUNN. Mr. President, will the Senator yield me about 10 seconds?

Mr. KENNEDY. I yield.

Mr. NUNN. Mr. President, I support the amendment. It is identical to the amendment we adopted 2 years ago by something like a 77 to 22 vote. It gives the President the latitude that he needs both in terms of verification and in terms of seeking a comprehensive test ban. It does not mandate a complete comprehensive ban. It gives a lot of leeway and flexibility.

I think it is a good amendment. I urge my colleagues to support it.

Mr. GOLDWATER. Mr. President, I yield 3 minutes to the Senator from South Carolina.

Mr. THURMOND. Mr. President, on the surface, this amendment seems to be a rather simple statement in support of controlling nuclear testing. The amendment, however, raises some serious issues that the Senate should consider very carefully. This amendment would endorse Senate ratification of a Threshold Test Ban Treaty and the Peaceful Nuclear Explosions Treaty before U.S. verification concerns have been addressed and satisfied. In addition, the amendment calls for the immediate resumption of the Comprehensive Test Ban Treaty negotiations.

Mr. President, verification is the heart and soul of any arms control agreement between the two superpowers. The Threshold Test Ban Treaty in its current form cannot be effectively verified. The Soviets have clearly violated the Limited Test Ban Treaty and have probably violated the Threshold Test Ban Treaty. Therefore, it is essential that the United States be guaranteed sufficient verification and enforcement provisions in any treaty.

Mr. President, President Reagan has stated if agreement can be reached with the Soviet Union on verification of the Threshold Test Ban Treaty, he is prepared to seek ratification of the Threshold Test Ban Treaty and the Peaceful Nuclear Explosions Treaty.

Mr. President, we need to ensure that any treaty concerning limiting nuclear tests can be vertified fully and accurately. Until the United States is assured of adequate verification provisions, the Senate should take no steps to undermine the President's negotiations with the Soviets.

Mr. President, I urge all of my colleagues to oppose this amendment.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. LUGAR. Mr. President, following the vote on the amendment of the distinguished Senator from Maryland will my amendment automatically be in order, and by what procedure does it become the pending amendment?

The PRESIDING OFFICER. When the Mathias amendment is disposed of the amendment of the Senator from Indiana will be in order.

Mr. LUGAR. Mr. President, is it true that whether or not the Mathias amendment passes, in the event that my amendment passes, will it prevail over both the Kennedy amendment and the Mathias second degree amendment?

The PRESIDING OFFICER. The Senator's amendment is a complete substitute, and the Senator is correct.

Mr. LUGAR. Mr. President, I ask these questions for the benefit of Members. In the event that the vote on the Mathias amendment is adverse, as I hope it will be, my substitute will be available. In the event the Mathias amendment should pass, my substitute will be available. In either case, if voted favorably, it would prevail.

Mr. GOLDWATER. Mr. President, I yield 2 minutes to the Senator from Virginia.

Mr. WARNER. Mr. President, I rise to oppose the Kennedy-Mathias amendment on nuclear testing. I would like to take this opportunity to address the issue of underground nuclear testing and its relationship to U.S. national security. In view of the Soviet moratorium on such testing announced by General Secretary Gorbachev, and the administration's determination to proceed with the U.S. underground test program, this issue is receiving heightened attention.

On April 29, 1986, the Committee on Armed Services conducted a hearing on nuclear testing issues. At that hearing we heard from administration officials and public witnesses on this important subject. In addition, earlier in April, the Subcommittee on Strategic and Theater Nuclear Forces—which I chair—conducted a hearing on the Department of Energy's National Security Programs. During this hearing the subject of nuclear testing—which would have a significant impact on our nuclear weapons programs—was discussed in considerable detail. I would like to share with my colleagues the information that was brought out during these hearings.

Effective and verifiable limitations on nuclear testing remain an important element in a broad spectrum of U.S. arms control objectives. However, there are two subjects that I would like to focus on today, and these are the key provisions of the amendment by my colleagues from Maryland and Massachusetts. The first is the Threshold Test Ban Treaty [TTBT] and the verification issues associated with that treaty. The second issue is the Comprehensive Test Ban Treaty [CTBT] and the question of whether the resumption of negotiations on a CTBT is in our national security interest at this time.

The United States and the Soviet Union signed the Threshold Test Ban Treaty in 1974, and although this agreement has not been ratified, both parties stated in 1976 that they would observe the 150 kiloton limit that it established. Because that the United States cannot effectively verify Soviet compliance with the TTBT, it places the highest priority in the nuclear testing area to resolving these verification problems. The Reagan administration has made several proposals to the Soviets to resolve these verification problems, including the President's proposal of March 14, 1986.

In that proposal, the administration again invited the Soviet Union to send scientists to the Nevada test site later that month to monitor a U.S. nuclear test. For the purpose of beginning a dialog, President Reagan agreed to forego any conditions on his unilateral invitation. At this time, the Soviets would be able to examine a proven technical method—known as CORR-TEX—to monitor the yields of underground tests. This technology can accurately determine test yields—to within plus or minus 30 percent—by measuring the propagation of the underground shock wave created by the nuclear explosion.

While the Soviets have rejected previous U.S. offers in this regard, I had hoped that they would respond more positively to this proposal. This would have been a good opportunity for General Secretary Gorbachev to demonstrate that his expressed willingness to discuss verification issues is more than an exercise in propagandizing. I was disappointed by the Soviet rejection of the President's offer, because I felt that it offered some hope of progress on the subject of nuclear testing limitations.

President Reagan has made it clear that if there can be agreement on the use of an effective verification system incorporating such a method to verify the TTBT, he would be prepared to move forward and seek ratification of both the Threshold Test Ban and Peaceful Nuclear Explosions agreements.

This amendment expresses the sense of the Congress that the President should submit the Threshold Test Ban Treaty for ratification prior to the resolution of these verification issues. I think this would be highly ill-advised. U.S. concerns about verification are particularly serious in view of the Soviet record of noncompliance with its arms control commitments, including likely violations of the TTBT and unambiguous violations of the Limited Test Ban Treaty of 1963. To submit this agreement before resolving our concerns would reduce any incentive

the Soviets might have to address these verification problems seriously.

Mr. President, as my colleagues know, United States and Soviet technical delegations met in Geneva during the week of July 28, 1986, to discuss nuclear testing issues. While the details of these discussions are confidential, I understand that they went well. The Soviets apparently listened with great interest to our discussion of the CORRTEX verification technology, and I understand that these delegations will be meeting again next month.

It is my firm hope that these discussions will lead to a resolution of U.S. concerns about nuclear testing verification, so that we might move forward with ratification of the TTBT and PNET agreements as the President has indicated he is prepared to do under those circumstances. I believe that a Senate amendment calling for the ratification of the TTBT before our verification concerns have been resolved would undermine any incentive the Soviets might have to agree to improve verification provisions. Adoption of this amendment would thus run counter to our national security interests.

On the subject of the Comprehensive Test Ban Treaty [CTBT], this remains a long-term objective of the United States. The Reagan administration's position on this is similar to that of previous administrations. The last several administrations have supported the goal of an effective and verifiable CTBT, but none of them tried or were able to conclude such an agreement.

A CTBT must be viewed in the context of overall U.S. security requirements. As long as the security of the United States and our allies continues to rely on a credible and effective nuclear deterrent, we must be able to continue nuclear testing. The United States must maintain a credible nuclear deterrent until a better alternative is available. It is only through regular nuclear testing that the reliability of the U.S. nuclear stockpile can be maintained with confidence. Without such testing, there would be strong pressures to increase the size of our stockpile to compensate for the resulting loss of confidence in its reliability.

There are numerous examples in the past when actual nuclear tests have identified serious weapon design problems that were not uncovered through computer simulations. In these cases, actual nuclear tests were required to correct these problems. As the United States continues to incorporate modern safety and security features into its weapons designs, these weapons must be tested to insure that they work. It should be noted that the small ICBM warhead will require such features because of its mobility and potential interface with the public. Without nuclear testing, the U.S. could not incorporate these important safety and security features without some loss of confidence in the reliability of our stockpile.

In addition, an important aspect of nuclear testing is weapons effects testing whereby nonnuclear components, such as electronics, are subjected to the effects of a nuclear explosion to test their hardness to these effects. The United States could not with confidence provide for the survivability of our satellites and command, control, and communications systems without such nuclear testing.

Nuclear testing over the years has enabled the United States to modernize and improve its deterrent force in response to the dynamic requirements of deterrence. As United States targeting policy has evolved, and as the Soviet target base has changed, the weapons needed to support our deterrence requirements have changed as well. Because of these changes, the weapons in the United States stockpile have become smaller, more accurate, and therefore less destructive. They may also have to become more specialized in response to Soviet efforts to make their important targets more difficult to target, either through hardening, construction of facilities deep underground, or mobility. Nuclear testing will be necessary to respond to such Soviet actions.

As a result of weapons developments over the years, the U.S. nuclear stockpile today is one-third smaller than it was in 1967. The total destructive power of our stockpile has been reduced by three-quarters since 1960. As a result, we have been able to maintain a credible nuclear deterrent with a smaller, safer and more secure nuclear stockpile.

As I said earlier, a Comprehensive Test Ban Treaty remains a long term objective of the United States. However, it must be viewed in the context of achieving broad, deep and verifiable arms reductions; substantially improved verification capabilities; expanded confidence building measures; and a greater balance in conventional forces. In addition, there remain serious problems with verifying a CTBT that must be resolved. In the meantime, our highest priority in arms control remains significant, equitable and verifiable reductions in strategic offensive forces.

Mr. President, I will conclude by again urging my colleagues to oppose the Kennedy-Mathias amendment on nuclear testing. The Senate's actions should be supportive of the administration's arms control efforts. These efforts will take time, and they can only be successful if they enjoy the support of the Congress. In view of the actions of the House of Representatives, the burden of supporting the administration's efforts has fallen entirely on the Senate. I am hopeful that we can reach agreement with the Soviet Union on improved verification provisions for the TTBT and PNET agreements. A ban on nuclear testing will remain a long-term goal, but I continue to believe that nuclear testing is in our national security interest until those circumstances exist under which we no longer rely on offensive nuclear weapons for deterrence.

Mr. President, I associate myself with the positions stated by the distinguished chairman of the Foreign Relations Committee and oppose this amendment.

Recently, the Soviets have shown a great and indeed a greater willingness to discuss this very issue that is before us tonight. During the week of July 28, 1986, United States and Soviet technical delegations met in Geneva for bilateral talks on nuclear testing issues.

This change of heart by the Soviets is a vindication of the administration's approach to nuclear testing limitations.

These discussions with the Soviets apparently went quite well and according to the United States representative, the Soviets listened to our discussions of the CORRTEX verification technology.

I also understand that further discussions are scheduled to take place next month.

Senate adoption of this amendment would undermine the administration during these important discussions and eliminate any incentive for the Soviets to agree to improved verification measures.

For that reason and such additional reasons that I have stated, I strongly oppose the amendment.

The PRESIDING OFFICER. Who yields time?

No time is sought.

The question is on agreeing to the amendment of the Senator from Maryland. On this question the yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Mississippi [Mr. STENNIS] is necessarily absent.

The PRESIDING OFFICER (Mr. SPECTER). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 64, nays 35, as follows:

[Rollcall Vote No. 189 Leg.]

NOT VOTING—1

Stennis

So the amendment (No. 2639) was agreed to.

□ 2210

Mr. KENNEDY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. NUNN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LUGAR addressed the Chair.

The PRESIDING OFFICER. The Senator from Indiana is recognized.

Mr. LUGAR. Mr. President, may I have the attention of my colleagues?

The PRESIDING OFFICER. The Senate will be in order.

□ 2220

Mr. LUGAR. Mr. President, let me describe the parliamentary situation. Senator KENNEDY offered an amendment. Senator MATHIAS then offered a second degree amendment, thus blocking the tree. We disposed of the Mathias amendment by adopting it. I am going to offer the substitute amendment now which I described earlier in the debate. In the event it is adopted, it takes out the Mathias amendment and becomes the action of the Senate this evening.

Many Members have asked if you can vote for both. The answer is yes. I presume many Members will do that, and I will be grateful for those votes.

AMENDMENT NO. 2640, SUBSTITUTE FOR AMENDMENT NO. 2638

Mr. LUGAR. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Indiana [Mr. LUGAR] proposes an amendment numbered 2640.

Mr. LUGAR. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In lieu of the language proposed to be inserted, insert the following:

A. FINDINGS. The Congress finds that:

(1) Ratification of the Threshold Test Ban Treaty (TTBT) and Peaceful Nuclear Explosions Treaty (PNET) with effective verification would be in the national security interest of the United States;

(2) Resolution of compliance questions arising from current verification shortcomings is essential to creating a climate in which TTBT and PNET could contribute to national security and the furthering of arms control objectives;

(3) Technical experts on nuclear testing from the United States and USSR have met in Geneva to discuss each side's views, and Soviet delegates expressed interest in pursuing U.S. concerns on TTBT verification;

(4) The Geneva technical experts meetings will resume in early September of this year;

(5) These meetings represent the best opportunity for moving forward with limitations on nuclear testing;

(6) The President is committed to moving forward on ratification of TTBT with PNET, if effective verification provisions can be negotiated;

(7) The Congress remains interested in the possibilities which may be afforded by a Comprehensive Test Ban (CTB);

(8) In examining the CTB question, innovative ideas have been brought forth which merit the serious attention of the Congress and the Administration; and

(9) Achievement of effective verification and ratification of TTBT and PNET would be a major breakthrough in US-Soviet relations upon which the President should seek to conclude further arms control agreements, especially those for significant reductions in existing nuclear weapons.

B. SENSE OF CONGRESS. It is the sense of Congress that:

(1) The President should be commended for bringing about the recent Geneva meeting on nuclear testing issues;

(2) The President should do everything possible to further the current Geneva talks of nuclear testing experts, including taking into account Soviet views;

(3) The President should seek to expand the experts meeting to the political level as soon as possible in order to negotiate effective verification of TTBT and PNET;

(4) The President should raise this as an issue of high priority with General Secretary Gorbachev at the next summit; and

(5) If effective verification is agreed, the President should seek Senate advice and consent to ratification of TTBT and PNET immediately.

C. REPORT. By February 1, 1987 the President shall submit a report to the Chairman of the Committee on Foreign Relations of the Senate and the Speaker of the House of Representatives. This report shall detail:

(1) Whether a CTB, or a ban on tests above the lowest verifiable yield, would contribute to U.S. national security, including our arms control objectives. If the Administration reports that they cannot, the report shall explain why;

(2) Whether a CTB, or a very low permitted yield could ever contribute to U.S. national security, including our arms control objectives, and if so, under what conditions;

(3) Whether a permitted yield below 150 kilotons could contribute to U.S. national security and arms control objectives, and under what conditions; and

(4) Whether an annual quota on tests could contribute to U.S. national security and arms control objectives.

D. COORDINATION OF THE REPORT. The President's report will be coordinated by the Director of The Arms Control and Disarmament Agency, with the Secretry of Defense, Secretary of Energy, Secretary of State, Director of Central Intelligence and all other responsible officials.

The PRESIDING OFFICER. The Chair will advise the Senator he has 3 minutes and 24 seconds remaining and 24 seconds remain to the opposition.

Mr. LUGAR. Mr. President, the Mathias amendment encourages the Soviet Union to focus on a comprehensive test ban instead of focusing on real reductions of existing nuclear weapons. Clearly, the negotiating position of the President of the United States is to reduce nuclear weapons, and not to pursue the illusory benefit which a comprehensive test ban would provide.

The Lugar amendment keeps our focus on real reductions of nuclear weapons. It seeks progress on nuclear testing where progress is possible: toward ratification of the Threshold Test Ban Treaty. It explores new ideas which have promise.

But, Mr. President, the significant difference——

Mr. WALLOP. May we have order in the Senate, Mr. President?

The PRESIDING OFFICER. The Senator is correct. The Senate is not in order. Will those seeking to converse please retire to the cloakroom?

The Senator from Indiana.

Mr. LUGAR. Mr. President, the Mathias amendment urged resumption of the comprehensive test ban talks. I would contend that the comprehensive test ban would harm U.S. security by halting modernization of our weapons, reducing their reliability, and because we could no longer test, a CTB would end efforts to improve safety and security of our weapons.

To leap for the comprehensive test ban at this point, it seems to me, is dangerous policy.

In the past, Senators have had the option of voting for what seemed to be a motherhood issue, and they left with something that seemed to offer peace and security.

Mr. President, that is not the way to proceed into these negotiations. To adopt the Mathias amendment is to undermine, in my judgment, our negotiating position in the coming days in Geneva.

I would hope, Mr. President, that adoption of the Lugar substitute would encourage an early move toward ratification of the Threshold Test Ban Treaty, but we would hold our fire with regard to accelerating movement toward the Comprehensive Test Ban Treaty.

We would, instead, focus upon our real efforts in Geneva to reduce existing nuclear weapons.

For these reasons, Mr. President, I ask Members to vote for the Lugar substitute in the vote we will now have. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The Senator from Maryland is recognized for 24 seconds.

Mr. MATHIAS. Mr. President, I would simply say that the language that the Senate has adopted tonight is the indentical language the Senate adopted by a vote of 77 to 22, 2 years ago. I think we muddy the waters if we change that language. I would hope we would not adopt the substitute.

The PRESIDING OFFICER. The Senator from Idaho.

SOVIET VIOLATIONS OF TEST BAN TREATIES MUST BE CORRECTED BEFORE SENATE CAN CONSIDER THEM

Mr. McCLURE. Mr. President, I rise in support of the amendment of the Senator from Indiana.

Mr. President, according to unclassified but authoritative information, there have been over 20 Soviet nuclear weapons tests underground believed to be likely or probable violations of the 1974 Threshold Test Ban Treaty. Moreover, according to unclassified but authoritative information, there have been over 30 Soviet underground nuclear weapons tests which have conclusively vented radioactive debris beyond Soviet borders, in violation of the 1963 Limited Test Ban Treaty.

I would like the legislative history of this amendment to show that there are both conclusive, clearcut Soviet violations, and probable or likely Soviet violations of nuclear testing treaties. I believe that the President should not ask the Senate for advice and consent for ratification of the Threshold Test Ban Treaty and the Peaceful Nuclear Explosions Treaty, until and unless United States concerns about Soviet violations can be alleviated, either by Soviet compliance, or by improved, effective verification which allows the United States to confidently conclude that Soviet violations have not occurred. It would be the height of folly for the President to ask the Senate for advice and consent to ratify a treaty which the United States believed that the Soviet Union had violated.

Mr. LUGAR. I yield back any remaining time.

The PRESIDING OFFICER. All time having been yielded back or expired, the question is on agreeing to the amendment. The yeas and nays have been ordered and the clerk will call the roll.

The bill clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Mississippi [Mr. STENNIS] is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 42, nays 57, as follows:

[Rollcall Vote No. 190 Leg.]

YEAS—42

NOT VOTING—1

Stennis

So the amendment (No. 2640) was rejected.

□ 2240

The PRESIDING OFFICER. The question now is on agreeing to the Kennedy amendment as amended by the Mathias amendment.

The amendment (No. 2638), as amended, was agreed to.

Mr. KENNEDY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. MATHIAS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GLENN. Mr. President, I have two amendments. Both of them can be disposed of in a matter of 3 or 4 minutes.

The PRESIDING OFFICER. If the Senator will desist, the question now recurs on the Wilson amendment No. 2595.

The Senator from Arizona.

Mr. GOLDWATER. Mr. President, the Senator from Ohio has yielded to me. We were going to have an amendment on the satellites but we have gotten a time agreement, I believe, with the Senator from Massachusetts on that for 1 hour. Is that correct, I ask the junior Senator from Massachusetts?

Mr. KERRY. Mr. President, that is correct. It is my understanding from the distinguished Senator from Virginia that that will be broken up with 40 minutes to the proponents and 20 minutes to the opponents. Am I correct?

Mr. GOLDWATER. That is all right. With this agreement for time, we begin on that tomorrow. Is that all right with the Senator?

Mr. KERRY. I understand we will go forward tomorrow with that?

Mr. GOLDWATER. Yes, Mr. President.

Mr. NUNN. Mr. President, I think we ought to have that by unanimous-consent agreement.

Mr. GOLDWATER. Mr. President, I ask unanimous consent that on the antisatellite weapons amendment, we have a time agreement of 1 hour, 40 minutes to the Senator from Massachusetts; 20 minutes to our side.

The PRESIDING OFFICER. Is there objection?

Mr. NUNN. Mr. President, would the Senator from Arizona add to that unanimous-consent request that there be no other amendments in order to that amendment?

Mr. GOLDWATER. Yes, that no amendments will be in order.

Mr. KERRY. Mr. President, and it is my understanding that there will be an up-or-down vote; is that correct?

Mr. NUNN. I do not think we have given that assurance to anyone yet. I do not think we ought to set that precedent. I shall have no desire to move to table, but I do not think we should give that by unanimous consent

Mr. KERRY. Reserving the right to object, may we discuss that for a moment?

Mr. GOLDWATER. Is the Senator asking that there be no tabling motion?

Mr. KERRY. The Senator is asking that.

Mr. GOLDWATER. I could not make that agreement.

Mr. NUNN. We may not move to table but I do not think we should begin doing that because if we do, we are going to run into a lot of problems with other amendments. I think as managers, we have to reserve the right to table.

Mr. KERRY. May I ask, Mr. President——

The PRESIDING OFFICER. Will all those carrying on conversations please retire to the Cloakroom.

The Senator from Georgia may resume.

Mr. NUNN. I yield to the Senator from Massachusetts.

Mr. KERRY. Mr. President, I simply want to ask the distinguished ranking member whether there is an agreement as to the last two amendments

and that there would be an up or down vote.

Mr. NUNN. I do not think there was an agreement not to table.

Mr. GOLDWATER. There was no discussion that I know of about no tabling. We agreed to no amendments, and to change the 1 hour and 20 minutes to 1 hour, with 40 minutes going to the Senator from Massachusetts and 20 minutes to our side.

Mr. KERRY. That is acceptable to the Senator from Massachusetts.

The PRESIDING OFFICER. Is there objection?

Mr. NUNN. Does that include the provision that there be no other amendments to this amendment?

The PRESIDING OFFICER. That has been stated.

Is there objection? Without objection, it is so ordered.

Mr. GOLDWATER. Mr. President, I would like to go a little further, because we are not through yet tonight. As to amendments, there will be two by Senator GLENN, but I see no reason for there being any more rollcall votes tonight. I anticipate if we could pick up just a few cats and dogs, we do not need a lot of talk and we could be out of here in another half hour.

Mr. NUNN. Will the Senator from Arizona yield for a brief observation?

Mr. GOLDWATER. Certainly.

Mr. NUNN. The Senator from Delaware [Mr. ROTH] has indicated he has five amendments. One or two of them are going to require a good amount of debate. We hope we can get agreement to start them tomorrow. He is willing to come in as early as we are permitted to come in and we can make a lot of progress early.

I know both managers are willing to get here very early. We cannot order time tonight; we are not trying to. The Senator from Massachusetts may want to follow those with his 1 hour. Then we will have made a great deal of progress. I know Members would like to get out of here at a reasonable hour tomorrow afternoon. We would, too. But we have a lot of work to do so it is going to take unprecedented cooperation.

Mr. GOLDWATER. Mr. President, may I ask the majority leader if we could open up at 9 o'clock?

□ 2250

Mr. DOLE. Mr. President, on that question and other questions, the distinguished minority leader and this Senator have been working on an agreement on a couple of very important issues—Contra aid and South Africa. In my opinion, without trying to guess what will happen, I think we have made some progress. We hope to be meeting again in the minority leader's office, I would say, in the next 15 or 20 minutes.

It has been my hope to try to get this agreement this evening. I know that many of our colleagues may have an interest in that agreement and might want to take that into account. Even though there are no more rollcall votes, they may want to remain on the floor until we come forth with some agreement or announce that we may not be able to do it until tomorrow morning. I am willing to come in early tomorrow morning to accommodate the managers, because we would like to complete action on this bill tomorrow.

We have only one more week before the recess is scheduled to start. We need to take action on the debt ceiling. We need to take action on both Contra aid and South Africa.

I hope there is a good opportunity to finish this bill tomorrow.

Mr. BYRD. Mr. President, will the distinguished majority yield?

Mr. DOLE. Senator GOLDWATER has the floor.

Mr. GOLDWATER. I yield.

Mr. BYRD. Unless these cloture votes are vitiated, we will have to have some rollcall votes tonight—unless they are vitiated or put over. I just want to say that to Senators. We may agree on no more rollcall votes on this bill, but we still have the cloture votes facing us.

Mr. DOLE. If we get an agreement, we can vitiate the votes. that is part of the agreement. If everybody will give us another hour to work on that, I would ask unanimous consent that those cloture votes be postponed until midnight.

Mr. BYRD. I have no objection.

The PRESIDING OFFICER. Is there objection?

Mr. NUNN. I will not object, but I hope we could postpone them until early in the morning; because the probability is that if we stay here until 12 or 12:30 tonight, we will have nothing in the morning. If there is any way we can carry those cloture votes over and let them be the first order of business—if the leaders do not get together—that would give us a much more productive day tomorrow.

Mr. DOLE. The only point I wish to make is that it probably will take an hour to get the agreement once we bring it to the floor. There is an hour right there. I would be happy to delay the cloture votes until tomorrow morning, but I think we should understand——

Mr. LEAHY. Mr. President, reserving the right to object, and I shall not, I am wondering if the distinguished leaders might consider going along the lines of what the Senator from Georgia has said: To postpone the cloture votes to a time, say, a relatively few minutes after the normal time of the leaders in the morning. For one thing, some, like myself get here at 7:30 in the morning. But it would also be an incentive for everybody to get here. It would remove the problem the Senator from Georgia has raised, that maybe a lot more amendments might be offered if we think there is going to be another vote at 12. I will not object to whatever the leadership wants.

Mr. DOLE. I do not have any problem with that. I am perfectly willing to suggest that unless we otherwise have an agreement, we postpone the cloture votes until 1 hour after we convene tomorrow morning.

Mr. BYRD. Mr. President, I will be happy to agree to that, because if further progress can be made on the DOD bill tonight, that will be fine. I am concerned that we may be here until midnight and still not be able to finalize our agreement. If the distinguished majority leader would follow the suggestion to put it over until the morning, it might be better.

Mr. RUDMAN. Mr. President, will the Senator yield?

Mr. DOLE. I yield.

Mr. RUDMAN. It is my understanding that if this agreement is reached, the debt ceiling is ready for third reading and that there would be no need to have any amendments to it. In fact, no other amendments would be in order. Is the Senator from New Hampshire correct?

Mr. DOLE. No other amendments would be in order.

Mr. RUDMAN. If you reach agreement.

I suggest to the leader that no one is more anxious than I am to get this to the House because of the time that remains. The fix for Gramm-Rudman-Hollings is contained therein. If you are going to do it in the morning, it would take about 20 minutes. I agree with the Senator from Georgia.

Mr. DOLE. I am not trying to keep anyone here, but I alert Members that we may be on this floor in 45 minutes, trying to get the agreement. So if anybody has an interest in South Africa or Contra aid, they should be alerted to that. We do not want anybody to lose their rights in the process.

Mr. President, I make that request.

The PRESIDING OFFICER. Is there a unanimous consent request pending?

Mr. DOLE. I ask unanimous consent that the votes on the cloture motions be postponed until 1 hour after we convene tomorrow morning.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Mr. President, reserving the right to object, that would include the live quorum.

Mr. DOLE. Yes.

The PRESIDING OFFICER. Is there objection?

Mr. NUNN. Reserving the right to object, could we have an understanding that we are going to come here with the intention of getting started on the DOD bill when we come in, and if cloture intervenes, we will be inter-

rupted? We will start in the morning. The Senator from Delaware is here, and he has five amendments.

Mr. BYRD. Mr. President, as to tomorrow, the cloture on the DOD bill will be up.

Mr. NUNN. It is my hope that that would not be necessary. Everyone has helped and cooperated and no one has tried to hold up this bill, and I believe we can continue this way. I hope we will not have to have a vote on the DOD bill.

Mr. BYRD. Mr. President, if the cloture votes on the Byrd amendment and on the Dole amendment to the Byrd amendment are put over and those votes occur tomorrow and they fail—both of them—then the next vote immediately would be on the cloture motion to shut off debate on the DOD bill. That is what the distinguished Senator from Georgia is hoping to avoid, and I would like to avoid it, too, because there is no desire to filibuster these bills.

Mr. HARKIN. Mr. President, reserving the right to object——

Mr. DOLE. Mr. President, let us get our agreement, if we can.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request propounded by the majority leader?

Mr. HARKIN. Mr. President, reserving the right to object, I inquire of the majority leader: Did he say that they might be back on the floor yet this evening with the unanimous-consent agreement, or will you do it tomorrow morning?

Mr. DOLE. I would like to do it this evening, or we would take about an hour of the time tomorrow from the DOD bill.

Mr. GOLDWATER. Mr. President, we have been here all day. We have worked hard on this bill all this week, and this kind of tactic just delays and delays and delays. I think it is time we knock it off and go home.

We have two amendments of the Senator from Ohio that will not take long. We have an agreement with the distinguished Senator from Massachusetts for a vote tomorrow. We have an understanding with the Senator from Delaware that we will be in and we will be ready to get on the road as soon as 9 o'clock comes and we have had a vote on cloture, if you want to have a vote on cloture.

I would like to see if we can stop the discussion now and get on with the business; and the majority leader and the minority leader can get back in their little hole and talk about it. [Laughter.]

The PRESIDING OFFICER. Is there objection to the unanimous-consent request propounded by the majority leader? The Chair hears none, and it is so ordered.

Mr. GLENN. Mr. President, I have sent an amendment to the desk, and I ask for its immediate consideration.

Mr. GOLDWATER. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

The question recurs now on the Wilson amendment, No. 2595.

Mr. GLENN. I ask unanimous consent that that amendment be set aside for the consideration of these two amendments.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The Senator from Ohio is recognized.

Mr. GLENN. Mr President, may we have order?

The PRESIDING OFFICER. All those who wish to carry on conversations will please retire to the cloakroom.

□ 2300

Mr. DOLE. Mr President, will the Senator from Ohio yield?

Mr. GLENN. I yield.

Mr. DOLE. Mr President, let me indicate that we are going to convene at 8 o'clock in the morning, which means the cloture vote, if it will occur, will be at 9.

The PRESIDING OFFICER. The Senator from Ohio is recognized.

AMENDMENT NO. 2641

(Purpose: To establish rights relating to the use, release, and disclosure of technical data)

Mr. GLENN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Ohio [Mr. GLENN] proposes an amendment numbered 2641.

Mr. GLENN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 186, between lines 9 and 10, insert the following new section:

SEC. 963. RIGHTS RELATING TO THE USE, RELEASE, AND DISCLOSURE OF TECHNICAL DATA.

(a) RIGHTS IN TECHNICAL DATA.—Subsection (a) of section 2320 of title 10, United States Code, is amended to read as follows:

"(a)(1) The Secretary of Defense shall prescribe regulations to define the legitimate interest of the United States and of a contractor or subcontractor in technical data pertaining to a product or process. Such regulations shall be included in regulations of the Department of Defense prescribed as part of the Federal Acquisition Regulation. Such regulations may not impair any right of the United States or of any contractor or subcontractor with respect to patents or copyrights or any other right in technical data otherwise established by law.

"(2) Such regulations shall include the following provisions:

"(A) In the case of a product or process that is developed by a contractor or subcontractor exclusively with Federal funds, the United States shall have the unlimited right to use, release, or disclose technical data pertaining to the product or process.

"(B) In the case of a product or process that is developed by a contractor or subcontractor exclusively at private expense, the contractor or subcontrator may limit the right of the government to use (for other than internal operations and maintenance purposes), release, or disclose to persons outside the Government technical data pertaining to the product or process.

"(C) Notwithstanding subparagraph (B), the Government may use, release, or diclose technical data pertaining to a product or process to persons outside the Government if such technical data is otherwise publicly available or if—

"(i) such use, release, or disclosure—

"(I) is necessary for emergency repair and overhaul; or

"(II) is a use, release, or disclosure to a foreign government that is in the interest of the United States and is required for evaluational or informational purposes;

"(ii) such use, release, or disclosure is made subject to a prohibition that the person to whom the data is released or disclosed may not further use, release, or disclose such data; and

"(iii) the contractor or subcontractor asserting the restriction is notified of such use, release, or disclosure.

"(D) In the case of a product or process that is developed in part with Federal funds and in part at private expense, rights in technical data pertaining to such product or process shall be negotiated as early in the acquisition process as practicable (preferably during contract negotiations), based upon consideration of the following factors:

"(i) The statement of congressional policy and objectives in section 200 of title 35, the statement of purposes in section 2(b) of the Small Business Innovation Development Act of 1982 (15 U.S.C. 638 note), and the declaration of policy in section 2 of the Small Business Act (15 U.S.C. 631).

"(ii) The interest of the United States in increasing competition and lowering costs by developing and locating alternative sources of supply and manufacture.

"(iii) The interest of the United States in encouraging contractors to develop at private expense items for use by the Government.

"(E) A contractor or subcontractor, or a prospective contractor or subcontractor, that develops a product or process exclusively at private expense may not be required, as a condition of being responsive to a solicitation or as a condition of being responsive to a solicitation or as a condition for the award of a contract, to sell or otherwise relinquish to the United States any rights in technical data that would permit the use by, or release or disclosure of, such data to persons outside the Government except under the conditions described in paragraph (2)(C).

"(F) The Secretary of Defense may—

"(i) negotiate with a contractor or subcontractor to contract for the acquisition of rights in technical data pertaining to a product or process developed by such contractor or subcontractor exclusively at private expense if necessary to develop alternative sources of supply and manufacture; or

"(ii) agree to limit rights of the United States in technical data pertaining to a product or process developed entirely or in part with Federal funds if the United States receives a royalty-free license to use, release, or disclose the data for purposes of the United States (including purposes of competitive procurement).

"(2) In this subsection, the term 'Federal Acquisition Regulation' means the single system of Government-wide procurement regulations as defined in section 4(4) of the Office of Federal Procurement Policy Act (41 U.S.C. 403(4)).".

(b) VALIDATION OF PROPRIETARY DATA RESTRICTIONS.—Section 2321 of title 10, United States Code, is amended—

(1) in subsection (a)(2), by inserting ", at any time before the end of the 3-year period beginning on the date the final payment is made on the contract," after "may review"; and

(2) in subsection (b)—

(A) by inserting "specific" after "state the" in clause (1); and

(B) by striking out "and" at the end of clause (1);

(C) by striking out the period at the end of clause (2) and inserting in lieu thereof "; and"; and

(D) by adding at the end the following new clause:

"(3) state that evidence of acceptance by any Federal agency of a restriction identical to the asserted restriction within the 3-year period preceding the challenge shall serve as justification for the asserted restriction if—

"(A) the acceptance occurred after a review of the accepted restriction under this section; and

"(B) the accepted restriction was asserted by the same contractor or subcontractor to whom such notice is being provided.".

(c) CONFORMING AMENDMENTS.—Section 1202 of the Department of Defense Authorization Act, 1985 (10 U.S.C. 2301 note), is amended—

(1) by inserting "and" at the end of paragraph (4);

(2) by striking out "; and" at the end of paragraph (5) and inserting in lieu thereof a period; and

(3) by striking out paragraph (6).

(d) DEADLINE FOR REVISION OF REGULATIONS.—The regulations required by section 2320(a)(1) of title 10, United States Code (as amended by subsection (a)), shall be prescribed not later than 180 days after the date of the enactment of this Act.

Mr. GLENN. Mr. President, I rise for the consideration of an amendment to the DOD authorization bill concerning technical data rights. This amendment is similar to legislation passed by the House Committee on Armed Services as noncontroversial.

The Packard Commission report states that—

DOD must recognize the delicate and necessary balance between the Government's requirement for technical data and the benefit to the Nation that comes from protecting the private sector's proprietary rights. That balance must be struck so as to foster technological innovation and private investment which is so important in developing products vital to our defense.

I agree wholeheartedly with that objective.

As currently drafted, title 10, United States Code, sections 2320 and 2321, which were enacted as part of the Defense Procurement Reform Act, title XII of the fiscal year 1985 DOD authorization bill, establish the parameters for DOD regulations on the right to use technical data provided the Government by its contractors.

There are two problem areas with the exiting language which my amendment addresses in order to preserve the delicate balancing of interests between the Government's need to acquire the right to release technical data to ensure competition and the contractor's interest in preserving valuable property rights in data on products which they develop at their own expense.

First, my amendment would amend section 2320 of title 10 to clarify that: if the item to which the technical data relates was developed at private expense, the contractor retains the unlimited rights in data and cannot be required, as a condition of bidding on a Government contract, to give the Government the right to release to other contractors technical data relating to items the contractor developed at its own expense. This intent was not made clear in the original language.

For those items developed at Government expense, the Government has unlimited rights in the technical data. With respect to items developed with a mixture of Government and contractor money, my amendment states that the Government's rights to use, release, or disclose technical data must be negotiated in the contract for delivery of the item to which the data relates or as soon thereafter as practicable. The determination of such rights should be based on consideration of pertinent factors such as the Government's need to retain the right to use, release, or disclose the data in order to complete future requirements, and the contractor's interest in retaining rights in data relating to innovative products or processes, including those related to items for sale to the general public.

Second, this legislation will amend section 2321 of title 10: First, to prohibit the Government from challenging a contractor's restriction on the release of technical data at any time after the 3-year period beginning on the date the final payment is made; second, to require the Government to state the specific grounds for challenging the asserted restriction; and third, to allow the contractor to assert in response to a challenge, that a Federal agency has reviewed the same data within the 3-year period preceding the challenge, and found the contractor's restriction appropriate.

Mr. President, I am concerned that in our zeal to expand competition in the defense sector and obtain data rights for the Government, we could be causing great damage to private industry. I strongly feel that it is essential to protect the legitimate rights in its privately developed technology. I believe this legislation goes a long way toward providing the balance of the Government's need for technical data and the need to protect the private sector's proprietary rights.

Mr. President, the Packard Commission made certain recommedations with regard to technical data rights that companies should have in the interest of promoting more investment in research and development.

I have put those recommendations into legislative language. We have discussed it with both sides of the aisle. I believe the floor managers are both prepared to accept this.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. GOLDWATER. Mr. President, We have looked at his amendment and find nothing wrong with it. We will accept it.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Ohio.

The amendment (No. 2641) was agreed to.

Mr. GLENN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GOLDWATER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2642

(Purpose: To grant access to the Secretary of Defense to all informatoin regarding nuclear proliferation matters)

Mr. GLENN. Mr. President, I send to the desk another amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Ohio [Mr. GLENN] proposes an amendment numbered 2642.

Mr. GLENN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 229, between lines 14 and 15, insert the following new section:

SEC. 1221. NUCLEAR NON-PROLIFERATION INFORMATION.

Section 602 of the Nuclear Non-Proliferation Act of 1978 (22 U.S.C. 3281) is amended—

(1) in subsection (c), by inserting "the Department of Defense," after "Department of State,"; and

(2) by adding at the end the following new subsection:

"(f) Upon request, the Secretary of Defense shall have access to all information regarding nuclear proliferation matters which the Secretary of State or the Secretary of Energy has or is entitled to have, including all communications, materials, documents, and records relating to such matters, including cables from United States diplomatic missions.".

Mr. GLENN. Mr. President, the Nuclear Nonproliferation Act of 1978 [NNPA] contains a reporting provision—section 602(c)—requiring a number of executive branch agencies to keep the Congress fully and currently informed with respect to their activities to carry out the purposes and policies of the NNPA and to otherwise prevent proliferation, as well as with respect to the activities of foreign nations which are of significance from the proliferation standpoint.

The agencies that are required to report to the Congress on such matters are the Department of State, the Arms Control and Disarmament Agency, the Department of Energy, and the Nuclear Regulatory Commission.

By an oversight, the agency most directly responsible for protecting U.S. national security, the Department of Defense, was omitted from this list.

My amendment rectifies this oversight so that the Department of Defense has the same responsibility as the other agencies to report to the Congress on this important issue. It also provides for the Secretary of Defense to have access to all information, including intelligence information, available to the Secretaries of State and Energy regarding nuclear proliferation matters.

Nuclear proliferation matters include agreements for cooperation and negotiations loading thereto, as well as subsequent arrangements.

Mr. President, I believe this amendment has also been accepted on both sides. It corrects a technical oversight in the Nuclear Nonproliferation Act of 1978, which requires certain departments of Government to report to Congress on a regular basis. The Department of Defense, which does have a vital role in this area, was left out. This enters them as another one of those agencies required to report.

It has been accepted on both sides.

I move the amendment.

The PRESIDING OFFICER. Is there further debate?

Mr. NUNN. Mr. President, this is a good amendment. I think it is a correction of the oversight in the law. The Department of Defense has a real role to play here.

I think it is a good amendment. I urge its adoption.

Mr. GOLDWATER. Mr. President, we have no objection to this amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Ohio.

The amendment (No. 2642) was agreed to.

Mr. GLENN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GOLDWATER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GLENN. I yield the floor.

Mr. GOLDWATER. Mr. President, I think there is another amendment from Senator ABDNOR.

The PRESIDING OFFICER. The Senator from South Dakota is recognized.

The question automatically recurs on the Wilson amendment No. 2595. It must be set aside by unanimous consent to proceed.

Mr. ABDNOR. Mr. President, I ask unanimous consent that the pending amendment be set aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from South Dakota is recognized.

AMENDMENT NO. 2643

(Purpose: To limit the use of funds to award of a contract to conduct the Minuteman Education Program)

Mr. ABDNOR. Mr. President, I send an amendment to the desk on behalf of myself and Senator MELCHER and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from South Dakota [Mr. ABDNOR], for himself and Mr. MELCHER, proposes an amendment numbered 2643.

Mr. ABDNOR. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 229, between lines 14 and 15, insert the following:

SEC. 1221. MINUTEMAN EDUCATION PROGRAM.

Notwithstanding any other provision of this Act, none of the funds appropriated pursuant to an authorization contained in this or any other Act may be obligated or expended by the Air Force to award a contract for the conduct of the graduate Minuteman Education Program unless the contract requires the contractor—

(1) to integrate class schedules under the program with full-time missile crew duty schedules;

(2) to provide a resident faculty, at each Air Force installation where the program is conducted, each member of which has obtained the terminal educational degree provided in the field the faculty member teaches under the program; and

(3) to provide library resources, at each such installation, adequate to support the program at such installation, including a full-time librarian who has obtained a degree in library science.

Mr. ABDNOR. Mr. President, this amendment is designed to maintain the educational quality of the Strategic Air Command Minuteman Education Program [MMEP] currently offered at the six Minuteman installations to provide incentive for encouraging young officers to volunteer for missile duty. The program provides an opportunity to officers to pursue an MBA while engaged full time in missile crew duty. At three of the six installations, an alternative degree program is also offered.

Last year, students enrolled in the existing MMEP at the Ellsworth Air Force Base in western South Dakota brought to my attention their concerns with respect to a potential change in the program. Pursuant to their objections, and those raised by students at other Minuteman installation, I developed language which was included in the Senate Appropriations Committee report on the fiscal year 1986 DOD appropriations bill (S. Rept. 99-176) directing the Air Force to provide the House and Senate Armed Services and Appropriations Committees with its rationale for pursuing a change in the existing program. The Air Force was asked to pay particular attention to the impact on those students currently enrolled in the MMEP, the Federal budgetary impact, and the admission criteria and academic specifications of the new program.

We finally received this report, which was due 6 months after enactment of the DOD appropriations bill, yesterday, As I mentioned earlier, Mr. President, concerns have been raised about the educational quality of the new program relative to the existing program that began more than 20 years ago. In my view, this long-awaited report does little to put to rest those concerns.

It is my intention to ensure the continued high academic standards of the MMEP as evidenced in the existing program. In the words of the Air Force report,

The current MMEP has an unchallenged reputation for quality.

Mr. President, I do not believe it to be in the best interest of the students or the Air Force to sacrifice this "reputation for quality" in the interest of saving a few dollars—particularly when the report also indicates the Air Force believes it can work with the educational institutions which currently serve the Minuteman installations to reduce program costs.

Mr. President, I applaud and support wholeheartedly efforts to save the Federal taxpayers' dollars. My amendment does not alter current law pertaining to the award of Federal contracts. Rather, it simply is intended to ensure the unique nature of the MMEP—which integrates class scheduling with full-time missile crew members' scheduling—and the academic credentials of the program are maintained. My amendment accomplishes this by requiring the inclusion of several pertinent specifications in the solicitation of bids for the MMEP.

Mr. President, I believe my amendment is acceptable to both sides, and I move its adoption.

Mr. President, I yield to my other sponsor, Senator MELCHER.

Mr. MELCHER. Mr. President, I am pleased to cosponsor this amendment relating to the Minuteman Educational Program conducted by the Air Force.

This amendment establishes certain standards which the Air Force must follow when it puts the Minuteman Education Program out for competitive bidding. In the first place, I am opposed to lowering the quality of education by submitting it to competitive bidding, but since the Minuteman Program is going to be included in the trend of competitive bids on Government services, I believe it is prudent to require some very basic and minimum standards to ensure that the quality of education is not sacrificed for the sake of saving a little money.

The Minuteman Program has been valuable, particularly at isolated Air Force bases. For example, at the Malstrom Air Force base in Montana, more than 400 students have earned M.B.A. degrees since 1967, including civilians who can participate in the program for a modest fee. The University of Montana which currently runs the program provides full-time instructors qualified in their respective fields, full library services and accommodates the schedules of service personnel. It is entirely possibly that unless we provide some direction to the Air Force, these essential criteria may be neglected under competitive bidding.

If we are going to place the Minuteman Educational Program out to bid, let's make sure that quality, rather than penny pinching is the primary concern.

Mr. GOLDWATER. Mr. President, this is a very important part of the Strategic Air Command program to provide master's degrees for those officers who have to spend their time sitting down in silos.

We will be glad to accept it.

The PRESIDING OFFICER. Is there further debate?

Mr. NUNN. Mr. President, I have conversed with the Senator from Montana on this and also the Senator from South Dakota. These are very important bases.

The personnel there are extremely important to our national security in areas of Montana, Wyoming, North Dakota, South Dakota, the upper tier. I recommend we approve this amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from South Dakota.

The amendment (No. 2643) was agreed to.

Mr. ABDNOR. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GOLDWATER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GOLDWATER. Mr. President, does the Senator from Virginia have an amendment?

Mr. WARNER. Yes.

The PRESIDING OFFICER. The Senator from Virginia is recognized.

The question recurs on the Wilson amendment and we need unanimous consent to proceed.

Mr. WARNER. Mr. President, I ask unanimous consent to set that pending amendment aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Virginia is recognized.

Mr. WARNER. I thank the President for bringing this to the Senator's attention.

AMENDMENT NO. 2644

(Purpose: To terminate all residuary rights of use held by the United States in certain warehouses owned by the Commonwealth of Virginia)

Mr. WARNER. Mr. President, I send to the desk an amendment on behalf of myself and Mr. TRIBLE.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Virginia [Mr. WARNER], for himself and Mr. TRIBLE, proposes an amendment numbered 2644.

Mr. WARNER. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 317, after line 22, insert the following:

SEC. 2192. RELEASE OF CERTAIN USE RIGHTS HELD BY THE UNITED STATES.

(a) IN GENERAL.—The Administrator of General Services shall release to the Virginia Port Authority, an instrumentality of the Commonwealth of Virginia, all residuary rights of use held by the United States in three warehouses located in the city of Norfolk, Virginia, within the area operated as a public port facility and known as the Norfolk International Terminals.

(b) TIME LIMITATION; COMPENSATION.—The Administrator of General Services shall execute such documents and take such other actions as may be necessary to release, within 180 days after the date of the enactment of this Act, the rights referred to in subsection (a). The release shall be made without any compensation in addition to compensation paid to the United States for such warehouses and other facilities by the city of Norfolk, Virginia, in 1968.

Mr. WARNER. Mr. President, I have asked the distinguished managers of this bill for clearance. I understand the minority side has it cleared and on the majority side the distinguished chairman of the MilCon Committee has just cleared it.

I represent, Mr. President, the full committee has received the clearance of Senator THURMOND.

Therefore, I ask it be adopted.

Mr. GOLDWATER. Mr. President, just a quick explanation.

Mr. WARNER. Mr. President, this amendment restores the full property ownership rights to three warehouses on the Norfolk terminal waterfront to the Virginia Port Authority.

A restriction on the use of these facilities is traceable back to the original purchase of the former Hampton Roads Army Terminal from the Maritime Administration in 1968.

All other Federal Agencies, including the Army and Navy, who possessed use rights to this property have long since voluntarily relinquished those rights.

The General Services administration [GSA] retained use rights of these warehouse facilities for supply distribution functions until such time as they no longer had such requirements. In June 1985, GSA indicated that they no longer needed these facilities for supply functions, yet in August stated that they intended to make them available to other Government Agencies.

This position gives the GSA virtual perpetual ownership of this Virginia waterfront property and the warehouse facilities thereon.

Mr. President, my office—with the assistance of my colleagues from Virginia, Senator TRIBLE and Congressman WHITEHURST and others—has tried for over a year to resolve this situation to no avail.

Therefore, I ask my colleagues to support this amendment to restore the full, legal rights of ownership of these three warehouses to the Virginia Port Authority within 180 days from the date of enactment of this legislation.

I thank the Chair.

□ 2310

(Mr. MURKOWSKI assumed to chair.)

Mr. GOLDWATER. Mr President, that explanation satisfies me and I will be glad to accept the amendment.

Mr. NUNN. Would the Senator from Virginia indicate whether there is substantial value here? I have no way of knowing what kind of value the Government is giving up.

Mr. WARNER. Mr President, I say to my distinguished colleague from Georgia that there is no great value. We are taking about use rights which may be of some modest value, but they pass from the Federal Government to a State port authority.

Mr. NUNN. Would the Senator indicate what these will be used for? What will the warehouses be used for?

Mr. WARNER. The State will utilize them in conjunction with the expansion of the port facilities down there. We are hopeful that the channel in the Hampton Roads area will be deepened and that will enable this area to grow and prosper.

Mr. NUNN. Is the GSA now occupying these buildings?

Mr. WARNER. They have been.

Mr. NUNN. What will they do in lieu of that?

Mr. WARNER. I am not able to inform the Senator what they will do.

Mr. NUNN. I just wonder, if the Federal Government is actually using these and if we are taking them from the Federal Government and giving them to the State government, I wonder what the Federal Government is going to do in lieu thereof.

Mr. WARNER. Mr. President, I respond to my distinguished colleague, apparently, while the GSA has indicated they no longer need them, they made an offer to other Government agencies to use them. They are badly needed by the State government.

Mr. NUNN. So they are not being used now?

Mr. WARNER. Not by the GSA at the present time as far as I know.

Mr. NUNN. Mr. President, I am not going to object. We just received the amendment. We have not had a chance to check into it and look into it. I will not object.

Mr. WARNER. If I might interrupt my distinguished colleague from Georgia, I would suggest we could adopt the amendment and by the time we go to conference I will provide such assurances as the Senator may require.

Mr. NUNN. I find that acceptable. We will need more information.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (No. 2644) was agreed to.

AMENDMENT NO. 2645

(Purpose: To extend until June 30, 1996, the period during which the Secretary of Energy may enter into contracts to provide community assistance payments to the Los Alamos School Board under the Atomic Energy Community Act of 1955)

Mr. BINGAMAN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection to setting aside the amendment of the Senator from California?

Without objection, the clerk will report the amendment of the Senator from New Mexico.

The bill clerk read as follows:

The Senator from New Mexico [Mr. Bingaman], for himself and Mr. Domenici, proposes an amendment numbered 2645.

Mr. BINGAMAN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment reads as follows:

On page 339, between lines 2 and 3, insert the following new section:

SEC. 3134. EXTENSION OF DATE FOR CERTAIN CONTRACT AUTHORITY.

Section 94 of the Atomic Energy Community Act of 1955 (42 U.S.C. 2394) is amended by striking out "June 30, 1986" and inserting in lieu thereof "June 30, 1996".

Mr. BINGAMAN. Mr. President, the amendment which my senior colleague from New Mexico and I are proposing amends the Atomic Energy Community Act of 1955 to allow a 10-year extension in the contract for community assistance payments between the Department of Energy and the Los Alamos School Board.

Earlier this year on March 10, 1986, the Secretary of Energy submitted to Congress, a report on the Community Assistance Program carried out under the Atomic Energy Community Act of 1955. One of the recommendations in that report was, and I quote:

In consideration that the tax base and tax revenues of the Los Alamos School Board are limited, and that the financial assistance rendered by DOE to the Los Alamos School Board is instrumental in DOE's capability to attract and retain a highly qualified work force at Los Alamos National Laboratory, DOE believes that annual financial assistance payments should be continued by extending the current contract for an additional 10 years.

I am informed that legislation to implement this recommendation should have been part of the DOE legislative proposal this year that and it was only through oversight that it was omitted. The Department of Energy supports, obviously, the amendment which we are offering. It is vital in attracting and retaining the very highly educated employees whom the national laboratory seeks to employ.

Mr. President, this is a simple amendment. The committee has authorized the $5,844,000 in community assistance payments for the Los Alamos School Board in our bill as requested by DOE, this amendment simply allows the existing relationship between the Department of Energy and the Los Alamos School Board to continue. While we are authorizing the contract to be extended for up to 10 years as DOE desires, any payments under that contract will, of course, continue to be subject to annual appropriations. Mr. President, I believe the amendment has been cleared on both sides. I would yield to my senior colleague from New Mexico prior to moving the adopting of the amendment.

Mr. DOMENICI. Mr. President, I join my colleague from New Mexico, Senator BINGAMAN, in sponsoring this amendment to extend the contract authority for the Department of Energy [DOE] under the Atomic Energy Community Act of 1955.

DOE recently submitted a report entitled "Financial Assistance Under the Atomic Energy Community Act of 1955, As Amended", concerning the community assistance program. In the report, DOE recommends that financial assistance contract be extended for the Los Alamos School Board.

The community of Los Alamos was established in 1942 by the Manhattan District of the U.S. Army Corps of Engineers. It was selected because of its remoteness and topography as the site to conduct research and development activities for the purpose of developing an atomic bomb. During World War II, the activities of the scientists, their administrators and families, and all community services were under military control. Families willingly endured hardships at Los Alamos because of the war. Today, the same remoteness still exists at Los Alamos.

The Los Alamos School District is geographically coincident with Los Alamos County and most of the students are children of employees at the Los Alamos National Laboratory [LANL]. The quality of schools and levels of services provided the community of Los Alamos is a major factor in attracting and retaining highly scientific employees at the national laboratory. Prospective laboratory employees routinely ask for information about the quality of the schools in the area.

DOE and its predecessor agencies have provided annual financial assistance to the school board from 1967 to the present time. DOE's financial assistance is a significant part of the school board budget because the school board is limited in its ability to obtain additional resources because state laws prohibit the local school board from: levying taxes for operational expenses; charging tuition; and charging fees for required courses. The Los Alamos School Board has reviewed various options regarding financial assistance, and it is the school board's position that an extension of the present contract is the most practical and effective means for DOE to provide such financial assistance, and DOE has concurred as stated in the report.

Mr. President, we must maintain the financial assistance program to the Los Alamos school system in order to continue to attract and retain a highly qualified work force at LANL.

DOE's recommendation states that a minimum period of 10 years for contract extension should be continued. Therefore, I urge the adoption of the amendment.

Mr. WARNER. Mr. President, I represent to the chairman that this amendment should be cleared on this side. It has been reviewed by staff and it is a perfectly orderly extension, as I understand it. It should be adopted.

Mr. BINGAMAN. I thank the Senator from Virginia. I know of no opposition to the amendment, Mr. President. I suggest that we are ready for a vote.

Mr. NUNN. Mr. President, we have cleared this amendment and we have no objection.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (No. 2645) was agreed to.

Mr. BINGAMAN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOMENICI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOMENICI. Mr. President, I have two amendments. I am not going to offer the one on the entitlements until tomorrow when the Senator from Arizona has checked it. But there is one with reference to the blue ribbon commission.

Might I ask the managers of the bill if they are ready to accept the Domenici amendment with reference to the blue ribbon commission's recommendations, or would you rather wait until morning?

Mr. GOLDWATER. We are not ready.

Mr. DOMENICI. I am in no hurry.

Mr. GOLDWATER. We will take it up tomorrow.

Mr. President, are there any more amendments?

CORRECTION OF AMENDMENT NO. 2597

Mr. NUNN. Mr. President, I have one small matter here that I think we can dispose of very rapidly.

Mr. President, I offer this amendment to correct a technical error that occurred in the submission of Amendment No. 2597 to the desk last evening. I ask unanimous consent that this amendment reflect the amended text, which I will send to the desk.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The amended text of amendment No. 2597 reads as follows:

On page 197, between lines 12 and 13, insert the following new section:

SEC. 1106. CONVERSION OF CHROMIUM AND MANGANESE ORE TO HIGH CARBON FERROCHROMIUM AND HIGH CARBON FERROMANGANESE.

(a) IN GENERAL.—During fiscal year 1987 and during each of the six succeeding fiscal years, the Administrator of General Services shall obtain bids from domestic producers of high carbon ferrochromium and of high carbon ferromanganese and award contracts for the conversion of chromium and manganese ores held in the National Defense Stockpile into high carbon ferrochromium and high carbon ferromanganese, respectively.

(b) STOCKPILE GOALS.—(1) Contracts awarded under subsection (a) shall provide for the addition of not less than 53,500 short tons of high carbon ferrochromium and 67,500 short tons of high carbon ferromanganese to the National Defense Stockpile in each of the fiscal years referred to in the preceding sentence.

(2) If, in any fiscal year referred to in subsection (a), the minimum quantity of high carbon ferrochromium or high carbon ferromanganese to be added to the National Defense Stockpile, as prescribed in paragraph (1), is not met, the quantity of such material to be added to such stockpile in the succeeding fiscal year shall be increased by the quantity of the deficiency.

(c) SEVEN-YEAR MINIMUM QUANTITIES.—The total quantities of high carbon ferrochromium and high carbon ferromanganese to be added to the National Defense Stockpile over the seven fiscal years referred to in subsection (a) shall be as follows:

(1) High carbon ferrochromium, 374,000 short tons.

(2) High carbon ferromanganese, 472,000 short tons.

(d) In this section, the term "National Defense Stockpile" means the stockpile provided for in section 4 of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98c).

Mr. NUNN. Mr. President, has this amendment been adopted? Has that correction been made?

The PRESIDING OFFICER. Unanimous consent to make the correction has occurred.

Mr. NUNN. I thank the Chair.

ROLE OF UNDER SECRETARY OF DEFENSE IN POLICY FOR INTELLIGENCE ACQUISITION

● Mr. DURENBERGER. Mr. President, I would like to commend the members of the Armed Services Committee for the heroic efforts they have made in the Defense authorization bill for fiscal year 1988 to reform procedures within the Department of Defense to develop and procure weapon systems. I believe that special praise is due to Senator QUAYLE and other members of the Subcommittee on Defense Acquisition Policy. Their proposal to establish an Under Secretary of Defense for Acquisition is an important step toward insuring that the weapons and support systems this country buys are consistent with our strategy for national security.

I would, however, take this opportunity to pose a few questions to Senator QUAYLE in order to clarify the role and responsibilities of the proposed Under Secretary of Defense for Acquisition.

As chairman of the Select Committee of Intelligence, I have found that the intelligence the Defense Department uses in the development and design of a weapon system is critical to the weapon's effectiveness. Currently, a number of methods—some formal, some informal—are used to bring intelligence estimates into the acquisition cycle. Needless to say, the quality of this intelligence and the way in which it is incorporated into the development of a weapon can determine whether the weapon can carry out its intended mission, or whether a particular weapon is even the best choice for a particular mission.

Therefore, I would first like to ask Senator QUAYLE, since intelligence can be such an important part of defense acquisition, what authority and what responsibilities will the Under Secretary have to determine requirements for the use of intelligence in the acquisition cycle?

● Mr. QUAYLE. Generally speaking, the committee avoids giving detailed instructions to the Secretary of Defense for specific procedures to be used in acquisition decisions. Even so, it is our view that assigning reponsibility for policies concerning how intelligence would be used in the acquisition cycle to the Under Secretary would be consistent with the other duties he is assigned and, in fact, would probably be necessary for him to carry out his mission. It is also our view that the Under Secretary should be the official responsible for establishing requirements for the use of intelligence at various steps in the acquisition cycle.

● Mr. DURENBERGER. This would not imply, however, that the Under Secretary of Defense for Acquisition would be a producer of intelligence, would it?

● Mr. QUAYLE. No; it would not. As recommended by the Packard Commission, we believe that the Joint Chiefs of Staff should be responsible for the actual production of threat assessments and other such estimates for the Department of Defense. The Under Secretary would only be an intelligence consumer. Still, the Under Secretary would determine whether the intelligence supporting an acquisition decision was adequate, and like other Defense officials, he could request whatever additional information he might need from the Intelligence Community through the Director of the Defense Intelligence Agency.

● Mr. DURENBERGER. Thank you. Once again, I commend you and the other members of the committee for the fine work they have done. I would urge my colleagues to give your proposal the support it so well deserves.●

MC ALESTER ARMY AMMUNITION PLANT CONTRACTING-OUT STUDY

Mr. BOREN. Mr. President, my colleague, Mr. NICKLES, and I want to draw to the attention of the full Senate the problems we have discovered in the administration of the Army Materiel Command over the activity of conventional ammunition and ammunition-related components missions/functions. This activity includes renovation, demilitarization and supply depot operation in support of all DOD components including the Army, Navy, and Air Force to meet peacetime, mobilization and sustained combat ammunition requirements.

The Army Materiel Command announced in late February a new decision to again study commerical activities for possible performance by a private contractor at the McAlester, OK, and Crane, IN, Army ammunition plants. We have been amazed at the blatant disregard for DOD directives as well as congressional mandates.

The very basic belief that this mission should be a combination of Government owned-Government operated and Government owned-contractor operated to provide a balance in defense readiness is the driving force that brings us to the floor today.

I want to thank the committee for inserting language in the fiscal year 1987 Defense authorization bill that prevents funding the present CA activity until GAO completes a study concerning the cost effectiveness of such a conversion and its effects on the defense readiness and mobilization base. I do have concern that the termination date of the ban, March 31, 1987, might impede the thorough investigation that I feel is necessary to find a final and absolute answer to this question of contracting out our entire conventional ammunition and ammunition-related function.

We have written a rather lengthy letter to the Comptroller General listing many of the concerns to which we want answers. We feel so strongly about the impact of contracting out the entire mission of convention ammunition and ammunition missions/functions that we want to bring to the attention of our colleagues and their staff the full text of this letter. We will appreciate a comprehensive review of the findings in the GAO review including a long hard look at what the contracting out of this entire function means in peacetime, mobilization and sustained combat ammunition requirements.

Mr. NICKLES. Mr. President, I rise today to join my good friend and colleague, Mr. BOREN, in voicing grave concern with regard to what I feel is an immediate threat to our national defense readiness.

As you may recall, May 8 of this year, Mr. BOREN and I introduced S. 2430, which would protect the security of the United States by ensuring the quality of munitions manufactured at the McAlester Army Ammunition Plant, McAlester, OK. This legislation would clarify that Congress intended that both ammunition manufacture and depot level maintenance of ammunition were meant to be mission-essential in terms of contracting out by placing both of these missions under core logistics functions.

Because I strongly believe that the manufacture of a Mark 84 bomb, which was similar to those used in the Libyan strike, is "mission-essential" and should not, therefore, be subject to contracting out, I join my colleague in inserting a copy of our letter to the Comptroller General of the United States, to ask clarification and expansion of the study of GAO.

Mr. President, I request unanimous consent that the text of our letter be included in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
*Washington, DC, August 7, 1986.*

Hon. CHARLES A. BOWSHER,
*Comptroller General of the United States, Washington, DC.*

DEAR MR. BOWSHER: We are writing to bring to your attention a matter of great concern—the problems we have discovered in the administration of the Army Material Command over the activity of conventional ammunition and ammunition-related components mission/functions. This activity includes renovation, demilitarization and supply depot operation in support of all DoD components including the Army, Navy and Air Force to meet peacetime, mobilization and sustained combat ammunition requirements. We would appreciate our concerns contained herein incorporated in the study instituted recently by GAO on this subject.

Since late February of this year when an announcement of a new decision to study commercial activities for possible performance by a private contractor at the McAlester, Oklahoma, and Crane, Indiana, Army Ammunition Plants was made, we have been in a very dissatisfactory dialogue with the Army.

We are convinced that this entire mission under AMC should be a combination of government owned-government operated and government owned-contractor operated to provide a balance in defense readiness.

The tactics employed during the initiation of this 1986 contracting-out study are unbelievable in light of directives from Congress and the Department of Defense.

We understand that the Army directives state that CA function expansions shall not include functions under contract to a small or small and disadvantaged business. Yet, AMCCOM directed McAlester to include the 8a set-asides to be included in the new study. We support contracting-out where services are readily available in the private sector and saves taxpayers dollars and does not impact on defense readiness. It was distressing to receive calls from 8a contractors whose contracts were thrust under the contracting out review umbrella.

A letter, dated March 29, 1985, from the Deputy Secretary of Defense to the Chairman of the Senate Armed Services Committee, states in part: "It is the policy of the Department of Defense to maintain an in-house capability, managed by government personnel and operated by either government or contractor personnel (or both), to meet the wartime requirements for depot level logistical support to the armed forces . . . we intend to perform the work in the most cost-effective manner, consistent with the need to maintain both a government and a commercial industrial base." In this letter is a list of Department of Defense core logistics activities including the depot-level distribution and maintenance of mission-essential materiel at the McAlester Army Ammunition Plant in Oklahoma. Yet the entire mission at McAlester was included in the CA review that began in February.

Circular A-76 states that contracting-out cannot be used to justify conversion to contract solely to avoid personnel ceiling or salary limitations. Enclosed is a copy of a directive from the Deputy of Resources and Management for AMC, the purpose of which is the reduction of AMCCOM end strength via commercial activities program.

In November, 1984, a Decision Summary for a CA review of the McAlester Army Ammunition Plant was forwarded to HQDA from the former commanding general at headquarters, U.S. Army Armament, Munitions and Chemical Command in Rock Island, Illinois. His recommendation was to continue in-house performance of the MCAAP mission functions.

In reading through his reasons, one cannot help but come to the same conclusion that contracting-out the entire base of conventional ammunition and ammunition-related components mission impacts drastically on defense readiness. He states that MCAAP, as a government operation, is able to insure direct support to our armed forces "in the world's current volatile environment without the risk of delays due to labor disruptions. . . . the plant has a viable, proven mobilization expansion plan that provides for effective transition of the work force and facilities to meet the substantial increases in ammunition supply support." To quote further, "MCAAP is one of the DoD activities that will take the brunt of initial surge impact for shipping ammunition to various theaters of operation during mobilization. . . . MCAAP has proven its ability to meet mobilization and surge requirements during the Korean Conflict, Vietnam, Lebanon, El Salvador, Grenada and other emergency situations. MCAAP's uninterrupted ability to immediately respond to support US forces is only assured with a continued in-house operation."

The loss of "corporate knowledge" when government operated facilities are contracted out is well documented. The concern expressed by the former commanding general in his recommendation not to contract out McAlester includes the fact that Hawthorne Ammunition Plant, when contracted out, required 2210 days of government employee assistance. If McAlester and Crane, the two remaining government-operated ammunition plants are contracted out, there would be no base from which to draw assistance. He states, "There is no question that a large number of these people will leave for other civil service employment. . . . will result in a loss of knowledge and skills that can never be replaced. The experience of HWAAP will be repeated at MCAAP, with the trained and skilled work force protecting their 15 to 25 year investment in federal service."

We want to do everything to insure that this study provide a complete picture of the entire mission of conventional ammunition and ammunition-related components. For instance, it occurs to us that this mission is a likely candidate that should be considered for possible transfer to the Defense Logistics Agency as a service-wide function in tune with the Department of Defense reorganization. We fully believe that a comprehensive study would prove that this mission should also be listed as core logistics and, therefore, not subject to contracting out.

In addition to the consideration of the transfer of this function to DLA and the definition of this function as core logistics, several questions should be answered including some from the earlier AMC recommendation not to contract out MCAAP:

1. Will contracting out MCAAP missions/functions further worsen an existing situation by dispersing the current skill base at MCAAP and similarly impact on private industry as the successor commercial contractor recruits skills to assemble a replacement skill base to operate MCAAP production facilities?

2. Will contracting-out MCAAP missions/functions increase or decrease skilled workers in the conventional and nonconventional ammunition field?

3. Will contracting-out MCAAP missions/functions prematurely retire MCAAP employees possessing the skills as has been experienced by the Army in the HWAAP experience?

4. Should MCAAP be converted to a contract method of performance and the current on hand government skills do not

accept employment with the contractor, will the unique demilitarization of a variety of military munitions mission at MCAAP come to a standstill?

5. How would contracting-out impact on the side-by-side, hands-on training and supervised handling of munitions McAlester presently provides to National Guard and USAR units, representing 12 states and Puerto Rico? This type of training is not acceptable under contractor operations due to infringement on contractor operations and taking workload away from contractor personnel covered under the union agreements.

We assume that contracted-out operations must be re-competed at proper intervals. What is the track record on these competitions? Are there sufficient bidders or does the operation become sole-sourced by default? If so, what is the economic impact?

We understand that the military personnel assigned to HWAAP are to be transferred. Hawthorne is a small town and cannot support the recreation facilities presently supported by the Morale, Welfare and Recreation Fund that must be discontinued. What problems does this present?

Mr. Bowsher, we are interested in a final and correct decision to the concerns we have listed here today regarding the contracting-out of the conventional ammunition and ammunition-related components mission. We will appreciate any assistance that you can provide to see that there is a comprehensive review of this issue including a long hard look at what the contracting out of this entire function means in peacetime, mobilization and substained combat ammunition requirements. Enclosed are copies of materials that should be helpful.

Sincerely,

DON NICKLES,
*U.S. Senator.*
DAVID L. BOREN,
*U.S. Senator.*
WES WATKINS,
*Member of Congress.*

### UNIVERSITY RESEARCH: THE HEART OF FUTURE NATIONAL SECURITY

Mr. PRESSLER. Mr. President, during the current debate on the Department of Defense authorization bill, a great deal of time has been spent on the subject of national security—and rightly so. However, there is one vitally important area to our national security which has received little attention: This is the state of our Nation's research and technology base in our colleges and universities.

Defense modernization in the decades ahead will greatly depend on the investment we make today in basic university research. Our university research facilities and equipment are outdated and in desperate need of renovation. Additionally, the number of foreign students studying in technical and scientific fields in the United States has risen dramatically in recent years—a growth not matched by U.S. students. Over one-half of our graduate degrees in engineering are now being awarded to foreign nationals.

The increase of foreign students studying in the United States is not necessarily bad. In fact, it is a reflection of the high-quality academic institutions and faculty we have here in America. However, many of these foreign students return to their home countries where their U.S. education will make them valuable resources in the development of foreign defense technologies.

We are developing the largest scientific research program in history, the SDI, while university-based research, on which we rely so heavily for technological advancement, is in a weakened state. We are expecting our scientists to develop the most technologically advanced defense system in the world, and they need our support.

Last year, Congress recognized this need. A new line item was added to the Department of Defense authorization bill entitled the "University Research Initiative." This new, unbudgeted item was a badly needed initiative to help revitalize our university research equipment and facilities. It was to be funded at $25 million for fiscal year 1986, with a doubling and redoubling of funding in fiscal years 1987 and 1988. However, on the advice of the President's science policy adviser, Dr. Keyworth, Congress accelerated the funding for this initiative and $100 million was authorized. I applaud Congress and the administration for recognizing the need for an investment in university-based research.

In the fiscal year 1987 Department of Defense authorization bill, approximately $49.5 million is authorized for university research, and a doubling of that funding is suggested for fiscal year 1988. It is my hope that the Armed Services Committee, as well as the Appropriations Committee will reaffirm their commitment to improving university research and include the $99 million in the fiscal year 1988 bill. This might seem to be an odd time to address the fiscal year 1988 DOD bill. However, rebuilding the research infrastructure is a long-term investment. Thus, it requires a long-term commitment, not just year-to-year "quick fixes." I would also urge that when implementing the "undistributed reductions" included in this bill, the Department of Defense take into consideration the crucial role university research plays in national security.

As many of my colleagues know, I have introduced legislation which would provide increased support for university research capabilities, as well as other areas of national need. My legislation, the Strategic Defense Education Act, has received letters of support from well over 50 major colleges and universities across the Nation. Many of them specifically commented on the importance of the University Research Initiative Program in the Department of Defense authorization bill.

Mr. President, the importance of the technology base funding within the research, development, test, and evaluation section of this bill cannot be overstated. In order to develop high-technology and advanced weapon systems, we must first ensure we have top-notch research infrastructure. With our past successes, we tend to take this for granted. Do not forget the technology gap of the 1950's, when the Soviet launching of Sputnik I led Congress to pass the National Defense Education Act [NDEA]. At that time, Congress declared, and I quote, "The national interest requires * * * that the Federal Government give assistance to education for programs which are important to our defense. * * *"

The university research initiative is a reaffirmation of this congressional declaration. I urge my colleagues on the Appropriations Committee to fully fund the university research components of this legislation. Adequate support for university-based research is the heart of our future national security.

## ROUTINE MORNING BUSINESS

Mr. DOLE. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business not to extend beyond the hour of 11:45 p.m.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

### SOUTH AFRICAN LIBERAL OPPOSES SANCTIONS

Mr. PRESSLER. Mr. President, one of the assumptions underlying the actions of those who support punitive economic sanctions on South Africa is that all progressive people, including South African progressives or liberals, support sanctions.

Nothing could be further from the truth. As I found on a recent trip to South Africa, the principal engine for change in South Africa is the business community. The business community's record of opposition to apartheid and support for progressive reform in their nation's economics and politics is well documented. These people need the encouragement which is made possible by outside investment in, and trade with, white and nonwhite South African businesses. They do not need, nor do they want, the discouragement, despair and economic decline which sanctions will impose on them and the rank and file nonwhite and white citizens of South Africa.

Mr. President, in this regard, I would like to call to the attention of our colleagues and others who read the RECORD, an excellent piece on Helen Suzman's recent article written by William Safire in the August 7, 1986, New York Times. I ask unanimous consent that the article appear at this point in the RECORD. Ms. Suzman is a South African liberal who recently spoke out against sanctions as a way to end apartheid.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE SUZMAN PLAN

(By William Safire)

WASHINGTON.—The Big Lie being sold and swallowed in the debate on South Africa is this: If you are against sanctions, you are for apartheid.

Robert Mugabe, the Marxist who brought one-party black rule to Zimbabwe, said it again this week, denouncing Margaret Thatcher for having "chosen the path of supporting apartheid." A British Labor Party leader predicted that the U.S. Congress would soon force President Reagan to go along with sanctions, making Britain "the only protector of apartheid in the world."

Effective demagoguery, but a lie. The equivalent red herring would be: If you are for sanctions, you favor a bloody race war.

Mrs. Thatcher and Mr. Reagan have spoken out against apartheid—"repugnant" is the favored adjective—but seem to be standing against a tide of public opinion that says "Well, what are you going to do about it?"

They do not have a satisfying answer to that for two reasons. One is that the pace of dismantling apartheid has been too slow; the striking-down of miscegenation laws and the hated pass system shows real progress, but only whets the appetite for more drastic social change that no brutality can beat down nor censorship hide.

The other reason is that the "it" that so many people want something done about is not merely apartheid. By "it," they mean real political equality: one person, one vote. That means majority rule, and nonwhites are the overwhelming majority in South Africa. That means and end to white governments as the Afrikaners have known it for three centuries; that means the same kind of black rule that exists elsewhere in Africa, and most white South Africans would rather remain the oppressors than become the oppressed.

No democrat can oppose the idea of majority rule, but no realist thinks the outside world can bring it about now or soon. Forget about the imposition of black rule in this decade; it will not happen. Some of the whites with English ancestors would flee to Australia, but the Boers would stand and fight for their homeland—and in extremism, would use atomic weapons to "equalize" the fight against a black majority in revolution.

So what are we going to do about it? First, split the "it": one "it" is a transfer of power, which if it is to come soon would have to come on the wings of Communist-backed revolution. Many radicals want just that, and call on us to help by quarantining South Africa, bringing its economy to its knees, spreading misery and hunger—which would invite increased violence, repression and uprising. Mrs. Thatcher and Mr. Reagan are neither racist nor Fascist for refusing to go down that road.

The "it" we can do more about now is apartheid. Moral condemnations at brutal crackdowns, occasional applause at advances, diplomatic pressure to release Nelson Mandela and others imprisoned without trial, and a series of sustained, fine-tuned economic pressures and incentives will have an effect.

Helen Suzman, a longtime apartheid-fighter and a member of the opposition in South Africa's Parliament, wrote a stunning and seminal article in last Sunday's New York Times Magazine making the case against sanctions.

Mrs. Suzman's point is that power comes out of the end of a wallet—that is, the best way for blacks to gain both social standing now and political participation soon is for them to be part of a growing economy.

We should be investing, not disinvesting, with requirements that new industry train and employ skilled blacks; by strengthening labor unions and giving black consumers economic muscle for boycotts, the outside world can help bring about political power-sharing without revolution.

That's the sort of thing now derogated as "constructive engagement" by those impatient with the designated villains. Enough talk, they say, let's show 'em we can throw a thunderbolt from the moral high ground. Sanctions now! We'll all feel better by giving up lobster tails.

Hold on: I have long held that economic sanctions do work, and we should not be shy about using the power of our trade to twist political arms. It upsets me when Robert Dole buys votes in Kansas by euchring Mr. Reagan into subsidizing Soviet consumers with 50 million U.S. tax dollars. We should be putting the squeeze on repressive governments of all ideologies.

But we should put on that heat in a way and on a level to achieve our ends, which in South Africa means symbolic sanctions but no disinvestment. Our purpose is to use what leverage we can get to end apartheid now and start black political participation soon. Our purpose is not to overthrow Pretoria or help start a revolution.

## MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mrs. Emery, one of his secretaries.

## EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

## REGULATORY PROGRAM OF THE UNITED STATES GOVERNMENT—MESSAGE FROM THE PRESIDENT—PM 164

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Governmental Affairs:

*To the Congress of the United States:*

The publication of the *Regulatory Program of the United States Government* is the second in an annual series begun last year as part of our effort to improve the management of regulatory activity within the Executive branch. A major goal of this publication is to provide the public and the Congress with a greater opportunity to learn about and evaluate our regulatory priorities and procedures.

The *Regulatory Program* describes the 523 most significant regulatory activities planned for the year ending March 31, 1987. Over the coming months and years, the Director of the Office of Management and Budget will report periodically on the agencies' progress in carrying out these initiatives.

Federal regulation is one of the most important and costly activities of government, yet it has been managed even less systematically than government spending. Last year, I established the *Regulatory Program* to complement the other programs I put in place during 1981 to improve the quality and responsiveness of our regulatory efforts.

We have too little information on the benefits provided by the regulations we promulgate each year and even less information on the benefits of those already in effect. By developing better information on benefits, we can improve the setting of priorities that truly meet the Nation's needs. The *Program* will help us do that.

Moreover, we have only rough estimates of the total costs of regulations—ranging between $50 billion and $150 billion each year. While the American people pay such regulatory costs, they tend to be hidden in the prices consumers pay for goods and services. These costs could grow even larger, as there will be a tendency to maintain government programs through regulatory means when funding is not available.

Today, more than ever, it is essential for us to coordinate regulatory activity among the agencies, to increase accountability for regulatory programs, and to ensure that the most significant regulatory activities are given priority and are properly managed. Only through a coordinated executive review can regulatory activities provide the greatest real benefits to society as a whole.

Of course, this *Regulatory Program* by itself cannot ensure that all regulation will be well-conceived and beneficial to society. It can, however, highlight important regulatory activities under consideration. Thus, this *Regulatory Program* is an important addition to our wide-ranging efforts of regulatory oversight and review—designed to make government regulation the servant, not the master, of the American people.

RONALD REAGAN.

THE WHITE HOUSE, *August 7, 1986.*

## PRESIDENTIAL APPROVALS

A message from the President of the United States announced that the

President has approved and signed the following bills and joint resolutions:

On July 29, 1986:

S.J. Res. 274. Joint resolution to designate the weekend of August 1, 1986, through August 2, 1986, as "National Family Reunion Weekend".

S.J. Res. 279. Joint resolution to designate the month of October 1986, as "Lupus Awareness Month".

On July 31, 1986:

S. 1068. An act to eliminate unnecessary paperwork and reporting requirements contained in section 15(1) of the Outer Continental Shelf Lands Act, and sections 601 and 606 of the Outer Continental Shelf Lands Act Amendments of 1978.

On August 4, 1986:

S. 1874. An act to authorize quality educational programs for deaf individuals, to foster improved educational programs for deaf individuals throughout the United States, to reenact and codify certain provisions of law relating to the education of the deaf, and for other purposes.

On August 5, 1986:

S. 415, An act to amend the Education of the Handicapped Act to authorize the award of reasonable attorneys' fees to certain prevailing parties to clarify the effect of the Education of the Handicapped Act on rights, procedures, and remedies under other laws relating to the prohibition of discrimination, and for other purposes.

On August 6, 1986:

S.J. Res. 371, Joint resolution to designate August 1, 1986, as "Helsinki Human Rights Day".

## MESSAGES FROM THE HOUSE

At 2:10 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following bill, with amendments, in which it requests the concurrence of the Senate:

S. 140. An act to amend the Child Abuse Prevention and Treatment Act to establish a program to encourage States to enact child protection reforms which are designed to improve legal and administrative proceedings regarding the investigation and prosecution of the child abuse cases, especially child sexual abuse cases.

At 7:10 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 4333. An act to amend title 38, United States Code, to improve veterans' benefits for former prisoners of war; and

H.R. 4623. An act to amend title 38, United States Code, to improve the delivery of health-care services by the Veterans' Administration, and for other purposes.

## MEASURES REFERRED

The following bills were read the first and second times by unanimous consent, and referred as indicated:

H.R. 4333. An act to amend title 38, United States Code, to improve veterans' benefits for former prisoners of war; to the Committee on Veterans' Affairs, and

H.R. 4623. An act to amend title 38, United States Code, to improve the delivery of health-care services by the Veterans' Administration, and for other purposes; to the Committee on Veterans' Affairs.

## REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. McCLURE, from the Committee on Energy and Natural Resources, with an amendment:

S. 1319: A bill to relieve the Washoe County Water Conservation District, Nevada, of certain Federal repayment obligations (Rept. No. 99-381).

By Mr. McCLURE, from the Committee on Energy and Natural Resources, with amendments:

S. 1542: A bill to amend the National Trails System Act by designating the Nez Perce (Nee-Me-Poo) Trail as a component of the National Trails System (Rept. No 99-382).

By Mr. McCLURE, from the Committee on Energy and Natural Resources, with an amendment:

S. 1772: A bill to authorize and direct the Secretary of the Interior to convey certain real property to the Pershing County Water Conservation District (Rept. No. 99-383).

By Mr. D'AMATO, from the Committee on Appropriations, with amendments:

H.R. 5203: A bill making appropriations for the Legislative Branch for the fiscal year ending September 30, 1987, and for other purposes (Rept. No. 99-384)

By Mr. HELMS, from the Committee on Agriculture, Nutrition, and Forestry, without amendment:

H.R. 1260: A bill for the relief of Joe Herring.

By Mr. GOLDWATER, from the Committee on Armed Services, with an amendment:

S. 2477: A bill to authorize appropriations for fiscal year 1987 for intelligence activities of the U.S. Government, the Intelligence Community Staff, the Central Intelligence Agency Retirement and Disability System, and for other purposes.

By Mr. THURMOND, from the Committee on the Judiciary, without amendment and with a preamble:

S.J. Res. 322: Joint resolution to designate December 7, 1986, as "National Pearl Habor Remembrance Day" on the occasion of the anniversary of the attack on Pearl Harbor.

S.J. Res. 345: Joint resolution to designate the week beginning November 9, 1986, as "National Reye's Syndrome Awareness Week."

By Mr. THURMOND, from the Committee on the Judiciary, with an amendment and an amendment to the title and with a preamble:

S.J. Res. 367: Joint resolution to designate July 31, 1986, as "National Kidney program Day."

By Mr. THURMOND, from the Committee on the Judiciary, without amendment and with a preamble:

S.J. Res. 368: Joint resolution to designate the month of October 1986, as "National Spina Bifida Month."

S.J. Res. 386: Joint resolution to designate October 6, 1986, as "National Drug Abuse Education Day."

## EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. THURMOND, from the Committee on the Judiciary:

Louis G. DeFalaise, of Kentucky, to be United States Attorney for the Eastern District of Kentucky for the term of four years.

By Mr. DANFORTH, from the Committee on Commerce, Science, and Transportation:

James Eugene Burnett, Jr., of Arkansas, to be Chairman of the National Transportation Safety Board for a term of two years.

(The above nominations were reported from the Committee on Commerce, Science, and Transportation with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

Mr. DANFORTH. Mr. President, as in executive session, I also report favorably from the Committee on Commerce, Science, and Transportation, a nomination list in the Coast Guard which appeared in the CONGRESSIONAL RECORD on July 22, 1986, and, to save the expense of reprinting them on the Executive Calendar, I ask unanimous consent that they may lie on the Secretary's desk for the information of Senators.

The PRESIDING OFFICER. Without objection, it is so ordered.

## INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. STEVENS (by request):

S. 2724. A bill to amend title 5, United States Code, to establish a simplified management system for Federal employees, and for other purposes; to the Committee on Governmental Affairs.

By Mr. CRANSTON:

S. 2725. A bill to increase the amount of capital available to financial institutions and other agricultural lenders for loans to farmers by providing a secondary market for farm mortgages through the establishment of a federally chartered corporation, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. BRADLEY:

S. 2726. A bill to provide for a minimum price and an alternative production rate for petroleum produced from the naval petroleum reserves, and for other purposes; to the Committee on Armed Services.

By Mr. KERRY (for himself, Mr. SARBANES, Mr. DECONCINI, Mrs. HAWKINS, and Mr. D'AMATO):

S. 2727. A bill to extend the life of the Department of Justice Assets Forfeiture Fund and the Customs Forfeiture Fund through fiscal year 1989, to make amounts from the funds available to the Secretary of Education and the Secretary of Health and Human Services for drug abuse education and prevention programs, and for other purposes; to the Committee on Finance.

## STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. STEVENS (by request):

S. 2724. A bill to amend title 5, United States Code, to establish a simplified management system for Federal employees, and for other purposes; to the Committee on Governmental Affairs.

CIVIL SERVICE SIMPLIFICATION ACT

● Mr. STEVENS. Mr. President, today, at the request of the administration, I am introducing the "Civil Service Simplification Act of 1986." This proposal would expand the personnel systems demonstrated at the two Navy laboratories in China Lake and San Diego, CA.

We are all too familiar with the shortcomings of the Federal pay and personnel systems. The pay comparability system has broken down. There is evidence to suggest that agencies are experiencing significant recruitment and retention problems in a wide variety of occupations. The General Schedule classification system is inflexible and its administration leads to the micromanagement of the Federal work force.

Several bills have been introduced which would establish separate agency personnel systems or otherwise address our recruitment and retention problems. Some Members believe we should amend the current special pay rate authority to provide higher minimum rates of pay for shortage occupations. Some Members believe we should test a variety of possible solutions, such as locality pay and collective bargaining. Some Members believe we should restructure the pay comparability system.

The administration believes that the Navy experiments are a success and should now be implemented Governmentwide. I agree they are successful, and I believe the Federal pay and personnel systems need to be retuned, and perhaps, restructured. I am not prepared at this time, however, to endorse the Governmentwide expansion of the concepts tested at these two Government laboratories.

Nonetheless, I look forward to working with the administration and other Members in the months and years ahead to come as we search for solutions to our pay and personnel problems. Mr. President, I ask that the bill and a section-by-section analysis appear in the RECORD following my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2724

A bill to amend title 5, United States Code, to establish a simplified management system for Federal Employees, and for other purposes.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "Civil Service Simplification Act of 1986".

SEC. 2. (a) Title 5, United States Code, is amended by inserting after chapter 51 the following new chapter:

"CHAPTER 52—SIMPLIFIED MANAGEMENT SYSTEM

"Sec.
"5201. Purpose.
"5202. Definitions.
"5203. Implementation.
"5204. Career Paths and Pay Bands.
"5205. Pay-for-Performance Plan.
"5206. Conversion Procedures.
"5207. Evaluation and Oversight.
"5208. Regulation.

"§ 5201. Purpose.

"It is the purpose of this chapter to promote better management of the Federal work force by establishing a Simplified Management System that will vest in Federal agencies the authority and responsibility to use flexibilities in assigning rates of basic pay in order to recruit, motivate, and retain a well-qualified work force. The Simplified Management System established by this chapter is an alternative to the classification and pay system established under chapter 51, subchapter III of chapter 53, and chapter 54 of this title. The Simplified Management System shall be incrementally expanded throughout the Federal work force in a controlled, measured, and budget-neutral manner.

"§ 5202. Definitions

"For the purposes of this chapter—

"(1) 'agency', 'class', 'grade', and 'position' have the same meanings as provided in section 5102(a) of this title;

"(2) 'budget-neutral' means that the aggregate costs (including administrative costs) directly and indirectly incurred under the Simplified Management System do not exceed the costs which would have been incurred had the Simplified Management System not been implemented;

"(3) 'career path' means a grouping of occupations that are determined by the Office to be sufficiently similar to warrant the assignment of the same set of pay bands;

"(4) 'employee' means an individual employed in or under an agency, but does not include—

"(A) an employee described by section 5102(c) or (d) of this title;

"(B) a member of the Senior Executive Service; or

"(C) an administrative law judge appointed under section 3105 of this title;

"(5) 'occupation' means a group of positions that are similar as to the kind of work and the kind of qualifications required;

"(6) 'Office' means the Office of Personnel Management; and

"(7) 'pay band' means a range of rates of basic pay encompassing the rates of pay for two or more grades (or, when determined appropriate by the Office in a particular situation, for a single grade) of the General Schedule under section 5332 of this title.

"§ 5203. Implementation

"(a) Subject to the requirements for approval provided in subsection (c) of this section, the head of an agency may implement the Simplified Management System for the agency, or for any component or location in the agency, or for any occupation or group of occupations within the agency, under a plan established under subsection (b) of this section. Any change in the coverage of the Simplified Management System in the agency, or in the plan, shall be subject to approval under subsection (c) of this section.

"(b) Prior to implementing the Simplified Management System, the head of an agency shall develop and submit for approval, in accordance with subsection (c) of this section, a plan for the operation of the Simplified Management System in the agency, component or location, or occupation or group of occupations affected. The plan shall set forth—

"(1) the proposed extent of coverage of the Simplified Management System under the plan;

"(2) the means by which the agency will ensure that the Simplified Management System will operate in a budget-neutral manner under the plan;

"(3) any career paths, pay bands, criteria, or qualification requirements proposed for the plan under section 5204(e) of this title;

"(4) the performance appraisal system under the plan, as required by chapter 43 of this title;

"(5) the pay-for-performance plan under section 5205 of this title;

"(6) the merit promotion plan, as required by regulations of the Office under authority of sections 3301 and 3302 of this title;

"(7) procedures for designating individuals for conversion to coverage under the plan, as required by section 5206(c) of this title; and

"(8) any other information required by the Office, including any required plans for evaluating the operation of the Simplified Management System.

"(c)(1) The President, or his designee, shall review each plan submitted by the head of an agency under subsection (b) of this section with respect to the adequacy of those provisions of the plan described in paragraph (2) of subsection (b), and shall approve the plan if he determines such provisions are adequate to ensure that the Simplified Management System will operate under the plan in a budget-neutral manner.

"(2) The Office shall review each plan submitted by the head of an agency under subsection (b) of this section with respect to the adequacy of those provisions of the plan described in paragraphs (1) and (3) through (8) of subsection (b), and shall approve the plan if the Office determines that such provisions comply with the provisions of this chapter and any regulations and criteria prescribed by the Office pursuant to this chapter, and that the Simplified Management System will operate under the plan in a manner that will accomplish the purpose of this chapter.

"(3) An agency plan for operation of the Simplified Management System must be approved under both paragraph (1) and paragraph (2) of this subsection before the agency may implement the Simplified Management System.

"(d) Notwithstanding any other provision of law, the coverage of an employee's position under the Simplified Management System shall not be subject to review or appeal, except as may be provided by the Office in its sole discretion.

"§ 5204. Career Paths and Pay Bands

"(a) The Office shall establish career paths and pay bands to be used by agencies which implement the Simplified Management System.

"(b) The Office, after consulting the agencies, shall develop and publish criteria, in such form as the Office may determine, which agencies shall follow for placing positions included in the Simplified Management System in the career paths and pay bands that are established by the Office. To

accomplish the purposes of this chapter, the Office may issue criteria which are derived from standards published under chapter 51 of this title, if such criteria provide for the grouping of classes of positions into career paths, and the consolidation of grades into pay bands.

"(c) Except as provided in subsection (e)(2), each agency shall assign positions under the Simplified Management System to career paths and pay bands on the basis of the criteria issued by the Office.

"(d) Except as provided in subsection (e)(2), the determination of the basic qualifications of individuals for positions under the Simplified Management System, in each career path and in each pay band, shall utilize qualification standards issued by the Office for positions under chapter 51 of this title, including subsequent changes or additions to those standards, or criteria developed and applied specifically for positions under the Simplified Management System. The determination of what standards or criteria to utilize shall be at the sole discretion of the Office.

"(e) When the Office determines that the career paths, pay bands, or criteria developed under subsection (a) or (b) of this section or the qualification requirements described in subsection (d) of this section are not appropriate to accomplish the purposes of this chapter for a particular agency, a component or location of an agency, or an occupation or group of occupations, the Office may, in its sole discretion—

"(1) develop career paths, pay bands, criteria, or qualification requirements for the agency, component or location, or occupation or group of occupations; or

"(2) authorize an agency to develop and submit to the Office for approval, proposed career paths, pay bands, criteria, or qualification requirements to accomplish the purposes of this chapter.

"(f) The minimum rate of basic pay for the Simplified Management System shall be the minimum rate for GS-1 under section 5332 of this title, and the maximum rate of basic pay shall be the rate payable for GS-18 under section 5308 of this title. The range of rates of pay for any given pay band shall be equivalent to the range of rates of basic pay for one or more grade levels of the General Schedule under Section 5332 of this title, and shall be adjusted to maintain such equivalency whenever the rates of pay of the General Schedule are adjusted under section 5305 of this title.

"(g) An individual shall be initially appointed as an employee under the Simplified Management System at the lowest rate in the applicable pay band that the agency determines, on the basis of the individual's qualifications and labor market conditions, is sufficient to recruit the individual.

"(h) When an agency determines that the recruitment or retention of well-qualified employees under the Simplified Management System is, or is likely to become, seriously handicapped by higher pay rates paid by Federal or non-Federal employers, or by undesirable working conditions, or a remote geographical location, the agency may—

"(1) increase pay rates within the pay band by an amount sufficient to recruit or retain such employees;

"(2) submit a request, if the maximum rate of the pay band is not sufficient to recruit or retain such employees, for approval of an increase of the pay band by an amount sufficient to recruit or retain the employees, except that—

"(i) such an increase in a pay band may not exceed twice the difference between the minimum and maximum rate of basic pay for the highest grade of the General Schedule encompassed by the pay band; and

"(ii) no pay band may exceed the maximum rate payable under section 5308 of this title; or

"(3) pay bonuses to such employees, either in lieu of establishing higher rates of pay under this subsection or in addition to such higher rates of pay, as appropriate, subject to the conditions specified in section 5303(b)(2)-(5) of this title.

The authority to approve or disapprove a request under paragraph (2) of this subsection shall be exercised by the President, or, in the event the President has authorized the Office to exercise the authority conferred on him by section 5303 of this title, by the Office.

"(i) An employee whose rate of basic pay falls below the minimum for the employee's pay band because of a failure to receive pay increases due to performance shall be placed in the next lower pay band, unless such action would place the employee in a pay band below the minimum pay band specified for the employee's career path. An employee who is placed in a lower pay band under this subsection shall not have his rate of basic pay reduced as a result of such placement.

"(j) For the purposes of section 5941 of this title, rates of basic pay fixed under this chapter shall be considered rates of basic pay fixed by statute.

"(k) The Office shall prescribe regulations to provide linkages between pay bands established under this chapter and General Schedule grade levels and rates of basic pay for purposes of administering chapter 55 of this title and any other provision of law or regulation.

**"§ 5205. Pay-for-Performance Plan**

"(a) Each agency which implements the Simplified Management System shall prepare a pay-for-performance plan, which shall be subject to the approval of the Office, and which shall include—

"(1) a method for determining progression within a pay band which (except as provided by section 5204(h)) shall be based on performance as determined by the performance appraisal system and which may take into account relative position in the range of rates of basic pay for the pay band;

"(2) an incentive and performance awards system which meets the requirements of chapter 45 of this title; and

"(3) a method to be used to determine the funds available to the agency for incentive awards, performance awards, and advancement of employees within the pay bands.

"(b) The Office shall prescribe regulations governing the application of a pay-for-performance plan in the case of an employee for whom a determination under section 4302 of this title for the latest appraisal period is not available.

**"§ 5206. Conversion Procedures**

"(a) The Office shall prescribe regulations governing the procedures to be used—

"(1) to convert individuals to coverage under the Simplified Management System;

"(2) to appoint individuals to coverage under the Simplified Management System for other Federal pay systems, or from the Simplified Management System in other components or locations of the agency or another agency; and

"(3) to terminate the Simplified Management System in an agency, or component or location thereof, or for an occupation or group of occupations in an agency, if the Simplified Management System is terminated under section 5207 of this title.

"(b) The Office may provide for restrictions on increases in rates of basic pay as appropriate for individuals who are appointed to positions under the Simplified Management System in an agency from another Federal pay system, or from the Simplified Management System in another agency.

"(c) Each agency which implements the Simplified Management System shall specify procedures for designating individuals for conversion to coverage under the Simplified Management System. Such procedures shall provide for written notification of conversion to each individual serving in a position at the time it is identified for conversion to the Simplied Management System. A conversion to coverage under the Simplified Management system shall be accomplished with no reduction in the rate of basic pay of the individual.

**"§ 5207. Evaluation and Oversight**

"(a) The President, or his designee, shall review the operation of the Simplified Management System in each agency to ensure that such System is operating in a budget-neutral manner. The President, or his designee, may require the agency to modify or terminate use of the Simplified Management System if he determines that it is not so operating.

"(b)(1) In addition to the review required under subsection (a) of this section, the Office shall monitor and evaluate the operation of the Simplified Management System in each agency to ensure compliance with the requirements of this chapter and other applicable laws, rules, and regulations.

"(2) If at any time the Office determines that the Simplified Management System in an agency, or a component or location thereof, or for an occupation or group of occupations in an agency, is not operating in compliance with the provisions of this chapter, or the regulations and approved plan under this chapter, the Office may require modification or termination of the use of the Simplified Management System.

"(c) An employee may request at any time that the Office—

"(1) ascertain currently the facts as to the duties, responsibilities, and qualification requirements of the employee's position;

"(2) decide whether the employee's position is in its appropriate career path and pay band; and

"(3) change a position from one career path or pay band to another career path or pay band when the facts warrant.

A decision made by the Office on the basis of an employee's request under this subsection is binding on the employing agency and is not subject to appeal or review by any other entity.

**"§ 5208. Regulations**

"The Office shall prescribe regulations to carry out this chapter.".

(b) The table of chapters for part III of title 5, United States Code, is amended by adding after the item relating to chapter 51 the following new item:

"52—Simplified Management System 5201".

CONFORMING AMENDMENTS

SEC. 3. Title 5, United Stated Code is further amended—

(1) in section 4302 by adding at the end thereof the following new subsection:

"(c) For the purposes of this chapter, a reduction to a lower pay band of an employee assigned to a position under the Simplified Management System under chapter 52 of

this title shall be considered a reduction in grade, except as provided in section 4303(f)(4) of this chapter.";

(2) in section 4303(f)—

(A) in paragraph (2) by striking out "or" at the end thereof;

(B) in paragraph (3) by striking out the period at the end thereof and inserting in lieu thereof ", or"; and

(C) by adding at the end thereof the following new paragraph:

"(4) the reduction to a lower pay band of an employee under chapter 52 of this title who falls below the minimum rate of the pay band by failing to receive a pay increase as specified in section 5204(i) of this title.";

(3) in chapter 45—

(A) by adding the following new section after section 4507:

"§ 4508. Performance awards for employees under the Simplified Management System

"An agency may pay a performance award to an employee covered under the Simplified Management System under chapter 52 of this title, under a pay-for-performance plan approved under section 5205 of this title. Such a performance award shall be related to the employee's performance as rated under a performance appraisal system, and shall be considered a cash award for purposes of this chapter.";

(B) the analysis for chapter 45 is amended by inserting after the item relating to section 4507 the following new item:

"4508. Performance awards for employees under the Simplified Management System.";

(4) in section 5102 by adding at the end thereof the following new subsection:

"(e) This chapter does not apply to an employee who is covered under the Simplified Management System under chapter 52 of this title.";

(5) in section 5363 by adding at the end thereof the following new subsection:

"(d) For an individual covered under the Simplified Management System under chapter 52 of this title, pay retention may be provided, under regulations prescribed by the Office of Personnel Management, when an individual's rate of basic pay is reduced, and the reduction is not the result of action initiated by the individual and is not based on the conduct or unacceptable performance of the individual.";

(6) in section 5948—

(A) in subparagraph (g)(1)(H) by striking out "or" at the end thereof;

(B) in subparagraph (g)(1)(I) by striking out "and" and inserting in lieu thereof "or";

(C) in paragraph (1) by adding at the end thereof the following new subparagraph:

"(J) chapter 52 of this title, relating to the Simplified Management System; and";

(7) in section 7103(a)(14)(B) by striking out "; or" at the end thereof and inserting in lieu thereof ", including the assignment of a postion to a career path or pay band under chapter 52 of this title, and the method for determining progression of an employee within a pay band; or";

(8) in section 7106—

(A) in subparagraph (a)(2)(C)(ii) by striking out at the end thereof "and";

(B) in subparagraph (a)(2)(D) by striking out the period at the end thereof and inserting at the end thereof "; and";

(C) by adding at the end of paragraph (a)(2) the following new paragraph:

"(E) to place positions under the Simplified Management System or to convert employees to or from the Simplified Management System under chapter 52 of this title."; (9) in section 7121(c)—

(A) in paragraph (4) by striking out "or" at the end thereof;

(B) in paragaph (5) by striking out the period at the end thereof and inserting in lieu thereof "; or";

(C) by adding at the end thereof the following new paragraph:

"(6) The assignment of a position to a career path or pay band under the Simplified Management System under chapter 52 of this title (unless such assignment results in the reduction to a lower pay band, or a reduction in basic pay for an employee, and the reduction is not caused by a performance deficiency as specified in section 5204(i) of this chapter) or the method for determining progression of an employee within a pay band,";

(10) in section 7511(a)(3) by striking out the semicolon at the end thereof and inserting in lieu thereof ", or a pay band under the Simplified Management System established under chapter 52 of this title;";

(11) in section 7512—

(A) in paragraph (4) by striking out "and" at the end thereof;

(B) in paragraph (5) adding at the end thereof "and";

(C) by adding as a new paragraph the following:

"(6) a reduction to a lower the pay band of an employee assigned to the Simplified Management System under chapter 52 of this title";

(D) in paragraph (D) by striking out "or" at the end thereof;

(E) in paragraph (E) by striking out the period at the end thereof and inserting in lieu thereof ", or"; and

(F) by adding at the end thereof the following new paragraph:

"(F) the reduction to a lower pay band of an employee assigned to the Simplified Management System under chapter 52 of this title who falls below the minimum rate of the pay band by failure to receive a pay increase as specified in section 5204(i) of this title.";

SPECIAL RATES AMENDMENTS FOR GENERAL SCHEDULE EMPLOYEES

SEC. 4. (a) Section 5303 of title 5, United States Code, is amended—

(1) in subsection (a)—

(A) by striking out "pay rates in private enterprise for one or more occupations in one or more areas of locations are so substantially above the pay rates of statutory pay schedules as to handicap significantly the";

(B) by striking out "he may establish for the areas" and inserting in lieu thereof the following: "is, or is likely to become, significantly handicapped by higher pay rates paid by Federal or non-Federal employers, or by undersirable working conditions or the remote geographic location of such positions, he may establish, as appropriate, for one or more areas"; and

(C) in the second sentence—

(i) by striking out "maximum" and inserting in lieu thereof "minimum"; and

(ii) by adding after "level" the following "by more than twice the amount by which the maximum rate of pay for that grade or level exceeds the minimum rate of pay for that grade or level. The President may authorize the appointment of an individual who would be covered by higher rates established under this section at a rate above the higher minimum rate so established"; and

(2) by redesignating subsections (b), (c), and (d) as subsections (c), (d), and (e), respectively, and by inserting after subsection (a) the following new subsection:

"(b)(1) When the President makes a finding under subsection (a) of this section, he may pay bonuses to individuals in positions covered by such finding, either in lieu of establishing higher rates of pay under that subsection or in addition to such higher rates of pay, as appropriate.

"(2) A bonus under this subsection may, as appropriate, be provided under a service agreement between the head of an agency and the individual, requiring the individual to complete a specified period of service in return for such bonus, but not over two years of service may be required under a single such agreement, subject to regulations prescribed by the President. An individual who does not complete the specified period of service shall repay the amount of the bonus unless—

"(A) the period of service is not completed by reason of the death or disability of the individual; or

"(B) the head of the agency determines, pursuant to regulations prescribed by the President, that such failure to complete the specified period of service is for the convenience of the Government,

"(3) A bonus paid under this subsection may not be considered as basic pay for the purposes of subchapter V, subchapter VI or section 5595 of chapter 55, chapter 81, 83, or 87 of this title, or other benefits or entitlements related to basic pay.

"(4) A bonus under this subsection may be paid in a lump sum or in two or more separate payments.

"(5) The sum of the basic pay and a bonus under this subsection paid to an individual in any 12-month period may not exceed the amount of basic pay payable to an individual in a position in level V of the Executive Schedule during the same 12-month period.

"(6) The President may authorize the exercise of the authority conferred on him by this subsection by the Office of Personnel Management or, in the case of individuals not subject to the provisions of this title governing appointment in the competitive service, by such other agency as he may designate.".

(b) Section 5333(a) of title 5, United States Code, is amended in the second sentence—

(1) by inserting after "case" the following, "(except to the extent that authority for such approval is delegated under section 1104 of this title)"; and

(2) by striking out "to a position in GS-11 or above".

SEC. 5. The amendments made by sections 2, 3, and 4 of this Act shall be effective on October 1, 1986.

---

SECTION-BY-SECTION ANALYSIS

SECTION 1. SHORT TITLE

The first section of the bill provides a title, the "Civil Service Simplification Act of 1986."

SECTION 2. CHAPTER 52

The second section of the bill amends title 5, United States Code, by inserting a new chapter 52, "Simplified Management System."

*Section 5201. Purpose.*

The first section of chapter 52 explains the purpose of the Simplified Management System, which is modelled on the successful personnel management demonstration projects conducted at two Navy laboratories in China Lake and San Diego, California.

The Simplified Management System will be expanded Governmentwide in a controlled, measured, and budget-neutral manner.

*Section 5202. Definitions*

This section defines the terms used in the Simplified Management System, and specifies that the coverage of the System may include any employee whose position would otherwise be in grades GS-1 through GS-8 of the General Schedule. The System would not include members of the SES, administrative law judges, and prevailing rate employees.

*Section 5203. Implementation*

Subsection (a) provides authority for the head of an agency to implement the Simplified Management System and to determine coverage of the System within the agency. This subsection also provides that the Simplified Management System may only be implemented with the approval of the President, or his designee, and that, once approved, changes in coverage of the System, or in the plan implementing the System, must be approved by the President or his designee.

Subsection (b) specifies the requirements of the Simplified Management System plan that must be approved before an agency may implement the System. The plan must include: the proposed extent of coverage; the means for assuring budget-neutrality; any career paths, pay bands, criteria or qualification requirements proposed under section 5204(e); the performance appraisal system; the pay-for-performance plan; the merit promotion plan; the conversion procedures; and the evaluation plan.

Subsection (c) provides that the President, or his designee, shall review each Simplified Management System Plan submitted for approval and shall approve the plan if he determines that the System will operate under the plan in a budget-neutral manner. The Office of Personnel Management (OPM) shall review and approve the plan if it determines that the plan complies with the legal and regulatory provisions of the Simplified Management System and will operate in a manner that will accomplish the purposes of the System. An agency may not implement the System unless its plan is approved for budget-neutrality by the President, or his designee, and unless the other required provisions of the plan are approved by OPM.

Subsection (d) provides that coverage under the Simplified Management System may not be appealed or reviewed, unless so provided by OPM.

*Section 5204. Career paths and pay bands*

Subsection (a) provides that the career paths and pay bands for the Simplified Management System will be established by OPM.

Subsection (b) requires OPM to publish the criteria for placing positions in the Simplified Management System into the appropriate career paths and pay bands. OPM may use standards developed under the General Schedule to define criteria for the Simplified Management System, as long as the criteria define career paths and pay bands under the Simplified Management System. This provision will allow for a quick implementation of a simplified position classification system, which is one of the key features of the Simplified Management System.

Subsection (c) provides that, with the exception specified in subsection (e)(2), agencies will determine career paths and pay bands on the basis of criteria issued by OPM.

Subsection (d) provides that, with the exception specified in subsection (e)(2), qualification determinations will be made on the basis of existing qualification standards published by OPM, including subsequent changes or additions to those standards. OPM will have sole discretion to determine whether to use existing standards, or whether to develop new ones.

Subsection (e) allows the tailoring of career paths, pay bands, criteria, or qualification requirements to specific problem areas in two situations: (1) when OPM determines that the regular governmentwide career paths, pay bands, criteria, or qualification requirements are not accomplishing the purposes of the Simplified Management System in a given instance, it may develop individual career paths, pay bands, criteria, or qualification requirements for that situation; or (2) OPM may authorize an agency to develop proposed career paths, pay bands, criteria, or qualification requirements which must be submitted to OPM for approval.

Subsection (f) provides that the minimum and maximum rates of basic pay under the Simplified Management System will be the same as those payable under the General Schedule, and that pay bands will have the same range of basic pay as one or more grades of the General Schedule. This subsection also provides that the range of rates of pay bands shall be adjusted to maintain equivalency with the General Schedule whenever the General Schedule receives a comparability adjustment.

Subsection (g) requires agencies to initially appoint an individual to the Simplified Management System at the lowest rate in a pay band which the agency determines is necessary to recruit the individual, based on the individual's qualifications and labor market conditions.

Subsection (h) provides a "special rate" and a bonus authority under the Simplified Management System to provide additional agency flexibility in recruiting and retaining employees in hard-to-fill occupations. Paragraph (1) allows agencies to adjust pay rates within pay bands by the amount necessary to recruit or retain employees. Paragraph (2) allows agencies to request increases to the maximum rate of an approved pay band, if the range of the pay band is not sufficient to recruit or retain well-qualified employees. Such requests for special rates must be submitted to the President, or to OPM if the President's authority to set General Schedule special rates under section 5303 of title 5 is delegated to OPM, for approval. Special rates are limited to a maximum rate which does not exceed the maximum rate of the pay band by an amount equivalent to twice the range of the highest General Schedule grade encompassed by the pay band, and may not exceed the rate of basic pay payable for level V of the Executive Schedule. Paragraph (3) allows for the payment of bonuses to recruit or retain employees for hard-to-fill positions, under the same restrictions as will apply to General Schedule employees. A bonus could be paid under an agreement between the employee and the agency requiring the employee to perform a specified period of service in return for the bonus, but not over two years of service could be required under a single agreement. An employee who does not complete the specified period of service would have to repay the amount of the bonus, unless the service is not completed because of death or disability, or the head of the agency determines that an employee's failure to complete the service is for the convenience of the Government. In any 12-month period, the combination of basic pay and a bonus could not exceed the basic pay payable to an individual in a position in level V of the Executive Schedule for the same 12-month period. A bonus would not be part of basic pay for the purpose of any benefit related to basic pay.

Subsection (i) provides that an employee who fails to receive pay increases because of less than fully successful performance and who drops below the mininum rate of pay for the pay band will be placed in the next lower pay band, unless the employee is already at the minimum pay band of the career path. A reduction of a pay band under this provision will be conducted without reducing the employee's rate of basic pay.

Subsection (j) continues the existing authority for payment of a cost-of-living allowance and, if applicable, post differential to employees under the Simplified Management System stationed in areas and possessions of the United States outside the 48 coterminous States.

Subsection (k) provides the Office of Personnel Management the authority to prescribe regulations which establish linkages between pay bands and General Schedule grade levels for purposes of administering the premium pay provisions and other provisions of title 5, United States Code, and any other provisions of law or regulation which are linked to the General Schedule.

*Section 5205. Pay for performance plan*

Subsection (a) specifies the requirements for the pay-for-performance plan which must be submitted to OPM for approval by each agency implementing the Simplified Management System. The plan must comply with the performance appraisal requirements of chapter 43 and the incentive and performance awards provisions of chapter 45 of this title. In addition, the plan must specify the method to be used to advance employees through the pay band. The method must be based on the employee's performance and may not depend on length of service, though it may consider an employee's relative position in the range of rates of basic pay for a pay band in determining the rate of progression through the band. The plan must also specify the method the agency will use to determine the funds available to the agency for incentive awards, performance awards, and for providing pay increases to employees.

Subsection (b) requires OPM to prescribe regulations for administering the pay-for-performance plan for employees who have not received a performance rating under an approved performance appraisal system.

*Section 5206. Conversion procedures*

Subsection (a) requires OPM to prescribe regulations governing the procedures to be used in converting employees to the Simplified Management System; appointing employees into the Simplified Management System; and terminating the Simplified Management System.

Subsection (b) authorizes OPM to provide restrictions on pay increases for employees who are appointed into the Simplified Management System from other agencies. The purpose of this provision is to ensure that agencies do not escalate salaries when competing among themselves for valuable employees.

Subsection (c) requires agencies to specify procedures for designating employees for conversion to the the Simplified Management System. These procedures must provide for written notification to employees who will be converted. Conversions to the Simplified Management System must be accomplished without a reduction of basic pay of the converted employee.

*Section 5207. Evaluation and oversight*

Subsection (a) requires the President, or his designee, to review the operaton of the Simplified Management System to ensure budget-neutrality. The President, or his designee, may require an agency to modify or terminate use of the System if it is not operating in a budget-neutral manner.

Subsection (b) provides that OPM shall have an active responsibility for monitoring and evaluating the Simplified Management System to ensure compliance with applicable laws, rules, and regulations. It also authorizes OPM to modify or terminate any use of the Simplified Management System if it determines that the System is not being implemented in compliance with applicable laws, rules, or regulations, or is not being implemented in a manner consistent with the purposes of the Simplified Management System.

Subsection (c) establishes an adminstrative appeals procedure which allows an employee to request a decision from OPM as to whether the employee's career path and pay band are appropriate under the Simplified Management System. A final OPM determination under this procedure is binding on the employing agency, and may not be appealed, or reviewed by any party.

*Section 5208. Regulations*

This section authorizes OPM to provide regulations to carry out the Simplified Management System.

Section 3. Conforming Amendments

Paragraph (1) provides that reductions in pay bands are generally treated as reductions in grade for purposes of the performance appraisal provisions of chapter 43 of title 5, United States Code.

Paragraph (2) has the effect of excluding reductions to a lower pay band which result from poor performance from the notice requirements of 5 U.S.C 4303(b), and also provides that such reductions are not appealable to the Merit Systems Protection Board.

Paragraph (3) adds a section to subchapter I of chapter 45 of title 5, United States Code, to provide a specific authority for performance awards for employees under the simplified Management System which are linked directly to an employee's performance rating. Performance awards will be treated as cash awards for purposes of chapter 45.

Paragraph (4) excludes employees under the Simplified Management System from the General Schedule.

Paragraph (5) provides authority for pay retention, under OPM regulations, for reductions in pay of employees in the Simplified Management System. Pay retention is appropriate only for involuntary reductions which do not result from poor performance and which are not based on the conduct of the employee.

Paragraph (6) extends the physicians comparability allowances provisions under 5 U.S.C. 5948 to appropriate employees under the Simplified Management System.

Paragraph (7) excludes the assignment of a position to career path or pay band from "conditions of employment" for purposes of labor-management relations. In effect, such decisions are to be treated as classification decisions for labor-management purposes. This paragraph also provides that the method for determining progression within a pay band is not a condition of employment.

Paragraph (8) provides that the decision to place positions under the Simplified Management System or to convert employees to or from the system is a management right and may not be abridged by any labor-management provision.

Paragraph (9) provides that employees under the Simplified Management System may not pursue a grievance through a negotiated grievance procedure concerning the placement in a career path or pay band, unless the placement results in a reduction to a lower pay band or a reduction in pay and the reduction is not a result of failure to receive pay increases because of poor performance. This paragraph also provides that the method for determining progression within a pay band is also not grievable.

Paragraph (10) establishes "pay band" as an equivalent to "grade" for adverse action purposes.

Paragraph (11) provides that reductions of employees to lower pay bands are covered by the adverse action procedures of subchapter II of chapter 75 of title 5, United States Code, except that reductions of employees to lower pay bands cause by failure to receive pay increases because of poor performance are excluded from these procedures.

Section 4. Special Rates Amendments for General Schedule Employees.

This section expands flexibilities available for the recruitment and retention of employees who remain under the General Schedule or who are paid under certain other white-collar pay systems. These flexibilities will allow agencies to address critical recruitment and retention problems prior to conversion to the Simplified Management System. This section would broaden the current authority for special rates of pay when the Govenment experiences difficulty in recruiting or retaining well-qualified employees due to higher pay rates paid by Federal or non-Federal employers. The proposal would allow such special rates in a greater variety of circumstances, increase the available rate range for such special rates when necessary, and permit the hiring of individuals covered by special rates at a rate above the minimum of the special rate range. In addition, the proposal would permit recruitment or retention bonuses, either in lieu of or injunction with special rates.

Subsection (a)(1) amends section 5303 of title 5, United States Code, which allows the President to establish special rates of pay for certain white-collar Federal employees when private sector pay for an occupation is so substantially above the Government's pay rates that the Government's recruitment or retention of well-qualified individuals in the occupation is significantly handicapped. The amendments broaden the authority to also allow special rates where the cause of the significant recruitment or retention problem is higher pay of Federal or non-Federal employers, undesirable working conditions of the Federal job, or the remote geographic location of the Federal job. Under the amendments, special rates could be established when any of these conditions is likely to cause a significant recruitment or retention problem, even if the problem has not yet fully materialized. In addition, the amendments increase the pay range available for fixing needed special rates. The current authority limits the special rate minimum to no more then the maximum—step 10—of the regular rate range. The amendments permit higher special rates, up to an additional width of the rate range, so that the special rate minimum may not exceed the regular step 1 by more than twice the amount by which the regular step 10 exceeds the regular step 1. Further, the amendments would allow the hiring of individuals who would be covered by a special rate range at a rate above the minimum rate of the special rate range, as needed to help resolve the recruitment or retention problem.

Paragraph (2) of subsection (a) redesignates current subsections (b), (c), and (d) of section 5303 as subsections (c), (d), and (e), respectively, and inserts a new subsection (b), concerning bonuses for recruitment and retention. Under the new subsection (b), whenever the President finds that there is a significant recruitment and retention problem, he may provide for bonuses for individuals in affected positions, to be paid either instead of establishing special rates of pay or in addition to special rates of pay, as appropriate. A bonus could be paid under an agreement between the individual and the agency requiring the individual to perform a specified period of service in return for the bonus, but not over two years of service could be required under a single agreement. An individual who does not complete the specified period of service would have to repay the amount of the bonus, unless the service is not completed because of death or disability, or the head of the agency determines that an employee's failure to complete the service is for the convenience of the Government. In any 12-month period, the combination of basic pay and a bonus could not exceed the basic pay payable to an individual in a position in level V of the Executive Schedule for the same 12-month period. A bonus would not be a part of basic pay for the purpose of any benefit related to basic pay.

The President could delegate the responsibility for administering this new program of bonuses to the Office of Personnel Management, or to a different agency in the case of individuals not appointed in the competitive service.

Subsection (b) amends section 5333(a) of title 5, United States Code, which allows the hiring of an individual at a within-grade rate above the minimum rate of the grade based on such factors as the individual's unusually high or unique qualifications. The amendment removes the limitation of this authority under current law to only those positions at GS-11 and higher grades, so that the authority could be used at any grade level as appropriate for a qualifying individual. The amendment also makes a conforming change to reflect that the authority to approve the hiring of individuals at advanced within-grade rates may be delegated by OPM to the head of an agency under section 1104 of title 5, United States Code.

Section 5. Effective Date

This section makes the amendments to law authorizing implementation of the Simplified Management System and amending the General Schedule special rates authority effective on October 1, 1986.●

---

By Mr. CRANSTON:

S. 2725. A bill to increase the amount of capital available to financial institutions and other agricultural

lenders for loans to farmers by providing a secondary market for farm mortgages through the establishment of a federally chartered corporation, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

FARM MORTGAGE MARKETING RESTORATION ACT

Mr. CRANSTON. Mr. President, today I am introducing a bill to set up a secondary market for agriculture real estate loans. The bill embodies recommendations of the joint task force of the American Bankers Association and the Independent Bankers Association of America. This bill is a companion bill to H.R. 5132 introduced by my distinguished colleague in the House, Congressman RICHARD LEHMAN.

The purpose of the legislation is the stabilization and enhancement of the flow of capital for long-term financing of agricultural real estate loans. This new corporation as proposed in the bill would be similar to other existing secondary market intermediaries such as the Federal Home Loan Mortgage Corporation [FHLMC], the Federal National Mortgage Association [FNMA], and the Student Loan Marketing Association [Sallie Mae]. All of these entities enhance access to credit by the pooling of loans from cash scarce areas of the country and selling securities represented by the pools to cash surplus areas of the country. I believe this bill will help significantly in making more affordable long-term financing available to farmers.

In the bill, secondary market entities will purchase mortgage loans from qualified agricultural lenders, repackage them as securities and sell them in the capital market to institutional investors such as pension funds, insurance companies and other large investors. The bulk of agriculture real estate loans are farmers guaranteed home loans. Today there is no liquidity in the agricultural market—when times get tough, bank lenders stop lending. This proposal could be used to shift the emphasis from costly direct lending by the Farmers Home Administration to lending through the guaranteed loan process via commercial banks. Many more commercial banks would become interested in long-term agricultural lending if they knew there was a viable secondary market for those loans. One of the biggest benefits of a secondary market for farm loans is liquidity for commercial banks that may want to make local loans but do not have adequate funding to hold on to the loans. A secondary market will benefit farmers by bringing new money into the agricultural land lending business, increasing competition and driving down interest rates. A number of entities, including insurance companies and commercial banks, have loanable funds available, but restrict their volume of farm mortgages to avoid tying up large portions of their available loan funds for the 20 to 30 years it takes an individual farmer to pay off his mortgage. By being able to sell farm loans immediately into the secondary market a farm bank can improve its capital, roll its fund over for new farm lending and increase fees from origination and servicing of the loans.

The secondary market is basically a private sector operation, but the Federal Government needs to be involved to structure its guarantee so such a market can work. My bill would provide $200 million in stock as seed capital to get the Corporation started. The Treasury capital would be repaid by the mortgage sellers who would be required to buy equity in the Corporation. Ultimately the debt would be retired and the Corporation would be privately owned by its share holders. This bill embodies a very simple concept that has already proven successful in providing a stable source of capital to meet the needs of the Nation in areas of housing and education.

There are, of course, as with any new idea, a great number of concerns which need to be addressed before a final bill is passed. I hope that the introduction of this proposal can be the focal point for in-depth discussions on what further steps need to be taken to make this idea workable. I consider this bill a first step in that process. We have seen that the creation of a secondary market facility for mortgage has been the single most important development in expanding the flow of credit to the U.S. mortgage market. I think it is time to move forward and explore the suitability of the concept to the farm credit system. While the enactment of this proposal will not solve the existing problems in our farm credit system, I believe that its enactment will help us avoid in the future, the credit crunch faced today by the farm segment of our economy.

I ask unanimous consent that the text of the bill together with a section-by-section analysis be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2725

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. SHORT TITLE.

This Act may be cited as the "Farm Mortgage Marketing Corporation Act of 1986".

SEC. 2. FINDINGS AND PURPOSE.

(a) FINDINGS.—The Congress hereby finds that—

(1) economic stability would be enhanced and the availability of long-term credit for agricultural borrowers would be ensured if a mechanism to access secondary markets was created; and

(2) economic stability would be enhanced and the liquidity of investment funds available to lend to agricultural borrowers by financial institutions and other agricultural lenders would be ensured by providing a secondary market for the purchase of sound agricultural real estate mortgages.

(b) PURPOSE.—It is the purpose of this Act to establish a quasi-private corporation chartered by the Federal Government which will purchase and insure agricultural mortgages and sell pools of such agricultural mortgages in order to—

(1) facilitate the availability of long-term credit for agricultural borrowers;

(2) provide liquidity for financial institutions and other agricultural lenders; and

(3) provide an institutional mechanism to allow capital markets to invest in and provide funding for agricultural loans.

SEC. 3. ESTABLISHMENT OF CORPORATION.

There is hereby established a corporation to be known as the Farm Mortgage Marketing Corporation.

SEC. 4. BOARD OF DIRECTORS.

(a) NUMBER AND APPOINTMENT.—

(1) 5 MEMBERS.—The powers of the Corporation shall be vested in the Board of Directors which shall consist of 5 members.

(2) INTERIM APPOINTED BOARD.—Until a determination is made by the President under paragraph (3), the Board of Directors shall be composed of the following members:

(A) The Comptroller of the Currency.

(B) The Chairman of the Federal Deposit Insurance Corporation.

(C) 3 members appointed by the President, by and with the advice and consent of the Senate, from among individuals who have substantial experience and expertise in the fields of agricultural lending and mortgage investments and are representative of agricultural lending institutions.

(3) REGULAR ELECTED BOARD.—When in the judgment of the President, sufficient common stock of the Corporation has been sold to qualified agricultural lenders, the interim Board shall turn over the affairs of the Corporation to regular Board members elected from holders of common stock.

(b) TERMS.—

(1) APPOINTED MEMBERS.—Directors appointed by the President shall serve at the pleasure of the President until their successors have been elected pursuant to subsection (a)(3).

(2) ELECTED MEMBERS.—Directors shall be elected for a term ending on the date of the next annual meeting of the common stockholders of the Corporation.

(3) VACANCY.—

(A) ELECTED MEMBER.—Any elective seat on the Board shall be filled by the Board, but only for the unexpired portion of the term.

(B) APPOINTED MEMBER.—Any appointive seat which becomes vacant shall be filled by the President in the manner provided in subsection (a)(2).

(c) CHAIRPERSON.—The Chairperson of the Board shall be designated by and from among the members of the Board.

(d) MEETINGS.—The Board shall meet semiannually at the call of its Chairperson to determine the general policies which shall govern the operations of the Corporation. A majority of members of the Board shall constitute a quorum.

(e) EMPLOYMENT OF STAFF.—

(1) APPOINTMENT.—The Board may appoint and fix the pay of such personnel as the Board considers appropriate.

(2) APPLICABILITY OF CERTAIN CIVIL SERVICE LAWS.—The staff of the Board may be appointed without regard to the provision of title 5, United States Code, governing appointments in the competitive service, and

may be paid without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, except that no individual so appointed may receive pay in excees of the maximum annual rate of basic pay in effect for the Senior Executive Service pursuant to section 5382 of such title.

SEC. 5. PURCHASE AND SALE OF MORTGAGES.

(a) IN GENERAL.—

(1) AUTHORITY TO PURCHASE.—Except as provided in subsection (c), the Corporation may purchase, and make commitments to purchase, farm mortgage loans from any qualified agricultural lender.

(2) AUTHORITY TO SELL.—The Corporation may sell or otherwise dispose of, any farm mortgage or interest in a mortgage purchased under paragraph (1).

(3) CERTIFICATION OF APPLICATIONS.—The Corporation shall receive applications for the certification of qualified agricultural lenders for the purpose of this Act and establish criteria for determining the eligibility of an agricultural lender for certification.

(b) AGREEMENTS FOR SERVICING MORTGAGES.—The Corporation may enter into agreements with the seller of any farm mortgage which the Corporation purchases, or with any qualified agricultural lender, to further provide for the servicing of such mortgage.

(c) LIMITATIONS.—No farm mortgage may be purchased by the Corporation under this section unless—

(1) the seller of the mortgage agrees—

(A) to retain a participation of not less than 10 percent in the mortgage; or

(B) to repurchase or replace the mortgage upon demand of the Corporation during such period and under such circumstances as the Association may require when the borrower is in default with respect to such mortgage only if there are no reserves established to cover losses on such mortgages.

(2) at the time of purchase—

(A) the outstanding principal balance of the mortgage is less than 80 percent of the value of the property securing the mortgage; or

(B) the portion of the unpaid balance of the mortgage is in excess of 80 percent of the value securing the mortgage is guaranteed or insured by a qualified insurer, as determined by the Association.

(d) MORTGAGE-BACKED SECURITIES.—

(1) ISSUANCE AUTHORIZED.—To provide a greater degree of liquidity to the farm mortgage investment market and as an additional means of financing the operations of the Corporation, the Corporation may issue and sell securities which provide for the payment of principal and interest in relation to payments of principal and interest on farm mortgages purchased and held by the Corporation under this section.

(2) TERMS AND CONDITIONS.—Securities issued under this subsection shall have such term to maturity and bear such rate of interest as the Corporation may prescribe with the approval of the Secretary of the Treasury.

(3) PRIVATE ISSUANCE OF PAYMENTS.—The Corporation shall issue or purchase from private sources commitments to insure the timely payment of principal and interest to purchasers of the securities backed by farm mortgages held by the Corporation.

(4) NOT EXEMPT SECURITIES.—No security issued by the Corporation under this subsection shall be—

(A) an exempted security under section 3 of the Securities Act of 1933; or

(B) an exempted security within the meaning given to such terms by section 3(a)(12) of the Securities Exchange Act of 1934.

(5) MINIMUM AMOUNT ESTABLISHED FOR FARM MORTGAGES BACKING SECURITIES.—The Corporation shall at all times hold such number of farm mortgages as may be necessary to enable the Corporation to make timely principal and interest payments on securities issued under this subsection from the principal and interest payments received by the Association with respect to such mortgages.

(6) NOTICE THAT SECURITIES ARE NOT FEDERALLY GUARANTEED.—The Corporation shall insert such language in each security issued under this subsection as the Corporation determines to be appropriate to clearly indicate that—

(A) the payment of principal and interest with respect to such security is not guaranteed by the United States;

(B) the security does not constitute a debt or obligation of the United States or any agency or instrumentality of the United States other than the Association; and

(C) the securities issued under this section shall be deemed nonbank eligible for the purposes of underwriting, selling and distribution.

(7) REPURCHASE AUTHORIZED.—The Corporation may repurchase in the open market any security issued under this subsection at any time and at any price.

(e) CLASSIFICATION OF SELLERS FOR CERTAIN PURPOSES.—

(1) CLASSIFICATION AUTHORIZED.—The Corporation may establish a system for classifying sellers of farm mortgages, or qualified agricultural lenders which services such mortgages, according to type, size, location, assets, or on such other basis the Corporation may consider appropriate.

(2) PURPOSES OF CLASSIFICATION.—The Corporation may take any classification system established under paragraph (1) into account and may distinguish between classes established under such system in prescribing regulations and imposing charges or fees.

SEC. 6. CAPITALIZATION.

(a) INITIAL CAPITALIZATION; GENERAL PROVISIONS.—

(1) INITIAL CAPITALIZATION.—The Corporation shall have capital stock of $200,000,000 subscribed by the Secretary of the Treasury from funds appropriated for such purchase.

(2) SHAREHOLDER VOTING RIGHTS.—Owners of common stock shall be vested with all voting rights, each share being entitled to one vote with rights of cumulative voting at all elections of directors.

(3) UNRESTRICTED TRANSFERABILITY.—The free transferability of the common stock at all times to any person shall not be restricted except that, as to the Corporation, it shall be transferable only on the books of the Corporation.

(b) CONTRIBUTIONS TO CAPITAL; FEES.—

(1) REQUIRED CONTRIBUTIONS ALLOWED.—The Corporation may accumulate funds for its capital surplus account by requiring each mortgage seller to make nonrefundable capital contributions equal to not more than 2 percent of the unpaid principal amounts or mortgages purchased by the Corporation from such seller.

(2) FEES.—The Corporation may impose charges or fees in such amounts as may be necessary to meet all costs and expenses incurred in connection with the administration of this Act.

(c) MANAGEMENT OF CAPITAL AND EARNINGS.—

(1) TRANSFER TO GENERAL SURPLUS ACCOUNT.—All earnings from the operations of the Corporation shall be transferred annually to its general surplus account.

(2) TRANSFER TO RESERVES.—At any time, funds of the general surplus account may, at the discretion of the Board, be transferred to reserves.

(3) DIVIDENDS.—Any dividends paid by the Corporation on stock issued under this section shall be charged against the general surplus account.

(d) STOCK FOR CONTRIBUTIONS TO CAPITAL.—

(1) CONTRIBUTIONS BY MORTGAGE SELLERS.—The Corporation shall issue, from time to time to each mortgage seller, its common stock evidencing any capital contributions made by such seller pursuant to subsection (b).

(2) OTHER CONTRIBUTIONS.—In addition to the shares of common stock issued under paragraph (1), the Corporation may issue additional shares of common stock in return for any other contributions to capital or capital and surplus.

(e) RETIREMENT OF STOCK.—The Corportion may at any time retire any stock of the Corporation which was purchased by the Secretary of the Treasury.

SEC. 7. POWERS OF THE CORPORATION.

(a) IN GENERAL.—The Corporation shall have the following powers:

(1) To adopt, alter, and use a corporate seal.

(2) To have succession until dissolved by an Act of Congress.

(3) To prescribe such regulations as may be necessary to carry out the provisions of this Act.

(4) To make and perform contracts, agreements, and commitments.

(5) To borrow, give security, pay interest or dividends, and issue notes, debentures, bonds, preferred stock, or other obligations or securities under terms and conditions which the Corporation may prescribe.

(6) To settle, adjust, compromise, and release any claim, demand, or right of, by, or against the Corporation, whether in whole or in part and with or without consideration or benefit to the Corporation.

(7) To sue and be sued in its corporate capacity, against to prosecute or defend any action brought by or against the Corporation in any State or Federal court of competent jurisdiction.

(8) To acquire, hold, and dispose of any property.

(9) To determine the Corporation's expenditures and the manner in which such expenditures shall be incurred and paid.

(10) To exercise such incidental powers which are not inconsistent with the provisions of this Act and are necessary to carry out the purposes of this Act.

SEC. 8. DEFINITIONS.

For purposes of this Act—

(1) CORPORATION.—The term "Corporation" means the Farm Mortgage Marketing Corporation established under section 3.

(2) BOARD.—The term "Board" means the Board of Directors of the Corporation.

(3) FARM MORTGAGE.—The term "farm mortgage" means any loan to an agricultural producer which—

(A) is secured by fee-simple or leasehold mortgage with status as a first lien on agri-

cultural real estate located in the United States;

(B) is originated after the date of enactment of this Act; and

(C) is an obligation of—

(i) an individual who is a citizen of the United States; or

(ii) any person other than an individual a majority interest in which is held by individuals who are citizens of the United States,

whose training or farming experience is sufficient, under criteria established by the Corporation, to assure a reasonable likelihood that such loan will be repaid according to its terms.

(4) AGRICULTURAL REAL ESTATE.—The term "agricultural real estate" means a parcel or parcels of land used for the production of one or more agricultural commodities or products and consisting of a minimum acreage or producing minimum annual receipts as determined by the Corporation;

(5) QUALIFIED AGRICULTURAL LENDER.—The term "qualified agricultural lender" means any bank, business and industrial development company, savings and loan institution, commercial finance company, trust company, credit union, insurance company, or other person approved by the Corporation.

(6) SECURITY.—The term "security" has the meaning given to such term in section 3(a)(10) of the Securities Exchange Act of 1934.

SEC. 9. DESIGNATION OF ASSOCIATION AS MIXED-OWNERSHIP GOVERNMENT CORPORATION.

Section 9101(2) of title 31, United States Code, is amended by adding at the end thereof the following new subparagraph:

"(K) The Farm Mortgage Marketing Corporation."

SEC. 10. AUTHORIZATION.

There is authorized to be appropriated to the Secretary of the Treasury for any fiscal year beginning after September 30, 1986, not to exceeed $200,000,000 for the purchase of stock of the Corporation to carry out the provisions of this Act.

---

FARM MORTGAGE MARKETING CORPORATION ACT OF 1986

It is the intent of this Act to establish a secondary market entity similar to those which already serve the needs of the nation's housing and education sectors. This secondary market mechanism will serve as a means of enhancing and stabilizing the flow of capital for long-term financing of agricultural real estate credit needs by serving as a conduit between primary commercial agricultural lenders and the captial markets.

SECTION-BY-SECTION SUMMARY

SECTION 1. TITLE.—"Mortgage Marketing Corporation Act of 1986".

SEC. 2. FINDINGS AND PURPOSE.— The purpose of this Act is to establish a quasi-private organization chartered by the Federal Government to purchase and insure agricultural mortgages from commercial agricultural lenders and to sell pools of agricultural mortgages to the capital market. Such a secondary market entity will facilitate the availability of long-term credit for agricultural borrowers and provide liquidity for financial institutions and other agricultural lenders.

SEC. 3. ESTABLISHMENT OF CORPORATION.— There is hereby established a corporation to be known as the Farm Mortgage Marketing Corporation.

SEC. 4. BOARD OF DIRECTORS.—The Act establishes a five-member Board of Directors. An initial interim Board will be appointed by the President, with the advice and consent of the Senate, and be comprised of the following: the Comptroller of the Currency, the Chairman of the Federal Deposit Insurance Corporation [FDIC], and three appointees with expertise and training in agricultural lending and mortgage investments. When sufficient common stock of the Corporation has been sold to qualified lenders, the interim Board shall turn over the affairs of the Corporation to a regular Board elected from among the holders of the stock.

SEC. 5. PURCHASE AND SALE OF MORTGAGES.—The Corporation, with certain limitations, may purchase farm mortgages from any qualified agricultural lender and dispose of those mortgages through the issuing of securities.

The Corporation may purchase farm mortgages if the mortgage seller agrees to retain a 10-percent participation in the mortgage, or to repurchase or replace the mortgage upon demand by the Corporation if the borrower defaults on the loan. In addition, at the time of the purchase of the mortgage, the outstanding principal balance of the mortgage must be less than 80 percent of the value of the property securing the mortgage, or the portion of the unpaid balance of the mortgage in excess of 80 percent is guaranteed by or insured by a qualified insurer. No repurchase shall be required on defaulted loans if there are sufficient reserves established to cover such losses.

The Corporation shall issue securities which provide for the payment of principal and interest on farm mortgages purchased and held by Corporation.

SEC. 6. CAPITALIZATION.—The Corporation shall be initially capitalized by the purchase of $200,000,000 in stock by the U.S. Treasury. In addition the Corporation shall have the authority to require that each mortgage seller make a nonrefundable capital contribution equal to not more than two percent of the unpaid principal amounts of the mortgages purchased from the seller, charge appropriate fees to meet all costs and expenses, and issue stock in return for any contribution to capital and capital surplus accounts.

The Corporation may at any time retire any stock of the Corporation which was purchased by the Treasury.

SEC. 7. POWERS OF THE CORPORATION.—The Corporation will have the authority to prescribe such regulations to carry out the provisions of the Act and meet the normal obligations the Corporation.

SEC. 8. DEFINITIONS.—Defines the terms of the Act.

"Farm mortgage" is defined as any loan to an agricultural producer which is secured by a fee-simple or leasehold mortgage with status as a first lien on agricultural real estate originated after the date of enactment of this Act and which is an obligation of a person who is a citizen or business entity whose majority interest are citizens of the United States.

"Qualified agricultural lender" is defined as meaning any bank, business and industrial development company, savings and loan institution, commercial finance company, trust company, credit union, insurance company, or other person approved by the Corporation.

SEC. 9. DESIGNATION OF CORPORATION AS MIXED-OWNERSHIP GOVERNMENT CORPORATION.

SEC. 10. AUTHORIZATION OF APPROPRIATIONS.—$200,000,000 shall be appropriated beginning after September 30, 1986.

By Mr. BRADLEY:

S. 2726. A bill to provide for a minimum price and an alternative production rate for petroleum produced from the naval petroleum reserves, and for other purposes; to the Committee on Armed Services.

MINIMUM PRICE FOR NAVAL PETROLEUM RESERVES

● Mr. BRADLEY. Mr. President, today I introduce a bill which will correct a serious aberration in domestic energy policy.

We've heard a lot in recent months about oil being dumped on the world markets, driving prices down and sending many U.S. producers into bankruptcy. Most often, the fingers are pointed at the Saudi Arabians as the coldly calculating nemesis to the U.S. oil interests. The fact of the matter, however, is that the cheapest oil available in the world today is not Saudi crude—which sells at the world market price—but crude oil produced in California by the U.S. Government from the Elk Hills Naval Petroleum Reserve [NPR]. Last week oil from the NPR sold for as low a $4.90 per barrel—about $7 per barrel below the prevailing price in the region. This week's prices might be as low as $4.50 per barrel. These ridiculously low prices represent an unfair attack on other oil producers, a loss of revenue to U.S. taxpayers and a squandering of a national and strategic resource.

This dumping of the Nation's oil reserves is obviously bad policy. It is not anyone's intended goal. Rather, these low prices are the inadvertent result of contract policies and legislation that did not anticipate the possibility of rapidly fluctuating oil prices. The Secretary of Energy has recently enacted a number of reforms which will help reduce the chance of a recurrence of this ill-advised outcome. The legislation I am introducing today, however, will go further and ensure that this dumping of U.S. oil never again occurs.

The bill would do two things:

First, it will prohibit the sale of Naval Petroleum Reserve oil (Elk Hills) for less than 90 percent of the prevailing market value for oil sold in the area, or less than the price of oil purchased for the Strategic Petroleum Reserve, minus the cost of transporting the oil from the Naval Reserve to the Strategic Petroleum Reserve.

If either of these conditions is met, the Secretary can reduce the production of oil and conserve the oil resource. Current law requires production only at a "maximum efficient rate," which is in excess of 100,000 barrels per day.

Second, the bill reduces from 30 to 15 days the period of time that the Justice Department has to review NPR sales contracts for antitrust consideration. By reducing the period between receipt of bids and first delivery

of oil, this will make bids more accurately reflect market conditions at the time of sale. This action is also consistent with the Department of Energy's administrative action which reduced the length of the contracts from 180 to 90 days.

Mr. President, the Secretary of Energy recently wrote to the Speaker of the House in support of legislation which would revise NPR oil sales contracts along these lines. In that letter he said, "I cannot overemphasize the importance of rapid congressional action to assure that the taxpayers of this country receive a fair return from the Naval Petroleum Reserves." I hope that my colleagues here in the Senate also appreciate the urgency of the situation and act accordingly.●

By Mr. KERRY (for himself, Mr. SARBANES, Mr. DECONCINI, Mrs. HAWKINS, and Mr. D'AMATO):

S. 2727. A bill to extend the life of the Department of Justice assets forfeiture fund and the Customs forfeiture fund through fiscal year 1989, to make amounts from the funds available to the Secretary of Education and the Secretary of Health and Human Services for drug abuse education and prevention programs, and for other purposes; to the Committee on Finance.

DRUG ABUSE EDUCATION AND PREVENTION ACT

Mr. KERRY. Mr. President, I am introducing today legislation to make Federal forfeiture funds available for drug abuse education and prevention programs. This initiative, the Drug Abuse Education and Prevention Act of 1986, will transfer money from the Justice Department assets forfeiture fund and the U.S. Customs Service forfeiture fund to the Department of Education and the Department of Health and Human Services to assist States in their drug education programs.

During the past several years States and local communities have begun to respond as never before in the development of strategies and initiatives for comprehensive substance abuse prevention programs in our schools, and it is these education programs that my legislation responds to. Drug education programs are in critical need of financial assistance for school education material and teacher training. The Drug Abuse Education and Prevention Act of 1986 attempts to meet this need, without requiring any additional expenditure of Federal funds or taking any money away from law enforcement efforts.

Nationwide, the statistics revealing use of drugs and alcohol by our children and young adults are alarming. In my home State of Massachusetts Gov. Michael Dukakis surveyed 5,000 high school students in 1984 and found that 60 percent admitted having used illegal drugs: 28 percent reported using illicit drugs at age 12 or younger.

The Commonwealth responded to this distressing data with the Governor's Alliance Against Drugs, which has successfully enlisted more than 200 Massachusetts communities in a unified and comprehensive effort to combat substance abuse by young people. A large portion of their activities have been performed without cost or with resources that have been marshaled from private groups and corporations, major media outlets, and professional and amateur sports organizations. However, the future success of programs like this will be based on their ability to pay for teaching curriculum and training programs for the instructors, and private contributions are not picking up the whole tab.

Our law enforcement authorities seize over $1 billion in drug trafficker's assets each year—cash, stocks, bonds, and real estate—but the money is not going to help reduce demand for drugs. In some cases, drug traffickers gross more each year than the Drug Enforcement Administration has in its budget.

The Justice Department's asset forfeiture fund only began operating last year in response to important provisions in the 1984 Comprehensive Crime Control Act. Although there is a lagtime between a seizure and the actual forefeiture of assets, the fund promises to be a major step forward in our war against drugs. Even after Federal, State, and local law enforcement agencies recoup their share of the forfeiture assets, including the costs of seizure and forfeiture, it is estimated that at least $50 million from this fund will pour into the Treasury at the close of this fiscal year.

I believe it makes a great deal of sense to use drugpusher profits in our attempt to meet the challenges before us. I recognize that this is just one step in what has to be a much broader plan to address drug demand and supply both here and internationally, but I am convinced it is a necessary step.

Mr. President, I ask unamimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2727

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. SHORT TITLE.

This Act may be cited as the "Drug Abuse Education and Prevention Act of 1986".

SEC. 2. EXTENSION OF LIFE OF DEPARTMENT OF JUSTICE ASSETS FORFEITURE FUND AND CUSTOMS FORFEITURE FUND; INCREASE IN AUTHORIZATION OF APPROPRIATIONS FROM CUSTOMS FORFEITURE FUND.

(a) DEPARTMENT OF JUSTICE ASSETS FORFEITURE FUND.—The first sentence of section 524(c)(8) of title 28, United States Code, is amended by striking out "and 1987" and inserting in lieu thereof "1987, 1988, and 1989".

(b) CUSTOMS FORFEITURE FUND.—

(1) The first sentence of section 613A(a) of the Tariff Act of 1930 (19 U.S.C. 1613b(a)) is amended by striking out "1987" and inserting in lieu thereof "1989".

(2) Section 613A(c) of the Tariff Act of 1930 (19 U.S.C. 1613b(c)) is amended by striking out "1987" and inserting in lieu thereof "1989".

(e) Section 613A(f)(1) of the Tariff Act of 1930 (19 U.S.C. 1613b(f)(1) is amended—

(A) by striking out "four" and inserting in lieu thereof "three"; and

(B) by adding at the end the following new sentence:

"There are authorized to be appropriated from the fund for fiscal years 1987, 1988, and 1989, such sums as may be necessary to carry out this section."

(4) The first sentence of section 613A(f)(2) of the Tariff Act of 1930 (19 U.S.C. 1613b(f)(2)) is amended by striking out "of the first three of such four fiscal years" and inserting in lieu thereof "fiscal year referred to in paragraph (1) (other than fiscal year 1989)".

(5) The second sentence of section 613A(f)(2) of the Tariff Act of 1930 (19 U.S.C. 1613b(f)(2)) is amended by striking out "the last of such four fiscal years" and inserting in lieu thereof "fiscal year 1989".

SEC. 3. USE OF DEPARTMENT OF JUSTICE ASSETS FORFEITURE FUND FOR DRUG ABUSE EDUCATION AND PREVENTION PROGRAM ASSISTANCE TO THE STATES.

Section 524(c) of title 28, United States Code, is amended by adding at the end the following new paragraph:

"(10) In addition to the purposes described in paragraph (1) of this subsection, the fund shall be available without fiscal year limitation, in such amounts as may be specified in appropriations Acts—

"(A) to the Secretary of Health and Human Services, to assist the States in providing drug abuse education and prevention programs; and

"(B) to the Secretary of Education to assist the States in providing statewide elementary school and secondary school drug abuse education programs, including curricula, teaching materials, demonstration projects, technical assistance, and administrative support.

Each Secretary shall determine the amounts to be made available to a State, based on the number of persons served by such programs in the State, the level of non-Federal support for such programs in the State, the amounts deposited in the fund as a result of forfeitures in the State, and other relevant factors. Amounts made available to a State under this paragraph shall supplement, and shall not replace, amounts made available for such programs from other sources. Not less than 50 percent of the total of amounts appropriated for all purposes under this subsection with respect to a fiscal year shall be appropriated for purposes under this paragraph.".

SEC. 4. USE OF CUSTOMS FORFEITURE FUND FOR DRUG ABUSE EDUCATION AND PREVENTION PROGRAM ASSISTANCE TO THE STATES.

Section 613A of the Tariff Act of 1930 is amended by adding at the end the following new subsection:

"(g) In addition to the purposes described in subsection (a) of this section, the fund shall be available to the Secretary of Health and Human Services and the Secretary of

Education for the programs described in section 524(c)(10) of title 28, United States Code. Not less than 50 percent of the total of amounts appropriated for all purposes under this section with respect to a fiscal year shall be appropriated for such programs.".

SEC. 5. TECHNICAL AMENDMENTS.

(a) AMENDMENT TO TITLE 28, UNITED STATES CODE.—Section 524(c)(6) of title 28, United States Code, is amended by inserting after "this subsection" the following: ", except that the Secretary of Health and Human Services and the Secretary of Education shall prepare (for transmittal by the Attorney General) the portions of the report relating to expenditures under paragraph (10)(A) and paragraph (10)(B) of this subsection, respectively".

(b) AMENDMENT TO TARIFF ACT OF 1930.—Section 613A(c) of the Tariff Act of 1930 (19 U.S.C. 1613(c)) is amended by inserting after "such year" the following: ", except that the Secretary of Health and Human Services and the Secretary of Education shall prepare (for transmittal by the Commissioner of Customs) the portions of the report relating to expenditures under subsection (g) of this section".

SEC. 6. EFFECTIVE DATE.

This Act shall take effect on the date of the enactment of this Act, except that the amendments made by sections 3, 4, and 5 shall apply with respect to fiscal years beginning with fiscal year 1987.

## ADDITIONAL COSPONSORS

S. 89

At the request of Mr. INOUYE, the name of the Senator from Maine [Mr. MITCHELL] was added as a cosponsor of S. 89, a bill to recognize the organization known as the "National Academies of Practice."

S. 1820

At the request of Mr. DECONCINI, the name of the Senator from Massachusetts [Mr. KERRY] was added as a cosponsor of S. 1820, a bill to provide financial assistance to State and local educational agencies for the development and expansion of demonstration chemical substance abuse prevention programs in the public elementary and secondary schools of such agencies, and for other purposes.

S. 2209

At the request of Mr. DOLE, the name of the Senator from Missouri [Mr. DANFORTH] was added as a cosponsor of S. 2209, a bill to make permanent and improve the provisions of section 1619 of the Social Security Act, which authorizes the continued payment of SSI benefits to individuals who work despite severe medical impairment; to amend such act to require concurrent notification of eligibility for SSI and Medicaid benefits and notification to certain disabled SSI recipients of their potential eligibility for benefits under such section 1619; to provide for a GAO study of the effects of such section's work incentive provisions; and for other purposes.

S. 2454

At the request of Mr. MURKOWSKI, the name of the Senator from West Virginia [Mr. ROCKEFELLER] was added as cosponsor of S. 2454, a bill to repeal section 1631 of the Department of Defense Authorization Act, 1985, relating to the liability of Government contractors for injuries or losses of property arising out of certain atomic weapons testing programs, and for other purposes.

S. 2515

At the request of Mr. WEICKER, the names of the Senator from Ohio [Mr. METZENBAUM], and the Senator from Oklahoma [Mr. NICKLES] were added as cosponsors of S. 2515, a bill to reauthorize the Rehabilitation Act of 1973, and for other purposes.

S. 2537

At the request of Mr. CRANSTON, the names of the Senator from Oregon [Mr. HATFIELD], and the Senator from Wyoming [Mr. SIMPSON] were added as cosponsors of S. 2537, a bill to protect and preserve the Federal interest and the historic and natural features of the National Capital.

S. 2661

At the request of Mr. GRASSLEY, the names of the Senator from Wyoming [Mr. WALLOP], and the Senator from West Virginia [Mr. ROCKEFELLER] were added as cosponsors of S. 2661, a bill to improve the quality of teaching in American secondary schools and enhance the competence of American secondary students and thereby strengthen the economic competitiveness of the United States, and for other purposes.

SENATE JOINT RESOLUTION 299

At the request of Mr. COCHRAN, the name of the Senator from Rhode Island [Mr. PELL] was added as a cosponsor of Senate Joint Resolution 299, a joint resolution to designate the week of December 7, 1986, through December 13, 1986, as "National Alopecia Areata Awareness Week".

SENATE JOINT RESOLUTION 322

At the request of Mr. LAUTENBERG, the name of the Senator from Ohio [Mr. GLENN] was added as a cosponsor of Senate Joint Resolution 322, a joint resolution to designate December 7, 1986, as "National Pearl Harbor Remembrance Day" on the occasion of the anniversary of the attack on Pearl Harbor.

SENATE JOINT RESOLUTION 338

At the request of Mr. RIEGLE, the name of the Senator from Kansas [Mr. DOLE] was added as a cosponsor of Senate Joint Resolution 338, a joint resolution to designate November 18, 1986, as "National Community Education Day."

SENATE JOINT RESOLUTION 352

At the request of Mr. METZENBAUM, the names of the Senator from Kansas [Mr. DOLE], and the Senator from Illinois [Mr. SIMON] were added as cosponsors of Senate Joint Resolution 352, a joint resolution to designate the week beginning September 7, 1986, as "Gaucher's Disease Awareness Week."

SENATE JOINT RESOLUTION 368

At the request of Mr. DIXON, the names of the Senator from Ohio [Mr. GLENN], the Senator from Tennessee [Mr. GORE], the Senator from Maryland [Mr. MATHIAS], and the Senator from Maryland [Mr. SARBANES] were added as cosponsors of Senate Joint Resolution 368, a joint resolution to designate the month of October 1986, as "National Spina Bifida Month."

SENATE CONCURRENT RESOLUTION 154

At the request of Mr. D'AMATO, the names of the Senator from Ohio [Mr. METZENBAUM], the Senator from Nebraska [Mr. EXON], and the Senator from Ohio [Mr. GLENN] were added as cosponsors of Senate Concurrent Resolution 154, a concurrent resolution concerning the Soviet Union's persecution of members of the Ukrainian and other public Helsinki Monitoring Groups.

SENATE RESOLUTION 435

At the request of Mr. MOYNIHAN, the names of the Senator from Florida [Mr. CHILES], the Senator from West Virginia [Mr. ROCKEFELLER], the Senator from Tennessee [Mr. GORE], and the Senator from Texas [Mr. BENTSEN] were added as cosponsors of Senate Resolution 435, a resolution to recognize Mr. Eugene Lang for his contributions to the education and the lives of disadvantaged young people.

AMENDMENT NO. 2588

At the request of Mr. DECONCINI, the names of the Senator from Florida [Mr. CHILES], the Senator from New York [Mr. MOYNIHAN], the Senator from Tennessee [Mr. SASSER], the Senator from California [Mr. WILSON], the Senator from New Mexico [Mr. DOMENICI], and the Senator from South Carolina [Mr. HOLLINGS] were added as cosponsors of amendment No. 2588 proposed to S. 2638, a bill to authorize appropriations for military functions of the Department of Defense and to prescribe military personnel levels for such Department for fiscal year 1987, to revise and improve military compensation programs, to improve defense procurement procedures, to authorize certain construction at military installations for fiscal year 1987, to authorize appropriations for national security programs of the Department of Energy for fiscal year 1987, and for other purposes.

At the request of Mr. ABDNOR, his name was added as a cosponsor of amendment No. 2588 proposed to S. 2638, supra.

## AMENDMENTS SUBMITTED

## DEPARTMENT OF DEFENSE AUTHORIZATION ACT, FISCAL YEAR 1987

---

### PRESSLER AMENDMENT NO. 2598

(Ordered to lie on the table.)

Mr. PRESSLER submitted an amendment intended to be proposed by him to amendment No. 2417 to the bill (S. 2638) to authorize appropriations for military functions of the Department of Defense and to prescribe military personnel levels for such Department for fiscal year 1987, to revise and improve military compensation programs, to improve defense procurement procedures, to authorize certain construction at military installations for fiscal year 1987, to authorize appropriations for national security programs of the Department of Energy for fiscal year 1987, and for other purposes; as follows:

Delete Section 309 from Senate Amendment 2417.

---

### PRESSLER AMENDMENT NO. 2599

(Ordered to lie on the table.)

Mr. PRESSLER submitted an amendment intended to be proposed by him to amendment No. 2414 to the bill S. 2638, supra, as follows:

Delete Section 309 from Senate Amendment 2414.

---

### McCLURE AMENDMENT NOS. 2600 AND 2601

(Ordered to lie on the table.)

Mr. McCLURE submitted two amendments intended to be proposed by him to the bill No. 2638, supra, as follows:

AMENDMENT No. 2600

At the end add the following:

Notwithstanding any other provision of this act, Section 309 as added by amendment 2417 shall be null and void.

---

AMENDMENT No. 2601

At the end add the following:

Notwithstanding any other provision of this act, Section 309 as added by amendment 2414 shall be null and void.

---

### SPECTER (AND HEINZ) AMENDMENT NO. 2602

(Ordered to lie on the table.)

Mr. SPECTER (for himself and Mr. HEINZ) submitted an amendment intended to be proposed by them to the bill S. 2638, supra, as follows:

At the appropriate place in the bill insert the following:

None of the provisions of this Act shall be effective unless the Secretary of Defense makes available, under current authority, from the funds available in the Army Industrial Fund, $25,000,000 which shall be available to be used to implement immediately, or to transfer to another appropriation account in this Act to be used to implement immediately, the program proposed by the Department in its letter of August 30, 1985, from the Assistant Secretary of Defense for Acquisition and Logistics, to rehabilitate and convert current steam generating plants at defense facilities in the United States to cool burning facilities in order to achieve a coal consumption target of 1,600,000 short tons of coal per year above current consumption levels at Department of Defense facilities in the United States by fiscal year 1994: Provided, That anthracite or bituminous coal shall be the source of energy at such installations: Provided further, That during the implementation of this proposal, the amount of anthracite coal purchased by the Department shall remain at least at the current annual purchase level, 302,000 short tons.

---

### HUMPHREY AMENDMENT NOS. 2603 THROUGH 2605

(Ordered to lie on the table.)

Mr. HUMPHREY submitted three amendments intended to be proposed by him to the bill S. 2638, supra, as follows:

AMENDMENT No. 2603

At the end add the following:

None of the provisions in Section 306 shall take effect until the same restrictions are applied relative to air services between the United States and the Union of Soviet Socialist Republics, pursuant to existing authority to impose such restrictions.

---

AMENDMENT No. 2604

On page 23, between lines 16 and 17, insert the following:

(e) AVAILABILITY OF FUNDS.—Amounts appropriated pursuant to the authorization in subsection (a) shall remain available until expended, to the extent provided in appropriation Acts.

---

AMENDMENT No. 2605

On page 229, between lines 14 and 15, insert the following new section:

SEC. 1221. SUBMARINE OVERHAUL STUDY.

The Secretary of the Navy shall conduct a detail study and investigation on the desirability and feasibility of applying production line techniques for the overhaul of Los Angeles class submarines. The Secretary shall submit the results of such study and investigation, together with such comments and recommendations as he determines appropriate, to Congress not later than May 1, 1987.

---

### HATFIELD AMENDMENT NO. 2606

Mr. HATFIELD proposed an amendment to the bill S. 2638, supra, as follows:

On page 10, strike out lines 9 through 16 and insert in lieu thereof the following:

SEC. 109. BINARY CHEMICAL WEAPONS.

(a) SENSE OF CONGRESS.—It is the sense of the Congress that the Presidential certification of July 29, 1986, transmitted to Congress pursuant to section 8093 of the Department of Defense Appropriations Act, 1986 (as contained in section 101(b) of Public Law 99-190 (99 Stat. 1217)), does not meet the requirements of such section and, therefore, the conditions necessary to begin production of binary chemical munitions pursuant to such section do not yet exist.

(b) PROHIBITION ON USE OF FUNDS.—None of the funds appropriated pursuant to an authorization contained in this or any other Act may be used—

(1) for the procurement or assembly of binary chemical munitions (or components of such munitions); or

(2) for establishment of production facilities necessary for procurement or assembly of binary chemical munitions (or components of such munitions),

until legislation has been enacted, after the date of the enactment of this Act, declaring that the certification requirements of section 8093 of the Act referred to in subsection (a) have been met.

(c) EXCEPTION.—The prohibition in subsection (b) does not apply to funds used exclusively for research, development, test, and evaluation of binary chemical munitions.

---

### MELCHER AMENDMENTS NOS. 2607 AND 2608

(Ordered to lie on the table.)

Mr. MELCHER submitted two amendments intended to be proposed by him to the bill S. 2638, supra, as follows:

AMENDMENT No. 2607

Notwithstanding any other provisions the figures on the following pages are deemed to be the following:

On page 10, line 24, "$4,093,318,650" in lieu of "$4,815,669,000".

On page 11, line 2, "$7,875,571,300" in lieu of $9,265,378,000".

On page 11, line 3, "$12,672,542,050" in lieu of $14,908,873,000".

On page 11, line 4, "$6,214,327,900" in lieu of $7,310,974,000".

AMENDMENT No. 2608

On page 229, between lines 14 and 15, add the following new section:

"SEC. 1221. REQUIREMENT FOR RETURN OF UNOBLIGATED FUNDS TO THE TREASURY.

Notwithstanding any other provision of this Act, twenty (20) percent of any funds appropriated pursuant to the Department of Defense Authorization Act for FY 1986 to or for the use of the Department of Defense for fiscal year 1986 that remain unobligated as of September 30, 1986, shall be returned to the general fund of the Treasury. The preceding sentence shall not apply to funds necessary for carrying out multiyear contracts."

---

### ROTH AMENDMENT NO. 2609

(Ordered to lie on the table.)

Mr. ROTH submitted an amendment intended to be proposed by him to the bill S. 2638, supra, as follows:

On page 283, line 1, strike section 2172 and redesignate the following sections accordingly.

---

### ANDREWS AMENDMENT NO. 2610

(Ordered to lie on the table.)

Mr. ANDREWS submitted an amendment intended to be proposed by him to the bill S. 2638, supra, as follows:

On page 203, strike out lines 1 through 13.

## FEDERAL-AID HIGHWAY ACT

### LAUTENBERG (AND OTHERS) AMENDMENT NO. 2611

(Ordered to lie on the table.)

Mr. LAUTENBERG (for himself, Mr. HEINZ, Mr. METZENBAUM, and Mr. SIMON) submitted an amendment intended to be proposed by them to the bill (S. 2405) to authorize appropriations for certain highways in accordance with title 23, United States Code, and for other purposes; ans follows:

After section 145, insert the following:

S. 2405

SEC. 146. Sections 146 through 168 of this Act may be cited as the "Disaster Relief Act Amendments of 1986".

SEC. 147. The short title of the Disaster Relief Act of 1974 (Public Law 93-288) is hereby amended by deleting the words "Disaster Relief Act of 1974" and inserting in lieu thereof "Major Disaster Relief and Emergency Assistance Act".

SEC. 148. Section 102(1) of the Disaster Relief Act of 1974 (42 U.S.C. 5122(1)) is amended to read as follows:

"(1) 'Emergency' means any occasion or instance for which, in the determination of the President, Federal assistance is needed to supplement State and local efforts and capabilities to save lives and to protect property, public health and safety, or to lessen or avert the threat of a catastrophe in any part of the United States.".

SEC. 149. Title VIII of the Public Works and Economic Development Act of 1965, as amended (Public Law 89-136; 42 U.S.C. 3231-3236) is hereby repealed, and title V of the Disaster Relief Act of 1974 (Public Law 93-288) is hereby amended to read as follows:

"TITLE V—FEDERAL EMERGENCY ASSISTANCE PROGRAMS

"PROCEDURES

"SEC. 501. (a) All requests for a determination by the President that an emergency exists shall be made by the Governor of the affected State. Such request shall be based upon the Governor's finding that the situation is of such severity and magnitude that effective response is beyond the capabilities of the State and the affected local governments and that Federal assistance is necessary. The Governor's request will furnish information describing State and local efforts and resources which have been or will be used to alleviate the emergency, and will define the type and extent of Federal aid required. As a part of this request, and as a prerequisite to emergency assistance under the act, the Governor shall take appropriate action under State law and direct execution of the State's emergency plan. Based upon such Governor's request, the President may declare that an emergency exists.

"(b) The President may exercise any authority vested in him by section 502 and section 503 of this Act with respect to an emergency when he determines that an emergency exists for which the primary responsibility for response rests with the United States because the emergency involves a subject area for which, under the Constitution or laws of the United States, the United States exercises exclusive or preeminent responsibility and authority. The President may determine that such an emergency exists only after consultation with the Governor of the affected State, if practicable. The President's determination, however, may be made without regard to the provisions of section 501(a) of this Act.

"FEDERAL ASSISTANCE

"SEC. 502. In any emergency, the President may—

"(a) direct any Federal agency with or without reimbursement to utilize its authorities and the resources granted to it under other Acts, including but not limited to personnel, equipment, supplies, facilities, and managerial, technical and advisory services in support of State and local emergency assistance efforts to save lives and to protect property, public health and safety or to lessen or avert the threat of a catastrophe;

"(b) coordinate all Federal agencies and voluntary relief or disaster assistance organizations providing emergency assistance, and coordinate emergency assistance with State and local officials; and

"(c) provide technical and advisory assistance to affected State and local governments in the performance of essential community services, warning of risks of hazards, public information and assistance in health and safety measures, management and control, and reduction of immediate threats to public health and safety.

"EMERGENCY ASSISTANCE

"SEC. 503. (a) In an emergency, when the Federal assistance provided pursuant to section 502 of this title is inadequate, the President may provide assistance to save lives and protect property, public health and safety, or to lessen or avert the threat of a catastrophe. When debris removal assistance is appropriate under this section, it shall be provided in accordance with the terms and conditions of section 406 of this Act.

"(b) In any emergency and except as provided by subsection (c) of this section, the costs of providing emergency assistance under this section shall not exceed $5,000,000 of funds appropriated to carry out this Act.

"(c) The limitation of subsection (b) of this section may be exceeded when the President determines that continued emergency assistance is immediately required; that there is a continuing and immediate risk to lives, property, public health or safety; and that necessary assistance will not otherwise be provided on a timely basis. In the event that the limitation of subsection (b) is exceeded, the President shall report to Congress on the nature and extent of the emergency assistance requirements and propose additional legislation if necessary."

SEC. 150. Section 102(2) of the Disaster Relief Act of 1974 (42 U.S.C. 5122(2)) is amended to read as follows—

"(2) 'Major disaster' means any natural catastrophe, including any hurricane, tornado, storm, high water, wind-driven water, tidal wave, tsunami, earthquake, volcanic eruption, landslide, mudslide, snowstorm, or drought, or any fire, flood, or explosion, regardless of cause, in any part of the United States which, in the determination of the President, causes damage of sufficient severity and magnitude to warrant major disaster assistance under this Act to supplement the efforts and available resources of States, local governments, and disaster relief organizations in alleviating the damage, loss, hardship, or suffering caused thereby."

SEC. 151. Title II of the Disaster Relief Act of 1974 (42 U.S.C. 5131-5132) is amended by—

(1) striking the words "(including the Defense Civil Preparedness Agency)" in section 201(a);

(2) adding the words "including evaluations of natural hazards and development of the programs and actions required to mitigate such hazards," between the words "plans" and "except" in section 201(d); and

(3) striking "$25,000" in section 201(d) and inserting in lieu thereof "$50,000".

SEC. 152. Title III of the Disaster Relief Act of 1974 (42 U.S.C. 5141-5158) is amended by—

(1) deleting sections 301, 305, and 306 and renumbering subsequent sections appropriately;

(2) deleting the caption "FEDERAL ASSISTANCE" of section 301, as redesignated by paragraph (1) of this section, and inserting in lieu thereof "RULES AND REGULATIONS";

(3) deleting the first and second sentences of subsection (a) of section 301, as redesignated by paragraph (1) of this section, and amending the final sentence thereof by adding ", with or without reimbursement," immediately before "through"; and

(4) deleting ", or economic status" in the second sentence of section 308(a) as redesignated by paragraph (1) of this section, and adding "or" before "age,".

SEC. 153. Section 302(a) of the Disaster Relief Act of 1974 (42 U.S.C. 5143(a)), as designated by section 152(1) of this Act, is amended by adding at the end thereof the following: "The Federal coordinating officer shall represent the President in coordinating the emergency or the major disaster response and recovery effort.".

SEC. 154. Section 311 of the Disaster Relief Act of 1974 (42 U.S.C. 5154), as redesignated by section 152(1) of this Act, is amended by redesignating subsections (a), (b), and (c) as (b), (c), and (d), respectively, and by adding at the beginning thereof a new subsection as follows:

"(a) As a condition of assistance, any public facility and private nonprofit facility which is:

"(1) located in a special flood hazard area as identified by the Director pursuant to the National Flood Insurance Act of 1986, as amended (42 U.S.C. 4001 et seq.);

"(2) damaged or destroyed by flooding; and

"(3) otherwise eligible for assistance under section 405 of this Act, must be covered, on the date of the flood damage, by reasonable and adequate flood insurance. Assistance under section 405 for any such facility not so covered shall be reduced by the maximum amount of benefits which could have been received had reasonable and adequate flood insurance been in force: *Provided, however,* That this reduction of assistance shall not apply to uninsured facilities where such communities have been identified for less than one year as having special flood hazard areas. The limitations of assistance required by this subsection shall not apply unitl final regulations are promulgated by the President. Such regulations shall define reasonable and adequate flood insurance.".

SEC. 155. Section 312 of the Disaster Relief Act of 1974 (42 U.S.C. 5155), as redesignated by section 152(1) of this Act, is amended to read as follows:

"DUPLICATION OF BENEFITS

"SEC. 312. (a) Agencies or other organizations providing Federal assistance for needs or losses resulting from a major disaster or emergency shall assure that no person, business concern, or other entity receives any such Federal assistance if said person, busi-

ness concern, or entity receives or is entitled to receive benefits for the same purposes from insurance or any other Federal or non-Federal source: *Provided*, That nothing in this section shall prohibit the provision of Fedeal assistance to a person, business concern, or other entity who is or may be entitled to receive benefits for the same purposes from insurance or any other Federal or non-Federal source when any such applicant for Federal assistance has not received such other benefits by the time of application for Federal assistance, so long as the applicant for Federal assistance agrees as a condition of receipt of Federal assistance to repay duplicative assistance from insurance or any other Federal or non-Federal source to the agency or other organizations providing the Federal assistance. The President shall establish such procedures as are deemed necessary to insure uniformity in preventing such duplication of benefits. Receipt of partial benefits for a loss or need resulting from a major disaster or emergency does not preclude provision of additional Federal assistance for any part of such loss or need for which benefits have not been provided.

"(b) A person, business concern, or other entity receiving Federal assistance for needs or losses resulting from a major disaster or emergency shall be liable to the United States to the extent that such Federal assistance has duplicated benefits available to the person, business concern, or other entity for the same purpose from insurance or any other Federal or non-Federal sources. The agency or other organization which provided the duplicative assistance shall collect such duplicative assistance from the recipient in accordance with the Claims Collection Act of 1966, as amended, when in the best interest of the Government. The repayment shall not exceed the amount of Federal assistance received.

"(c) Federal disaster assistance and comparable disaster assistance provided by States, local governments, and disaster assistance organizations to individuals and families shall not be considered as income or a resource when determining eligibility or benefit levels for federally funded income assistance or resource tested benefit programs.".

SEC. 156. (a) Title III of the Disaster Relief Act of 1974 (42 U.S.C. 5141-5158) is amended by adding at the end thereof four new sections as follows:

"PROTECTION OF ENVIRONMENT

"SEC. 315. No action taken or assistance provided pursuant to section 402, 403, 406, 502, or 503, of this Act, or any assistance provided pursuant to section 405 of this Act that has the effect of restoring facilities substantially as they existed prior to the disaster, shall be deemed a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (83 Stat. 852). Nothing in this section shall alter or affect the applicability of the National Environmental Policy Act of 1969 (83 Stat. 852) to other Federal actions taken under this Act or under any other provisions of law.

"RECOVERY OF FUNDS

"SEC. 316. The Attorney General of the United States is authorized to institute actions in the United States District Court for the district in which an emergency or major disaster occurred, or in such district as otherwise provided by law, against any party whose acts or omissions may in any way have caused or contributed to the damage or hardship for which Federal assistance is provided pursuant to this Act. Upon the showing that an emergency or major disaster or the associated damage or hardship was caused in whole or in part by an act or omission of such party, then such party shall be liable to the United States for the full amount of Federal expenditures made to alleviate the suffering or damage attributable to such act or omission. The authority of this section shall also apply to the recovery of Federal funds expended under the authority of section 419 of this Act for fire suppression.

"AUDITS AND INVESTIGATIONS

"SEC. 317. (a) The President, when deemed necessary to assure compliance with any provision of this Act or related regulations, shall conduct audits and investigations and in connection therewith may enter such places and inspect such records and accounts and question such persons as deemed necessary to determine the facts relative thereto.

"(b) The President, when deemed necessary to assure compliance with any provision of this Act or related regulations, may require audits by State and local governments in connection with assistance provided under the Act.

"(c) The President and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access, for purposes of investigation, audit, and examination, to any books, documents, papers, and records of any person or entity relating to any activity or program undertaken or funded pursuant to this Act.

"CRIMINAL AND CIVIL PENALTIES

"SEC. 318. (a) Any person, organization, or other entity who knowingly makes a false statement or representation of a material fact, or who knowingly fails to disclose a material fact, in any application or other document in connection with a request for assistance under this Act, or who knowingly falsifies or withholds, conceals, or destroys any documents, books, records, reports, or statements upon which such request for assistance is based, shall be fined not more than $10,000 or imprisoned for not more than one year, or both, for each violation.

"(b) Any person, organization, or other entity who knowingly makes a false statement or representation of a material fact, or who knowingly fails to disclose a material fact, in any bill, invoice, claim, or other document requesting reimbursement for work or services performed in connection with assistance provided under this Act, or who knowingly falsifies or withholds, conceals, or destroys any documents, books, records, reports, or statements upon which such request for reimbursement is based, shall be fined not more than $10,000 or imprisoned for not more than one year, or both, for each violation.

"(c) Any person, organization, or other entity who knowingly misapplies the proceeds of a loan or other cash benefit obtained under any section of this Act shall be subject to a find in an amount equal to one and one-half times the misapplied amount of the loan or cash benefit.

"(d) Whenever it appears that any person, organization, or other entity has violated or is about to violate any provision of this Act, including rules and regulations issued and civil penalties imposed, the Attorney General may bring a civil action for such relief as may be appropriate. Such action may be brought in the district court of the United States having jurisdiction where the violation occurred or, at the option of the parties, in the United States District Court for the District of Columbia.

"(e) The President, or the duly authorized representative of the President, shall expeditiously refer to the Attorney General of the United States for appropriate action such evidence developed in the performance of functions under this Act as may be found to warrant consideration for criminal prosecution under the provisions of this Act or other Federal law.".

(b) Title III of the Disaster Relief Act of 1974 is amended by deleting subsections (a) and (c) of section 314 (42 U.S.C. 5157), as redesignated by section 152(1) of this Act, and by renumbering "(b)" from the remaining subsection of section 314 as subsection "(f)" of section 318 as added by section 156(a) of this Act.

(c) Title IV of the Disaster Relief Act of 1974 is amended by deleting section 405 (42 U.S.C. 5175) and by renumbering subsequent sections appropriately.

(d) Section 315 of the Disaster Relief Act of 1974 (42 U.S.C. 5158), as redesignated by section 152(1) of this Act, is further redesignated as section 314.

SEC. 157. Title IV of the Disaster Relief Act of 1974 (42 U.S.C. 5171-5189) is amended by adding three new sections as follows and by renumbering subsequent sections appropriately:

"PROCEDURES

"SEC. 401. (a) All requests for a declaration by the President that a major disaster exists shall be made by the Governor of the affected State. Such Governor's request shall be based upon a finding that the disaster is of such severity and magnitude that effective response is beyond the capabilities of the State and the affected local governments and that Federal assistance is necessary. As a part of this request, and as a prerequisite to major disaster assistance under the Act, the Governor shall take appropriate action under State law and direct execution of the State's emergency plan. He shall furnish information on the extent and nature of State resources which have been or will be used to alleviate the conditions of the disaster, and shall certify that for the current disaster, State and local government obligations and expenditures (of which State commitments must be a significant proportion) will constitute the expenditure of a reasonable amount of the funds of such State and local governments for alleviating the damage, loss, hardship, or suffering resulting from such disaster, including, but not limited to, the cost-sharing provisions pursuant to sections 405, 406, 407, and 410 of this Act. Based upon such Governor's request, the President may declare that a major disaster exists.

"(b) In any case where an eligible applicant (or the State) is unable to assume its financial responsibility under the cost-sharing provisions of sections 405, 406, and 407 of this Act, the President is authorized to lend or advance to the State such 25 per centum share. For the purposes of section 405, such loan or advance shall be authorized only after the occurrence of concurrent, multiple major disasters in a given jurisdiction, or the extraordinary costs of a particular major disaster, and when the damages caused by such major disasters are so overwhelming and severe that it is not possible for the applicant or the State to assume their financial responsibility under this Act immediately. Except as provided by

subsection (c) of this section, any such loan or advance is to be repaid to the United States there shall be no deferral of the repayment of loans or advances authorized by this subsection or of accrued interest. Such obligations shall bear interest at a rate determined by the Secretary of the Treasury, taking into consideration the current market yields on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the reimbursement period of the loan or advance.

"(c) The President may cancel all or any part of such loan or advance made regarding section 405 or section 406 for concurrent, multiple major disasters or a single catastrophic major disaster if a determination is made that following the three full fiscal years after the loan or advance is made, the applicant demonstrates substantial and continuing inability to repay all or part of the loan or advance.

"(d) The President shall issue regulations describing the terms and conditions under which any loans or advances authorized by this section may be made or canceled.

"FEDERAL ASSISTANCE

"SEC. 402. In any major disaster, the President may—

"(a) direct any Federal agency with or without reimbursement to utilize its authorities and the resources granted to it under other Acts including, but not limited to, personnel, equipment, supplies, facilities, and managerial, technical, and advisory services in support of State and local assistance efforts;

"(b) coordinate all Federal agencies and voluntary relief or disaster assistance organizations providing disaster assistance, and coordiante disaster assistance with State and local officials; and

"(c) provide technical and advisory assistance to affected State and local governments in the performance of essential community services, warning of risks and hazards, public information and assistance in health and safety measures, management and control, and reduction of immediate threats to public health and safety.

"COOPERATION OF FEDERAL AGENCIES IN RENDERING DISASTER ASSISTANCE

"SEC. 403. (a) In any major disaster, Federal agencies are hereby authorized, on the direction of the President, to provide assistance by—

"(1) utilizing or lending, with or without compensation therefore, to States and local governments, their equipment, supplies, facilities, personnel, and other resources, other than the extension of credit under the authority of any Act;

"(2) distribution or rendering, through the American National Red Cross, the Salvation Army, the Mennonite Disaster Service, and other relief and disaster assistance organizations, or otherwise, medicine, food, and other consumable supplies, other services to disaster victims, or emergency assistance;

"(3) donating or lending equipment and supplies, including that determined in accordance with applicable laws to be surplus to the needs and responsibilities of the Federal Government, to State and local governments for use or distribution by them for the purposes of this Act; and

"(4) performing on public or private lands or waters any emergency work or services essential to save lives and to protect and preserve property, public health and safety, including, but not limited to: Search and rescue, emergency medical care, emergency mass care, emergency shelter, and provisions of food, water, medicine, and other essential needs, including movement of supplies or persons; construction of temporary bridges necessary to the performance of emergency tasks and essential community services; provision of temporary facilities for schools and other essential community services; warning of further risks hazards; public information and assistance on health and safety measures; technical advice to State and local governments on disaster management and control; reduction of immediate threats to life, property, and public health and safety; and making contributions to State or local governments for the purpose of carrying out the provisions of this paragraph. Such contributions for emergency work under this section and section 402 of this Act shall not exceed 100 per centum of the net eligible cost, or for small projects 100 per centum of the Federal estimate of the net eligible cost, of such emergency work or services performed by State and local governments: *Provided*, That where debris removal assistance is appropriate under this section or section 402 of this Act it shall be provided in accordance with the terms and conditions of section 406 of this Act.".

SEC. 158. (a) Section 405 of the Disaster Relief Act of 1974 (42 U.S.C. 5172), as redesignated by section 157 of this Act, is amended to read as follows:

"(a) The President is authorized to make contributions to State or local governments to help repair, restore, reconstruct, or replace public facilities belonging to such State or local government which were damaged or destroyed by a major disaster. Notwithstanding any other provision of law, such contribution shall be limited to 75 per centum of the net eligible cost, or for small projects 75 per centum of the Federal estimate of the net eligible cost, of repairing, restoring, reconstructing, or replacing any such facility estimated on the basis of the design of such facility as it existed immediately prior to such major disaster and in conformity with current applicable codes, specifications, and standards. For the purposes of this section, 'public facility' includes any publicly owned flood control, navigation, irrigation, reclamation, public power, sewage treatment and collection, water supply and distribution, watershed development, or airport facility, any non-Federal-aid street, road, or highway, any other public building, structure, or system including those used for educational or recreational purposes and any part.

"(b) The President is authorized to make contributions to help repair, restore, reconstruct, or replace eligible private nonprofit facilities which were damaged or destroyed by a major disaster. Notwithstanding any other provision of law, such contributions shall be 75 per centum of the net eligible cost, or for small projects 75 per centum of the Federal estimate of the net eligible cost, of repairing, restoring, reconstructing, or replacing any such facility estimated on the basis of the design of such facility as it existed immediately prior to such major disaster and in conformity with current applicable codes, specifications, and standards. For the purposes of this section, 'eligible private nonprofit facility' means private nonprofit educational utility, emergency, medical, and custodial care facilities, including those for the aged and disabled, and such private nonprofit facilities on Indian reservations, which were damaged or destroyed by a major disaster.

"(c) No authority under this section shall be exercised unless the affected State, local government, or eligible private nonprofit organization first agrees that such facility shall be repaired, restored, reconstructed, or replaced in compliance with flood plain management and hazard mitigation criteria required by the President, with the provisions of the Coastal Barrier Resources Act and other applicable Federal statutes, and in conformity with other applicable codes, specifications, and standards, except as otherwise provided in section 315 of this Act.

"(d) For those facilities eligible under this section which were in the process of construction when damaged or destroyed by a major disaster, the contribution shall be 75 per centum of the net eligible costs of restoring such facilities substantially to their predisaster condition: *Provided*, That the term 'net eligible costs' shall not include cost which, under a contract, are the responsibility of a contractor.

"(e) In those cases, except for small projects, where a State or local government determines that public welfare would not be best served by repairing, restoring, reconstructing, or replacing particular public facilities owned or controlled by that State or that local government and which have been damaged or destroyed in a major disaster, it may elect to receive, in lieu of the contribution described in subsection (a) of this section, a contribution that shall be 50 per centum of the Federal estimate of the net eligible cost of repairing, restoring, reconstructing, or replacing such damaged facilities owned by it within its jurisdiction. The cost of repairing, restoring, reconstructing, or replacing damaged or destroyed public facilities shall be estimated on the basis of the design of each facility as it existed immediately prior to such disaster and in conformity with current applicable codes, specifications, and standards. Funds contributed under this subsection may be expended either to repair or restore certain selected damaged public facilities or to construct new public facilities which the State or local government determines to be necessary to meet its needs for governmental services and functions in the disaster-affected area.".

(b) The Disaster Relief Act of 1974 is amended by deleting section 421 (42 U.S.C. 5189), as redesignated by sections 156(c) and 157 of this Act, and by striking "or 419" each place that this phrase appears in section 311 (42 U.S.C. 5154), as redesignated by section 152(l) of this Act.

(c) Section 406 of the Disaster Relief Act of 1974 (42 U.S.C. 5173), as redesignated by section 157 of this Act, is amended by adding at the end thereof the following:

"(c) Notwithstanding any other provision of law, whether carried out directly through Federal departments, agencies, or instrumentalities or through grants to State or local governments, Federal assistance provided under authority of this section shall be 75 per centum of the net eligible costs, or for small projects 75 per centum of the Federal estimate of the net eligible costs, of debris removal.".

SEC. 159. Section 407(a) of the Disaster Relief Act of 1974, as redesignated by section 157 of this Act, is amended to read as follows:

"(a) The President is authorized to provide, either by purchase or lease, temporary housing including, but not limited to, unoccupied habitable dwellings, suitable rental housing, mobile homes, or other readily fabricated dwellings for those who, as a result

of a major disaster, require temporary housing. Whenever he determines it to be in the public interest, the President is authorized to provide temporary housing assistance by using Federal departments, agencies, or instrumentalities. In addition, the President is authorized to provide temporary housing assistance by contributing not to exceed 100 per centum (or 75 per centum for group site development pursuant to paragraph (2) of this subsection) of the costs of temporary housing assistance to a State or local government which provides such assistance to those who require it as a result of a major disaster. Federal financial and operational responsibilities for temporary hosing assistance shall not exceed eighteen months from the date of the major disaster declaration by the President, unless he determines that due to extraordinary circumstances it would be in the public interest to extend the eighteen month period.

"(1) Temporary housing assistance pursuant to this subsection shall be provided only when adequate alternative housing is unavailable, unless there is compelling need to do so because of extreme hardship.

"(2) Any mobile home or other readily fabricated dwelling supplied pursuant to this subsection shall be placed on a site complete with utilities provided either by the State or local government, or by the owner or occupant of the site who was displaced by the major disaster. When the President determines such action to be in the public interest, he may authorize installation of essential utilities at Federal expense and he may elect to provide other more economical or accessible sites. However, in the event the President authorizes the development of a group site, that is, a site for two or more households, the Federal share shall be 75 per centum of the development costs, and the remainder shall be met by funds provided by the State or local government.".

SEC. 160. Section 408 of the Disaster Relief Act of 1974 (42 U.S.C. 5176), as redesignated by sections 156(c) and 157 of this Act, is amended by adding "(a)" after "408." and by adding a new subsection "(b)" as follows:

"(b) The President is authorized to contribute up to 50 per centum of the cost of implementing hazard mitigation projects which he has determined would be cost effective and would substantially reduce the risk of future damage, hardship, loss, or suffering in the area affected by a major disaster. Such projects shall be identified following the evaluation of natural hazards provided for the subsection (a) of this section and shall be subject to approval by the President. The total of the contributions made under this subsection shall not exceed 10 per centum of the Federal estimate of grants made under the authority of section 405 of this Act for each major disaster.".

SEC. 161. Section 409(a) of the Disaster Relief Act of 1974 (42 U.S.C. 5177), as redesignated by sections 156(c) and 157 of this Act, is amended to read as follows: "The President is authorized to provide such disaster unemployment assistance as he deems appropriate to individuals who are unemployed as a result of a major disaster. Disaster unemployment assistance authorized by this section shall be available to an eligible individual for a period not to exceed fifty-two weeks after the week in which an eligible individual became unemployed as a result of a major disaster, and such period shall be regarded as the disaster assistance period for that individual for the purposes of this section. Disaster unemployment assistance shall not be payable with respect to any week for which an individual is entitled to unemployment compensation (as defined in section 85(c) of the Internal Revenue Code of 1954, as amended) or waiting week credit. The maximum amount of disaster unemployment assistance payable to any individual with respect to a major disaster shall not exceed twenty-six times the maximum weekly amount for which the individual establishes eligibility minus the amount of any unemployment compensation paid to the individual during the fifty-two week benefit period established pursuant to this section. Such assistance for a week of unemployment shall not exceed the maximum weekly amount authorized under the unemployment compensation law of the State in which the disaster occurred, and the amount of assistance under this section for a week of unemployment shall be reduced by any amount of private income protection insurance compensation available to such individual for such week of unemployment. The payment of unemployment compensation to an individual with respect to any week subsequent to the exhaustion of eligibility of such individual for disaster unemployment assistance and within the fifty-two week benefit period established pursuant to this section shall not be regarded as duplication of benefits under section 312 of this Act. The President is directed to provide disaster unemployment assistance through agreements with States which, in his judgment, have an adequate system for administering such assistance through existing State agencies.".

SEC. 162. (a) Section 410(b) of the Disaster Relief Act of 1974 (42 U.S.C. 5178), as redesignated by sections 156(c) and 157 of this Act, is amended by adding a period after the word "share" in the second sentence of that subsection and by deleting the following phrase from the second sentence of section 410(b): "and any such advance is to be repaid to the United States when such State is able to do so.".

(b) Section 410(b) of the Disaster Relief Act of 1974 (42 U.S.C. 5178), as redesignated by sections 156(c) and 157 of this Act, is further amended by adding the following sentence between the second and third sentences of this subsection: "Such advances shall bear interest from the date of the advance at a rate determined by the Secretary of the Treasury, taking into consideration the current market yields on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the reimbursement period of the loan or advance. Repayment of such advances and of interest which accrues on the advances may be deferred for no longer than two years from the date of the major disaster declaration.".

SEC. 163. Section 410(b) of the Disaster Relief Act of 1974 (42 U.S.C. 5178), as redesignated by sections 156(c) and 157 of this Act, is amended by striking "$5,000" in the last sentence and inserting in lieu thereof "$7,500".

SEC. 164. Section 415 of the Disaster Relief Act of 1974 (42 U.S.C. 5183), as redesignated by sections 156(c) and 157 of this Act, is amended by striking "(through the National Institute of Mental Health)".

SEC. 165. Section 420(d) of the Disaster Relief Act of 1974 (42 U.S.C. 5188), as redesignated by sections 156(c) and 157 of this Act, is deleted.

SEC. 166. The Disaster Relief Act of 1974 (42 U.S.C. 5121-5202) is amended by—

(1) striking paragraph (7) of section 101(b) (42 U.S.C. 5121), striking "; and" from paragraph (6) and adding in lieu thereof a period, and adding "and" at the end of paragraph (5);

(2) striking "the Canal Zone," in paragraphs (3) and (4) of section 102 (42 U.S.C. 5122);

(3) striking "DISASTER" in the caption of title III (42 U.S.C. 5141-5158) and inserting in lieu thereof "MAJOR DISASTER RELIEF AND EMERGENCY";

(4) striking "section 402 or 404 of" in section 308(b) (42 U.S.C. 5151), as redesignated by section 152(i) of this Act;

(5) adding "emergency or" before the word "major" each of two places that word appears in section 307 (42 U.S.C. 5150), as redesignated by section 152(i) of this Act;

(6) striking in section 310(b) (42 U.S.C. 5153), as redesignated by section 152(1) of this Act, everything after the word "areas" and inserting in lieu thereof a period;

(7) striking "or section 803 of the Public Works and Economic Development Act of 1965," each place the phrase appears in section 311 (42 U.S.C. 5154), as redesignated by section 152(1) of this Act;

(8) striking "402" each place that number appears in section 311 (42 U.S.C. 5154), as redesignated by section 152(1) of this Act, and inserting in lieu thereof "405";

(9) adding "emergency and major" before the word "disaster" in section 313 (42 U.S.C. 5156), as redesignated by section 152(1) of this Act;

(10) adding the word "MAJOR" between the words "FEDERAL" and "DISASTER" in the caption to title IV (42 U.S.C. 5171-5189);

(11) striking "in emergencies or in major disasters" in the third sentence of paragraph (2) of section 407(d) (42 U.S.C. 5174), as redesignated by section 157 of this Act;

(12) striking "311" in section 407(d)(2) (42 U.S.C. 5174), as redesignated by section 157 of this Act, and inserting in lieu thereof "308";

(13) striking "an emergency or" in section 417 (42 U.S.C. 5185), as redesignated by sections 156(c) and 157 of this Act, and inserting in lieu thereof "a";

(14) striking "408" in section 605 (42 U.S.C. 5121) and inserting in lieu thereof "410";

(15) striking "301" in subtitle C of title I of the State and Local Fiscal Assistance Act of 1972 (Public Law 92-512; 86 Stat. 919) and inserting in lieu there of "401";

(16) striking "President" each place that word appears in section 309(a), as redesignated by section 152(1) of this Act, and inserting in lieu thereof "Federal coordinating officer".

(17) striking "rent" in section 310(a)(2) (42 U.S.C. 5153), as redesignated by section 152(1) of this Act, and inserting in lieu thereof "income"; and

(18) striking paragraph (1) of section 310(a) (42 U.S.C. 5153), as redesignated by section 152(1) of this Act, and renumbering subsequent paragraphs appropriately.

SEC. 167. (a) Section 6(a)(6)(E) of the Coastal Barrier Resource Act, 16 U.S.C. 3505(a)(6)(E), is amended by striking out "pursuant to sections 305 and 306 of the Disaster Relief Act of 1974" and inserting in lieu thereof" pursuant to sections 402, 403, 502, and 503 of the Major Disaster Relief and Emergency Assistance Act".

(b) Whenever any reference is made in any provision of law (other than this Act), regulation, rule, record, or document of the United States to provisions of the Disaster Relief Act of 1974 repealed or renumbered

by sections 146 through 168 of this Act, such reference shall be deemed to be a reference to the appropriate provisions of the Major Disaster Relief and Emergency Assistance Act.

SEC. 168. (a) Except as provided in subsection (b), sections 146 through 168 of this Act shall take effect on October 1, 1986.

(b)(1) Sections 146 through 168 of this Act shall not affect the administration of any assistance provided under the authority of the Disaster Relief Act of 1974, for any major disaster or emergency declared by the President prior to October 1, 1986.

(2) Except with regard to section 409(a) of the Disaster Relief Act of 1974, as redesignated by sections 156(c) and 157 of this Act (relating to disaster unemployment assistance)—

(A) rules and regulations issued under statutory provisions which are repealed, modified, or amended by this Act shall continue in effect as though issued under the authority of this Act until they are expressly abrogated, modified, or amended by the President; and

(B) provision of disaster assistance authorized by statutory provisions repealed, modified, or amended by this Act or rules and regulations issued thereunder, or proceedings involving violations of statutory provisions repealed, modified, or amended by this Act or rules and regulations issued thereunder which are in process prior to the effective date of this Act, may be continued to conclusion as though the applicable statutory provisions had not been repealed, modified, or amended.

(3) Violations of statutory provisions or rules and regulations issued under the authority of statutory provisions repealed, modified, or amended by this Act or rules and regulations issued thereunder which are committed prior to the effective date of this Act may be proceeded against under the law in effect at the time of the specific violation.

(C) Title IV of the Disaster Relief Act of 1974 (42 U.S.C. 5171-5189) is amended by adding at the end thereof a new section as follows:

"SEC. 421. No State shall be ruled ineligible to receive assistance under this Act solely by virtue of an arithmetic formula based on income or population."

● Mr. LAUTENBERG. Mr. President, today I am submitting along with Senator HEINZ, an amendment to the Federal-Aid Highway Act of 1986 to prevent drastic and ill-advised changes to the Federal Disaster Relief Program.

On April 18, the Federal Emergency Management Agency issued regulations which would deny Federal disaster assistance for the repair and reconstruction of public facilities in thousands of communities nationwide. These regulations have been greeted by a storm of protest by cities and States across the country.

Mr. President, the FEMA regulations would result in 61 of the last 111 disaster declarations not being made. In the event of a disaster, if a State did not exceed a given dollar threshold, no Federal aid would be available. The cost sharing with local governments when a disaster is declared would be increased from 75/25 percent Federal to local match to 50/50 percent.

It is time the Congress stepped in to prevent these regulations from taking effect. Absent congressional action, the regulations will take effect on October 1.

Mr. President, I had intended to offer a simple amendment to the debt ceiling bill to prevent these regulations from taking effect and giving the Congress time to authorize changes in the Disaster Relief Program. I was persuaded to offer an amendment on the highway bill, because the disaster relief legislation would then be in conference with the proper House committee. As ranking member on the Community and Regional Development Subcommittee of the Environment and Public Works Committee, I want to move this legislation forward in a manner which respects the committee's jurisdiction.

The amendment Senator HEINZ and I are offering will prevent FEMA from establishing an arbitrary ability to pay threshold. It would also establish in law the 75/25 percent Federal to local cost sharing in current practice. In addition, the amendment makes changes in the Disaster Relief Program sought by FEMA and previously supported by the Senate.

Mr. President, this amendment will go far to resolving the controversy over the FEMA regulations and I hope it will be accepted as part of the highway bill.●

---

## PRYOR (AND OTHERS) AMENDMENT NO. 2612

Mr. PRYOR (for himself, Mr. GORTON, and Mr. HATFIELD) proposed an amendment to the bill S. 2638, supra, as follows:

On page 4, line 3, strike out "$6,121.657,000" and insert in lieu thereof "$6,093,124,000".

On page 6, line 20, strike out "$10,374,848,000" and insert in lieu thereof "$10,346,448,000".

On page 10, between lines 16 and 17, insert the following new section:

SEC. 110. RESTRICTIONS OF THE BIGEYE BOMB PROGRAM.

(a) IN GENERAL.—Except as provided in subsection (b), none of the funds appropriated pursuant to an authorization contained in this or any other Act may be used for procurement or assembly of the Bigeye binary chemical bomb, for the procurement of any component or subcomponent for such bomb, or for the procurement of any construction facilities or equipment associated with the production of such bomb until specific, subsequent legislation has been enacted authorizing the obligation, and expenditure of funds for production of the Bigeye binary chemical bomb.

(b) EXCEPTION FOR RESEARCH, DEVELOPMENT, TESTING, AND EVALUATION.—The requirements of this section shall not apply to funds obligated solely for the purpose of carrying out research, development, testing, and evaluation in connection with the Bigeye binary chemical bomb program.

(c) LIMITATION OF FISCAL YEAR 1986 FUNDS.—Except as provided in Subsection (b), the funds appropriated to carry out the Bigeye binary chemical bomb program in fiscal year 1986, and which remain unexpended on the date of the enactment of this Act, may not be used to carry out such program.

---

## HARKIN AMENDMENTS NOS. 2614 AND 2615

(Ordered to lie on the table.)

Mr. HARKIN submitted two amendments intended to be proposed by him to the bill S. 2638, supra, as follows:

At the end of the amendment, add the following new section:

Notwithstanding any other provision of law, no member of the United States Armed Forces, or any agent, or contractor thereof, may provide training, or any other service, or otherwise participate directly or indirectly in the provision of any assistance, to the Nicaraguan democratic resistance within the territory of the countries of Honduras, Costa Rica, and El Salvador.

At the end of Section 208 of the amendment, insert the following new subsection:

(c) Of the amounts transferred under Section 206(a), $50,000,000 shall be transferred only to the Agricultural Credit Insurance Fund established under Section 309 of the Consolidated Farm and Rural Development Act (7 U.S.C. 1929) for use by the Secretary of Agriculture to make and insure real estate and operating loans in accordance with subtitles A and B, respectively of such Act (7 U.S.C. 1922 et seq.).

---

## KERRY AMENDMENT NO. 2616

(Ordered to lie on the table.)

Mr. KERRY submitted an amendment intended to be proposed by him to the bill S. 2638, supra, as follows:

At the appropriate place, add the following:

SEC. . (a) The Congress finds that—

(1) the Republic of South Africa has made little progress in the elimination of apartheid or in the enfranchisement of a majority of its citizens;

(2) the Republic of South Africa has recently intensified its crackdown on journalists by severely restricting written and electronic coverage of news that relates to social, economic, and political unrest in that country;

(3) the Republic of the Philippines has recently demonstrated to the world the power and virtues of democracy;

(4) the Republic of the Philippines relies heavily on the export of sugar to generate needed capital; and

(5) an increase in sugar exports at this crucial transitional time for the Philippines would tend to help their economy and improve the close and historic relationship between our two countries.

(b)(1) Notwithstanding any other provision of law, no sugars, sirups, or molasses that are products of the Republic of South Africa may be entered after the date of enactment of this Act.

(2) The aggregate quantity of sugars, sirups, and molasses that—

(A) are products of the Philippines, and

(B) may be entered (determined without regard to this paragraph) under any limitation imposed by law on the quantity of all sugars, sirups, and molasses that may be entered during any period of time occurring after the date of enactment of this Act,

shall be increased by the aggregate quantity of sugars, sirups, and molasses that are products of the Republic of South Africa which may have been entered under such limitation during such period if this section did not apply to such period.

(c)(1) Paragraph (c)(i) of headnote 3 of subpart A of part 10 of schedule 1 of the Tariff Schedules of the United States is amended—

(A) by striking out "13.5" in the item relating to the Philippines in the table and inserting in lieu thereof "15.8", and

(B) by striking out the item relating to the Republic of South Africa in the table.

(2) Paragraph (c) of headnote 3 of subpart A of part 10 of schedule 1 of the Tariff Schedules of the United States is amended by adding at the end thereof the following new subparagraph:

"(iii) Notwithstanding any authority given to the United States Trade Representative under paragraphs (e) and (g) of this headnote—

"(A) the percentage allocation made to the Philippines under this paragraph may not be reduced, and

"(B) no allocation may be made to the Republic of South Africa,

in allocating any limitation imposed under any paragraph of this headnote on the quantity of sugars, sirups, and molasses described in items 155.20 and 155.30 which may be entered.".

(d) For purposes of this section—

(1) The Term "entered" means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States.

(2) The term "customs territory of the United States" means the States, the District of Columbia, and Puerto Rico.

---

## DeCONCINI AMENDMENT NO. 2617

Mr. DeCONCINI proposed an amendment to the bill S. 2638, supra, as follows:

At the appropriate place in the bill, insert the following new section:

RESTRICTION ON THE SALE OF STINGER ANTIAIRCRAFT MISSILES

SEC. . Notwithstanding any other provision of law, no STINGER antiaircraft missiles may be sold, donated, or otherwise provided, directly or indirectly, to democratic resistance forces unless the President certifies to the Congress that the proposed recipient has agreed to the following conditions:

(1) Physical security of such missiles shall consist of the following:

(A) Magazines of reinforced concrete, arch-type, and earth-covered whose construction is at least equivalent in strength to the requirements of the Chief of Engineers (Department of the Army) drawings, 652-686 through 652-693, 27 Dec 1941 as revised 14 Mar 42, shall be provided.

(B) Lighting shall be provided for exterior doors and along perimeter barriers.

(C) Exterior doors shall be class 5 steel vault doors secured by two-key operated high security padlock and hasp (mil spec P-43607), and keys shall be secured separately to insure effective two-man control of access.

(D) Fencing shall be 6-foot (minimum) steel chain link on steel or reinforced concrete posts over firm base, and clear zones shall be established inside and outside fencing.

(E) A full-time guard force or combination guard force and instrusion detection system shall be provided.

(2) Such missiles shall be accounted for as follows:

(A) A 100 percent physical count shall be taken monthly with two-man verification, and records shall be available for United States inspection.

(B) A United States Military Training Mission shall conduct the United States inspection and inventory annually, and weapons expended outside of hostilities shall be accounted for.

(C) When missiles are deployed and assembled, the recipient shall be responsible for a daily accounting of such missiles. Records shall be maintained by the recipient and, upon request, shall be available for United States Government review, United States representatives, shall have the right, upon request, to inspect the missiles at the deployed sites.

(3) Movements shall meet United States standards for safeguarding classified material in transit.

(4) Access to such missiles and to classified information relating thereto shall be as follows:

(A) Access to hardware and related classified informaton shall be limited to military and civilian personnel who have the proper security clearance and who have an established need-to-know. Information released shall be limited to that necessary for assigned functions or operational responsibility and, where possible, shall be oral or visual only.

(B) No maintenance shall be authorized which required access to the interior of the operational system. Such maintenance shall be performed under United States control.

(5) The recipient shall report to the United States by the most expeditious means any instance of compromise, loss, or theft of any material or related information. This report shall be followed by prompt investigation and the results provided to the United States

(6) The recipient shall agree that no information on Basic STINGER shall be released to a third government or any other party without United States approval.

(7) The security standards applied by the recipient to protection of Basic STINGER information and material shall be at least equivalent to those of the United States at the identified security classification.

(8) The recipient shall use the information of Basic STINGER only for the purpose for which it was given.

(9) United States officers shall be allowed to inspect and assess physical security measures and procedures established for implementation of these security controls on an announced random access basis.

(10) Damaged launchers shall be returned to United States Armed Forces for repair or demilitarization prior to disposal by United States authorities.

(11) Two principal components of the STINGER system, the gripstock and the missile in its disposable launch tube, shall be stored in separate locations. Each location shall meet all physical security requirements applicable to the STINGER system as a whole. The two locations shall be physically separated sufficiently so that a penetration of the security at one site shall not place the second at risk.

(12) The principle components of the STINGER system, the gripstock, missile, and launch tube, may be brought together and assembled only under the following circumstances:

(A) In the even of hostilities or imminent hostilities.

(B) For firing as part of regularly scheduled training (only those rounds intended to be fired shall be withdrawn from storage and assembled).

(C) For lot testing (only proof rounds) shall be withdrawn and assembled).

(D) When STINGER systems are deployed as part of the point of defenses of high priority installations or activities.

(13) Field exercises or deployments wherein the use of STINGER system is simulated shall not create conditions for the assembly of the system.

---

## SIMON AMENDMENT NOS. 2618 AND 2619

(Ordered to lie on the table.)

Mr. SIMON submitted two amendments intended to be proposed by him to amendment No. 2414 to the bill S. 2638, supra, as follows:

On page 7, line 4 add "as well as any territory occupied by South Africa on violation of international law.

---

AMENDMENT NO. 2619

On page 33, line 4 insert the following "consumption".

"(9) fluorspar,"

---

## THURMOND AMENDMENT NO. 2620

Mr. THURMOND proposed an amendment to the bill S. 2638, supra, as follows:

On page 241, line 7, strike out "$2,950,806,000" and insert in lieu thereof "$2,949,746,000".

On page 241, line 24, strike out "$131,640,000" and insert in lieu thereof "$130,580,000".

On page 260, between lines 19 and 20, insert the following new item:

Andrews Air Force Base, Maryland, $25,000,000.

On page 263, strike out line 8.

On page 264, strike out "$12,800,000" and insert in lieu thereof "$9,400,000".

On page 268, line 12, strike out "$670,057,000" and insert in lieu thereof "$695,057,000".

On page 268, line 15, strike out "$329,543,000" and insert in lieu thereof "$321,243,000".

On page 268, line 17, strike out "$218,320,000" and insert in lieu thereof "$210,280,000".

On page 268, line 20, strike out "$124,860,000" and insert in lieu thereof "$117,260,000".

---

## MURKOWSKI (AND McCONNELL) AMENDMENT NO. 2621

(Ordered to lie on the table.)

Mr. MURKOWSKI (for himself and Mr. McCONNELL) submitted an amendment to the bill S. 2638, supra, as follows:

Strike section 307a and add "Notwithstanding any other section of law, no funds may be expended for any cooperation, directly or indirectly, with the armed forces of the government of South Africa, except activities which are reasonably designed to facilitate the collection of necessary intelligence."

## DURENBERGER AMENDMENT NOS. 2622 THROUGH 2625

(Ordered to lie on the table.)

Mr. DURENBERGER submitted four amendments intended to be proposed by him to the bill S. 2638, supra, as follows:

AMENDMENT No. 2622

At the appropriate place in the bill, add the following new section:

SEC. . No agency or entity of the United States may engage in any form of cooperation, direct or indirect, with the armed forces of the government of South Africa, except activities which are reasonably designed to facilitate the collection of necessary intelligence. Each such activity shall be considered a significant anticipated intelligence act for the purpose of Sec. 501 of the National Security Act of 1947.

AMENDMENT No. 2623

At the appropriate place in the amendment, add the following new section:

SEC. . No agency or entity of the United States which is involved in intelligence activities may, directly or indirectly, provide any intelligence information to the Republic of South Africa which pertains to the African National Congress or any other South African Group, movement, organization or individual which is engaged in activities in opposition to the government of the Republic of South Africa, except if the information credibly indicates the imminent likelihood of violent action calculated to threaten human life. In the event that any intelligence information pertaining to opposition activities is transmitted to the Republic of South Africa, either in an authorized or unauthorized manner, the Director of Central Intelligence shall promptly inform the Select Committee on Intelligence of the Senate and Permanent Select Committee of Intelligence of the House of Representatives of the facts and circumstances regarding the nature of the information and its transmission.

AMENDMENT No. 2624

At the appropriate place in the bill, add the following new section:

SEC. . No agency or entity of the United States which is involved in intelligence activities may, directly or indirectly, provide any intelligence information to the Republic of South Africa which pertains to the African National Congress or any other South African Group, movement, organization or individual which is engaged in activities in opposition to the government of the Republic of South Africa, except if the information credily indicates the imminent likelihood of violent action calculated to threaten human life. In the event that any intelligence information pertaining to opposition activities is transmitted to the Republic of South Africa, either in an authorized or unauthorized manner, the Director of Central Intelligence shall promptly inform the Select Committee on Intelligence of the Senate and Permanent Select Committee of Intelligence of the House of Representatives of the facts and circumstances regarding the nature of the information and its transmission.

AMENDMENT No. 2625

At the appropriate place in the amendment, add the following new section:

SEC. . No agency or entity of the United States may engage in any form of cooperation, direct or indirect, with the armed forces of the government of South Africa, except activities which are reasonably designed to facilitate the collection of necessary intelligence. Each such activity shall be considered a signficant anticipated intelligence act for the purpose of Sec. 501 of the National Security Act of 1947.

## MILITARY CONSTRUCTION APPROPRIATIONS

## SIMON AMENDMENT NO. 2626

(Ordered to lie on the table.)

Mr. SIMON submitted an amendment intended to be proposed by him to the bill (H.R. 5052) making appropriations for military construction of the Department of Defense for the fiscal year ending September 30, 1987, and for other purposes; as follows:

At the appropriate place in the bill, insert the following new section:

SEC. . (a) The Congress finds that—

(1) the United States historically has supported international law;

(2) every American President since World War II has attempted to strengthen international law and the role of the International Court of Justice; and

(3) the United States helped to create international legal standards and helped to formulate international agreements such as—

(A) the Charter of the United Nations;

(B) four conventions done at Geneva on August 12, 1949, relative to the treatment of civilians, prisoners of war, and the wounded and sick during time of war;

(C) the Charter of the Organization of American States; and

(D) the Statute of the International Court of Justice.

(b) None of the funds appropriated or otherwise made available by this Act may be available for any program or activity in Nicaragua which violates customary international law or conflicts with treaty obligations of the United States under the international agreements described in subsection (a).

## DEPARTMENT OF DEFENSE AUTHORIZATION ACT, FISCAL YEAR 1987

## WALLOP (AND OTHERS) AMENDMENT NO. 2627

Mr. WALLOP (for himself, Mr. QUAYLE, and Mr. WILSON) proposed an amendment to the bill S, 2638, supra, as follows:

At the end thereof, add the following:

SEC. . REPORT ON THE ANTI-BALLISTIC MISSILE TREATY.—The Secretary of Defense shall, not later than February 1, 1987, transmit to Congress a report concerning the impact of the less restrictive interpretation of the Anti-Ballistic Missile Treaty. Such report shall include, but not be limited to the following:

(1) an analysis of the ramifications of the less restrictive interpretation on the development under the Strategic Defense Initiative program, of strategic defenses, including comprehensive strategic defense systems, and more limited defenses designed to protect vital U.S. military and command and control assets, based on "other physical principles". This analysis should compare research and development programs pursued under both the restrictive and less restrictive interpretations of the ABM Treaty, including a comparative analysis of—

(A) the overall cost of the research and development programs

(B) the schedule of the research and development programs, and

(C) the level of confidence attained in the research and development programs with respect to supporting a full-scale engineering development decision in the early 1990s; and (2) a list of options under the less restrictive interpretation of the ABM Treaty that meet one or more of the following objectives: (a) reduce the overall development cost, (b) to advance the schedule for a full-scale engineering development decisions, or (c) to increase the level of confidence in the results of the research by the original full-scale development date.

## LAUTENBERG (AND OTHERS) AMENDMENT NO. 2628

Mr. LAUTENBERG (for himself, Mr. LEVIN, Mr. D'AMATO, Mr. KERRY, Mr. WILSON, Mr. SIMON, Mr. BOSCHWITZ, Mr. SPECTER, Mr. GRASSLEY, and Mr. MOYNIHAN) proposed an amendment to the bill S. 2638, supra, as follows:

On page 229, between lines 14 and 15, insert the following new section:

SEC. 1221. WEARING RELIGIOUS APPAREL NOT PART OF THE OFFICIAL UNIFORM.

(a) IN GENERAL.—Chapter 45 of title 10, United States Code, is amended—

(1) by redesignating section 774 as section 775; and

(2) inserting after section 773 the following new section:

"§ 774. Wearing religious apparel

"(a) Except as provided in subsection (b), a member of the armed forces may wear an item of religious apparel if—

"(1) the wearing of the item of apparel is part of the religious observance of the religious faith practiced by the member; and

"(2) the item of apparel is neat and conservative.

"(b) The Secretary concerned may prohibit a member from wearing an item of religious apparel if the Secretary determines that the wearing of such item significantly interferes with the performance of the member's military duties.".

(b) CONFORMING AMENDMENTS.—The table of chapters at the beginning of such chapter is amended—

(1) by redesignating the item relating to section 774 as 775; and

(2) by inserting below the item relating to section 773 the following new item:

"774. Wearing religious apparel.".

## HARKIN AMENDMENT NOS. 2629 THROUGH 2631

(Ordered to lie on the table.)

Mr. HARKIN submitted three amendments intended to be proposed by him to the bill S. 2638, supra, as follows:

AMENDMENT No. 2629

At the end of the amendment, insert the following:

Notwithstanding any other provision of this act, $50,000,000 of the amount authorized under Section 206(a) shall not be effective unless, pursuant to subsequent legislation, $50,000,000 is transferred from funds available for the purposes described in section 105(a) of the Intelligence Authorization Act for Fiscal Year 1986, and all the requirements, terms and conditions of such section and sections 101 and 102 of such Act, section 502 of the National Security Act of 1947, and section 106 of the Supplemental Appropriations Act, 1985 (Public Law 99-88) to the Agricultural Credit Insurance Fund established under section 309 of the Consolidated Farm and Rural Development Act (7 U.S.C. 1929) for use by the Secretary of Agriculture to make and insure real estate and operating loans in accordance with subtitles A and B, respectively of such Act (7 U.S.C. 1922 et seq.).

---

AMENDMENT No. 2630

At the end of the amendment, add the following section:

Notwithstanding any other provision of this act, no member of the United States Armed Forces, or any agent, or contractor thereof, may provide training, or any other service, or otherwise participate directly or indirectly in the provision of any assistance authorized under this act, to the Nicaraguan democratic resistance within the territory of the countries of Honduras, Costa Rica, and El Salvador.

---

AMENDMENT No. 2631

At the end of the amendment, insert the following:

Notwithstanding any other provision of this act, the figure specified in 206(a)(2) as amended by the Senator from Kansas shall be $50,000,000.

---

## PROXMIRE AMENDMENT NO. 2632

(Ordered to lie on the table.)

Mr. PROXMIRE submitted the following amendment intended to be proposed by him to the bill S. 2638, supra, as follows:

On page 19, between lines 18 and 19, insert the following new section:

SEC. 206. REPORT ON PROJECTED COSTS OF SDI PROGRAM.

Subsection (b) of section 223 of the Department of Defense Authorization Act, 1986 (Public Law 99-145; 99 Stat. 613), is amended to read as follows:

"(b) REPORT ON PROCUREMENT AND DEPLOYMENT COSTS.—(1) The Secretary of Defense shall submit to Congress a report on the cost estimates for procurement and deployment of Strategic Defense Initiative programs.

"(2) The Secretary shall include in such report such projected cost data as may be necessary or appropriate to inform Congress fully on anticipated future costs associated with the Strategic Defense Initiative program. The Secretary shall specifically include in such report the following information:

"(A) The cost goals or cost objectives for the production and deployment of a Strategic Defense Initiative System determined on the basis of capabilities expected to be developed in the future and the cost goals or cost objectives for the individual components of such system (determined on the basis of capabilities expected to be developed in the future).

"(B) The estimated cost for the production and deployment of the Strategic Defense Initiative System referred to in subparagraph (A) and determined on the basis of prices in effect and capabilities in existence at the time of the preparation of the report and the estimated cost for the production and deployment of the individual components of such system (determined on the basis of prices in effect and capabilities in existence at the time of the preparation of the report).

"(3) The Secretary shall submit an interim report to Congress under this subsection not later than the time of the submission of the budget request of the Department of Defense for fiscal year 1988. The interim report shall contain the information specified in paragraph (2) on as many of the individual components of the Strategic Defense Initiative System as possible.

"(4) The Secretary shall submit a final report to Congress under this subsection not later than the time of the submission of the budget request of the Department of Defense for fiscal year 1989.

"(5) The Secretary shall submit the reports referred to in paragraphs (3) and (4) in both classified and unclassified forms.

"(6) As used in this subsection, the term 'Strategic Defense Initiative System' means a defense system designed to eliminate the threat posed to the United States by ballistic missiles.".

---

## DANFORTH (AND OTHERS) AMENDMENT NO. 2633

Mr. DANFORTH [for himself, Mr. GORTON, Mr. GARN, and Mr. RIEGLE] proposed an amendment to the bill S. 2638, supra, as follows:

At the appropriate place in the bill, insert the following:

SEC. . AUTHORIZATION OF APPROPRIATIONS FOR THE AIR FORCE.

Notwithstanding any other provision of this Act, funds are hereby authorized to be appropriated for fiscal year 1987 for the Air Force as follows:

For missiles, $8,866,000,000.

For research, development, test, and evaluation, $15,334,573,000.

For expenses, not otherwise provided for, for operation and maintenance, $19,687,171,000.

Of the funds authorized to be appropriated under this section, not less than $556,300,000 shall be available for the purpose of payment to the National Aeronautics and Space Administration to reimburse such agency for launch services and related expenses of the space shuttle system as agreed to between such agencies.

---

## BOSCHWITZ AMENDMENT NOS. 2634 THROUGH 2637

(Ordered to lie on the table.)

Mr. BOSCHWITZ submitted four amendments intended to be proposed by him to the bill S. 2638, supra, as follows:

AMENDMENT No. 2634

Section 105, paragraph (a)(2), after the words "should seek", insert "within six months".

---

AMENDMENT No. 2635

At the end of the bill add the following new section:

SEC. . (a) The President is hereby directed to provide humanitarian assistance from the funds made available under Chapter 4 of Part II of the Foreign Assistance Act of 1961, as amended, to any black South African whose livelihood is impaired due to American actions taken under this Act or any Executive Order. Such humanitarian assistance shall provide at least the Minimum Effective Level for a family of 6 as determined by the University of Port Elizabeth.

(b) The President is hereby authorized to waive or modify any provision in the Act in the event that more than 10,000 black South Africans have become unemployed and qualifying for assistance under paragraph (a) of this section if the President determined that the humanitarian assistance required under paragraph (a) would necessitate a drastic reduction in economic assistance provided to other nations in Africa.

AMENDMENT No. 2636

Add the following new paragraph to Section 312:

(c) The prohibition contained in this section shall not apply to investments in or loans to a firm owned by black South Africans, or a joint venture business entity with a black South African, or a corporation whose board of directors are predominantly black South Africans.

---

AMENDMENT No. 2637

In Section 308 of the bill, paragraph b, sentence 1, after the word "officials" add the following ", other than judges and employees of the judicial system,"

---

## KENNEDY (AND MATHIAS) AMENDMENT NO. 2638

Mr. KENNEDY (for himself and Mr. MATHIAS) proposed an amendment to the bill S. 2638, supra, as follows:

On page 229, between lines 14 and 15, insert the following:

SEC. 1221. SENSE OF THE CONGRESS ON NUCLEAR EXPLOSIVE TESTING.

(a) FINDINGS.—The Congress finds that—

(1) the United States is committed in the Limited Test Ban Treaty of 1963 and in the Non-Proliferation Treaty of 1968 to seek to achieve the discontinuance of all test explosions of nuclear weapons for all time;

(2) a comprehensive test ban treaty would promote the security of the United States by constraining the United States-Soviet nuclear arms competition and by strengthening efforts to prevent the proliferation of nuclear weapons;

(3) the Threshold Test Ban Treaty was signed in 1974 and the Peaceful Nuclear Explosions Treaty was signed in 1976, and both have yet to be considered by the full Senate for its advice and consent to ratification;

(4) the entry into force of the Peaceful Nuclear Explosions Treaty and the Threshold Test Ban Treaty will ensure full implementation of significant new verification procedures and to make completion of a comprehensive test ban treaty more probable;

(5) a comprehensive test ban treaty must be adequately verifiable, and significant progress has been made in methods for detection of underground nuclear explosions by seismological and other means;

(6) at present, negotiations are not being pursued by the United States and the Soviet Union toward completion of a comprehensive test ban treaty; and

(7) the past five administrations have supported the achievement of a comprehensive test ban treaty.

(b) *Sense of Congress.*—It is the sense of Congress that at the earliest possible date, the President of the United States should—

(1) request advice and consent of the Senate to ratification (with a report containing any plans the President may have to negotiate supplemental verification procedures, or if the President believes it necessary, any understanding or reservation on the subject of verification which should be attached to the treaty) of the Threshold Test Ban and Peaceful Nuclear Explosions Treaties, signed in 1974 and 1976, respectively; and

(2) propose to the Soviet Union the immediate resumption of negotiations toward conclusion of a verifiable comprehensive test ban treaty.

In accordance with international law, the United States shall have no obligation to comply with any bilateral arms control agreement with the Soviet Union that the Soviet Union is violating.

---

## MATHIAS AMENDMENT NO. 2639

Mr. MATHIAS proposed an amendment to amendment No. 2638 proposed by Mr. KENNEDY (and Mr. MATHIAS) to the bill S. 2638, supra, as follows:

At the end of the amendment add the following:

(2) a comprehensive test ban treaty would promote the security of the United States by constraining the United States-Soviet nuclear arms competition and by strengthening efforts to prevent the proliferation of nuclear weapons:

(3) the Threshold Test Ban Treaty was signed in 1974 and the Peaceful Nuclear Explosions Treaty was signed in 1976, and both have yet to be considered by the full Senate for its advice and consent to ratification;

(4) the entry into force of the Peaceful Nuclear Explosions Treaty and the Threshold Test Ban Treaty will ensure full implementation of significant new verification procedures and so make completion of a comprehensive test ban treaty more probable;

(5) a comprehensive test ban treaty must be adequately verifiable, and significant progress has been made in methods for detection of underground nuclear explosions by seismological and other means;

(6) at present, negotiations are not being pursued by the United States and the Soviet Union toward completion of a comprehensive test ban treaty; and

(7) the past administrations have supported the achevement of a comprehensive test ban treaty.

(b) Sense of Congress.—It is the sense of Congress that at the earliest possible date, the President of the United States should—

(1) request advice and consent of the Senate to ratification (with a report containing any plans the President may have to negotiate supplemental verification procedures, or if the President believes it necessary, any understanding or reservation on the subject of verification which should be attached to the treaty) of the Theshold Test Ban and Peaceful Nuclear Explosions Treaties, signed in 1974 and 1976, respectively; and

(2) propose to the Soviet Union the immediate resumption of negotiations toward conclusion of a verifiable comprehensive test ban treaty.

In accordance with international law, the United States shall have no obligation to comply with any bilateral arms control agreement with the Soviet Union that the Soviet Union is violating.

---

## LUGAR AMENDMENT NO. 2640

Mr. LUGAR proposed an amendment to amendment No. 2638 proposed by Mr. KENNEDY (and Mr. MATHIAS) to the bill S. 2638, supra, as follows:

In lieu of the language proposed to be inserted, insert the following:

A. *Findings.* The Congress finds that:

(1) Ratification of the Threshold Test Ban Treaty (TTBT) and Peaceful Nuclear Explosions Treaty (PNET) with effective verification would be in the national security interest of the United States;

(2) Resolution of compliance questions arising from current verification shortcomings is essential to creating a climate in which TTBT and PNET could contribute to national security and the furthering of arms control objectives;

(3) Technical experts on nuclear testing from the United States and USSR have met in Geneva to discuss each side's views, and Soviet delegates expressed interest in pursuing U.S. concerns on TTBT verification;

(4) The Geneva technical experts meetings will resume in early September of this year;

(5) These meetings represent the best opportunity for moving forward with limitations on nuclear testing;

(6) The President is committed to moving forward on ratification of TTBT with PNET, if effective verification provisions can be negotiated;

(7) The Congress remains interested in the possibilities which may be afforded by a Comprehensive Test Ban (CTB);

(8) In examining the CTB question, innovative ideas have been brought forth which merit the serious attention of the Congress and the Administration; and

(9) Achievement of effective verification and ratification of TTBT and PNET would be a major breakthrough in US-Soviet relations upon which the President should seek to conclude further arms control agreements, especially those for significant reductions in existing nuclear weapons.

B. *Sense of Congress.* It is the sense of Congress that:

(1) The President should be commended for bringing about the recent Geneva meeting on nuclear testing issues;

(2) The President should do everything possible to further the current Geneva talks of nuclear testing experts, including taking into account Soviet views;

(3) The President should seek to expand the experts meeting to the political level as soon as possible in order to negotiate effective verification of TTBT and PNET;

(4) The President should raise this as an issue of high priority with General Secretary Gorbachev at the next summit; and

(5) If effective verification is agreed, the President should seek Senate advice and consent to ratification of TTBT and PNET immediately.

C. *Report.* By February 1, 1987 the President shall submit a report to the Chairman of the Committee on Foreign Relations of the Senate and the Speaker of the House of Representatives. This report shall detail:

(1) Whether a CTB, or a ban on tests above the lowest verifiable yield, would contribute to U.S. national security, including our arms control objectives. If the Administration reports that they cannot, the report shall explain why;

(2) Whether a CTB, or a very low permitted yield could ever contribute to U.S. national security, including our arms control objectives, and if so, under what conditions;

(3) Whether a permitted yield below 150 kilotons could contribute to U.S. national security and arms control objectives, and under what conditions; and

(4) Whether an annual quota on tests could contribute to U.S. national security and arms control objectives.

D. *Coordination of the Report.* The President's report will be coordinated by the Director of The Arms Control and Disarmament Agency, with the Secretary of Defense, Secretary of Energy, Secretary of State, Director of Central Intelligence and all other responible officials.

---

## GLENN AMENDMENT NOS. 2641 AND 2642

Mr. GLENN proposed two amendments to the bill S. 2638, supra, as follows:

AMENDMENT No. 2641

On page 186, between lines 9 and 10, insert the following new section:

SEC. 963. RIGHTS RELATING TO THE USE, RELEASE, AND DISCLOSURE OF TECHNICAL DATA.

(a) RIGHTS IN TECHNICAL DATA.—Subsection (a) of section 2320 of title 10, United States Code, is amended to read as follows:

"(a)(1) The Secretary of Defense shall prescribe regulations to define the legitimate interest of the United States and a contractor or subcontractor in technical data pertaining to a product or process. Such regulations shall be included in regulations of the Department of Defense prescribed as part of the Federal Acquisition Regulation. Such regulations may not impair any right of the United States or of any contractor or subcontractor with respect to patents or copyrights or any other right in technical data otherwise established by law.

"(2) Such regulations shall include the following provisions:

"(A) In the case of a product or process that is developed by a contractor or subcontractor exclusively with Federal funds, the United States shall have the unlimited right to use, release, or disclose technical data pertaining to the product or process.

"(B) In the case of a product or process that is developed by a contractor or subcontractor exclusively at private expense, the contractor or subcontractor may limit the right of the government to use (for other than internal operations and maintenance purposes), release, or disclose to persons outside the Government technical data pertaining to the product or process.

"(C) Notwithstanding subparagraph (B), the Government may use, release, or disclose technical data pertaining to a product or process to persons outside the Government if such technical data is otherwise publicly available or if—

"(i) such use, release, or disclosure—

"(I) is necessary for emergency repair and overhaul; or

"(II) is a use, release, or disclosure to a foreign government that is in the interest of the United States and is required for evaluational or informational purposes;

"(ii) such use, release, or disclosure is made subject to a prohibition that the

person to whom the data is released or disclosed may not further use, release, or disclose such data; and

"(iii) the contractor or subcontractor asserting the restriction is notified of such use, release, or disclosure.

"(D) In the case of a product or process that is developed in part with Federal funds and in part at private expense, rights in technical data pertaining to such product or process shall be negotiated as early in the acquisition process as practicable (preferably during contract negotiations), based upon consideration of the following factors:

"(i) The Statement of congressional policy and objectives in section 200 of title 35, the statement of purposes in section 2(b) of the Small Business Innovation Development Act of 1982 (15 U.S.C. 638 note), and the declaration of policy in section 2 of the Small Business Act (15 U.S.C. 631).

"(ii) The interest of the United States in increasing competition and lowering costs by developing and locating alternative sources of supply and manufacture.

"(iii) The interest of the United States in encouraging contractors to develop at private expense items for use by the Government.

"(E) A contractor or subcontractor, or a prospective contractor or subcontractor, that develops a product or process exclusively at private expense may not be required, as a condition of being responsive to a solicitation or as a condition for the award of a contract, to sell or otherwise relinquish to the United States any rights in technical data that would permit the use by, or release or disclosure of, such data to persons outside the Government except under the conditions described in paragraph (2)(C).

"(F) The Secretary of Defense may—

"(i) negotiate with a contractor or subcontractor to contract for the acquisition of rights in technical data pertaining to a product or process developed by such contractor or subcontractor exclusively at private expense if necessary to develop alternative sources of supply and manufacture; or

"(ii) agree to limit rights of the United States in technical data pertaining to a product or process developed entirely or in part with Federal funds if the United States receives a royalty-free license to use, release, or disclose the data for purposes of the United States (including purposes of competitive procurement).

"(2) In this subsection, the term 'Federal Acquisition Regulation' means the single system of Government-wide procurement regulations as defined in section 4(4) of the Office of Federal Procurement Policy Act (41 U.S.C. 403(4)).".

(b) VALIDATION OF PROPRIETARY DATA RESTRICTIONS.—Section 2321 of title 10, United States Code, is amended—

(1) in subsection (a)(2), by inserting ", at any time before the end of the 3-year period beginning on the date the final payment is made on the contract," after "may review"; and

(2) in subsection (b)—

(A) by inserting "specific" after "state the" in clause (1); and

(B) by striking out "and" at the end of clause (1);

(C) by striking out the period at the end of clause (2) and inserting in lieu thereof "; and"; and

(D) by adding at the end the following new clause:

"(3) state that evidence of acceptance by any Federal agency of a restriction identical to the asserted restriction within the 3-year period preceding the challenge shall serve as justification for the asserted restriction if—

"(A) the acceptance occurred after a review of the accepted restriction under this section; and

"(B) the accepted restriction was asserted by the same contractor or subcontractor to whom such notice is being provided.".

(c) CONFORMING AMENDMENTS.—Section 1202 of the Department of Defense Authorization Act, 1985 (10 U.S.C. 2301 note), is amended—

(1) by inserting "and" at the end of paragraph (4);

(2) by striking out "; and" at the end of paragraph (5) and inserting in lieu thereof a period; and

(3) by striking out paragraph (6).

(d) DEADLINE FOR REVISION OF REGULATIONS.—The regulations required by section 2320(a)(1) of title 10, United States Code (as amended by subsection (a)), shall be prescribed not later than 180 days after the date of the enactment of this Act.

---

AMENDMENT No. 2642

On page 229, between lines 14 and 15, insert the following new section:

SEC. 1221. NUCLEAR NON-PROLIFERATION INFORMATION.

Section 602 of the Nuclear Non-Proliferation Act of 1978 (22 U.S.C. 3281) is amended—

(1) in subsection (c), by inserting "the Department of Defense," after "Department of State,"; and

(2) by adding at the end of the following new subsection:

"(f) Upon request, the Secretary of Defense shall have access to all information regarding nuclear proliferation matters which the Secretary of State or the Secretary of Energy has or is entitled to have, including all communications, materials, documents, and records relating to such matters, including cables from United States diplomatic missions.".

---

## ABDNOR (AND MELCHER) AMENDMENT NO. 2643

Mr. ABDNOR (for himself and Mr. MELCHER) proposed an amendment to the bill S. 2638, supra, as follows:

On page 229, between lines 14 and 15, insert the following:

SEC. 1221. MINUTEMAN EDUCATION PROGRAM.

Notwithstanding any other provision of this Act, none of the funds appropriated pursuant to an authorization contained in this or any other Act may be obligated or expended by the Air Force to award a contract for the conduct of the graduate Minuteman Education Program unless the contract requires the contractor—

(1) to integrate class schedules under the program with fulltime missile crew duty schedules;

(2) to provide a resident faculty, at each Air Force installation where the program is conducted, each member of which has obtained the terminal educational degree provided in the filed the faculty member teachers under the program; and

(3) to provide library resources, at each such installation, adequate to support the program at such installation, including a fulltime librarian who has obtained a degree in library science.

## WARNER (AND TRIBLE) AMENDMENT NO. 2644

Mr. WARNER (for himself and Mr. TRIBLE) proposed an amendment to the bill S. 2638, supra, as follows:

On page 317, after line 22, insert the following:

SEC. 2192. RELEASE OF CERTAIN USE RIGHTS HELD BY THE UNITED STATES

(a) IN GENERAL.—The Administrator of General Services shall release to the Virginia Port Authority, an instrumentality of the Commonwealth of Virginia, all residuary rights of use held by the United States in three warehouses located in the city of Norfolk, Virginia, within the area operated as a public port facility and known as the Norfolk International Terminals.

(b) TIME LIMITATION; COMPENSATION.—The Administrator of General Services shall execute such documents and take such other actions as may be necessary to release, within 180 days after the date of enactment of this Act, the rights referred to in subsection (a). The release shall be made without any compensation in addition to compensation paid to the United States for such warehouses and other facilities by the city of Norfolk, Virginia, in 1968.

---

## BINGAMAN (AND DOMENICI) AMENDMENT NO. 2645

Mr. BINGAMAN (for himself and Mr. DOMENICI) proposed an amendment to the bill S. 2638, supra, as follows:

On page 339, between lines 2 and 3, insert the following new section:

SEC. 3134. EXTENSION OF DATE FOR CERTAIN CONTRACT AUTHORITY

Section 94 of the Atomic Energy Community Act of 1955 (42 U.S.C. 2394) is amended by striking out "June 30, 1986" and inserting in lieu thereof "June 30, 1996".

---

## DOLE AMENDMENT NO. 2646

(Ordered to lie on the table.)

Mr. DOLE submitted an amendment intended to be proposed by him to the bill S. 2638, supra, as follows:

On page 306, between lines 6 and 7, insert the following new section:

SEC. 218a. CORRECTIONAL FACILITIES AT FORT RILEY, KANSAS.

The Secretary of Defense shall retain and maintain the correctional facilities located at Fort Riley, Kansas, and take such action as may be necessary to accomplish the renovations necessary to make such facilities adequate for their purpose.

---

## AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON RULES AND ADMINISTRATION

Mr. HATFIELD. Mr. President, I ask unanimous consent that the Committee on Rules and Administration, be authorized to meet during the session of the Senate on Thursday, August 7, 1985, in order to receive testimony on S. 2539, to consolidate and improve provisions of law relating to absentee registration and voting in election for Federal office by members of uni-

formed services, and citizens of the United States who reside overseas.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ADDITIONAL STATEMENTS

### CONGRESSIONAL GOLD MEDAL OF HONOR TO RED SKELTON

● Mr. QUAYLE. Mr. President, I am proud to join as a cosponsor of S. 2585 to award a Congressional Gold Medal of Honor to Richard "Red" Skelton in recognition of his service to the United States.

As a fellow Hoosier, I take great pride in honoring Red Skelton for his lifetime dedicating to entertaining Americans. Since his debut at age 10 on a medicine show, Red's comedy acts have been humorous parts of tent shows, circuses, Mississippi showboats, vaudeville acts, and radio and television shows. Red has kept people laughing for more than 60 years and continues to do so today with his wholesome sense of humor which is appealing to people of all ages.

Red Skelton was born on July 18, 1913, in Vincennes, IN. He spent most of his childhood in Vincennes and nearby Mansfield, IN. His father, who was a clown with the Hagenbeck and Wallace Circus, died 2 months before Red was born. This tragedy left the family in dire financial straits; to help support his family, Red went to work as a newsboy at the tender age of 7. Though faced with this calamity and other misfortunes, Red never lost his sense of humor or his ability to make others laugh.

Red toiled with his comedy skits on showboats, in circuses, and in burlesque and vaudeville shows until he got his break in bigtime radio in the mid-1930's. He made his Broadway debut in June 1937, and soon after, signed a contract with MGM in 1940. Red went on to star in 48 movies as well as his own "Red Skelton Show," which entertained American families for 18 years.

Red has been honored as a guest and entertainer of nine U.S. Presidents—Roosevelt through Reagan—and he has received private audiences with three Popes. A recent honor bestowed upon this outstanding entertainer and humanitarian was the Hollywood Foreign Press Association's Cecil B. DeMille Award for outstanding contributions to the entertainment industry.

While most people might associate Red Skelton with his famous pantomimes, such as Freddy the Freeloader, Cauliflower McPugg, or Clem Kadiddlehopper, others will surely remember him for his patriotism and service to his country. Red served in World War II, often spending 7 nights of the week entertaining servicemen. His pride and love for America is further reflected in his renowned version of the Pledge of Allegiance.

Throughout the years, Red has written more than 22 film scripts, more than 4,000 short stories, two full-length books, almost 5,000 musical selections, and an additional 64 symphonies. In 1984, he began making videotape cassettes of his reruns, and he has recently completed his third special for Home Box Office. Today, Red continues to keep busy painting, gardening, and developing new programs for television while still making time for 125 appearances a year.

Mr. President, Red Skelton has dedicated his life to comedy and family entertainment. This Hoosier's love and respect for America and his great contribution to the entertainment industry and American family life are most worthy of recognition. Therefore, I am proud to cosponsor this bill to award to Red Skelton this honor which he so richly deserves.●

### ENVIRONMENTAL EXCELLENCE IN INDUSTRIAL ARCHITECTURAL DESIGN

● Mr. GOLDWATER. Mr. President, on August 21, the Sperry Corp. Aerospace and Marine Group will dedicate the opening of a 253,000 square foot space systems facility at Glendale, AZ. The occasion of this event offers me a fitting opportunity to note that the nearby Sperry Avionics facility and the architect of both structures, Jack Peterson and Associates, have been honored for excellence in design, energy conservation, and concern for a healthy environment for employees in a growing community.

In June, the Valley Forward Association, an organization of metropolitan Phoenix business leaders, presented Jack Peterson and Associates with the "Crescordia" Environmental Excellence Award for the Sperry Avionics office and assembly building. In addition, the American Institute of Architects conferred Jack Peterson and Associates with two Awards for Excellence in Architecture for the same structure. The building also has received an Environmental Efficiency Award.

Mr. President, it is clear that the impact of environmental excellence is gaining greater recognition in communities nationwide and I think we can all agree that the quality of new industrial architectural design contributes to the life of the community at large, as well as to the lives of users and employees and to the reputation of the industry served.

It is a pleasure for me to take note of this much-honored facility and the awards given to it and Mr. Peterson, on the occasion of the dedication of the new facility where components of the Nation's future in space will be built. Both Sperry Corp. Aerospace and Marine Group and Jack Peterson and Associates are to be commended on this contribution to improving the quality of life in, what we in the greater Phoenix area call, "The Valley of the Sun."●

### REPORT ON PREVENTING NUCLEAR TERRORISM

● Mr. NUNN. Mr. President, on June 25 the International Task Force on Prevention of Nuclear Terrorism released the results of its year-long study on the question of nuclear terrorism. In its report, the task force concluded that "the probability of nuclear terrorism is increasing" and warned that "the fact that so far there has been no serious act of nuclear terrorism is no reason for complacency."

The old adage about an ounce of prevention being worth a pound of cure aptly describes the basic thrust of this valuable report. Prepared by a balanced panel of leading international experts in this field—including four top executives, active and retired, of the nuclear industry and two former presidents of the Nuclear Non-Proliferation Treaty review conference—the report offers a realistic and urgently needed roadmap for preventing nuclear terrorism.

I am particularly pleased that the task force has strongly endorsed the concept which Senator WARNER and I have developed for the establishment of United States-Soviet Nuclear Risk Reduction Centers. The task force notes that the centers' assignments could include "principal responsibility for coordinating responses of the superpowers to nuclear terrorist threats" and concludes that the center proposal "is a major step in the right direction for pursuing these options." I join the task force in urging the two governments to give high priority to successfully completing the discussions on the establishment of the centers which were begun in Geneva in May.

Mr. President, I ask that statements by the two cochairmen and the vice chairman of the task force, along with a summary of the group's recommendations, be printed in the RECORD.

The statements follow:

STATEMENT OF BERNARD J. O'KEEFE

As long as I've been concerned about the possibility of nuclear terrorism—and it's been several years now—the subject has been long on wordy observations and rather short on facts. The experts have loved to speculate. Some have dismissed the phenomenon altogether as not on the terrorist's agenda; others have said it is highly unlikely, others that it is probable, still others that it is inevitable but when and where nobody knows.

I want to stress that this international task force, the first independent group to examine the phenomenon, has broken the "bluster" barrier on a terrifying topic. We have refrained from making forecasts; we

have overcome institutional self-interests; we have identified the areas of highest concern and we have made a list of recommendations that are actually doable today.

Here are a few of them. First, all of us would like to live in a world in which we could be sure that the thousands of nuclear weapons in nuclear arsenals never will be exploded except by command of the highest authority in the land. It is of the utmost importance, therefore, to implement readily available, highly sophisticated electronic locks and other self-protecting designs that can prevent anyone, except the highest authority, from exploding them.

Today, we can make it virtually impossible for anyone who has stolen a nuclear weapon to blow it up. Some of our weapons scattered around the world and even some at home don't have these locks and other self-protecting features. They must have them. The cost, in terms of national security, is minimal. I know; I'm in the business. Harold Agnew, another Task Force member, knows; he's in the business.

Second, if terrorists don't steal a weapon, they could make one, assuming they could acquire the needed nuclear material. Task Force member Ted Taylor knows—he's been in the business—as does Carson Mark and three other former weapon designers who worked with Ted on a paper on this subject. So we recommend tightening up the defenses around weapon-usable forms of nuclear material at military and civil plants and in transit. This will add to the cost of nuclear power in those countries that choose to use weapon-usable materials to fuel their reactors, but it's got to be done; the alternative cost is too high.

Third, if all these precautions are somehow breached, we have got to have ways of finding out quickly where the stolen bomb or the nuclear material is hidden. In the United States we have a special team for doing this, but its capabilities are somewhat limited; they could be upgraded if certain types of tracking devices were added to weapons and weapon containers. General Mahlon Gates knows this; he's been in the business and he came to a Task Force meeting to tell us of his concerns.

Along the same lines, plans for informing and evacuating citizens from areas of a nuclear terrorist threat are not as good as they could be. Task Force member Donald DeVito knows this; he's in the business.

Fourth, we should be cooperating more with the Soviet Union on deterring and, if necessary, on thwarting nuclear terrorism which, if it got out of hand, could bring us to the brink of nuclear war. Such close cooperation would be something quite new for us, nor would it be easy. But there are some special intelligence channels that could be explored; they are thought by some intelligence experts like Task Force member Stansfield Turner to be a good idea. He should know because he once ran the business.

Finally, talking about terrorist action is, by definition, speculation. No one can know when or where they might occur. But you can know *how* they might occur. Nuclear terrorism is one way that is becoming increasingly likely, and although the probability thankfully remains low, the stakes are too high for us to ignore the urgent need to implement ways to prevent such a catastrophe. That's everybody's business.

STATEMENT OF REAR ADMIRAL THOMAS D. DAVIES

For more than a year I have been involved in the Nuclear Control Institute's project on preventing nuclear terrorism—first by participating in the conference that ended one year ago today, and then by co-chairing the International Task Force that is releasing its report today. On the day in January that we announced formation of the Task Force, the Challenger space shuttle blew up. Just three months later, the Chernobyl reactor accident occurred.

These technological disasters have reminded us how fragile is man's control over his creations; how the accidental malfunction of a tiny part of a complex, scientific marvel can cause a calamity. In the past, our cleverness has sometimes subsumed our wisdom. We have been too complacent, too over-confident of our abilities to control scientific inventions that can quite literally destroy us all. This complacency is perhaps most freightening when we consider how such accidents can be caused by design—by, say, a group of terrorists determined to generate maximum harm and maximum publicity by stealing a nuclear weapon or sabotaging a nuclear reactor.

The Task Force today offers multiple ways that, if pursued, could help to prevent nations from being held hostage by the threat of nuclear terrorism. There already has been some progress in strengthening potential targets in both the military and civil nuclear sectors against infiltration and attack. Much more needs to be done, however.

The Task Force, citing a confluence of factors, finds that the probability of nuclear terrorism is increasing. It recommends quite specific steps that should be taken to eliminate or at least substantially to reduce the risk of terrorists gaining access to nuclear weapons, to nuclear materials that could be made into weapons and to nuclear powerplants and other nuclear installations. It also proposes ways to improve the capabilities of national intelligence services to detect and to thwart threats or acts of nuclear terrorism, and explores a wide range of commercial, diplomatic and legal approaches that bear on the nuclear terrorist threat.

One approach that I feel particularly strongly about is to pursue arms control measures that would reduce the growth and the spread of nuclear arsenals and help to reduce and eventually eliminate the reliance on nuclear weapons as a means of projecting power or of ensuring common defense and security. Nuclear weapons, I believe, make nations and the world less secure; in terrorist terms, these weapons serve as a tempting example as well as a tempting target. I fully support, therefore, the view of a substantial majority of the Task Force members that negotiation of a strictly verifiable comprehensive test ban is an important step in reducing the arsenals and is also, therefore, a major step in helping to prevent terrorists from "going nuclear."

The radioactive cloud from Chernobyl still drifting around the world is a sober reminder that a nuclear accident anywhere is a matter of grave concern everywhere; it also is an indicator of how vulnerable we all are to the terrorist who might seek to trigger such an accident.

In recent weeks, world leaders of various political persuasions have called for united action through the International Atomic Energy Agency to improve safety and accident-reporting requirements at nuclear powerplants. At the same time, the recent Tokyo economic summit provided evidence that counter-terrorist strategies are rising to the top of the international political agenda. We should take this opportunity to press for increased protection of civil nuclear facilities against the threat of sabotage, especially against the use by saboteur groups of insiders or truck bombs to penetrate nuclear plants' safety and security systems. The minimum physical security guidelines, as laid out by the International Atomic Energy Agency, should be upgraded and implemented worldwide.

Finally, and of equal importance, nations should attempt to break away from institutional and commercial habits that perpetuate the processing and use of ever-increasing quantities of weapon-usable nuclear materials in their commercial nuclear power programs. It is possible to have viable nuclear power programs without these dangerous materials, and every effort should be made to eliminate such materials from the potential terrorist target list as well as from the weapons' banks of nuclear nations.

---

STATEMENT OF PAUL L. LEVENTHAL

I would like to begin with a few words about what this report is not.

It is not an anti-nuclear statement regarding nuclear weapons or nuclear power. The task force includes four top executives of the nuclear industry, active and retired, including the current president of the American Nuclear Society and the former head of the Los Alamos National Laboratory. The members include weapon designers, weapon testers and the current head of NATO's Weapon-Protection Program.

The report is not a pro-nuclear statement, weapons or power. The task force includes two former presidents of the Nuclear Non-Proliferation Treaty Review Conference and a number of other task force members, myself included, who want to see a sharp reduction in the growth and the spread of nuclear arsenals and the successful completion of a comprehensive nuclear test ban. The members include me and others who favor restraint in the development of nuclear power, especially in the processing and use of civil nuclear fuels that can be made into bombs.

The report is not another "play" on the terrorism issue. Specialists on terrorism comprise one-sixth of the task force members, and they are joined by experts on nuclear weapons, arms control, national security, intelligence, nuclear power, nuclear proliferation, nuclear safeguards, physical protection, crisis management and international law.

In other words, this report is notable not only for what it says but who is saying it. It is remarkable, I believe, because it represents a consensus among 26 members who sometimes hold sharply divergent views on public policy questions but who nevertheless have issued a strong statement on a question that transcends such differences: the question of nuclear terrorism.

Nuclear terrorism indeed is a question. We cannot say with certainty that it will happen, or that it will not happen. We can only pose questions, as we did a year ago at the first public conference to be held on the subject:

Is nuclear terrorism plausible?

What nuclear means could terrorists use and what factors might influence whether they do?

How good is the security over nuclear weapons, materials and installations?

What should be done to prevent, at least effectively to deter, nuclear terrorism?

The "Conference on International Terrorism: The Nuclear Dimension" raised these questions. The task force we convened after the conference sought to provide some definitive answers and to draw a few conclusions.

The good news is that the probability of terrorists turning to nuclear forms of violence is low. The bad news is that it is increasing. There are a number of steps that should be taken to make the probability lower. Some of these are being pursued and some are not. The net balance at this time, in the view of the task force, is tilting toward an increase in the risk of nuclear terrorism. That should be of concern to all peoples of the world. This is an international task force—its membership drawn from nine countries—and its report is directed to all nations.

The report is relatively short and to the point. It is made up mostly of recommendations, followed by brief background explanations. The recommendations alone are listed in one of the attachments to the press release. There are also some 26 background papers commissioned for use of the task force that will eventually be published with the report. A few of these—pertaining to crude weapon design, accident consequences from sabotage, weapons protection, civil liberties questions, U.S.-Soviet cooperation—are available to members of the press today.

Among its recommendations, the task force calls for:

1. Fitting all tactical nuclear weapons with the most sophisticated self-protecting systems—such as coded electronic locks—to help ensure that if the weapons are stolen they cannot be used;

2. Better protecting, and minimizing use of, certain types of power- and research-reactor fuels that, if stolen, could be used by terrorists to make bombs;

3. Better protecting nuclear powerplants and other nuclear installations against sabotage, in particular better safeguards against terrorists' use of insiders or truck bombs to overcome a plant's security and safety systems.

These recommendations address a number of vulnerabilities that could be exploited by terrorists:

1. Thousands of U.S. tactical nuclear weapons, mostly those aboard navy ships, do not have any special self-protecting systems to prevent terrorists or other unauthorized persons, if they gain access to them, from using them.

2. Weapon-usable forms of nuclear material in private hands for use in civil power and research reactors often do not get the same level of protection that governments provide where nuclear weapons and weapon materials are located.

3. Many nuclear powerplants, including those in the United States, do not yet have remotely operated safety systems designed specifically to thwart terrorist efforts to deliberately cause a serious accident, nor are there adequate measures to protect against truck bombs or against terrorists' use of a number of insider collaborators.

The task force has found that the interest of terrorists to acquire nuclear weapons should be regarded as technically, politically and psychologically plausible; that the design of crude nuclear weapons, while not as easy as previously suggested by some experts, is within the reach of terrorists with sufficient support to recruit a team of 3 or 4 qualified specialists; that terrorists, if they could gain entry to a nuclear installation for only a few minutes, could succeed in sabotaging the plant, causing severe consequences, possibly leading to radioactive releases in the event of a reactor core melt.

Under these circumstances, it would be prudent indeed to implement as quickly as possible all of the recommendations of the task force for eliminating or reducing vulnerabilities over the short term. Unfortunately, there appears to be little interest in Government and industry circles to pursue at least some of these measures vigorously or at all. By issuing this report, the task force intends to increase public understanding of the danger, and of the measures needed to lower it, without providing sensitive details to would-be nuclear terrorists.

Let me close by noting two areas in which there were differences, sometimes sharp ones, among task force members. One was on the question of the relevance and the utility of arms control efforts to reduce the threat of terrorists going nuclear. Some members thought there was essential linkage, others thought there was none, but a substantial majority favored arms control efforts to make nuclear weapons less attractive to terrorists or nations—with particular emphasis on a comprehensive test ban. There are some individual views in the report on this issue.

The other principal area of contention was on the appropriate role of weapon-usable forms of plutonium and uranium in civil power and research programs. Some favored unrestricted use, so long as these materials are adequately protected, others favored highly restricted use on the Assumption that many tons of weapon-usable material in commerce cannot be adequately protected over the long term. There were also differences as to whether use of these materials made economic sense today or over the next several decades. A substantial majority, myself included, favored an economic reassessment of the use of plutonium where it is now to be used as fuel in power reactors; prompt consideration of converting research reactors to lower-enriched uranium not usable in weapons; and, to the extent these bomb-grade materials are used in commerce, extraordinary precautions to protect them from terrorists. The Japanese members of the task force submitted a separate view on these issues.

I will close by noting my personal view that widespread use of separated plutonium and highly enriched uranium poses an unprecedented danger to civilization, one that is not being adequately addressed in France, West Germany and Japan—the principal countries committed to unrestricted use of these materials—or in the United States, where nuclear trade policies serve to promote such use in contradiction of the nuclear Nonproliferation Act. I believe some day the world will deeply grieve our failure to seize the opportunity history now provides to cut off the flow of these weapon-usable materials while quantities already produced are still small enough to be manageable. One approach that could be taken, a reciprocal halt in further production by nuclear weapon and non-weapon states, is appended to the report, without recommendation, for further consideration.

If present plans proceed, the existing arsenals of the superpowers will be dwarfed by the hundreds, eventually thousands, of tons of plutonium that will be produced and trafficked for commercial purposes over the next few decades. It is not hard to imagine a variety of future crises that could cause significant quantities of that "peaceful" plutonium being put to non-peaceful use. One such crisis is already upon us: international terrorism.

---

TASK FORCE RECOMMENDATIONS

SHORT-TERM RECOMMENDATIONS

*I. Protecting nuclear weapons*

1. Nuclear-weapon states should determine whether their weapons are sufficiently protected to deter or repel terrorists.

2. All tactical nuclear weapons should be fitted with the most advanced self-protecting systems.

3. The U.S. Nuclear Emergency Search Team should be upgraded.

*II. Protecting nuclear materials*

1. Civil nuclear materials worldwide in forms suitable for use in weapons should be given protection equivalent to government protection of weapons.

2. The cost of protecting weapon-usable forms of nuclear materials should be factored into private decisions to produce and use them.

3. In the meantime, reexamination of civil applications of plutonium can be conducted on economic grounds.

4. Conversion of reactors from weapon-grade uranium fuels to lower-enriched uranium not usable in weapons should be considered at this time, as well.

5. To the extent civil materials suitable for weapons are used, extraordinary precautions should be taken to protect them from terrorists.

*III. Protecting nuclear facilities*

1. Denial of access to nuclear facilities should be the basic consideration in protecting against sabotage.

2. Thorough vigilance against the insider threat is needed.

3. Guard forces should be thoroughly trained and authorized to use deadly force.

4. The basis used for designing physical protection of nuclear plants should be reviewed to ensure that it accurately reflects the current threat.

5. Power reactors should be protected against vehicular threats.

6. Research reactors should have adequate security provisions against terrorists.

7. Reactor safety designs should be reexamined to protect against an accident caused by terrorists.

8. IAEA physical-protection guidelines should be reviewed and updated.

9. Protection standards should be spelled out unambiguously.

*IV. Intelligence programs*

1. National authorities should task their intelligence agencies to apply sufficient resources to the threat of nuclear terrorism.

2. Concerted efforts to promote cooperation among national intelligence services, including those of the U.S. and U.S.S.R., should be pursued as part of the effort to counter the nuclear terrorist threat.

3. National intelligence agencies should look for early indicators of nuclear terrorism.

4. National intelligence agencies should develop behavioral and political profiles of protential nuclear terrorists.

5. National intelligence agencies should prepare plans on how and when to inform local officials of a credible nuclear threat.

6. National centers for analyzing intelligence on terrorism should be established and should give high priority to the nuclear threat.

*V. Civil liberties concerns*

Physical protection and intelligence activities directed at preventing nuclear terrorism always should be exercised with the greatest vigor necessary under the particular circumstances, with full regard to the individual rights of citizens and employees.

With this principle in mind, the Task Force makes the following recommendations:

1. Screening of job applicants and surveillance of employees at nuclear facilities should be conducted in ways to ensure that employment is not denied for activities that represent the exercise of basic rights to free speech and association rather than pose a security threat.

2. Because of the potential danger of emotionally unstable employees and of the insider threat in nuclear plants, employees or job applicants who are to have unrestricted access to vital areas of a plant should be subject to psychological screening and to a check for a national criminal history, including a check of fingerprint records. Any criminal record found, however, should be available to the subject for review, correction or appeal before any adverse action is taken.

3. Plant security personnel should be authorized to use deadly force, but the conditions under which the use of deadly force is appropriate and legal should be clearly spelled out in regulations, taking into consideration the laws and customs of particular countries.

4. In the event of an imminent threat or calamity, national-security interests will prevail over individual rights. However, wide-ranging searches for nuclear devices or materials, and detention of suspects or witnesses in connection with a nuclear terrorist incident, should be undertaken with maximum restraint.

*VI. Controlling nuclear transfers*

Nuclear transfers among nations should be tightly controlled to help prevent nuclear terrorism.

In this regard, the Task Force recommends:

1. No significant nuclear transfers should be made to a nation that is located in a zone of war or that supports or sponsors international terrorism. Such a policy, if adopted by all nuclear suppliers, would help to deter military attacks on nuclear installations and to deny to terrorists a potential source of nuclear-weapon material and know-how.

2. Export controls and customs-police practices should be reexamined to ensure they are adequate to meet the threat of nuclear terrorism.

3. National criminal laws should be amended as necessary to provide for punishment sufficient to work as true deterrent for violations of nuclear export laws and regulations.

4. There should be prompt and vigorous prosecution of all persons seeking to smuggle weapons-usable nuclear items out of a country.

*VII. United States-Soviet cooperation*

Cooperative efforts by the United States and the Soviet Union to counter the nuclear terrorist threat should be promoted to the extent possible within the bounds of vital national security interests.

In this regard, the Task Force recommends:

1. Efforts should be made to promote U.S.-Soviet cooperation on intelligence-sharing and on responses to threats or acts of nuclear terrorism. Consideration should be given as to whether joint action against a nuclear terrorist threat might or might not include the use of force by the superpowers.

2. The proposal by Senators Nunn and Warner for establishment of U.S.-U.S.S.R. Nuclear Risk Reduction Centers, whose assignments would include principal repsonsibility for coordinating responses of the superpowers to nuclear-terrorist threats, is a major step in the right direction for pursuing these options and should be negotiated promptly.

*VIII. Arms control initiatives*

To help promote an international climate that inhibits the spread of nuclear weapons to additional nations or to terrorists, efforts to reverse the nuclear arms race should be pursued by all nations. The superpowers together have a special responsibility to pursue negotiations in good faith toward cessation of the arms race because the degree of reliance they place on nuclear weapons has an influence on their spread.

The Task Force, recognizing that the process of nuclear arms control is related to the special effort to prevent nuclear terrorism, makes the following recommendations:

1. The United States and the Soviet Union should pursue current efforts to negotiate deep cuts in their strategic arsenals with a view toward lessening the threat from nuclear weapons by reducing the risk of early use, improving strategic stability and maintaining credible nuclear deterrence.

2. Ongoing efforts to reduce the size of nuclear arsenals should include the smaller battlefield weapons that are most susceptible to attack or theft by terrorists.

3. Additional nuclear-weapon free zones, which would reduce potential access to nuclear weapons, should be negotiated where it proves consistent with the security interests of the nations concerned.

4. In meeting obligations under existing treaties, all nations should examine the anti-terrorist benefit which would accrue from a strictly verifiable comprehensive test ban.

*IX. Convention on physical protection of nuclear materials*

The Convention on Physical Protection of Nuclear Materials should be ratified promptly.

1. The Task Force recommends that the Convention on the Physical Protection of Nuclear Materials, which has not come into force for lack of accessions, should be ratified promptly. It is particularly important to secure ratification by the 11 members of the European Economic Community, which would provide more than the needed number of accessions.

2. At the same time, urgent steps should be taken bilaterally and through the International Atomic Energy Agency to establish more stringent minimum requirements for protection of weapon-usable nuclear materials while in *domestic* use, storage or transport worldwide.

*X. Role of emergency-management programs*

For there to be effective response at the regional and local levels to a nuclear terrorist emergency, there should be cooperation by national governments in providing adequate resources and intelligence information.

1. Emergency management organizations at the regional and local level should be provided the fiscal and human resources needed to cope effectively with a threat or act of nuclear terrorism.

2. In particular, there should be consideration of what arrangements can be made in advance of a nuclear-terrorism crisis to ensure the sharing of information by national intelligence agencies on a timely basis with selected regional and local officials during such a crisis—information needed for decisionmaking on evacuation and other protective measures.

3. The issuance of security clearances to emergency management officials is an essential first step.

*XI. Role of the media*

To avoid panic as the result of premature or inaccurate information during a nuclear terrorist emergency, guidelines should be established now among media and government representatives on disseminating information in such a crisis.

1. Because of the possibility of widespread panic, injury and death resulting from a credible threat by nuclear terrorists, government officials and media representatives should cooperate in planning how to provide timely and accurate information in such a contingency.

2. To the extent possible, joint guidelines should be developed in anticipation of a crisis by the responsible national government agencies with regard to how and when information will be disseminated during a crisis. The key consideration should be at what point in a crisis, if the threat proves real, there still would be time to order an evacuation in a manner that minimizes injury and death and promotes public order. Leading media representatives and state and local officials should be invited to participate in preparation of the guidelines.

LONG-TERM RECOMMENDATIONS

*I. International measures*

1. All states should embark on outlawing acts of nuclear terrorism by signing and ratifying the Convention on the Physical Protection of Nuclear Material.

2. International agreements in the wake of the Chernobyl accident should include measures to deal with the terrorist threat.

3. The UN Security Council should approve a resolution on nuclear terrorism.

4. An agreement specifying additional acts of nuclear terrorism is needed.

*II. Emerging nuclear technologies*

The development of new fuel-cycle technologies should take into account the threat presented by the growing potential for nuclear terrorism.

With this principle in mind, the Task Force makes the following recommendations:

1. Emerging technologies capable of simplifying the production of weapon-usable forms of nuclear material should be followed as a possible route for acquisition of such materials by terrorists.

2. Advanced enrichment and production technologies should be developed with restraint and used only if required to meet national energy needs.

3. Efforts to develop forms of nuclear fuel less subject to proliferation should be further encouraged in the interest of lessening the dangers of nuclear terrorism. In particular, the development of fuels containing thorium in more proliferation- and terrorist-resistant fuel cycles should be considered.●

## INVESTING IN OUR YOUTH

● Mr. DURENBERGER. Mr. President, last week I brought to the attention of my colleagues a speech given recently by Dr. Donald Kennedy,

president of Stanford University. I ask that Dr. Kennedy's speech be included in its entirety in the RECORD. I commend his wise words to all of my colleagues and urge them to take to heart his message of the need to make investments now in the America yet to be.

The speech follows:

INVESTING IN THE YOUNG
(Donald Kennedy, President, Stanford University)

It is a pleasure and an honor to address you today. My previous incursions at Bohemia have involved the delightful foolishness of Big Game night: trading identities with my friend Chancellor Mike Heyman and enjoying the wry tasteful witticisms of Coach Joe Kapp. But this is clearly different: the post-prandial hour and the sylvan setting suggest something more uplifting. What I have for you today is not exactly that. But it will, I promise, fit within the constraints decreed by your leadership with regard to brevity; and it will be no more somber than the circumstances require. Scant reassurance, I concede.

First, just one word about the setting. How is it that we like the redwoods so much? They are big, of course, and majestic. They are old—old enough to have personal experience, if that is not too outlandish to apply to a tree, with a time at which grizzly bear, Tule elk, antelope and cougars were all regular visitors to this Grove and its surroundings. But what I like best about the redwoods is a kind of self-sufficiency they possess. In the coast range valleys one of these trees, with its tens of thousands of needles, can condense enough moisture out of a fog to create a steady drip, equal to perhaps ten inches of rainfall over the course of a year. Their sefl-watering supports summer streamflow, creating life where none would otherwise exist.

Majestic, vigorous, self-sufficient—it is no wonder that the coast redwoods have such symbolic appeal to Americans. We are, after all, great ones for developing such images of ourselves. But today I want to talk about the disparity between our images and reality.

It is a story of two portraits. One is of the America we believe ourselves to be. It is a self-portrait that contains elements of our strongest historical traditions—it is a likeness full of robustness, vigor, and above all of youth. The other is different. It takes its form from various contemporary measures of what we are actually doing, as distinct from what we say we are doing. A more shadowy and indistinct likeness, it is also, I am afraid, less flattering.

What are some of the main features of the first portrait—the one we like well enough to hang?

First, we think of ourselves as a nation that praises intelligence, nurtures literacy, and fosters the highest achievements of human intellect. We are justly proud of having provided an educational system that spreads its benefits in an egalitarian fashion, yet rewards excellence and pushes young people to the highest levels of accomplishment. We cite the large percentage of our citizens who graduate from high school, and the impressive proportion who eventually receive post-secondary education. We see ourselves as seriously engaged in educational experimentation and improvement—recalling, for example, the significant high-school curriculum reforms in mathematics and science of the 1960s. So in the educational cultivation of our human resources, we find much to praise—or, at least, to remember.

Second, we see ourselves as youth-oriented society, in the best sense of that phrase. We believe we are sensitive to the needs of the young; Heaven knows we are susceptible enough to their fads! A look at contemporary advertising or at almost any indicator of popular national culture suggests our concern with youthfulness. We often say that the young represent our future, and thus persuade ourselves that we are paying them a great deal of attention.

Third, we see ourselves as a people who have mastered science and technology and employed them to gain enormous improvements in our national life; the strain of "Yankee ingenuity" runs strong in our self-image. We are proud of our inventiveness, and we think of ourselves as a nation that invest heavily in science and technology and then exports the results to less fortunate nations. Part of the notion of American know-how is that we are willing to tend the health of scientific institutions, and keep them strong for our successors; and we are proud to have chosen to do most of our basic science in the universities, so that we train tomorrow's scientists as we do today's research.

This self-portrait adds up to something—a portrait of the investing society. My colleague, the economist Victor Fuchs, would say that it displays a future time preference—it is characterized by an ability to wait for gratification instead of wanting it now.

Well, I'm afraid the makers of TV commercials and the keepers of the statistics may be wiser than the rest of us. The former offer us endless versions of 'having it all, now'; and the latter have compiled a self-portrait a whole lot less encouraging than the one I just gave you. Let's examine this deeper likeness:

First, what is the real picture with respect to our regard for literacy and for the education of our ablest young poeple—the human resources on which our future will depend? Our national literacy figures have slumped badly in relation to those for other 'developed' countries. Only 30% of our 17-year-olds are now classified as 'adept' readers—competent enough to continue to college, or to cope in business or government work environments. Worse, only 16% of Black and 20% of Hispanic 17-year-olds qualified by this standard. And in the dozen years between 1970 and 1982, average scores on the Scholastic Aptitude Test, given each year to college-bound high-school seniors, dropped by 40 point—even after correcting for the social and economic backgrounds of the test-takers. The small rebounds in the past two years may be a source of hope, but it is too early to tell.

Worse still, we have seen a flight from teaching careers on the part of our most capable young people. In the early 1980s it had gotten so bad that the average SAT scores of those students intending to go into teaching averaged nearly 100 points below those for college-bound seniors generally. That was just part of a more generalized mistrust of public service occupations—an attitude encouraged by the corrosive recent tendency of candidates for elective office, and others, to heap scorn on governmental organizations and civil servants whenever they can. Bureaucracy-bashing is a bad national habit, and it may have given us a lost generation in terms of public service. In the world of education, bureaucracy-bashing has taken the form of criticizing schools and teachers for everything that is wrong—instead of wondering whether society may be asking them to do too much for too little.

The excellent recent report by the Carnegie Forum on Education and the Economy, called A Nation Prepared, has given us a more thoughtful diagnosis. We are simply underinvested. We call teaching a profession, yet pay teachers and treat them as though they were blue-collar workers. There is virtually no Federal leadership in innovation and curriculum reform, states and local districts are at war over control and there is little opportunity for the best teachers to advance and to share their special knowledge in a productive way. It is hardly surprising that the dropout statistics are so disappointing, and that performance indicators—even for the best students—are lower than a decade ago.

Thus, although we give the appearance of a nation in which the development of intellectual resources is a matter of deep concern, we have deteriorated seriously in the measures by which nations are judged in that respect.

And more generally—to turn to the second feature of the portrait—our advertised orientation toward youth is belied by our national pattern of expenditures. In recent years, perhaps without really meaning to, we have redirected our society's resources away from the young, and toward those at the other end of the life cycle.

In 1970, for example, approximately equal shares of the GNP in the United States were spent on health and education. A dozen years later, expenditures on health had grown 50 percent larger than those for education. Even considering that the proportion of the elderly in the population increased during this period, the enormous shift of expenditures from the young—for the most part the objects of education—to the elderly—who receive the largest fraction of health-care dollars—represents a significant change in national policy.

Expenditures for social welfare have been shifted in the same direction. Comparisons are hard to make, but by some estimates more than 30 percent of the budget is now spent on older Americans, while just 3 to 5% is spent on children. The consequences are not surprising. For example, the proportion of Americans over 65 who live in poverty was reduced from 24% to 15% between 1970 and 1982. During that same period, though, the proportion of those under 14 who live in poverty grew from 16 to 23%. Thus the positions of elderly and young Americans with respect to this critical social indicator were exactly reversed in just a dozen years.

But what about the last feature—the vigor of our scientific venture. Surely that is realistic!

Well, by some measures it is. Through the first part of this century, we took remarkably good care of American science. Some of the early history is inspiring. It begins in the 1920s with a man who enjoyed this grove, and in whose house I am now privileged to live. Herbert Hoover argued, as Secretary of Commerce in the mid-1920s, that U.S. industry needed the ideas as well as the trained scientists it could obtain from universities. He said this, among other things: "A nation with an output of $50 billion annually in commodities which could not be produced but for the discoveries of pure science, could well afford, it would seem, to put back a hundredth of 1% as an assurance of further progress."

Hoover's rhetoric did not convince the industrial America of 1925. But his ideas did result in more federal funding for basic science in the universities during the 1930s, and may well have helped prepare us for the remarkable events that followed World War II. In the short period of time from 1946 to 1951, we transformed an extraordinary apparatus of military research into a peacetime enterprise located largely in the universities, and funded primarily by government sources—initially the Department of Defense, then the National Institutes of Health and ultimately a new agency created just for the support of basic research—the National Science Foundation.

This system has worked admirably; over the next three decades, it brought us a steady stream of innovation, new technologies, and producitivity improvements. And it has lifted American science to the very top. Two and a half years ago the King of Sweden gave Nobel Prizes to five persons in the four research disciplines—and all were American. Those of you who admit to some California chauvinism will be pleased to know that three were Californians. It was the second time in seven years that Americans had swept the research prizes—a feat previously accomplished only by Germany, in 1905. After the first U.S. sweep, the noted Swedish biologist Sune Bergstrom explored the U.S. success and concluded that it was due to what he called "the democracy of American science"—the unique decision to locate graduate training and research in the same places, so that the experience and widsom of senior scientists could blend with the enthusiasm and vigor of their apprentices. No other industrial democracy has made that commitment, signalled by the location of two-thirds of our basic research in the universities; and none has succeeded as we have.

But we are now harvesting the fruits of a crop planted and grown two decades earlier. Good science requires patient husbandry, and matures slowly. Today's rewards properly belong to the caretakers of the past, whereas we—you and I—are responsible for the future. Thus our continuing Nobel harvest is a little illusory, like a late Indian summer crop that one can't be sure of next year. As to our investment in science, support has been dropping rapidly; and in 1983—the last year for which complete data are available—we spent only 1.9% of our GNP on nonmilitary research and development. By comparison, Japan invested 2.6%, West Germany 2.5%. Although program commitments for basic research have held up fairly well, the capital base for doing that work—the facilities and equipment—have suffered serious erosion.

That phenomenon can be traced back nearly 20 years. Through most of the 1960s, federal support of basic science was adequate to handle both the operating side and the modest capital demands associated with most scientific work. Toward the end of the 1960s, two things happened. First, we witnessed the end of federal support for the construction of research facilities. Second, because of rapid technological changes in the doing of science, the demand for new and more sophisticated equipment rose dramatically. Yet for FY 1984, the last for which complete data were available, the total federal investment in R&D plant in universities is projected at just $50 million.

Herbert Hoover would have approved of the way the private sector is trying to fill in. At Stanford, we are trying to work away at a staggering shortfall of research facilities—at least a third of a billion dollars worth, mostly concentrated in the science and engineering areas to the west of the main Quadrangle, and in the Medical School. Industry and private individuals have been responsible for nearly a hundred million dollars worth of recovery so far. And especially farsighted foundations are occasionally recognizing that capital needs demand special attention right now. The landmark gift of the W.M. Keck Foundation of Los Angeles to build the new CalTech/UC telescope is an especially encouraging case in point. Still, the size of the task is simply too large to be undertaken without public sector leadership.

And to the limited extent that this problem is now being addressed by government, it is being addressed in the wrong way, and that gives rise to a new problem all its own. The budget measure that passed the Congress a few weeks ago added $56 million in facilities as part of the Defense appropriation. But those facilities were not ones that had survived competitive scientific scrutiny within the agency. Instead, they were add-ons, earmarked for institutions in particular states by their friendly representatives without examination for scientific merit. The projects could be good—but we can't know. If Congress continues to make direct appropriations of this kind based on political influences rather than merit review, American Science will be in deep trouble. It needs help; but the wrong kind will sap public confidence and invite mediocrity.

Thus in all three aspects of investing in the young: education, how we distribute society's resources, and how we treat science and our responsibility for innovation; our self-portrait is not really as we see it. And it is not the picture of a nation that cares as much about the future as it thinks. For the social cost of failure to invest adequately in the young is not one we pay today; our successors will pay it; in doing so they will have to cheat their own successors; and so on.

Thus we find ourselves entering a trap. If political neglect of the young and their training continues, we will only enhance intergenerational dependence. The youngsters we slight today will become more dependent, less productive adults later on—and so they will require even more of the societal resources that should go to their children. Only ingenuity and productivity improvement can get us out of that trap; but those things depend on the strength of our educational and scientific systems, which are part of our misinvestment pattern. Scientific and technological decay, political neglect of education and the schools, the juvenilization of poverty are related; all form a trend in America's political economy that could, if we do not arrest it, become a death spiral.

What can we do about it? I have a few remedies to propose.

At the center of the problem is the inability of this government to formulate and pursue a strategy of investment. It is not obvious why that is so difficult; nonetheless, investment is a word that is simply never used or thought about in connection with Congressional budgeting and finance. It must become a shaping force, and I believe that must start with the tax system.

We must develop better tax treatment for encouraging investment, especially in research and other ventures that yield future benefits. Equally, we need to explore new ways to tax personal consumption and to spare personal investment. Neither the present tax structure, nor the one emerging from the spasm of reform we have been witnessing provides adequate incentives to put investment first.

And we should examine our patterns of national expenditure more carefully, with an eye to payoff not tomorrow or next week but in the more distant future. The most highly leveraged expenditures we can make are those on the young, who can repay the investment over long lifetimes of enhanced personal contributions. Nowhere is that more critical than for our very brightest young people, those who carry the creative intellectual spark that could produce dramatic changes in our knowledge of ourselves or our universe.

Perhaps we need a new kind of instrument for evaluating how each national policy affects the welfare of different age segments of the population. Call it a demographic impact statement. If we had one, it would surely raise some interesting questions about current policy. For example, why is all aid to college students means-tested, whereas Medicare and Social Security payments to the elderly are entitlements given without regard to financial need? And why are social security payments indexed to inflation, whereas fellowships and traineeships for young scientists are not?

Surely, too, the government would find it easier to make wise investment decisions if we could do something to improve the way in which Congress budgets expenditures. In our present system, recurring obligations (like the salary associated with a position) and one-time expenditures (like new buildings) are treated just the same. As a result, the Congress can reach a reduction target by taking out one major capital item just as easily as by eliminating dozens of positions. Which will they choose? The big ticket, naturally. It is a formula well calculated to disadvantage capital investment. A separation between recurring or "base" expenditures and capital outlays in the Federal budget process would help to provide a national discipline for taking care of our infrastructure.

Finally, the very richest opportunities for improvement lie in the area of science and education—on which we depend for the human and instrumental resources to supply an innovative society.

Our past neglect in this area can be made up for, if we act quickly. But who will do it? As I have said, industry is helping, but the task is too large and their need to satisfy other, shorter-term demands from their own investors is too great. The universities have fairly impressive endowments, and you are likely all too aware of their eagerness to grow them! But although to some that makes the universities look rich, they are feeling poor. They have grown their endowments only a little faster than inflation, and it is a surprising fact that the endowments of Harvard and Stanford both contribute a lower proportion of the operating budgets of those institutions than they did fifteen years ago.

Well, who can do it? The White House Science Council and its Chairman, Dave Packard, have supplied an answer as well as a diagnosis. The Council said in its recently issued report: "science and technology are critical to our future. Nations everywhere are investing in these capabilities. We conclude that we must rethink and, in many ways rebuild the critically important interactions between universities, government, and industry that have served this nation so well in the past. The federal government/university relationship is too fundamental to the maintenance of our national science and technology base to be taken for grant-

ed, and the industry/university partnership is emerging as critical to exploring that base in order to compete in the world marketplace. One conclusion is clear: our universities today simply cannot respond to society's expectations for them or discharge their national responsibilities in research and education without substantially increased support."

Only the Federal government can manage the sort of financial intervention the Packard panel is advocating.

And its words take us back to where Hoover began—with the educational institutions of America, particularly its research universities. There capacity to support scientific work must be shored up: by direct government support for building and equipment, and by the payment of full audited indirect as well as direct costs of doing sponsored research. We will suffer a dreadful setback if the awarding of funds for research facilities comes to be regarded the Congress as a new opportunity—like the rivers and harbors appropriation—for spreading wealth to their own districts and their own friends. The principle that scientific merit and not geography or some other factor should govern such events is the best guarantee of quality in our scientific enterprise.

What I have just been talking about, you may say, is only a piece of the American future—just a piece of one dimension of domestic policy, just one of a number of areas important to our national security. That is true. But I hope you will ask yourselves this question. If it is not to be our young scientists and their future work that will gain us a secure place among the nations and a better life for our citizens, then what will it be instead? And, more generally, how can we fail to invest adequately in the successor generation given what the stakes are? I cannot believe we will allow this to happen. For the result—the entirely unacceptable result—would be that forty years or so from now a generation will stand where we are now, knowing that things are, for the very first time in American history, worse than they were for their fathers.●

## THE CONTINUING WORK OF HON. JOSEPH A. CALIFANO

● Mr. HART. Mr. President, the current issue of National Journal contains on article on the efforts of a leading American public servant, former Health, Education, and Welfare Secretary Joseph A. Califano.

During his tenure in the Cabinet of President Carter, the Secretary tried relentlessly to educate the Congress and the country about the needless drain on our economy caused by escalating health care costs. And that is a battle which Mr. Califano continues to wage in the private sector.

This year, the Secretary published a new book on "America's Health Care Revolution." I commend it to the Senate. The book begins with the story of Mr. Califano's work with the Chrysler Corp. on cost containment in the health care plans of its workers and retirees. Largely through his efforts, the health care bill of these active and retired workers was reduced dramatically without harming the quality of care they received. The volume continues with descriptions of how the policies which worked for Chrysler can be applied throughout the corporate world. And it also contains a number of persuasive proposals—in areas ranging from medical technology to the education of our doctors and nurses—to reduce the health care bill of the Nation.

Among his other publicly spirited activities, Mr. Califano has recently released a report requested by New York Mayor Edward Koch "On Smoking and Health."

Joe Califano, in government and the private sector, is an activist on behalf of the health of the people of this country. As the National Journal article demonstrates, he is a pragmatist interested in policies that work—whether they are private or public solutions. I ask that the text of this article appear in the RECORD.

The article follows:

[From the National Journal, Aug. 2, 1986]

EX-HEW CHIEF HIGH ON THE PRIVATE SECTOR

(By Julie Kosterlitz)

When President Carter asked for the resignation of Health, Education and Welfare (HEW) Secretary Joseph A. Califano Jr. in July 1979, few doctors or hosptial administrators reached for their handkerchiefs. After all, Califano had led ill-fated quests to develop a form of national health insurance and impose cost controls on hospitals; to many, he personified the heavy-handed government regulator.

Today these same groups find it more than a little ironic that the former regulator is reentering the health policy debate by trumpeting the virtues of competition as a solution to many of the nation's health care woes. That's the essence of Califano's new book, *America's Health Care Revolution: Who Lives? Who Dies? Who Pays?* (Random House). "It's like a born-again Christian when one discovers there's another way to do something and takes it on like a brand new idea that's never been thought of by anyone else," said Jack W. Owen, executive vice president of the American Hospital Association.

The book, inspired by Califano's experience as chairman of the Chrysler Corp. board of directors' committee on health care costs, is a likely if somewhat relentless catalog of the shortcomings of the current health care delivery system and an almost Cinderella-like tale of the transformation of some Chrysler employee health plan administrators from know-nothing claims payers to tough purchasers. The Chrysler plans encourage use of generic drugs, second opinions, health maintenance organizations and other competitive programs.

The efforts, Califano said, brought Chrysler's health plans in $58 million under their projected $460 million budget in 1984, and more savings are likely. Chrysler has asked medicare to allow the company to administer the program for its own retirees in a similarly cost-conscious manner, an idea Califano recently discussed with Health and Human Services Secretary Otis R. Bowen.

Califano's book, which also urges more preventive care and lifestyle changes (including a war on smoking), does have a hint of religious zeal: "The gospel lesson is that hard-negotiating buyers, who treat health care like the other products they purchase, can change the system," he writes, "and we are only beginning to realize the benefits of competition." Care will not only be cheaper, but of higher quality, he says, and savings can be used to provide access for the poor.

But in an interview, Califano, 55, acknowledged that there's no guarantee that employers' cost consciousness might not eventually result in stinting on patient care or that the savings employers incur will be ploughed back into care for the poor. In fact, Califano still advocates a major role for government, including imposing the same combination of mandatory employer-provided health insurance and expanded federal health programs for the old, disabled and poor that he proposed while at HEW.

Now managing partner of the Washington office of the New York law firm of Dewey, Ballantine, Bushby, Palmer & Wood, where he has clients in the health field, Califano wrote the book because "I think I know what we should do right now in the health care system, and I wanted to get the attention of some people who could do something about it."

Despite restrained reviews, the book is in its third printing, and Califano has received letters from businesses, medical schools and corporate executives and now gets about 10 speaking requests a week.

To those who say that he has refashioned his views to fit today's thinking, Califano and a number of those who worked with him at HEW respond the charge is unfair. "I'm a little wiser than I was," Califano admitted. "I have a much better sense of what the private sector can do." But he also contended that "when I was at HEW, I used to tell corporate executives to look at their health care costs—I couldn't get them interested." A changing business climate and the swelling federal deficit turned the tide in the early 1980s, he said.

"He was always interested in private-sector solutions," said Karen Davis, a former Califano associate at HEW who's now chairman of the department of health policy and management at the Johns Hopkins University School of Public Health.

Others see the resistance to Califano during the 1970s more as the result of his combative style than of any special tenor of the times. "It was ram it down your throat, fella, instead of work out a system that makes more sense," Owen said.

"Maybe I was a little too contentious, I don't know," Califano said of his HEW years. "But I had to perform a public education function."●

## PREVENTING ILLITERACY

● Mr. ZORINSKY. Mr. President, for the benefit of my colleagues who are concerned about the problem of illiteracy, I would like to share one of the many letters I have received on this subject. All teachers have not been given the tools they need to teach reading effectively. I believe it is important to give specific information on what does and does not work in the teaching of reading to all educators so that they can experience the same pride that Mrs. Southern now feels.

I ask that Mrs. Southern's letter be included in the RECORD.

The letter follows:

MARCH 31, 1986.

Hon. EDWARD ZORINSKY,
*Russell Senate Office Building,*
*Washington, DC.*

MY DEAR SENATOR ZORINSKY: As a supporter of your legislation on illiteracy I want to share a brief testimony.

This is my 14th year teaching first grade and my 2nd year teaching intensive phonics. Teaching by using this method means seeing little eyes light up when they discover they can blend the letter sounds into words.

Beginning on the 1st day of school the children are given a simple explanation about the alphabet and their sounds. Then we start with one consonant sound and progress into words, adding more consonants and short vowel sounds day by day.

One way success is measured is by the confidence the children have in performing different reading tasks, which I have observed means less discipline problems. The children feel good about themselves. They know they can learn the process in becoming readers. The simple progression in phonics to the more complex letter sounds makes sense to the children when presented in a logical manner. This means children do not have to guess at a word or stop and wait to be told an unknown word.

I have now experienced the pride that goes with knowing I have truly given my First Graders the tools to master reading. Finally, by using Intensive Phonics I honestly feel like a teacher.

Most sincerely,

Mrs. MARY ANN M. SOUTHERN.●

## DISMANTLING THE NUCLEAR WASTE PROGRAM IS A SERIOUS MISTAKE

● Mr. KASTEN. Mr. President, this morning we had a tough battle in the Appropriations Subcommittee on Energy and Water Development over the very complicated issue of funding our High-Level Nuclear Waste Disposal Program. This issue has already been decided by the Department of Energy. Now is not the time to abruptly, and without compelling reason, toss aside the entire process for the disposal of high-level nuclear waste. I totally oppose reopening this resolved matter.

At issue is across-the-board reductions in funding for the Geologic Waste Disposal Program and the Monitored Retrievable Storage System [MRS]. Such reductions would obliterate the entire program. This issue is far too important to be dealt with at a subcommittee level. There are a number of members on the full committee who share the intensity of my feelings on this matter, and they too must be provided an opportunity to express their concerns.

Although this issue will likely be revisited next week before the full committee, from my perspective, the issue has been resolved. Unraveling the only vehicle we have for the isolation of high-level waste is impulsive and imprudent.

The options with regard to nuclear waste disposal have been thoroughly discussed and fully aired. State and local governments, private citizens, and a broad spectrum of interested organizations participated in the review process. Together we have invested a great deal of time and resources in the development of this national program. The consequences of halting this process are very grave.

Secretary Herrington's decision to indefinitely postpone site-specific work on a second repository is to be commended. This decision was based on the following: First, data that showed significant decreases in the projections of the spent fuel volume generated; second, lack of technical barriers to single-site containment; and third, imprudent fiscal management.

It costs the Nation over $25 billion to find and implement a geologic waste repository. It makes no sense to spend an additional $25 billion for a second site that is not needed.

DOE is trying to meet the goals we set for them in the Nuclear Waste Policy Act. Congress designed the act so that it would be flexible. Congress must resist the temptation of meddling in this program. DOE is responding to both new information and changing national needs. DOE's decision to continue site-specific work on one site is a sound one.

Dismantling the entire Geologic Waste Program does not further our efforts to deal responsibly with disposal of high-level nuclear waste and spent fuel. We must work together to ensure that this country has a safe, reliable, and fiscally responsible Nuclear Waste Disposal Program.●

## CUBAN POLITICAL PRISONERS

● Mr. CHILES. Mr. President, a little over 1 month ago America celebrated its birthday in magnificent fashion. I am referring to the festivities which took place on the Fourth of July in New York in honor of the 100th anniversary of the Statue of Liberty.

The celebration was a most fitting tribute to the lady in the harbor who has offered welcome to generations of immigrants searching for a better life in America. The Statue of Liberty epitomizes our long held belief in providing safe haven for the world's oppressed and refuge for those fleeing political persecution. One hundred years after her inauguration, Miss Liberty's torch still serves as a beacon of hope for those seeking a life of freedom and justice.

It is unfortunate that recent U.S. policy has clouded Miss Liberty's message of hope. In an effort to get the Cuban Government to reinstate the suspended December 14, 1984, immigration accord, our State and Justice Department officials were reported to be pursuing a policy of denying former political prisoners entry into the United States except under "exceptional circumstances." It was believed this would force the reinstatement of the immigration accord. In my opinion, this attempt to hold Castro's feet to the fire has put the heat on the backs of innocent political prisoners. It is a misguided and ineffective policy.

Recent reports have indicated that the State Department is now taking steps to speed up the visa application process for political prisoners. I realize the need to obtain an accurate record on the released political prisoners as well as the difficulty imposed by the suspension of the immigration agreement. However, I believe it needs to be made clear that pursuing a policy which denies entry to political prisoners is not going to accomplish anything—least of all a reinstatement of the immigration accord.

I have introduced Senate Resolution 432 in response to the plight of the Cuban political prisoners. While this resolution specifically names 17 recently released prisoners, I intend it to serve as a clear signal that this body will not support placing additional hardship on Cuba's political prisoners. They should not be pawns. Denying them entry is not the way to force a change in Cuban Government policy.

Mr. President, I request that a copy of an article appearing in the June 29, 1986, edition of the Miami Herald be inserted in the RECORD. It reprints excerpts from an article written by Jose Marti that appeared in the January 1, 1887, edition of La Nacion in Buenos Aires. Appropriately, it documents Marti's thoughts on the inauguration of the Statue of Liberty.

The article follows:

[From the Miami (FL) Herald, June 29, 1986]

THE STATUE AS SYMBOL—MARTÍ: "IT WAS A RAW DAY, BUT SELDOM WAS MAN'S REJOICING SO GREAT"

(José Martí, considered one of the Hispanic world's most gifted writers, lived in New York from 1881 to 1895. There he organized the war for Cuban independence that eventually claimed his life. Martí, who became a keen observer of the U.S. scene, witnessed the inauguration of the Statue of Liberty on Oct. 28, 1886. His observations and reflections on the Statue's dedication were published in La Nación in Buenos Aires on Jan. 1, 1887. Here are brief excerpts.)

(By José Martí)

For him who enjoys thee not, Liberty, it is difficult to speak of thee. His anger is as great as that of a wild beast forced to bend his knees before his tamer. He knows the depths of hell while glancing up toward the man who lives arrogantly in the sun. He bites the air as a hyena bites the bars of his cage. Spirit writhes within his body as though it were poisoned.

The wretched man who lives without liberty feels that only a garment made of mud from the streets would befit him. Those who have thee, oh Liberty! know thee not. Those who have thee not should not speak of thee but conquer thee.

It was yesterday, Oct. 28, that the United States solemnly accepted the Statue of Liberty which the people of France have donated to them in memory of the 4th of July, 1776, when they declared their independence from England, won with the help of French blood. It was a raw day: The air was ashy, the streets muddy, the rain relentless; but seldom was man's rejoicing so great.

The emotion was immense. The movement resembled a mountain chain. Not an empty spot remained on the streets. The two rivers seemed like solid land. The streamers, pearly in the fog, maneuvered, crowded from wheel to wheel. Brooklyn Bridge groaned under its load of people. New York and its suburbs, as though invited to a wedding, had risen early. Among the happy crowds that filled the streets there were none as beautiful—not the workmen forgetful of their troubles, nor the women, nor the children—as those old men who had come from the country with their flying cravats and greatcoats to salute, in the commemorative Statue, the heroic spirit of the Marquis de Lafayette, whom they as children had greeted, with waving hands and boughs, because he loved Washington and helped him make this country free.

Is not this nation, in spite of its rawness, the hospitable home of the oppressed? The voices that impel and counsel come from within, from deeper than the will. Flags are reflected on faces, heart-strings are plucked by a sweet love, a superior sense of sovereignty brings to countenances a look of peace, nay of beauty. And all these luckless Irishmen, Poles, Italians, Bohemians, Germans, redeemed from oppression or misery, hail the monument to Liberty because they feel that through it they themselves are uplifted and restored.

Then, when the hour came to draw away the flag that veiled the Statue's face, everyone's heart swelled and it seemed as though the sky had become covered with a canopy of eagle wings. People rushed to the boats as impatiently as would bridegrooms. Even the steamers, dressed to look like great wreaths, seemed to smile, chatter and bustle about as merrily as girls at a wedding feast.

From the time the parade was over, until dusk brought an end to the celebrations on the island where the monument stands, New York City and its bay were like one great cannon volley, a ringing of bells, a column of smoke. . . .

How the people roared when their president, who has come up as they had from the worker's bench, stepped into the official launch to go and accept the image in which every man seems to see himself redeemed and uplifted!

At the grandstand the commander-in-chief of the American Army called in vain for silence, waving his black three-cornered hat.

President [Grover] Cleveland seemed entirely worthy of speaking in her presence. His style too has marrow, his accent is sincere, his voice warm, clear and powerful. He suggests more than he explains. He said such broad lofty things as sound well before a monument. His left hand rested on the rostrum rail, his right he sank under the lapel of his frock coat. His glance had that challenge which becomes honest winners.

His words brought forth applause not so much for the pompous phrase and commanding gesture, as for their vibrating tone and sound sense. If the Statue could be melted into words, they would say the same: "This token of the love and esteem of the French people proves the kinship between republics and assures us that we have a firm ally across the Atlantic in our efforts to recommend to all men the excellence of a government built on the will of the people." "We are not here today to bow our heads before the image of a war-like and fearful god, full of wrath and vengeance, but to contemplate joyfully our own goddess guarding the gates of America, greater than all those the ancient worshiped, a goddess who, instead of wielding the bolts of terror and death, raises to heaven the beacon that lights the way to man's emancipation." The long applause that rewarded this honest man came from loving hearts.

Then a bishop appeared on the rostrum. He raised an age-bitten hand; all around the men of genius and of power stood up. There was a magnificent silence while he blessed in the name of God the redeeming Statue. Guided by the bishop the audience intoned a slow, soft hymm, a mystic doxology. A sign from the top of the torch indicated the ceremony was over.●

## NAUM AND INNA MEIMAN: REFUSENIKS SEEK TREATMENT FOR CANCER

● Mr. SIMON. Mr. President, the National Institutes of Health estimates that in 1986 alone, 930,000 people in the United States will be stricken with cancer. Four out of ten of these people will be alive after 5 years if their cancer is diagnosed early enough and they receive proper medical treatment.

Mr. President, this is an alarming figure, but even more shocking is the plight of Soviet cancer victims who are not allowed to seek advanced medical treatment. Cancer is a terrible disease, but in the United States victims have the opportunity to obtain proper medical care and the freedom to go to other countries, if necessary, to receive experimental treatment. My friends, Naum and Inna Meiman, have been denied that right.

Inna Meiman is dying of cancer. She and her husband, Naum, desperately want—and need—to leave the Soviet Union so they may seek alternative medical treatment for Inna. Inna has had four hazardous operations, but her tumor continues to grow and her pain continues to increase. Soviet doctors have said there is nothing more they can do for her, and while she has received invitations from several American, European, and Israeli cancer institutes, Soviet authorities continue to deny her permission to emigrate.

Cancer victims have to bear enough pain and suffering because of their disastrous illness. They should not have to be aggravated by the stressful life of refuseniks. I strongly urge the Soviet authorities to grant Naum and Inna permission to emigrate to Israel.●

## ORDER OF BUSINESS

Mr. DOLE. Mr. President, let me indicate that there will be no more rollcall votes this evening and also, the distinguished minority leader earlier gave me a comprehensive agreement which I have looked at and made some changes, but for the most part, it is still that agreement. It is rather lengthy and I think in the interest of our health and time and a few other things, we are going to put off further private consideration of that until tommorrow morning.

I thank the distinguished minority leader for his assistance. It seems to me we are getting closer and closer. We now have, I think, a list of all the amendments on both the Contra and South Africa issues on our side, which we shall deliver to the distinguished minority leader.

## ORDERS FOR FRIDAY

RECESS UNTIL 8:45 A.M.

Mr. DOLE. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until the hour of 8:45 a.m. on Friday, August 8, 1986.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

LEADERSHIP TIME

Mr. DOLE. Following the recognition of the two leaders, I ask unanimous consent that if not used, the time of the majority leader be reserved and the time of the distinguished minority leader be allocated to the distinguished Senator from California [Mr. CRANSTON].

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF CERTAIN SENATORS

Mr. DOLE. I ask unanimous consent that there be special orders in behalf of Senators HAWKINS, PROXMIRE, BAUCUS, and HUMPHREY for not to exceed 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. DOLE. Following the special orders just identified, I ask unanimous consent that there be a period for the transaction of routine morning business not to extend beyond the hour of 9:15 a.m. with Senators permitted to speak therein for 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

## PROGRAM

Mr. DOLE. Mr. President, at 9:15, we will be back on the DOD authorization bill. At 9:45, unless otherwise provided, under the provisions of rule XXII, a live quorum will begin, to be followed by a cloture vote on the Byrd amendment to the DOD authorization bill. I visited with both managers of the DOD authorization bill before they left. They are very optimistic that they can complete action on the DOD

authorization bill at a reasonable hour tomorrow.

Based on the hours we have been staying, reasonable would be any time before midnight, but they are hoping it will be in the afternoon—daylight at least. They believe that with the agreement with the Senator from Massachusetts [Mr. KERRY] on the Asat amendment and one other rather major amendment, they can dispose of a number of the other amendments in rather rapid order.

As the distinguished minority leader pointed out earlier, following the cloture vote on his amendment, in any event, we could have a vote on the DOD authorization bill itself.

I think with the progress that has been made, I would be willing at this time to withdraw that cloture motion if there is no objection.

The PRESIDING OFFICER. Is there objection heard?

Mr. HARKIN. Reserving the right to object, I want to understand what I just heard. Is the distinguished majority leader trying to get unanimous consent to withdraw the cloture petition that was filed yesterday on the DOD bill? Reserving the right to object, I would like to have an explanation of why. I think that ought to sit there. It was filed. It ought to sit there.

Mr. DOLE. What we are trying to do is complete action on the DOD authorization bill and the purpose of that was, as I said earlier, to speed up the handling of amendments. We have had a very good day. As I have noted, I think there have only been about two or three periods where we had any quorum calls all day, so they have been going just as rapidly as they could. I am advised by both managers that they really believe they can finish tomorrow and, therefore, it is my judgment at this time that cloture, even if it were invoked, would probably not speed up the process.

Mr. HARKIN. I again wonder if this might not be taken up again tomorrow morning, seeing what the agreement is like. If an agreement is reached, then maybe all those things can be vitiated at that time.

Mr. DOLE. I think the problem is going to be that there is only a 15-minute period between the time we go on the DOD bill until the first cloture vote is to occur on the Byrd amendment. If we should postpone that, if Senator BYRD should ask that be postponed, we would still have the other cloture vote. And it is going to take, in my opinion, probably an hour to get the unanimous-consent agreement because we are dealing with a rather lengthy agreement, with a total of some 70 amendments. We can raise it again tomorrow morning if the Senator prefers.

Mr. HARKIN. Again, the unanimous-consent request was to vitiate the cloture petition that was filed yesterday on the DOD bill that would ripen tomorrow.

Mr. DOLE. That is correct.

Mr. HARKIN. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. I would make this suggestion to the distinguished majority leader. It would seem to me that the two cloture petitions that remain could very well be put later in the day because even without any problems in connection with the agreement that we are working on, they would have to be delayed. It is going to take more time than the time that we will have under the order that has been entered by the distinguished majority leader. He may want to think now of delaying those beyond the hour of 9:45. Of course, he will have to do that in any event as I see it.

Mr. DOLE. I know it would certainly please the manager if they could come in and start working on the bill, and it is going to take, I would say, probably private discussions of another hour with the two of us and other Senators and an hour getting the agreement. It would seem to me we could postpone those votes until 1 p.m.

Mr. BYRD. I do not think that the distinguished majority leader will lose any time or any advantage or that anybody will gain any advantage by differing therefrom. Under the distinguished majorty leader's proposal that action on the first cloture motion under rule XXII be delayed until 1 p.m., I do not think the majority leader will lose any time or any advantage. I think it will work to the advantage of all. It would certainly give us more time to work on the agreements, and it will allow the managers of the DOD bill to proceed earlier with action without threat of cloture votes hanging over them.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. DOLE. Now, is it necessary to make the same request for the other cloture vote? Would it also be postponed?

The PRESIDING OFFICER. They would both be postponed under the request.

## RECESS UNTIL 8:45 A.M. TOMORROW

Mr. DOLE. Mr. President, there being no further business to come before the Senate, I move we stand in recess until 8:45 a.m. Friday, August 8, 1986.

The motion was agreed to, and 11:51 p.m., the Senate recessed until Friday, August 8, 1986, at 8:45 a.m.

## NOMINATIONS

Executive nominations received by the Senate August 7, 1986:

U.S. ARMS CONTROL AND DISARMAMENT AGENCY

Frank C. Carlucci, of Virginia, to be a member of the General Advisory Committee of the U.S. Arms Control and Disarmament Agency, vice William Robert Graham.

DEPARTMENT OF AGRICULTURE

W. Kirk Miller, of Wisconsin, to be Administrator of the Federal Grain Inspection Service, vice Kenneth A. Gilles.

VETERANS' ADMINISTRATION

Thomas E. Harvey, of the District of Columbia, to be Deputy Administrator of Veterans' Affairs, vice Everett Alvarez, Jr., resigned.

FOREIGN SERVICE

The following-named persons of the agencies indicated for appointment as Foreign Service officers of the classes stated, and also for the other appointments indicated herewith:

For appointment as Foreign Service officers of class 1, consular officers, and secretaries in the Diplomatic Service of the United States of America:

AGENCY FOR INTERNATIONAL DEVELOPMENT

Charles Harold Antholt, of Maryland.
Francis William Conniff, of Nevada.
Harry H. Houck, of New Jersey.
Ernest C. Kuhn, of Ohio.
Paul M. Scott, of Virginia.
Alejandro Sundermann, of Texas.
Robert Allan Van Horn, of Oklahoma.

For appointment as Foreign Service officers of class 2, consular officers, and secretaries in the Diplomatic Service of the United States of America:

DEPARTMENT OF AGRICULTURE

Francis J. Tarrant, of Maryland.

DEPARTMENT OF COMMERCE

Robert S. Connan, of Pennsylvania.

AGENCY FOR INTERNATIONAL DEVELOPMENT

J. Wayne Butler, of Ohio.
Thomas Fenelon Cornell, of Ohio.
Thomas Lee Marr, of Virginia.
Elizabeth Smartt Flemister Martelia, of New Hampshire.
Campbell S. McClusky, of California.
Barbara J. Spaid, of North Dakota.

For appointment as Foreign Service Officers of class 3, consular officers, and secretaries in the Diplomatic Service of the United States of America:

DEPARTMENT OF STATE

Robert D. Burkette, of Tennessee.
Joseph Hilliard, Jr., of Washington.
Quincy M. Krosby, of New York.
Mary Bland Marshall, of Virginia.
Janice Zeszutek Ogden, of California.
Leslie V. Rowe, of Washington.

AGENCY FOR INTERNATIONAL DEVELOPMENT

Gary Flynn Fuller, of California.
James Van Den Bos, of Virginia.

U.S. INFORMATION AGENCY

Helen B. Picard, of California.

For appointment as Foreign Service officers of class 4, consular officers, and secretaries in the Diplomatic Service of the United States of America:

DEPARTMENT OF STATE

Richard Alan Albright, of Ohio.
Rudolph Frederick Boone, of Florida.
Thurmond H. Borden, of Texas.
Marc Daly Carlisle, of North Dakota.

William Robert Carlson, of Massachusetts.
Lisa A. Carty, of New Jersey.
Michael J. Delaney, of Illinois.
John Frederick DeVleming, of Washington.
Bruce E. Donahue, of Indiana.
David Ross Dreher, of Texas.
Henry S. Ensher, of California.
Kaara Nicole Ettesvold, of the District of Columbia.
Jerome Thomas Farrell, of California.
Mark Foulon, of Washington.
Gordon Gray III, of Nebraska.
Blair Parks Hall, Jr., of the District of Columbia.
Eigil Valdemar Hansen, of New Jersey.
Karl William Hofmann, of California.
Pete Kazuhiko Ito, of California.
Gerard J. Jackson, of Pennsylvania.
Craig Mallory Karp, of Washington.
David J. Keegan, of Florida.
Leonard A. Kusnitz, of Connecticut.
Beverly A. LaVigne, of California.
Sally L. Lindover, of New York.
Cheryl Ann Martin, of Connecticut.
Karen E. Martin, of Washington.
Michael Anthony Matera, of California.
James Edward Maxstadt, of Indiana
James Aidan McVerry, of Connecticut.
Lloyd Woodson Moss, of Florida.
Stephen D. Mull, of Pennsylvania.
Bruce Richard Nelson, of Minnesota.
Gregory Eugenio Phillips, of Virginia.
Kenneth John Pitterle, of California.
Eileen Jane Quinn, of New Mexico.
Charles Aaron Ray, of Texas.
Christopher R. Riche, of Washington.
James Milnor Roberts III, of Florida.
Jack D. Robinson, of Washington.
Theorphilus James Rose, of Florida.
Daniel A. Russell, of Maine.
Claudia H. Serwer, of New York.
Frederick A. Smith, of California.
Eugene P. Sweeney, of Massachusetts.
Linda Thomas-Greenfield, of Louisiana.
Paul G. Wickberg, of Oklahoma.
Robert Cantrell Wood, of South Carolina.
Allen William Yale, of Connecticut.
Thomas Michael Young, of California.
Jack M. Zetkulic, of New Jersey.

U.S. INFORMATION AGENCY

Pendleton Clark Agnew, of Virginia.
Russell A. Bikoff, of New York.
Lynn L. Cassel, of Alaska.
Peter R. Claussen, of South Dakota.
Paul Denig, of New Jersey.
James Crosby Dickmeyer, of Iowa.
Alberto M. Fernandez, of Florida.
Gregory Lawrence Garland, of Florida.
Mary Ellen T. Gilroy, of New York.
Roy A. Glover, of South Dakota.
Adrienne S. O'Neal, of Louisiana.
Hilary Olsin-Windecker, of California.
Elizabeth B. Pryor, of New Jersey.
Donald E. Terpstra, or Texas.
Kathleen Ann Tormey, of California.
Dennis Spencer Wolf, of Ohio.

The following-named members of the Foreign Service of the Departments of State and Commerce, the Agency for International Development, and the U.S. Information Agency, to be consular officers and/or secretaries in the Diplomatic Service of the United States of America, as indicated:

Consular officers and secretaries in the Diplomatic Service of the United States of America:
Carlton Louis Ames, of Florida.
Dale R. Avery, of Pennsylvania.
Joanne Martin Baldonado, of California.
Lora Jane Berg, of New York.
Joan Callahan Bigge, of California.
Nicholas Stephen Bouras, of New Jersey.
Nikki Brajevich, of California.
Sue Lenore Bremner, of California.
Kelly W. Brimhall, of Virginia.
Krystin Lynn Buckey, of Ohio.
Vincent Paul Carver, of Connecticut.
Ralph Dominick Chiocco, of Florida.
Katherine Christensen, of Texas.
Colin Michael Cleary, of New York.
Dawn M. Cooper-Bahar, of Maryland.
Robert Lawrence Daly, of New York.
Robert Lawrence Dance, of Ohio.
David Bryan Edwards, of New Jersey.
Crayon Cornelius Efird, of North Carolina.
Barbara Jean Euser, of Colorado.
David R. Gilmour, of Texas.
Zachary Robb Greenhill, of New York.
Jay P. Gurian, of Hawaii.
Patrick M. Hailey, of Virginia.
Sylvia Lorrain Hammond, of California.
Patricia Ann Havasy, of Virginia.
Danny R. Hildreth, of Virginia.
Jeffrey Martin Hill, of Maryland.
Jeffrey A. Hoover, of Virginia.
Edward Bruce Howard III, of Maine.
Paul Jerome Howard, of Washington.
Jean Anne Winkler Hudder, of Kansas.
Anthony Alonzo Hutchinson, of Washington.
Michael J. Jacobsen, of Maryland.
David Wade Jenkins, of Pennsylvania.
Kathy A. Johnson, of Illinois.
William E. Jones, of Virginia.
Sandra L. Kaiser, of California.
Edward Arthur Kemp, of Massachusetts.
Morgan Adele Kennedy, of Texas.
Marie L. Kish, of Virginia.
William Speer Kuhn III, of Connecticut.
Thomas M. Leary, of the District of Columbia.
Theresa Leech, of Michigan.
Douglas H. London, of New York.
John B. Long, of the District of Columbia.
John M. Louton, of Washington.
Joseph Estey MacManus, of New York.
Megan M. McCall, of California.
M. Lee McClenny, of Washington.
Elizabeth Barkalow McGaffey, of California.
Raymond Gerard McGrath, of Virginia.
Jeffrey A. Miotke, of California.
Calvin Arthur Mitchell III, of New York.
Michael K. Morrow, of Michigan.
Rachel Norniella, of Florida.
Lee Young-Eun O'Donnell, of California.
Paul Christopher O'Friel, of Virginia.
Francisco Luis Palmieri, of Connecticut.
Alison Pentz, of Virginia.
Marcie Ellen Porter, of the District of Columbia.
Linda Louise Powers, of Connecticut.
Robert Powers, of California.
Enrique A. Pardo, of Florida.
Jean Ellen Preston, of New Jersey.
Evelynn Ululani Putnam, of Maryland.
Patricia Raikes, of Iowa.
Edward James Ramotowski, of Connecticut.
Susan A. Sutton Robinson, of Maryland.
Daniel F. Romano, of Washington.
Karen E. Runge, of Virginia.
Norma D. Scott, of Virginia.
David R. Siefkin, of California.
Robert A. Sorenson, of New Jersey.
Michael M. Steere, of Virginia.
Virginia Anne Canil Tadie, of Connecticut.
Thomas Edward Torrance, of California.
Mary Townswick, of Minnesota.
Katherine Rose Von Eckartsberg, of the District of Columbia.
Geraldine George Vought, of Florida.
Nancy R. Wade, of New York.
Roy S. Weatherston, of California.
Michael Q. Whitley, of Virginia.
Charles C. Wilson, of Texas.

Consular officers of the United States of America:
John J. Bodson, of the District of Columbia.
Renato L. Davia, of Texas.
Richard Vincent Groccia, of California.
Larry A. Moody, of the District of Columbia.
Frank W. Skinner, Jr., of Virginia.

Secretaries in the Diplomatic Service of the United States of America:
Johnny E. Brown, of South Carolina.
Robert J. Bucalo, of Pennsylvania.
David K. Diebold, of Virginia.
Paul W. Leinenbach, of New York.
John Andrew Martens, of California.
Harvey Michael Mears, of Ohio.
Earl J. Young, of Oklahoma.

IN THE NAVY

The following-named rear admirals (lower half) of the line of the Navy for promotion to the permanent grade of rear admiral, pursuant to title 10, United States Code, section 624, subject to qualifications therefore as provided by law:

UNRESTRICTED LINE OFFICER

Roger Francis Bacon
Jerry Creighton Breast
Paul Donald Butcher
Guy Haldane Curtis III
Harry Kenneth Fiske
Raymond Paul Ilg
Jerome Lamarr Johnson
Robert Joseph Kelly
Robert Kalani Uichi Kihune
Henry Herrward Mauz, Jr.
William Tyler Pendley
James Guy Reynolds
Dean Reynolds Sackett, Jr.
James Michael Gleason Seely
John Frederick Shaw
Hugh Larimer Webster
John Raymond Wilson, Jr.

RESTRICTED LINE—ENGINEERING DUTY OFFICER

Malcolm Mackinnon III
Kenneth Cornelius Malley

RESTRICTED LINE—AERONAUTICAL ENGINEERING DUTY OFFICER

John Clark Weaver

The following-named rear admirals (lower half) of the U.S. Navy for promotion to the permanent grade of rear admiral, pursuant to title 10, United States Code, section 624, subject to qualifications therefor as provided by law:

CIVIL ENGINEER CORPS

Arthur William Fort
Frederick Guyer Kelley

The following-named rear admirals (lower half) of the Reserve of the U.S. Navy for permanent promotion to the grade of rear admiral in the line and staff corps, as indicated, pursuant to the provisions of title 10, United States Code, section 5912:

UNRESTRICTED LINE OFFICERS

John Edward Love
John Dennis Summers

AERONAUTICAL ENGINEERING DUTY OFFICER (AERONAUTICAL ENGINEERING)

Clay Wayland Gordon Fulcher

SPECIAL DUTY OFFICER (CRYPTOLOGY)

William Joseph Miles

SPECIAL DUTY OFFICER (INTELLIGENCE)

Robert Patrick Tiernan

MEDICAL CORPS OFFICERS

John Duncan Tolmie
James Glen Roberts

DENTAL CORPS OFFICER

Edward John O'Shea, Jr.

JUDGE ADVOCATE GENERAL'S CORPS OFFICER

Robert Edward Wiss

CHAPLAIN CORPS OFFICER

John Joseph Hever

IN THE AIR FORCE

The following-named officer for appointment to the grade of general on the retired list pursuant to the provisions of title 10, United States Code, section 1370:

Gen. Andrew P. Iosue [redacted] FR, U.S. Air Force.

The following-named officer, under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code section 601:

*To be lieutenant general*

Maj. Gen. Thomas J. Hickey, [redacted] FR, U.S. Air Force.

The following-named officer, under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

*To be lieutenant general*

Lt. Gen. John A. Shaud [redacted] FR, U.S. Air Force.

# EXTENSIONS OF REMARKS

## RETIRED: HOW SUCCESSFUL ARE YOU?

HON. CLAUDE PEPPER
OF FLORIDA
IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. PEPPER. Mr. Speaker, the editor of Vital Speeches of the Day, T.F. Daly, Jr., of Southold, Long Island, NY, discovered over time that the active business people with whom he played golf, often died shortly after they retired. He lost a lot of good companions, golf partners he could sometimes beat, and missed their conversations. It bothered him, naturally.

And then, he received a copy of a speech made before the National Association of Retired Federal Employees in Long Beach, CA, at their annual convention—in which the speaker, Col. Barney Oldfield, USAF(Ret.), but for the last 23 years on the staff of Litton Industries, in Beverly Hills, CA, told them that retirement as a condition relating to payroll might be all right, but as a frame of mind was intolerable. The whole atmosphere of the downbeat convention changed, and 85-year-old Vander Mary Smith, the program chairman who got the speaker, was surprised the last day with a hasty presentation to her of a meritorious award. Vital Speeches of July 15, 1986 reprinted Colonel Oldfield's stimulating remarks for world distribution.

For the thought-providing tone of these remarks, I ask permission for Col. Barney Oldfield's excellent statement to appear at this point in the CONGRESSIONAL RECORD:

RETIRED: HOW SUCCESSFUL ARE YOU?

(By Barney Oldfield)

Colleagues, ladies and gentleman; When Vander Mary Smith called me—I suppose in desparation—I asked her to tell me a bit about your organization. I get paid for 30 years three months and 29 days of military service which ended in September, 1962. But mine has always been the experience of retiring, but never the condition that follows because there was always another attachment or tie-on awaiting me the next day. I retired from the Screen Publicists Guild and Warner Brothers in 1948 when the Army recalled me and gave me a regular commission. I transferred to the Air Force, and in 1962 waved goodbye to the uniform. I retired from active status in the Writers Guild of America West in 1974, and qualified for retirement from Litton Industries that same year. In the midst of the festivities, the foundar of Litton Industries, Tex Thorton, joined the party and said: "Come to work tomorrow as if nothing happened, and you can go as long as you wish or until you drop dead, whichever is soonest." I thought that was very enlightened personnel practice. So now coming upon on 77, I'm in my 23rd year and unless they find out I'm here when I should be back in my office, real retirement eludes me—and I hope it always will.

So my credentials are suspect as a retiree, but Vander Mary said she had other things in mind. She said your organization was interested in arousing favorable media attention, and she'd like to have me talk about the how of doing that.

In no way am I a patent medicine salesman, nor can I guarantee that any suggestion I might make will work. But it might be fun to try. And if you can accept what President Reagan has said is crucial to life's betterment—the great force of voluntarism—that there are compensations beyond money, if you will entertain such engagements you may even feel rewarded above and beyond anything you could put in a bank. Or that you might have known when you were on the job.

When I look out at all of you, what do I see? Hundreds of people who served their country, state, or city in some role it thought was important and necessary. That you served well indicates you possess two admirable characteristics—loyalty and dedication.

For another, you represent a vast pool of knowledge and experience learned at government expense, while serving the most benevolent and caring boss of them all—the U.S.A. and its increments.

There's yet another probability among you—that perhaps 10 percent of you dropped ideas in "suggestion boxes" wherever you did your government service and were given some award. That means you were and are observant, saw things needing correction and the methodology for bringing it about. Whatever they gave you in money had that added ingredient of personal satisfaction when accompanies recognition. And it says that you possess the greatest commodity of all—imagination. I have always believed that those who are truly born poor are those who were born without an imagination.

Undoubtedly, if each of you was interviewed individually we would find that a great many of you are still capable of being jewels substituted for the crowns of thorns worn by today's society, and the whole scene around you could be burnished and brightened were you to observe a little, focus a little, and offer as part of the indicated remedy a little—or a lot of yourselves.

Many of you, I'm told, engage in supportive projects of one kind or another, and you know what I'm talking about. Unfortunately, you perhaps keep them as your own and do not see them by your membership in the California State Federation of Chapters of the National Association of Retired Federal Employees, as a concerted and coordinated effort.

There is an awesome word in our language which halts all too much of your potential and comprehension of your worth. As a verb, the word is retire. As a condition, the word is retirement. As a connotation, it suggests having been placed on a shelf, having had your clock stopped, your capability cut off, your being assessed as a real or possible societal burden and your allotted days on the calendar numbered.

If you are a man, the story is that your wife wants you out of the house and from under her feet. If you are a woman, it probably dawns on you that there's no pleasing him. And why is this? It's not just the payroll condition, but mental acceptance that incapacitation and retirement are synonymous.

If your organization is to attract attention in a media sense, it has a lot of barnacles to shake off. The first thing you must do is look at yourselves as others seem to see you, and this will cue you as to changes that are necessary. Example: The chances now of a media call on you as persons or an organization would be for a negative, rather than a positive. Would assignment editors think of you as a response area if their question of the day was "How much better are you off this year than you were last year?" or would they be most likely to think of you for such questions as "How much short of your needs is your monthly retirement check," or, "How well does Medicare take care of you?" Since last year, individuals among you may have done well in something else you do, picked up a new and fulfilling hobby, have found satisfaction in helping others in a well-constructed program, may have invented something, may have won at the flower show, endowed a scholarship or helped a kid through school, have become a partime teacher or tutor. You as such a person would have been infinitely better off, more happy with yourself, and have known appreciations, of all kinds, but that would not be the answer sought. Among you they know if they look long enough, you will be seen as having to pinch pennies, beset by costly illnesses and these responses will seem to indict all of the good works of caring people who have made this the best place in the world to be a government employee and later on, a retired one.

Why is this?

A number of reasons. One is what we call in old Hollywood "type-casting." You have either passed the countdown of 62, or the later 65, are retired and are thereafter pigeon-holed as "old." It has nothing to do with how you feel and what you can still do, you have been declared old by legislation, by policy, by decree, by regulaion and by the calendar pages used up. It is irrelevant and immaterial that you may not feel that way at all, and may not act that way either. Grandma Moses was born in 1860 and died in 1961 and if you own one of her paintings, you are rich. It would also bear witness that there is no stopping some people, and in her case she didn't grow old—she grew better. As she amassed her 101 years, she excited and made envious people one quarter her age. She was "type-cast," too— as a doer.

Another reason is the mind-set of those who dismiss you as in a single, limited, compartmentalized classification, a statistic or a demographic. To such minds, you are somewhere between alive or dead and they're not sure which describes you best. Rather than do some inquiring, they place you nearer the latter condition. Since you don't carry a placard in one of those zombie-like marching exercises, the sloganeering approach hasn't been used much by you. It is a well known fact of American life that no TV assignment editor ever saw a placard on a pole

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.
Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

he didn't like. In earlier days, the cameramen who went to the scene brought already prepared signs for the visual improvement of what their lenses could catch. There was an old adage you must remember that "beauty is only skin deep" which warned that we should all look to the inner depths of people in assessing true worth. Now, too often, it's "what you see is what you get." More often than not, you are dismissed by default.

What you are attempting to do then, to change the public impression of you, means you have to go through this filter. I hasten to say that what you want to do is not so much bigger than all of you, but it does indicate the size of your undertaking.

First, you have to see your organization as for the knee-jerk reactions it arouses. National Association of Retired Federal Employees. Every word of it except of has been the subject of stories, speeches and commentaries or editorials. *National*—that meant you existed in the millions, whether as civil servants or in the military. You were described over and over as "costly," "wallowing in the government trough," and a "burden to the taxpayers." You may have held critical positions which gave our government stability and kept it on a steady course, or helped win it wars, but when the general public reflects about you that's not what it remembers. You made them the gift of the government which blessed them, operated it in their behalf, but in most cases only you know that. *Retired*—that means you have accepted shelving, state of suspended animation, have become someone to leave the grandchildren with and to flatter the generations behind you by worrying fulltime about their futures. *Federal*—that makes you blood brothers and sisters of "pork barrel" legislation, where agencies are created for which the pay is generous, where too many are hired to do job that is required doing, or has been said so often in derision: "A soldier has nothing to do, but gets up early to do it." *Employees*—that does it right there, as we have all known the tone used along with uttering the words. "government job" which has never ranked high in the public mind. Add to that all the specters *Association* conjures up—lobbying, special interests, hostility to change, protection of the status quo.

In all those years in uniform, as a regular Army and Air Force officer, there was never a week that went by in peacetime that some well-meaning person who thought he was flattering me didn't ask, "How come a guy like you is in uniform?" It was always said as though they believed I could have cut it in some civilian commerical pursuit, so how could I possibly be comfortable wasting my time in uniform? When I would tell them what I was doing was far more interesting to me than what they were doing could ever be, I'm sure they marked me down as peculiar—but I marked them down as uninformed and that they would probably stay that way.

Your first task has to do with your organizational umbrella—National Association of Retired Federal Employees. You keep the name of course, but in your thinking, think something like National Association of Redirected Federal Employees. Redirected indicates restored momentum, renewed efforts and that you've all had do-something transplants.

If your membership cards do not already tell you such things, send a questionnaire along with your next mailing which asks not only for the name, but a positive attitude testimonial profile about general state of health, ability to engage in what kinds of activities, projects with which each is already involved either full or part-time, what projects the Association might be thinking about would appeal for participation, and what previous applicable skill credentials those surveyed might have. One thing I'm sure will surprise you will be how many you find engaged in constructive, society-serving, rewarding personal activities already.

When all this is analyzed, I suggest as part of your next annual meeting agenda, you select perhaps ten Association goals in which you are inviting membership participation. You have the makings of a press release right there, perhaps with additional numbers of foster grandparents, hospital ward visitations with retarded children, speech therapy aids, civic decorative and renewal undertakings—and so on. You know the labels better than I do.

But you have to energize such things a little. Just for fun, try this: Have the press release available for all comers, and mail it on convention opening day, but add on a little. Paint some placards with the slogan "Hell, no, we won't go!" Go to the local cemetery and march up and down in front of the gate, after letting the media know that the National Association for Retired Federal Employees is mounting some kind of protest at the cemetery. When the media shows up, use that as the platform to state those goals and this is the kind of thing your Association is identifying with as long as you are allowed by good health and the grace of God to stay on this side of the cemetery gate!

You all might just become the most fantastic bunch of feisty folks.

I used the word "colleagues" in my salutation starting these remarks, and I'm proud to be one of you. But I have been the world's greatest failure as a retiree; no matter how many times it happens, it never sticks—and I hope that even if it does, being retired as a frame of mind never occurs to me—and I hope it never overtakes you either.

Before I take your questions, I want to thank you all for your generous gift to the Foundation of the Americas for the Handicapped. Let me tell you how it came about. The Department of Labor which has under it the President's Committee for Employment of the Handicapped called me. They said they wanted me as a panel member for a workshop in Guatemala, part of their very special festival and symposium for handicapped children. I told them I was sympathetic, but far from an expert in this field. They said they had all kinds of experts, but they had found their greatest handicap to be one we all know about—insufficient funds. They needed some ideas, they said, and asked me to discuss it with the General Secretary of the Organization of American States. Before I went to see him in Washington, I called the Internal Revenue Service asking them if they had a tax exempt organization called the Foundation of the Americas for the Handicapped. IRS said there was no such organization, so I went to my hotel, wrote out a check to the Foundation of the Americas for the Handicapped for $1,000. I told the Secretary General I disliked very much going to a small country which would put itself out at great length and would have one more flowery speech that would die in the four walls of the workshop site, so I asked him if I could start something. Prone as they are to revolutions in Latin America, he was somewhat apprehensive, but I told him I was going to talk about the biblical story of the widow's mite, how what she gave was all she had. I would then hold up the $1,000 check and tell them it wasn't all I had, but to be good since it was made out to a nonexistent organzation, they would have to set up a Foundation of the Americas for the Handicapped to be able to cash it. Would you believe that conference was suddenly jumping and we raised $4,000 before we left the country. It is still growing, and what you are giving us today will help.

Thank you.

## CONGRATULATIONS TO DAVID W. WHITE, M.D., OF LYNCHBURG, VA

## HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. FASCELL. Mr. Speaker, I have just read about a remarkable man, Dr. David W. White, an ophthalmologist in Lynchburg, VA. His story gave me a tremendous lift and I would like to share his article from Medical Economics with our colleagues. It is an excellent reminder that one of America's greatest traditions is helping the less fortunate. It is a custom that has strengthened us and enriched our lives, and, as you will see, it continues to do so.

Dr. White is the brother of one of my constituents, Mr. Warren T. White of Miami. I share the pride he has in his brother's professional achievements and in his humanity.

The article follows:

EVERY WEDNESDAY, I TAKE A VACATION FROM REDTAPE

(By David W. White, M.D.)

For a spell last year, every time I got together with a bunch of doctors I came away depressed. President Reagan was talking about freezing Medicare reimbursements. State medical societies and the AMA were asking us to freeze fees. Hospitals were gearing up to cope with DRG. And my colleagues were griping endlessly about the situation. It was getting me down.

One evening I held forth to my wife about the dark forecasts I was hearing in the surgeons' lounge and at hospital staff meetings. The general feeling was that it was going to get tougher and tougher to keep up our incomes and standards of living. Malpractice premium rates were soaring. Reimbursement by state agencies was low and falling lower. I couldn't put it all in perspective. "Sometimes," I said morosely, "I wish I'd gone to law school like my brothers."

My wife interrupted my mutterings. "I think you're looking at it the wrong way," she said. "Remember when Medicare was first proposed? You were dead set against it then, and now here you are complaining for fear of losing out on the goodies."

She was right. Essentially, it was governmental dictates that were depressing me. I'd been opposed to Medicare and had refused to participate for over a year, until pressure from my patients brought me around. I'd believed that the inevitable bureaucratic entanglements would take the pleasure out of practicing medicine, and that's proven true, at least in part.

My wife wasn't finished. "What did you do before Medicare?" she asked.

"Well, let's see." I struggled to recall the good old days. I charged patients who could pay, sometimes lowering their bills if necessary, and those who couldn't pay I saw for nothing. Come to think of it, I had fewer employees back then too, because there was so much less paperwork.

"If it worked then, why won't it work now?" she persisted. "Instead of just complaining about what the government is doing, why not come up with something you can feel good about?"

She was right again. Why not run my own system on a positive basis, rather than brood about the government's next step? Before long a plan began to take shape.

One of the reasons I'd become a doctor was to help people. That was in the 1950s, when most doctors expected to do their fair share of charity work. Our town had a public clinic where every doctor took a turn in caring for patients who couldn't afford to pay. I was glad to help those who really needed it, and I didn't believe these clinic patients experienced any loss of dignity by accepting my gladly given services. But since the advent of Medicare and Medicaid, I'd almost forgotten that such a system once existed, and that it worked.

The plan I arrived at was simple. I'd set aside each Wednesday for patients who couldn't afford to pay. There would be no screening. I'd assume that those who said they couldn't afford to pay were telling the truth.

My office assistants weren't enthusiastic. They thought people would take advantage of me, but I persuaded them that we should give it a try. The following Sunday, this notice appeared in our local newspaper:

"I will see any patient, free of charge who cannot afford to pay for an eye examination, David W. White, M.D., F.A.C.S., Wednesdays by appointment, Telephone (804) 846-7317."

I couldn't help wondering how my colleagues would react. The first doctor I told about my plan was an orthopedic-surgeon friend in another town. He listened, then surprised me by saying flatly, "The medical society will never let you get away with it."

I didn't follow his reasoning.

"Why not? What can they possibly object to?"

"You know. They'll all be wanting to know what the angle is. By the way, what is the angle?"

I had to laugh. "There isn't any angle. I'm giving my services away, one day a week, no strings attached. I just got tired of constantly reacting to government edicts. So I decided to set up my own voluntary program, the same as we used to do before government got involved in medicine. If there are poor people who can't afford eye care and who can't qualify for the government programs, I'll take care of them, free of charge. That's my only angle."

I could sense his mental wheels turning. He'd all but forgotten the old days, too. It was a sign of how much our thinking had been changed by years of government reimbursement. Had we really become that much more interested in cash flow than in our age-old responsibility for taking care of the needy? It was a humbling revelation for me.

Anyway, I've heard no complaints from other physicians since my plan went into effect. Almost immediately I was booked for 15 to 20 patients every Wednesday, with appointments backed up for about a month—a situation that still prevails. If someone wanders in who qualifies for Medicare or Medicaid, of course we accept the assignment. But the word is now out that people don't need government insurance to be examined at my office.

It didn't take long to determine that 99 percent of my Wednesday patients were completely deserving. Many expressed their gratitude profusely, some with tears in their eyes. Most people seemed astonished that a doctor would give his services free—clear evidence that the public view of doctors as white knights has been badly corroded by dependence on government programs.

There have been one or two patients who took me for a ride. I knew it at the time, but I figured they must have had bigger problems than mine if they had to fake poverty. Because such freeloaders have been so few and far between, I've let them slide.

My Wednesday patients are from every age-group and every imaginable circumstance—those who aren't covered by Medicare or Medicaid, those who don't qualify for other public assistance, young single mothers supporting children on a shoestring, capable young men who can't find jobs, people not yet old enough for old-age assistance who have just enough money to shelter and feed themselves. I see black and white, young and old, the unemployed and the working poor, the disabled and the able-bodied. I'd rather look upon my services to these people as a "tithe" of my professional skill than slog through stacks of paperwork for drastically reduced fees. This may not be good business, but it's certainly good for my soul.

After a few months, I found I was gaining a better perspective on my own financial comfort. My pleasant house, my two automobiles, my children's college educations began to seem like tremendous wealth next to the situations of my courageous Wednesday people, who counted it a major victory if they could both pay their utility bills and eat.

Then I began thinking about those who needed glasses but had no way of paying for them. I'd been handing out plenty of optical prescriptions, yet they were useless if the patients couldn't afford to have them made up.

So I decided to enlist some support. I wrote letters to all the opticians in town—about 10 of them—asking if they would fill prescriptions for my needy patients free of charge. Six of them agreed.

They worked out a weekly rotation to fill prescriptions for my Wednesday patients. One of the six was recently forced to cut back on his participation because he couldn't afford to continue the free service. He now offers to provide frames and lenses at cost.

With patients who need follow-up care I have various choices. Suppose I see a patient for a routine exam and I diagnose glaucoma. I'll then refer that person to our city clinic, where I and eight other ophthalmologists rotate our services for nominal pay. I may not see that particular patient in the clinic again, but he'll be taken care of by one of us.

If it's necessary for me to perform surgery, I follow through just as I do with my paying patients. Thus far I have performed only one operation on a Wednesday patient. If referral is needed, I generally send my patients to the University of Virginia Hospital, about 50 miles away in Charlottesville.

After several months of my "Poor People Wednesdays," I've arrived at some conclusions. First, I'm rediscovering the satisfaction of offering my best to someone who needs it with no thought of the price tag. Second, my practice is growing and my income has gone up, despite my "tithing." As a result of the bread I've cast on the waters, my Wednesday patients have referred to me some of their better-off friends and relatives. And other new paying patients have sought me out because they respect what I'm doing.

I like to think that perhaps I've changed the climiate in our town in some small way, giving people something to be glad about. And this morning I received my greatest gift from the whole undertaking. It was a delightful letter, penciled on notebook paper in neat, third-grade letters. "Thank-yous" bordered the top and bottom of the page. The letter read:

"Thanks!!! Dear Doctor White: I really enjoy my glasses they make a big difference on my eyes. They work the most on bright things and things far away. Thank you."

It was signed, "Love, April D."

If every doctor in America would give one-fifth of his time to those who need him but can't afford to pay, would we even need Medicare and Medicaid? Think about it.

## WHAT IS RIGHT ABOUT TAX AMNESTY

### HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. BIAGGI. Mr. Speaker, as our Nation's astronomical deficit continues to reign as the No. 1 domestic crisis facing our country today, the importance and necessity of a National Tax Amnesty Program grows increasingly apparent. Tax amnesty is a powerful, but painless, tool in our deficit reduction effort. It is a means to raise desperately needed revenues, without raising anyone's taxes and without slashing key human and social service programs.

As author of H.R. 2031, the first bill introduced in the House to provide for a one-time national tax amnesty, I wish to share with my colleagues an article that recently appeared in the Governor's Weekly Bulletin, a publication of the National Governors Association. It discusses the importance of a National Tax Amnesty Program and outlines many of the hugely successful State amnesty programs that have been undertaken in recent years.

My bill, H.R. 2031, closely resembles these successful State amnesty programs. It calls for a one-time National Tax Amnesty Program, with all generated revenues to be applied to reducing our deficit. It calls for a full repayment of all unpaid taxes, as well as 50 percent of the interest penalty, in exchange for immunity from all criminal and civil penalties. The "tax gap"—the amount the U.S. Treasury is owed as compared to what they will actually receive—is almost $90 billion. It has tripled since 1973. Obviously, the time has come for a National Tax Amnesty Program.

The reason is simple. Michigan Gov. James Blanchard, who was in Washington just last month to urge the Federal Government to consider a National Tax Amnesty Program, said it best. He stated, "If a tax amnesty pro-

gram were run by the Federal Government, my sense is we could produce million, billions, tens of billions in revenues and dedicate it to deficit reduction."

The article follows:

TAX AMNESTY CAN HIKE STATE REVENUES—IF IT'S DONE RIGHT

Granting amnesty to taxpayers who owe back taxes can bring in big revenues for the states, proponents say. But to make tax amnesty programs work, states have to create a high level of public awareness, increase enforcement of tax compliance, and make sure there are dedicated employees to carry out the program.

Michigan Gov. James Blanchard was in Washington, D.C., this week to urge other governors and the federal government to consider tax amnesty programs. "Wherever amnesty has been pursued in a comprehensive way, it has been successful," he said July 14 in the Hall of the States. If a tax amnesty program were run by the federal government, he said, "my sense is we could produce millions, billions, tens of billions in revenues and dedicate it to deficit reduction."

$900 MILLION TOTAL

Nineteen states have conducted tax amnesty programs, which have brought in a total of more than $900 million. Illinois was the first. Its first program ran December 1981 to January 1982, and a second ran in October to November 1984. Michigan was the most recent state, running its program this year between May 12 and June 30. Iowa, Mississippi, Rhode Island and West Virginia will run tax amnesty programs before the end of this year.

Tax amnesty does not mean letting people off the hook. In general, it means providing a "window" in which people can pay back taxes, plus interest, without other penalties or prosecution.

But as a rule, tax amnesty should be offered only once in a state. Otherwise, delinquent taxpayers are encouraged to wait for the next amnesty period, and voluntary compliance is reduced.

Michigan's program brought in nearly $102 million, more than double the state's $50 million goal. Almost 73,500 taxpayers took advantage of the program, which was designed to benefit all taxpayers through a cut in the state income tax.

Gov. Blanchard said 80 percent of Michigan's amnesty participants are new taxpayers. But now they're on the tax rolls, and will produce revenues and broaden Michigan's tax base from now on, the governor said.

Critics of tax amnesty programs say they erode the base of voluntary compliance. But Massachusetts Revenue Commissioner Ira Jackson, who also spoke July 14 in Washington, said that Massachusetts has received $1 billion in tax revenues from voluntary compliance since the state ran its amnesty program from October 1983 to January 1984.

The $900 million raised through tax amnesty programs so far represents a 5 percent increase in revenues. If the federal government undertook a tax amnesty program, Jackson said, a 5 percent increase would represent $20 billion to $25 billion in revenues annually. Those revenues would recur, Jackson said, because many of the taxpayers taking advantage of amnesty programs would be new ones not previously on the tax rolls.

Here are summaries of how other states have handled tax amnesty programs, or are planning to run them:

Illinois: The first time Illinois tried tax amnesty, there was little publicity, and the program brought in only $80,000. The second time, from October to November 1984, the state spent $400,000 on promotion, increased penalties for tax violations, and increased the number of investigators from about 40 to about 80. That time, the program brought in more than $160 million.

Massachusetts: More than $86 million from 56,000 taxpayers was brought in through Massachusetts tax amnesty program. The program was "extremely popular" in the state, said Revenue Commissioner Jackson. Even more important than "the one-time collection of delinquent taxes is the ongoing annual revenue benefit from changing the bad tax habits of tens of thousands of citizens," said a December 1984 revenue department report.

Michigan: Michigan's advertising campaign, borrowed in part from California, provided a toll-free phone number (1-800-1.O.-TAXES) and urged delinquent taxpayers to "get to us before we get to you." Apparently, they got the message. Along with a projected end-of-year surplus, $102 million in amnesty program revenues will allow Michigan to make a 4.6 percent personal income tax cut retroactive to January 1. The largest payment was $6.1 million, from a Michigan business; the smallest was one cent, from an individual. A $2.7 million payment from an individual set a record among states that have held amnesty programs—and "we didn't even know he was alive," said Gov. Blanchard. State Treasurer Robert Bowman said the treasury department's 270 existing employees "worked a little bit harder and a little bit longer" on the tax amnesty program, assisted by 40 temporary employees. Michigan had two firsts in its program: setting up regional offices outside U.S. borders, in Canada, and allowing taxpayers to use credit cards to pay their back taxes. Michigan will provide technical advice and assistance to other states interested in running a tax amnesty program.

Mississippi: The state legislature authorized a tax amnesty program, primarily as a cost-saving measure, to run from September through November 1986. But no additional appropriations were made for the program, so it will use existing state resources. Mississippi will try to obtain publicity primarily through the media, and it will also "piggyback" tax amnesty fliers with other tax mailings. The program will not allow known tax delinquents to take part, nor will it apply to any taxes due after January 1, 1986. Before July 1, 1986, Mississippi had no criminal penalties for failing to file a tax return. Because of that, the tax amnesty program will also exempt interest payments on back taxes, to make it more attractive to tax delinquents.

New York: Some $363 million was raised by New York's amnesty program, which ran from November 1985 to January 1986. New York set up its amnesty office as a separte operation, because they anticipated a big response that would affect normal tax office operations. That "probably added tens of millions of dollars to our final figures," said Karl Felsen, the state's public information director. The state spent about $800,000 publicizing the program.

West Virginia: Tax Commissioner Michael Caryl anticipates that an intensive advertising program will tell people how to take part in the state's amnesty program, and that a public relations campaign will probably emphasize the state's enhanced tax enforcement efforts. About $100,000 will be spent on promotion. West Virginia's effort differs from those of some other states, because it will allow known tax delinquents to take advantage of amnesty, unless a criminal proceeding is in progress. "If you include your known accounts, you're obviously going to have a bigger pool to draw from," said Caryl.

National Governors' Association policy notes that states "have experimented with aggressive, creative, and effective tax enforcement, and their programs have resulted in substantial revenue increases." Approaches enacted by the states include tax amnesty, making tax evasion a felony, and authorizing license revocation. According to its policy, NGA urges the administration and Congress "to strengthen federal tax enforcement tools, powers, or other resources for the Internal Revenue Service as integral to any tax reform proposal and integral to initiatives designed to tackle the deficit crisis. We estimate that as much as $20 billion annually could be saved by the Treasury through an intensive effort to tighten federal enforcement."

| | Time of program | Total collected | Number of returns | All taxpayers eligible | Legislatively authorized | Funds appropriated |
|---|---|---|---|---|---|---|
| State: | | | | | | |
| Alabama | 1/20/84–4/1/84 | $3.15 million | 10,150 | Yes | No | Yes. |
| Arizona | 11/20/82–1/20/83 | $6.0 million | 10,600 | No | No | Yes. |
| California | 12/10/84–3/15/85 | $146.5 million | 164,000 | Yes | Yes | Yes. |
| Colorado | 9/16/85–11/15/85 | $6 million | 7,000 | No | Yes | Yes. |
| Idaho | 5/20/83–9/1/83 | $300,000 | 900 | No | No | No. |
| Illinois | 12/28/81–1/8/82 | $80,000 | 400 | No | No | No. |
| | 10/1/84–11/30/84 | $160 million | 22,456 | Yes | Yes | Yes. |
| Kansas | 7/1/84–9/30/84 | $555,468 | 750 | No | Yes | Yes. |
| Louisiana | 10/1/85–12/31/85 | $1.2 million | 411 | No | Yes | Yes. |
| Massachusetts | 10/17/83–1/17/84 | $80.5 million | 52,000 | Yes | Yes | Yes. |
| Michigan | 5/12/86–6/30/86 | $101.6 million | 73,483 | Yes | Yes | Yes. |
| Minnesota | 8/1/84–10/31/84 | $11.9 million | 10,400 | Yes | Yes | No. |
| Missouri | 9/1/83–10/31/83 | $853,000 | 241 | No | No | No. |
| New Mexico | 8/15/85–11/13/85 | $14 million | 48,000 | No | Yes | Yes. |
| New York | 11/1/85–1/31/86 | $363 million | 148,000 | Yes | Yes | Yes. |
| North Dakota | 9/1/83–11/30/83 | $150,000 | 630 | No | No | No. |
| Oklahoma | 7/1/84–12/31/84 | $13.9 million | 56,500 | Yes | Yes | Yes. |

| | Time of program | Total collected | Number of returns | All taxpayers eligible | Legislatively authorized | Funds appropriated |
|---|---|---|---|---|---|---|
| South Carolina | 9/1/85–11/30/85 | $8.9 million | 7,600 | Yes | Yes | Yes. |
| Texas | 2/1/84–2/29/84 | $500,000 | 85 | No | No | No. |
| Wisconsin | 9/15/85–11/22/85 | $20 million | 30,000 | Yes | Yes | Yes. |

## SPACE STATION STATEMENT

## HON. MICHAEL A. ANDREWS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. ANDREWS. Mr. Speaker, for over a month now a debate has been raging over the future of the Space Station Program. Questions have arisen over the station's design. Its method of construction, and how best to use the institutional strengths of NASA to assure the success of this critical next step in space development. Many factors have contributed to the highly charged atmosphere of these discussions: NASA continues to reel from the *Challenger* disaster and its repercussions; Congress is moving to better understand what the Nation buys for its space investment; and internal rivalries within NASA intensifying as many seek to preserve what they can in a shaky space program.

What can be done to bring order out of this confusion? The leaders of NASA, the Congress, and the administration each have a role in crafting our Nation's future in space, and each must contribute to bringing an end to this chaos and setting our space policy back on track.

To understand how we came to this point, I want to review the steps that brought us to this impasse.

In the wake of the *Challenger* disaster, NASA asked Gen. Sam Phillips, former manager of the Apollo program, to review the management of the agency. On June 26 he presented his report on the Space Station Program to Dr. James C. Fletcher, the Administrator of NASA. On June 30, Dr. Fletcher announced that he had accepted all of General Phillips' recommendations on reorganizing the Space Station Program's management and would immediately implement them. Unfortunately, NASA made no effort to consult with the House Subcommittee on Space Science and Applications, which approves NASA's budget and policies, prior to the announcement.

When Congressmen, including myself, began to inquire about the nature of the action, we were told that it was of only minor consequence. In addition, our staffs had much difficulty in getting the documents which explained the decision in detail. Once we obtained the necessary information, a picture developed of a major shift in policy and work allocation on the station program. It appeared there could be a significant impact on the Johnson Space Center in Houston, which has been the lead center for station development since 1985; so, I asked the leadership of Johnson to brief me on the potential impact of the proposal.

On July 12, I received a full briefing from Johnson officials. The effect of the reorganization would be twofold. First, the overall management for the station program would be moved from Johnson to Washington in order to centralize management, that was General Phillips' recommendation. Second, based upon recommendations from John Hodge, the Acting Associate Administrator for Space Station, the proposal would realign the duties of the four field center work packages that constituted the division of labor for station development. The key to this realignment was a switch of duties between Johnson and Marshall Space Flight Center at Huntsville, AL. Johnson officials estimated on the basis of NASA headquarters' data that this switch would transfer the bulk of work on station from Johnson to Marshall. Statistically, Johnson's percentage of responsibility for station work would drop from 43 to 29 percent while Marshall's percentage would rise from 31 to 44 percent.

Much controversy has swirled around this contention. Unfortunately, this dispute has clouded the heart of the work transfer question. The real concern I have is that the switch in work moves the responsibility for outfitting the manned systems of the station away from our traditional manned systems experts at Johnson and gives it to Marshall. And in turn, responsibility for the propulsion systems is to be moved away from the world's pre-eminent rocket experts at Marshall and given to Johnson. This made no sense when announced on June 30 and has never been properly explained by NASA in each of its opportunities to justify the switch since. To any rational observer it seems that NASA is playing away from its institutional strengths as it enters its most challenging effort since going to the Moon.

As my colleagues and I have presented our concerns and arguments over these substantive questions, NASA has responded only fitfully and contended that we were playing politics with the Space Station. Well, NASA has been immensely insensitive to the political environment they operate in.

When Dr. Fletcher was in Houston to discuss these changes on July 25, he told the people of that city that NASA is not a jobs program—this to the people of a State facing 2.5 percent unemployment.

Of equal importance, NASA snubbed the legitimate oversight responsibilities of the Congress in not consulting with the Space Subcommittee on this major policy shift. Only after weeks of controversy did NASA acknowledge its mistake. But why is this oversight role so important? The Rogers Commission report on the *Challenger* criticized NASA for poor communications. Moreover, the House Science and Technology Committee's review of the commission's report made it clear to us the desperate need for more effective understanding by the Congress of what NASA is doing. Without that understanding, the Congress cannot hope to properly fund and set policy for NASA to meet its long-range goals.

Some have said that this assertion of congressional oversight is interference and micromanagement and will cause delays in the program. I would respond that those people seem to have forgotten what happened on January 28 of this year. On that day a desire to avoid delay and a disdain for the legitimate concerns raised by others came together as our Nation's worst space disaster and claimed seven brave lives. Congress must, as the representative of the people, exercise its proper role as guide and funder of NASA. To resist that role is to resist reality.

In fact, today there are indications that we need a delay in the Space Station Program. The astronauts have raised serious concerns about the current design for the station, feeling that their doubts about the safety and soundness of the design were not being heard. In addition, my colleagues on the Space Subcommittee and I persist in our concerns over the wisdom of the work allocations. In a July 5 meeting with Dr. Fletcher, Chairman BILL NELSON of the subcommittee and I asked that he not implement the reorganization until the subcommittee had a chance to review it. We felt the proposed reorganization would have long-term implications for the role of the Johnson Space Center and the potential for millions in additional costs that NASA had not sufficiently taken into account.

Therefore, I feel it was a positive move by Dr. Fletcher to agree to reassess the decision and review the design of the station. He stated in a Space Subcommittee hearing on August 5, called at my request to review these questions. That he would return to the subcommittee between September 1 and October 1 with a new proposal for the reorganization of the work packages and a finalized version of the Space Station's design that incorporates the concerns raised.

We strongly encouraged NASA to take full account of the points we have raised about the switch between Johnson and Marshall and to finally do the cost analysis so necessary to make decisions of such magnitude.

My minor role in crafting space policy over the past years has taught me one very important lesson. We must have daring visions to succeed in space exploration and development. But space is a very unforgiving place, so we must be conservative in realizing those visions if we are to succeed with safety. John Kennedy called us to reach for the Moon, but in that endeavor we were willing to accept delays and to learn from our errors because human life is sacred. In stepping permanently into the void of space, we must step carefully and never lose sight of the precious lives that will be at stake. At its most fundamental, that is what this debate is about and why it has been so impassioned. It is my hope and faith that when we have finished NASA will be made whole again and the Space Station will be on course toward completion as our Nation's permanent and proudest achievement in space.

Thank you, Mr. Speaker.

## A SALUTE TO "BURGER FLIPPERS"

### HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. MICHEL. Mr. Speaker, every now and then we come across a magazine article that eloquently and memorably illuminates some important aspects of our lives. In a recent article in Newsweek, Vickie L. Sleiman, who happens to work for the House of Representatives Select Committee on Narcotics and Abuse and Control, has reminded us all of the link between the hard work of parents and relatives and a college student's ability to pursue his or her studies. Ms. Sleiman with her calculations of how many hamburgers have to be flipped and how many lube jobs have to be done in garages to pay for college tuitions, has done a really great job. As a father who has sent four of his children through college and as a son who has benefited from the hard work of his father and the rest of his family, I deeply appreciate Ms. Sleiman's tribute to those who work so others might learn.

At this point I wish to include in the RECORD, "A Salute to 'Burger Flippers'" by Vickie L. Sleiman, Newsweek, June 30, 1986.

A SALUTE TO "BURGER FLIPPERS"

(By Vickie L. Sleiman)

Last month I was awarded the honor of being escorted to the first row of seats at my university's graduation exercises. I listended to the guest speaker talk about our responsibility as citizens of the world, and I listened, too, as our valedictorian informed the class of '86 that it was better to be here than out "flipping burgers." The ceremony finally ended, I returned my rented cap, hood and gown; then, when I was back in my parent's house, I began to calculate the number of burgers that had been "flipped" by my family so that I could attain the title of "doctor of philosophy." After hours of working with means and medians, my calculator indicated the total was nearing the number illuminated beneath the Golden Arches.

For example, at $3.35 an hour, it took my mother almost 10 hours of flipping burgers to buy "Moral Development and Socialization" ($31.43, plus 6 percent sales tax), a textbook she purchased to help me study for my Ph.D, qualifying exams in education. Simply stated, Mom flipped 2,984 burgers working the grill in a bustling coffee shop to buy me this one book (5 burgers per minute × 10 hours = 3,000 burgers).

I then estimated that if she had paid for only three books a semester for the last seven years, at an average cost of $25 per book, she would have flipped over 94,030 burgers. However, by also counting the money she gave me to "put towards" my car insurance, school supplies, registration fees and dissertation expenses, I know she had to turn an additional 250,746 patties. Thus, my mother's total contribution during those seven years was 344,776 rare, medium and well burgers.

The larger these numbers grew, the better I understood the cause of the chronic bursitis in her right shoulder and elbow . . . hashslinging has its own rewards. As the hours passed, I became entranced by the magnitude of the numbers.

My fingers danced across my calculator as I computed how many burgers were flipped by Aunt Micky so she could present me with a graduation bouquet (2,100); by my godparents and Aunt Marlene so they could buy me the gold bracelet I promised to wear when I accepted my diploma (13,500).

GRADUATION CEREMONY

I had entered a state of mathematical frenzy. It "cost" my brother-in-law 900 burger flips for a tank of gas so he could drive from his job at a McDonald's in Los Angeles to my graduation ceremony in San Diego, and a total of 1,800 burgers for the graduation cards cousins, uncles and aunts had sent to me.

As graduation day turned into graduation night, I calculated the number of lube jobs and oil changes my dad, a mechanic, performed at his job at Sears so he could help pay for my lunch tickets at the university cafeteria. I added to that the number of buckets I filled with wings, legs and side breasts at Kentucky Fried Chicken, the number of dog kennels I scraped and the number of fish fillets I dunked in vats of oil at Mr. Fish and Chips—all to pay the personal and educational expenses that student loans, fellowships and scholarships did not cover.

The following morning I inserted new batteries into my calculator, paused for a moment and thanked God for the privilege of having so many burgers flippers in my family—an honor the valedictorian at my university did not have. For if she had, she would have expressed her graditude to each and evey one of them sitting in that stadium on graduation day; she would have thanked them for the moral and financial support that allowed so many of us to be included in the class of '86.

INSENSITIVE AND FLIPPANT

Now, as the self-proclaimed president of the Children of Burger Flippers of America, I say "thank you" to all the parents, brothers, sisters husbands and wives who stood over smoky grills and hot ovens. Through your labor we gained insight into the rigors of life on a minimum wage, we learned the value of a dollar and, given your support, we are now able to make more money in one year than you were able to make in five.

I hope other college students will become honorary members of my club. If they would take time and look up from their books, they might learn that their position of privilege is sustained, in part, by burger slingers—taxpayers who help support the nation's public-university system. Future valedictorians would then salute the contributions of the blue-collar employee instead of making insensitive and flippant remarks.

In the end, though, the flippers may have the last laugh. Theirs is the face of the future, according to some labor-market studies. If 1 out of every 3 meals consumed by Americans will be eaten away from home, as projected for the next 10 years, then flipping burgers may become a source of employment for those college graduates unable to secure a "professional" position.

But do not fret, dear students. As Ralph Waldo Emerson once wrote: "The differences between men in natural endowment are insignificant in comparison with their common wealth. Do you think the porter and the cook have no anecdotes, no experiences, no wonders for you? Everybody knows as much as the savant."

As the proud daughter of a flipper, I know how to say thank you. To everyone in my family who ever swung a spatula so that I could "succeed," your generosity made my graduation so much sweeter and so much more appreciated.

## A TRIBUTE TO AMERICA AND THE STATUE OF LIBERTY

### HON. BERNARD J. DWYER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. DWYER of New Jersey. Mr. Speaker, I would like to share with my colleagues the eloquent thoughts of one of my constituents from Edison, NJ, Mr. Louis Fuzak, Sr. Mr. Fuzak, the son of an immigrant couple, who was so inspired by the Liberty Weekend Celebrations that he has written two very moving and touching essays on America, the Statue of Liberty, and what being an American citizen means to him.

AMERICA

As I watched television this week I was very thrilled to be an American. I was born in the twenties to a hardworking immigrant couple, as were my buddies and friends with whom I grew up with in the streets. World War II broke and all of us joined the different branches of the service. It was time for our generation to stand up and keep the torch lit—it was passed down to us from the previous generation. As I listened to some of the comments made about the next generation I said "Thank God we have them to pass the torch on to!" If we all walk with God and keep His truth alive we will always be able to celebrate tributes to our Lady. In our generation there were all kinds of ethnic backgrounds and colors; it never bothered us. In all, I think we did a good job—as long as we never took our freedom for granted. It is not easy to come by. I know for I miss some of my friends who gave their lives for our country. For them I say "Keep the Peace." If you are forced to—you must fight to protect our country and our lady, the symbol of our freedom. Freedom never comes cheap. Every generation paid the price, heavily at times. So when your time comes do not be afraid. Stand up and be counted—but make sure that God is along side you.

God Bless America! The sun always brightens the way after the darkness.

The immigrants gave of themselves—sweat and many tears shed for their boys, who are buried on plots in the South Pacific and Europe. Their white crosses mark the landscape of the earth where they now rest in peace. They were sent to protect our safety and gave their lives for our freedom. The ultimate sacrifice that protects our liberty and freedom.—Louis Fuzak, Sr.

THE LADY

What a wonderful party! What stands out most in my mind:

The children—the future guardians of the Lady.

The young black boy who sang the National Anthem.

The young Vietnamese girl who recited what freedom and liberty and becoming an American meant to her and her family.

The young ones who took up collections of pennies, nickels and dimes.

The young boy who collected thousands of dollars.

Oh! Yes, we hear only of the bad that is done by some of the young people. But for a few bad you don't give up on all our youth. It's like making pie. If some of the apples are soiled or rotten, you clean them up, remove the bad ones, mix them up with the good and you come up with a real American apple pie.

The next generation will keep the torch of the Lady lit—just like all of the generations before. When the president pushed the button to unveil 'The Lady' what a beautiful sight! It was awesome—goose pimples took over my body—And as I watched the celebration on the Fourth it started to take on a personal meaning to me. When the president boarded the U.S.S. Iowa #61 it took me back to World War II, when I was assigned to this magnificant battlewagon. I will never forget when we sailed out of the harbor. We were given the order "All hands on deck—topside" to salute the Lady as we passed her. We all gave a salute. Most of us were young boys raised during the depression. As we passed by the thought in almost every ones mind was when and if we would return. Then we all got down to the business at hand 'let's go give the Japs hell'. Yessir, when I saw that battlewagon I thought I could see tears in the Lady's eyes, also a smile. She knows her children will take care of her as they always did. I knew that also. Because I suspect God was also smiling. That was why we had such a beautiful, sunning, smile day.

Thank you, God! For letting me be an American boy. What a party! I know with the kind of children, like the ones who participated in this birthday celebration, we will have many more. I feel that God has always sprinkled joy, happiness, religions of all kind, also trials and tribulations. If you look close the next time you pass by you will see that smile and perhaps the tears. God Bless America! Guard her closely and with your lives protect her at all cost. Immigrants—this is your day! Make the most of it—black, white, yellow, red—the next time it rains you will see colors over her head—forming a rainbow. Just take time and don't ever take her for granted. And listen! You can hear the next generation saying "Pass the torch—we will keep it lit".—Louis Fuzak, Sr.

## IRINA RATUSHINSKAYA: IMPRISONED SOVIET POET

### HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. HOYER. Mr. Speaker, 1 year ago today—on August 7, 1985—Soviet poet-prisoner, Irina Ratushinskaya, was sentenced to a week of punishment isolation. While she was transported in a truck to her place of punishment, she suffered a concussion. She was later beaten by wardens and dragged to her cell. After she tried to sue the wardens, Ratushinskaya was given an additional 5 months in an isolation cell.

Tragically, being in punishment isolation is typical of Irina's conditions of imprisonment. She is penalized for defending the rights of prisoners. Despite promises of release if she will publically denounce her views, Irina holds fast.

She even manages to write and smuggle poetry out of camp. Here is a small sample of her highly acclaimed work. It is a poem Irina wrote in camp in April 1983 about her husband, Igor Gerashchenko:

Lord, how is life for him? Keep a watchful eye,
Lest that cubby-hole apartment drive him to madness.
Make his pain a dark secret and lend to his face a light
Meant for two, so the world shall perceive adversity mastered.
With a lifted cup I salute the force of Your will
(See the ease of that gesture—my hands held high without trembling.)
But with Being's radiant armor, protect his soul
From the jeers of the rabble.
Unlike him in obscurity, I have a road so plain,
Polished smooth by the multitudes, memorizing each pebble.
In can manage this task—just watch me! But please keep him safe.
From the nooks of insane asylums with spider webbing.
Do not disposses him, depriving him of Your strength,
Do not let Your hand fall carelessly from his shoulder.
From eternity's alloy of spirit and truth
Let him fashion a chain and manacles for our sorrow.
When we stand in Your presence in the next life,
Asking nothing—except a companionship past all fractures,
Past the power of angelic trumpets or rending knives,
We will look at You, ready to give You our answers.

Why was she imprisoned? For writing and circulating poetry! And what was her punishment? In February 1983, Ratushinskaya was sentenced to 7 years labor camp plus 5 years exile for "anti-Soviet agitation and propaganda."

What lies ahead for this talented and brave poet? Irina Ratushinskaya, 32 years old, has been elected a member of the international PEN Club. She has been acclaimed by the noted Russian emigre poet, Joseph Brodsky, as the greatest poet of her generation in the Soviet Union.

And yet, inside the U.S.S.R., Irina faces many long years of hunger, beatings, and punishment isolation in the Soviet gulag. International publicity has, however, had an effect in Ratushinskaya's case: For the first time in 3 years a relative recently was allowed to see her.

The Soviet Government must finally see that the imprisonment of people such as Irina Ratushinskaya is not only a flagrant violation of the Helsinki Final Act, it is a national disgrace. We in the West will continue to press for the release of Irina Ratushinskaya and all other Soviet prisoners of conscience.

## VILLA MARIA COLLEGE OF BUFFALO—25 YEARS OF COMMUNITY SERVICE

### HON. HENRY J. NOWAK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. NOWAK. Mr. Speaker, I would like to take this opportunity to bring to the attention of my colleagues the achievements of one of the fine educational institutions in my district, Villa Maria College of Buffalo, which celebrates its 25th anniversary this year.

The Villa Maria College of Buffalo was founded in 1961 by the Felician Sisters under the leadership of Sister Mary Annette Guzowska, first president. It has been chartered by the New York State Board of Regents since then and accredited by the Middle States Association of College and Secondary Schools since 1972.

Since its inception, Villa Maria College has served the community through participation in civic, educational, and business committees and organizations, through establishment of continuing education classes, and by hosting community functions on the college campus. It has provided quality education to more than 5,000 students in the western New York area.

Villa Maria College's 2,464 graduates are well prepared for lifelong careers. The college provides technical training with a strong liberal arts base, and career oriented and personal counseling for all its students. All its programs incorporate cooperative education providing a linkage between the college and business and industry. Most importantly, Villa Maria College of Buffalo embraces that philosophy which recognizes the dignity of each person and provides for the holistic development of the individual.

Villa Maria College's excellent standards of service have brought it much deserved growth during its 25 year existence:

The student body has grown from 15 to 770.

The faculty has grown from 4 to 73.

The curriculum has grown from a single program of study to 14 degree and 7 certificate programs.

The quality of a community is, in large part, determined by the quality of the institutions that serve it. So, it is with sincere gratitude that I recognize the contribution that Villa Maria College of Buffalo has made to the western New York community for 25 years and wish it continued success as it begins its next quarter century.

## CONGRATULATIONS TO THE NEW POSTMASTER GENERAL, BOB TISCH

### HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. KEMP. Mr. Speaker, I want to congratulate my friend, Bob Tisch, on his appointment as Postmaster General. Mr. Tisch, a success-

ful businessman and philanthropist, was president and chief operating officer of Loews Corp., before accepting this new position.

The U.S. Postal Service Board of Governors made an outstanding decision when they selected Bob Tisch as Postmaster General. He brings with him the expertise and ability to operate this Nation's vast Postal Service in a positive and efficient manner. I am proud to be a friend of Bob's and pleased that this dedicated American and New Yorker will serve our Nation as the new Postmaster General.

I urge my colleagues to read the following articles by the Washington Post on Bob's appointment.

[From the Washington Post, Aug. 6, 1986]

LOEWS EXECUTIVE SLATED TO HEAD POSTAL SERVICE

(By Jonathan Karp)

New York business executive Preston Robert Tisch will be named postmaster general, congressional sources said yesterday.

A news conference to announce the appointment is scheduled for today.

Tisch, 60, is president and chief operating officer of Loews Corp., a family-run business with 25,000 employes, annual revenue of $5.6 billion, and interests in hotels, tobacco, insurance, theaters and timing devices. His brother, Laurence A. Tisch, is chairman of the corporation.

The U.S. Postal Service Board of Governors apparently settled on Tisch in a closed meeting yesterday morning, ending a seven-month search. The present postmaster general, Albert V. Casey, is resigning Aug. 16 to teach business administration at Southern Methodist University in Texas.

Tisch, who is staying at the Loews, L'Enfant Plaza Hotel across the street from postal headquarters, did not return repeated telephone calls yesterday. John R. McKean, chairman of the Board of Governors, could not be reached for comment.

However, Wilma Stein Tisch, who is married to Laurence Tisch, confirmed that her brother-in-law has accepted the job. She said he accepted it out of a "desire to perform public service in an area where he has great expertise and in a country that's been very good to us."

Tisch began his career in the early 1950s when he joined his brother Laurence in the hotel business, which started with a $375,000 investment in a New Jersey resort called Laurel-in-the-Pines. Together, they built a financial empire estimated by Forbes magazine to be worth $1.7 billion. The Tisch family owns 29 percent of Loews Corp.

That empire includes Loews Theaters, which the brothers bought from MGM; Lorillard Corp., one of the nation's largest tobacco manufacturers; CNA Financial Corp., a property, casualty and life insurance business, and Bulova Watches.

When he moves to postal headquarters here, Tisch will run an operation that earns $27 billion a year in revenues, employs 740,000 workers and delivers more than 140 billion pieces of mail a year.

A graduate of the University of Michigan with a degree in economics, Tisch is married and has three children.

Tisch will be the third postmaster general in three years, and the 67th successor to the nation's first postmaster general, Benjamin Franklin.

[From the Washington Post, Aug. 7, 1986]

LOEWS HEAD TISCH NAMED POSTAL CHIEF—BOARD OF GOVERNORS' LONG SEARCH ENDS

(By Jonathan Karp)

Loews Corp. President Preston Robert Tisch was named postmaster general yesterday, ending a seven-month search and a prolonged internal debate by the Postal Service Board of Governors over who should lead the $30 billion-a-year corporation.

"Bob Tisch is a careful, highly skilled manager and corporate leader who can strengthen the Postal Service," board Chairman John R. McKean said in announcing the appointment.

The board settled on Tisch, a Democrat from New York, Tuesday morning. Tisch 60, and his brother Laurence began building what would become a $6.7 billion-a-year conglomerate by buying a New Jersey hotel in 1946.

Since then, the brothers have amassed assets of more than $16 billion, including resort hotels and motor lodges in the United States and abroad; Loews Theaters; Lorillard Corp., a major tobacco manufacturer; CNA Financial Corp., a property, casualty and life insurer; the Bulova watch company, and BSIC, a defense contractor. Loews is also the largest single shareholder of CBS Inc., with 22 percent of CBS stock, and Laurence Tisch sits on the company's board.

Bob Tisch said in response to a reporter's question that he heard about the postmaster job through New York University president and former U.S. representative John Brademas (D-Ind.), who was approached for the post by the board's recruiter. Brademas didn't want the job, said Tisch, who contacted retiring Postmaster General Albert V. Casey to apply.

McKean said there was "no question" Tisch was the "outstanding" outside candidate.

"He really impressed me," board member George W. Camp said in an interview. In the end, Camp said, the board struggled over whether to choose an insider or Tisch. "It was a real long, drawn-out discussion," he said.

"It was no easy choice," board member Ruth O. Peters said in an interview about the protracted selection process. "It was a knock-down, drag-out. And that's the way you come up with a postmaster general."

Tisch will assume command of the Postal Service during one of the rockiest periods in its history. Following the guilty plea in May of board Vice Chairman Peter E. Voss to charges of embezzlement and receiving kickbacks, the service is under investigation by the Postal Inspection Service in conjunction with the Justice Department and the General Accounting Office.

At yesterday's news conference, Tisch showed litle knowledge of postal issues. "I haven't had a chance to study," he said, and later joked that "I'm relatively new in the job."

When asked about delivery problems in New York City, Tisch said he didn't realize the area was a problem. "I know my mail is delivered on time," he said, "and I assume everybody else's is also."

Tisch, whose family's fortune was estimated by Forbes to be worth $1.6 billion, is widely credited with having coined the term "power breakfast." He will earn $86,200 a year as postmaster general. Tisch said he will resign from Loews Corp. by Aug. 15—the day he begins serving as postmaster general.

## EXTRA-LONG STAPLE COTTON

### HON. JERRY HUCKABY

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. HUCKABY. Mr. Speaker, the legislation I am introducing today would relieve the producers of extra-long staple cotton from the requirements of cross compliance for the 1987 and 1988 crops. It is intended to preserve and enhance a viable and vibrant export market for extra-long staple cotton.

The ELS cotton situation is unique in contemporary U.S. agriculture. Domestic consumption is up and exports have increased markedly in each of the past 3 years. Fueled by competitive prices and a producer-financed development program, exports of ELS cotton increased from 12,500 bales in 1982 to 85,000 bales in 1984, and export commitments for the 1985 marketing year are estimated to exceed 100,000 bales.

For the 1986 marketing year, exports are expected to increase even more, so the trend is continuing.

One of the primary factors in this successful export effort has been the significant increase in the production and availability of high quality ELS cotton in the United States. Prior to 1983, foreign mills were reluctant to buy U.S. ELS cotton because of limited supplies. U.S. production averaged only 87,000 bales per year in the 10 years preceding 1983 and after domestic offtake—45,000–55,000 bales, supplies available for export were severely limited. The increases in production in 1984, 1985, and 1986 gave credibility to U.S. producers' commitment to be reliable suppliers.

On May 30, 1986, the Secretary announced his determination that limited cross compliance would be in effect for the 1987 crops of wheat, feed grains, upland cotton, and rice.

As proposed by the Secretary, limited cross compliance would require that, as a condition of eligibility for loans, purchases or payments for wheat, feed grains, upland cotton, or rice crops the acreage planted for harvest on a farm in other commodities, including extra-long staple cotton, may not exceed the crop acreage base of such commodities.

If implemented as proposed by the Secretary, limited cross compliance would have a disastrous impact on our domestic extra-long staple cotton industry by drastically reducing production in the face of rapidly expanding domestic and export demand. A very successful, producer-financed, export development program would be virtually destroyed.

Mr. Speaker, the typical ELS cotton producer is primarily an upland cotton producer with a much larger established upland cotton acreage base. Economics will dictate his participation in the Upland Cotton Price Support Program. It is estimated that if cross compliance is implemented, at least 95 percent of ELS growers would be participating in the Upland Cotton Program and would be prohibited from planting in excess of their ELS base acres. The result would be a significant reduction in the production of ELS cotton and a corresponding inability to meet foreign demand

which would seriously damage our credibility as reliable suppliers.

The 1985 national base acreage for ELS cotton was 65,872 acres; however, producers responding to expanding export demand planted 83,000 acres of which only 31,216 acres or 35.4 percent were enrolled in the Price Support Program. The 1986 national base acreage for ELS cotton is 77,686 acres. However, USDA has reported that 98,000 acres have been planted to ELS. Of the total planted acres, only 34,477, or 34 percent, have been planted within the program.

Clearly, Mr. Speaker, the producers of ELS cotton have responded to the increased foreign demand for their product. A demand created to a large extent by their own concerted efforts to create and expand foreign markets for their product.

Mr. Speaker, I am convinced that the producers of ELS cotton would be unintended victims of the Secretary's decision to implement across-the-board, limited cross compliance provisions authorized in the 1985 farm law. I do not believe the administration or the Congress intended this result. I am certain that I did not.

## EXAMPLES OF COURAGE

### HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. LEHMAN of Florida. Mr. Speaker, in 1980 our Washington Congressional Office was most fortunate to have as a summer intern, Ms. Marjorie Deutsch. Marjorie was a graduate student of the University of York in Britain, and had a degree in history from Yale University.

An exceptional young lady, she left our office to work for the American Council on Education.

Then misfortune. There was a reoccurrence of a brain tumor that for several years had apparently been completely cured. This meant more surgery that, because of the location of the malignancy, left Marjorie physically handicapped—but in no way mentally or spiritually impaired.

Though mostly bound to a wheelchair, Marjorie has not stopped her good work. This year she was awarded the "exemplary volunteer" by the Dade County School Volunteer Program. The presentation was in recognition of Marjorie's outstanding service to the students of Dade County schools.

Nearly every school day, Marjorie is at Kenwood neighborhood elementary school as a teacher's aide and, even more importantly, setting an example in courage and character for the young children with whom she works.

We are privileged to have had Marjorie as an intern. If and when she is physically able, we would like to have her back.

## DEPENDENCE ON FOREIGN REINSURANCE QUESTIONED

### HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. FLORIO. Mr. Speaker, in my subcommittee's 9-day series of hearings on the insurance crisis, one of the most troubling themes has been the dependence of this country of foreign reinsurers. Time and again when we have encountered situations where insurance is unavailable, we have been told that one immediate cause may be the withdrawal from the market of foreign reinsurers. I am here inserting in the RECORD an article from the Journal of Commerce reporting on remarks by the Georgia insurance commissioner deploring this situation. Members may be interested to know that the subcommittee has received proposals from business and consumer groups regarding Federal action to facilitate increased availability of reinsurance.

[From the Journal of Commerce, July 17, 1986]

INSURERS URGED TO SEVER TIES WITH LLOYD'S

ATLANTA.—America's liability insurance industry should declare independence from Lloyd's of London instead of spending millions to campaign for tort reform, the Georgia insurance commissioner urged.

"It does not make sense to me that a nation as strong as ours should be depending on foreigners at Lloyd's of London for something as vital as reinsurance." Commissioner Warren Evans told the Georgia Association of Property and Casualty Companies.

Mr. Evans said that "right now there are people in Washington and the rest of the country who can't quite understand why the American free enterprise system must depend on foreigners for something as vital as insurance.

"For the industry to just throw up its hands and holler 'tort reform' instead of improving the system from within will pave the road for a full scale federal regulatory system," he said.

American insurance companies have been stressing throughout the crisis that they must charge higher premium rates and restrict certain liability coverages because Lloyd's brokers won't back them with reinsurance for the risks.

Mr. Evans said the U.S. industry "needs to give immediate attention to the need for expanded reinsurance facilities" on these shores.

He compared the need for reinsurance for underwriters to the banking industry's need for central banks.

"But I hope it would be created by private industry, not Uncle Sam," he said.

Instead of "a monolithic system like the Federal Reserve for banks," he envisioned a reinsurance market made up of "a dozen or so" private companies.

Mr. Evans concluded that "the insurance crisis may be a blessing in disguise. We cannot continue to let our insurance industry depend on foreign support."

## NO MINOR DEVALUATION

### HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. FRENZEL. Mr. Speaker, today's Journal of Commerce carried the following editorial on exchange rates.

The Journal, agreeing with the analyses and conclusions of Wharton Econometrics, believes that the decline in the dollar will cause a "substantial correction" in U.S. trade accounts later this year.

I believe it, too.

The editorial follows:

[From the Journal of Commerce, Aug. 7, 1986]

NO MINOR DEVALUATION

As the Nation waits for the trade deficit to begin to shrink, something it so far has stubbornly refused to do, it has become fashionable to pooh-pooh the decline in the dollar. Admittedly, the dollar has dropped substantially against the yen and the deutsche mark, but—so the argument goes—it has fallen little, or actually risen, against the currencies of countries with whom we are doing an increasing volume of business, Taiwan, South Korea, Hong Kong, Indonesia and Singapore. As a result, overall on a trade-weighted basis it has fallen very little.

Not so, says Wharton Econometrics. It's true, the economic consulting service says, that these newly emerging industrial countries, plus Canada, have experienced little change in the value of their currencies against the dollar. But Japan alone accounts for 20% of U.S. imports and Europe another 19%. And the yen has suffered a 40.4% rise in value, the European currencies rises of 22.4% to 41%. Overall, thus, merchandise imports have had to endure a 20% effective currency appreciation abroad. The table shows how the percentage of trade shares, on a c.i.f. basis, has shifted between 1973 and 1985. This is compared with the change in currency values between the end of February last year and the present.

Merchandise Import Trade Shares

[CIF Basis (Percent)]

| Country | 1985 | 1973 | Change in Currency [1] (2/28/85–pres.) |
|---|---|---|---|
| Canada | 19.3 | 25.5 | 0 |
| Europe | 18.8 | 22.4 | |
| U.K. | 4.3 | 5.3 | −27.4 |
| Germany | 5.8 | 7.6 | −37.2 |
| Italy | 2.9 | 2.9 | −29.3 |
| France | 2.8 | 2.4 | −32.8 |
| Bel.Lux | 1.0 | 1.9 | −34.5 |
| Netherlands | 1.2 | 1.3 | −36.6 |
| Sweden | 1.2 | 1.1 | −22.4 |
| Switzerland | 1.0 | 1.1 | −41.0 |
| Japan | 20.0 | 14.1 | −40.4 |
| Asia NICs: | | | |
| Taiwan | 5.0 | 2.6 | −2.8 |
| S. Korea | 3.0 | 1.4 | 5.1 |
| Hong Kong | 2.5 | 2.2 | 0.1 |
| Indonesia | 1.4 | 0.7 | 3.6 |
| Singapore | 1.2 | 0.7 | −2.3 |
| Australia | 0.8 | 1.6 | 18.8 |
| Average Effective | | | −19.7 |

[1] Percent change in local currency per dollar.

"It is this fact," Wharton Econometrics says, "that causes us to continue to expect a substantial correction of the U.S. trade accounts, starting later this year. Japanese and European auto and heavy machinery prices are already starting to reflect these

currency shifts, and European food and wine and household furnishings prices will soon follow suit. Before long these price impacts will start to dissuade imports purchases and boost domestic sales."

## A TRIBUTE TO FORMER GOV. RALPH M. PAIEWONSKY: A GREAT VIRGIN ISLANDER

### HON. RON de LUGO

OF THE VIRGIN ISLANDS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. DE LUGO. Mr. Speaker, 2 months ago I had the privilege to attend a ceremony at New York's Pierre Hotel honoring Mr. Ralph M. Paiewonsky on the 25th anniversary of his appointment as Governor of the U.S. Virgin Islands. Governor Paiewonsky had and still maintains a deep commitment to the betterment and future of our community and its people.

Anyone who has visited my district will know that it is a melting pot of nationalities, races, and religion. Although the diversity of backgrounds exist, we all share one thing in common, we are all "Virgin Islanders." Ralph Paiewonsky defined a Virgin Islander most eloquently when, in 1962 while serving as Governor, he composed the following statement which is still the best definition I know for a Virgin Islander. I would like to share it with my colleagues.

The statement follows:

[March 2, 1962]

WHAT IS A VIRGIN ISLANDER?

The Virgin Islander represents a way of life. He is a man of dignity. He is a member of all races and of different religious beliefs. He selects his friends and associates on the basis of human worth and value without regard to race, creed or color. He is the voter. He is the property owner; he is our civic and community leader; he is our legislator; he is our administrator; he is our teacher; he is the farmer; he is the laborer—he is in every walk of life. He is our physician, he is our law-enforcement officer; he is the planner; he is the newspaper, radio and TV owner; he is the businessman—he is of all hues and of all beliefs. He is the majority. He does not apologize to any man for being a Virgin Islander—he is proud of it—to him it is a title of distinction. He was either born in the Virgin Islands or he came here to live among us with the same ideals, principles and dedication to preserve this way of life.

New people who come here to live among us earn this title only after they have proved that they can appreciate, accept and participate in this society of men of goodwill. They are accepted by us, not because they are rich or poor, white or black, Jew or Gentile, Republican or Democrat, but because they are decent human beings. Those who remain outside this happy association are constantly dissatisfied with our Virgin Islands way of life.

We in the Virgin Islands welcome all to our shores and we are happy to offer them mutuality and equality, but more we cannot give. We are proud of our way of life, not only because we enjoy it, but because we know it is right. Official and other visitors have repeatedly commented on the ease and harmony in which we live. Many have pointed out that this demonstration represents the greatest asset the Virgin Islands can offer the United States.

We will preserve this Virgin Islands way of life, not only because it is important to us and to our children, but because it is important to the world.

RALPH M. PAIEWONSKY,
*Governor.*

## FSLIC RECAPITALIZATION NEEDED BEFORE ADJOURNMENT

### HON. STAN PARRIS

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. PARRIS. Mr. Speaker, the severe financial strains on the Federal Savings and Loan Insurance Corporation [FSLIC] require Congress to act on the Treasury's $25 billion recapitalization plan before we adjourn. FSLIC insures deposits in 3,200 thrift institutions with total assets of $1.1 trillion. If we don't move quickly on this legislation, which is pending before both bodies' banking committees, the cost will increase for depositors, taxpayers, and the thrift industry.

At the end of 1985, 450 thrifts, with assets of $113 billion, were insolvent. Of this group, 229 also had losses at a $2.7 billion annual rate on assets of $55 billion, according to a GAO study prepared at my request. FSLIC is powerless to close most of these money losers because its reserves are dangerously low.

Treasury Under Secretary George Gould has succinctly stated why recapitalizing FSLIC before Congress adjourns in a top priority for the administration. "FSLIC is a serious here-and-now problem. According to a Federal home loan bank board study, the cost of postponing the resolution of the FSLIC case load is between $700 million and $1 billion per year; so there's a real cost involved here," said Mr. Gould in a recent interview in a banking industry newsletter.

Mr. Charles Bowsher of the General Accounting Office agrees with the Treasury assessment. "I want to emphasize that it is very important to deal promptly with FSLIC's severe and growing problems. Both our program reviews of the savings and loan industry and our audits of FSLIC's financial statements confirm the need to provide additional support to FSLIC," stated the Comptroller General in a July 21 letter to members of this body's Banking Committee.

There are those who say to Congress, "do not put off till tomorrow what can be put off till day after tomorrow just as well." And there are those of us who say to Congress, "most people put off till tomorrow that which they should have done yesterday." Whether you agree with Mark Twain or Edgar W. Howe, Mr. Speaker, the FSLIC's problems aren't going to disappear; they are only going to mount.

We must act to shore up the FSLIC this year; time is running short.

## PERSONAL EXPLANATION

### HON. WILLIAM F. CLINGER, JR.

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. CLINGER. Mr. Speaker, on August 6, 1986, I was absent from the floor of the House of Representatives for the last vote of the day. Had I been present, I would have voted in the following fashion:

Rollcall No. 299: H.R. 3129: Surface transportation, the House agreed to the Bentley amendment that restricts the use of imported finished cement, "aye."

## LEGISLATION TO REQUIRE DISCLOSURE OF CERTAIN CHARITABLE FUNDRAISING ACTIVITIES

### HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. STARK. Mr. Speaker, for some time now I have been uncomfortable with the activities of the National Committee to Preserve Social Security and Medicare. I have read too many letters from senior citizens in my district who are terribly frightened by the literature they receive from this organization. It is not right to use scare tactics on these people to frighten money out of them.

NCPSSM claims to be informative and helpful. Yet the newsletters they send to members distort the facts and ignite a fear in some that is anything but helpful. My colleagues are familiar with the text of these publications. Phrases such as "your immediate action is needed to stop midnight raid * * * I need your emergency contribution * * * threat to Social Security never so great * * * please rush your emergency contributions * * * Social Security system could collapse * * * send at least $10 today" are repeated throughout letters that a senior citizen member of NCPSSM receives. These are exaggerated statements and should not be treated as educational facts.

To be sure, the administration's highhanded manner of borrowing from the Social Security Trust Fund last October should not be ignored or condoned. In fact, afterward Congress took action to prevent this from happening again. Yet to call it a midnight raid is an exaggeration surely intended to scare senior citizens who may be unfamiliar with the workings of their Government. Why does Mr. James Roosevelt, chairman of NCPSSM employ such tactics?

It appears to be his sales pitch. In each of NCPSSM's letters that I've seen a contribution of at least $10 or $15 is requested of its members not once, but three to five times a letter. The very people that NCPSSM acknowledges are in critical need of every penny of their Social Security check are hit up for at least $10 to $15. NCPSSM claims this money is for stepping up our Washington lobbying activities, presenting our testimony before Con-

gress, and sending NCPSSM representatives to plead our case before Congress.

To my knowledge Mr. Roosevelt does the minimum of active lobbying on the Hill. He has not testified before the Social Security Subcommittee or the Health Subcommittee since the NCPSSM was founded and has never testified before the Select Aging Committee. To tell people that their money is going toward "presenting testimony before Congress and to plead our case to your Congressmen and Senators on a person-to-person basis" is just not true.

I object to the misleading language and half truths that NCPSSM uses in its mailings. And, I find it unconscionable that a former Member of Congress would lead people to believe that their $10 to $15 petition is more effective than a 22-cent letter. The message is the same but my reception of a personal letter is much more sympathetic and warm than a computerized printout. Better still, the sender saves the money.

The NCPSSM qualifies for a tax-exempt status under code 501(c)(4) which is set up for "civic leagues or organizations not organized for profit but operated exclusively for the promotion of social welfare." Such a tax-exempt status is a privilege and with it comes certain responsibilities. For example, that they spend the money they solicit from the public for the purpose stated in the initial solicitation. In 1983 NCPSSM took in $1,707,535 from membership dues and contributions and in 1984 this amount had risen to $9,818,640. That is quite a bit of money to be received from its senior citizen membership.

Given the privileged tax status the NCPSSM has obtained and the way it comes by its very high income, I think it fitting that this, and any other organization with similar characteristics, be more open to public view. To this end I am introducing legislation today which would require civic league and other organizations which are granted the 501(c)(4) tax-exempt status and solicit money from the public to pay out at least half of their gross revenues for its tax-exempt qualified activities each year and to disclose certain financial information in each solicitation. This will put an end to organizations that are making their staff rich through mail order scare tactics rather than through serving the public interest.

I think that the bill is a fair and reasonable way to ensure that those organizations which claim to benefit the public good and thus are given special tax privileges do indeed serve the public. Money gifts and contributions of time and labor given to these organizations is estimated at $50 billion a year. This is all well and good for it has been these groups that have been in the forefront of building an enlightened America: ridding society of child labor, purging the spoils system from public office, and educating millions of people. But as there is the possibility for mismanagement in the raising of such funds, it would be wise to have some way of assuring that the funds are indeed spent on the public good.

The bill I am introducing today singles out the 501(c)(4) organizations which are "civic leagues or organizations not organized for profit but operated exclusively for the promotion of social welfare, or local associations of employees * * * the net earnings of which are devoted exclusively to charitable, educational, or recreational purposes." This is where I am aware of possible discrepancies between the privileged tax-exempt status and the actual operation of the organizations. However, in the course of hearings on the issue I look forward to the investigation of other tax-exempt organizations. I also want to look at the requirement to pay out 50 percent of an organization's revenue. The research I had done on this aspect of the bill showed this to be a fitting percentage. However, I welcome input to show that this is too high or too low an amount.

This past year we have spent a good amount of time and hard work on reforming the Tax Code. We have done this largely in the name of fairness to the taxpayers of this country; I see this bill as a similar reform.

The text of the bill follows:

TRUTH IN SOLICITATION AND RECEIPT OF CHARITABLE CONTRIBUTIONS ACT OF 1986

SUMMARY

This bill will amend the Internal Revenue Code to require certain charities [501(c)(4)s] which solicit contributions from the public to use at least half of their gross revenues for charitable activities within a year after receipt, and to amend the title 39, United States Code, to require persons who solicit charitable contributions by mail to disclose certain information in such solicitations.

Sec. 1. Short Title.

Sec. 2. Taxes on undistributed revenue of certain charities—

(1) A tax would be imposed on the undistributed revenue of a public charity which is not distributed within a year (this tax would be equal to 15% of the amount of such revenue remaining undistributed).

(2) The part remaining undistributed after a 90 day correction period would be taxed at 100%.

(3) Exemption for organizations in existence for not more than 3 years.

(4) Definitions—

Public charity—an organization that is granted a tax exempt status under section 501(c)(4).

Undistributed revenue—½ of the gross revenue of the organization for the taxable year which exceed the charitable expenditures.

Gross revenue—the gross income of the organization for the taxable year (it does not include the value of property received and held for the production of income unless such property is sold or exchanged.

Charitable expenditure—expenditures for the active conduct of the activities constituting the purpose or function for which the organization is organized and operated.

Sec. 3. Prohibition and penalty for willfully causing a charitable organization to fail to distribute sufficient revenue.

Sec. 4. Disclosure of information by persons who solicit contributions by mail. Any solicitation shall include the name and the principal business address, the purpose of the solicitation and the estimated portion of all contributions for the same charitable purpose during the 12-month period following.

## CONGRESSIONAL CALL TO CONSCIENCE FOR SOVIET JEWRY

### HON. ROBERT A. YOUNG

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 7, 1986*

Mr. YOUNG of Missouri. Mr. Speaker, today I am proud to participate in the Congressional Call to Conscience for Soviet Jewry. Our efforts must continue each and every day until the human rights of all Soviet Jews have been restored.

Soviet Jews comprise the third largest surviving Jewish community in the world. Jews in the Soviet Union have been struggling to achieve basic human rights, including the right to maintain their own religion and culture. The right to leave any country that denies one their heritage is an internationally recognized human right, yet in the Soviet Union permission to emigrate is given arbitrarily.

In recent years, the number of Jews granted exit visas has virtually come to a halt. The rate of Jewish emigration from the Soviet Union has declined 97 percent over the past 5 years. Fewer than 900 Jews were allowed to leave the U.S.S.R. during 1984. The reduction in exit visas has left an estimated 20,000 refuseniks stranded. This figure is a conservative estimate, since it accounts only for those Jews who submitted formal applications and received formal refusals. The figure does not include those who have been arbitrarily denied even the right to apply for exit permits, those who have applied but have received no official answer from the Government, or those who choose not to publicize their plight for fear of reprisals.

Jews categorized as refuseniks have been increasingly treated as outcasts from Soviet society. The Soviet policies aimed at Jewish emigration have been accompanied by an escalation of efforts to isolate and intimidate Jewish activities. As it has become almost impossible to leave the Soviet Union, it has become unbearable to exist as a Jew within the Soviet Union.

Last year, I was fortunate to have had an opportunity to travel to the Soviet Union with several of my colleagues from the Committee on Science and Technology.

One of the most profound experiences that I encountered on this trip was our meeting with Soviet refuseniks.

We were able to spend several hours with a dozen refuseniks at the home of Prof. Yakov Alpert. Professor Alpert and his wife first applied for permission to emigrate in 1975. Subsequently, they both lost their jobs, and Professor Alpert has been completely cut off from the international science community.

Dr. Aleksandr Lerner, one of the Soviet Union's most respected scientists, also attended the meeting. Dr. Lerner has been constantly harassed since he first applied to leave the U.S.S.R. in 1971. He was dismissed from his job and has been accused of espionage and treason. The Soviet Government has made it clear that they do not intend to ever grant Dr. Lerner permission to leave the Soviet Union.

We heard similar stories from all the refuseniks. There is a clear pattern in the Soviet Union that once a person applies for an exit visa that person may expect to lose his job, have his home searched, and experience constant harassment by the KGB.

As a Member of Congress and concerned citizen, I have adopted a Soviet Jewish family from the Ukraine to help them fulfill their dream of emigrating to Israel.

Samuel and Manya Klinger have been trying unsuccessfully, for a number of years, to emigrate to Israel. Samuel Klinger is an agronomist from Dnepropetrovsk in the Ukraine. He and his wife, a nurse by profession, have been repeatedly denied exit visas since 1970.

The Klinger family is a perfect example of the way the Soviet Union treats refuseniks. In the past few years, defamatory letters have been printed in the local newspaper about the family—prompting Mr. Klinger to immediately send letters of protest to the editor. Unfortunately, the only response has been several anti-Semitic articles in the same paper.

We have asked the Soviet Government to grant this family permission to emigrate, but have received no response. There can be no doubt that by not allowing the Klingers to leave the Soviet Union, the Soviet Government is in clear violation of the Helsinki Final Act, the Universal Declaration of Human Rights, as well as their Soviet Constitution.

As the leader in the free world, the United States must do all that is possible to protect the human rights of all people. I urge my colleagues to continue to protest the blatant violations of human rights occurring each day in the Soviet Union.

# HOUSE OF REPRESENTATIVES—*Friday, August 8, 1986*

The House met at 10 a.m.

The Reverend Dr. Richard G. Hutcheson, Vienna Presbyterian Church, Vienna, VA, offered the following prayer:

Almighty God, who created humankind and ordained governments to establish peace and justice; we praise You for those in this body, and in every walk of life, whose work and witness are in accord with Your purposes. Grant to these Your servants a sure sense of discrimination between that which is popular and that which is right, between personal gain and the common good. Grant to the citizenry the wisdom to support them steadfastly, not demanding immediate advantage, but affirming their mandate to seek the long-term good, that through this instrument of governance Your will may be done, in this land You have blessed so richly and endowed with such great responsibilities in the world. Amen.

## THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. SMITH of New Hampshire. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. SMITH of New Hampshire. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 246, nays 127, answered "present" 2, not voting 56, as follows:

[Roll No. 311]

□ 1020

Messrs. TRAXLER and UDALL changed there vote from "present" to "yea."

So the Journal was approved.

The result of the vote was announced as above recorded.

## ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair intends to recognize Members for just three 1-minute speeches this morning that have been prearranged. Other than that, the 1-minute speeches will come later in the day.

## THE REVEREND DR. RICHARD G. HUTCHESON

(Mr. WOLF asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WOLF. Mr. Speaker, it is my pleasure to welcome today to the House our guest, the Reverend Dr. Richard G. Hutcheson, of the Vienna Presbyterian Church. His words this morning had special meaning to me because not only is Reverend Hutcheson a resident of my congressional district, but he is also copastor of my church and a man whom I greatly admire and respect. I am pleased that my colleagues had the opportunity to listen to his inspiring words this morning.

Reverend Hutcheson came to my church 5 years ago. He is a retired rear admiral in the Navy Chaplain Corps and is the author of three books, most recently, "Mainline Churches and the Evangelicals." Prior to coming to the Vienna Presbyterian Church, Reverend Hutcheson served the U.S. Presbyterian Church as chairman of the Office of Evaluation and Review in Atlanta, GA.

During the years he has served at the Vienna Presbyterian Church, he has diligently worked to foster the spiritual development of church members and has been an outstanding minister.

Mr. Speaker, I would like to congratulate Reverend Hutcheson on his inspiring words and thank him for addressing the House this morning.

## KENTUCKY FREEWAY TO BE NAMED FOR THE HONORABLE GENE SNYDER

(Mr. PERKINS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PERKINS. Mr. Speaker, as this body is meeting, Gov. Martha Layne Collins of Kentucky is dedicating the freeway in Jefferson County to my friend and our colleague, GENE SNYDER. I know of no one more appropriate to name this highway after than GENE SNYDER.

The people of Jefferson County have been promised the completion of this freeway by Kentucky for over 20 years. In 1982, GENE SNYDER decided that he was going to complete this road. A provision happened to appear in the Surface Transportation Assistance Act of 1982 which provided the funds to complete this long-promised road. This provision somehow survived conference and became law.

I attended law school at the University of Louisville, and I saw the tremendous need for the completion of this road. It is most appropriate that the Governor of Kentucky has recognized the contributions of GENE SNYDER for the improvement of transportation, not only in Jefferson County and Kentucky but throughout every corner of our Nation, by naming the freeway in Jefferson County after GENE SNYDER.

## KENTUCKY FARMERS DONATE HAY AND MONEY TO DROUGHT-STRICKEN NORTH CAROLINIANS

(Mr. COBLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COBLE. Mr. Speaker, the farmers of western Kentucky recently came to the aid of farmers in the Sixth District of North Carolina, and I would like to use this time to thank them.

An independent trucker from Greensboro contacted our office and said he wanted to do his part to aid drought-stricken farmers. That man was Ron Howard. Our office put Mr. Howard in contact with Lyon County, KY, extension agent John Rudolph, who located surplus hay in Eddyville, KY. Back in our area, Alamance County Commissioner Junior Teague located farmers who needed hay.

I told my colleague, Congressman CARROLL HUBBARD, that the good people of Eddyville really came through. They donated hay and money, and gave Ron Howard the royal treatment while he was in their town. On August 2, we brought that hay to Mr. and Mrs. W.J. Cook and Mr. and Mrs. Bill Ed McPherson of Mebane. Between them, they have over 200 head of dairy cattle that were in critical need of hay. It was a joy unloading that hay.

This episode proves that when some Americans are in need, their fellow citizens come to their rescue. The residents of western Kentucky certainly proved that. You helped some people in my district during a difficult time. From all of us in the Sixth District of North Carolina, to the fine folks of Eddyville, KY, we say, "Thank you."

## PERMISSION TO FILE CONFERENCE REPORT ON H.R. 4151, OMNIBUS DIPLOMATIC SECURITY AND ANTI-TERRORISM ACT OF 1986

Mr. FASCELL. Mr. Speaker, I ask unanimous consent that the managers may have until midnight tonight to file a conference report on the bill (H.R. 4151) to provide enhanced diplomatic security and combat international terrorism, and for other purposes.

The SPEAKER. Is there objection to the request of the gentlemen from Florida?

There was no objection.

## NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 1987

The SPEAKER. Pursuant to House Resolution 523 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 4428.

□ 1019

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 4428) to authorize appropriations for fiscal year 1987 for the Armed Forces for procurement, for research, development, test, and evaluation, for operation and maintenance, and for working capital funds, to prescribe personnel strengths for such fiscal year for the Armed Forces, and for other purposes, with Mr. ROSTENKOWSKI in the chair.

The Clerk read the title of the bill.

□ 1030

The CHAIRMAN. When the Committee of the Whole rose on Tuesday, August 6, 1986, amendments made in order pursuant to section 2 of House Resolution 523 had been completed.

Pursuant to House Resolution 531, no further amendments to the bill or to the committee amendment in the nature of a substitute, as modified, are in order except the amendments designated in section 2 of House Resolution 531, and said amendments shall be considered only in the order and in the manner specified and shall be considered as having been read if available in the printed report by the Committee on Rules.

First, before the Committee substitute, as modified, is considered for amendment, it is in order to debate the funding levels for 1 hour, equally divided and controlled by the chairman and the ranking minority member of the Committee on Armed Services. After the completion of such debate, it is in order to consider the following two amendments to the committee substitute, as modified, contained in House Report 99-766 relating to funding levels, which shall not be subject to amendment or to a demand for a division of the question but each shall be debatable for 30 minutes equally divided and controlled by the proponent and a Member opposed thereto:

First, an amendment if offered by Representative SPRATT or his designee; and second, an amendment if offered by Representative DICKINSON, or his designee.

The gentleman from Wisconsin [Mr. ASPIN] will be recognized for 30 minutes and the gentleman from Alabama

[Mr. DICKINSON] will be recognized for 30 minutes.

The Chair recognizes the gentleman from Wisconsin [Mr. ASPIN].

Mr. ASPIN. Mr. Chairman, I yield myself such time as I may consume for the purpose of explaining briefly the situation so that members of the Committee of the Whole may understand.

We have before us an amendment that is going to be necessary to bring the outlays in the bill before you down to the level in the budget resolution. It is not our intention on our side to debate this issue for the full time allotted, but this is a very, very important issue for the future of the budget process and to avoid the sequestration which faces us. We need to reduce the outlays in the bill before us by $6 billion to make it consistent with the budget resolution.

I beg of you, all members of this committee, to vote for the amendment which will be offered by the gentleman from South Carolina [Mr. SPRATT] and other substitutes will be offered.

We must vote to reduce the outlays. We are $6 billion over in outlays and our chances of avoiding sequestration are close to zero unless we correct the outlay figures in this bill before us.

Mr. Chairman, I yield 6 minutes to the gentleman from South Carolina [Mr. SPRATT].

Mr. SPRATT. Mr. Chairman, when we move from general debate into amendments on this bill, first up I will offer an amendment this morning whose object is very simple.

As the chairman has just said, the object of my amendment which will be offered along with the gentleman from Wisconsin [Mr. ASPIN] and the gentleman from Oklahoma [Mr. MCCURDY] is to bring this bill, this authorization bill, in line with the budget resolution that we have already accepted and agreed to.

We have a second object, because in trying to bring the bill in line with the budget resolution we want to protect the accounts that we think are most important, personnel and readiness, both as a priority in this particular budget and this authorizatioin bill and we want to protect them against sequestration later on because sequestration could be particularly devastating to the personnel and readiness accounts.

Now, the object we have is very simple, that the amendment is a bit complex and I think it would be useful for everyone if I tried to put it in context.

In the budget resolution passed by the House, the allocation for Defense, function 050, was $285 billion; and the Armed Services Committee marked the budget authority in this bill down to that level: $285 billion. The committee had basically completed the mark at $285 billion when the concurrent budget resolution was adopted the night before we left for the Independence Day recess.

The concurrent budget resolution allocates $292.2 billion in budget authority to national defense—function 050—and $279.2 billion to outlays. The $292.2 billion was the ceiling set by the concurrent budget resolution on outlays.

When we returned from the recess, our committee met to decide what to do with the additional $7 billion in budget authority, gained in the concurrent budget resolution. We knew then we had an outlay problem. We knew that our mark to $258 billion in budget authority would generate outlays of about $283 billion, $4 billion above the outlays allowed under the concurrent budget resolution.

In spite of this mismatch, which we already had between BA and outlays, with BA $285 billion, the committee decided to add back the entire $7 billion in additional BA that was made available to us under the concurrent budget resolution, and most of this $7 billion goes to R&D, procurement, the so-called investment accounts in the defense budget. The result was a defense authorization bill, the one that comes to the floor, with $292.15 billion in budget authority and $285.4 billion in outlay impact. In other words, this bill as it is, as it comes to the floor, is $6.2 billion over budget in outlays.

Our amendment, as I said, has a very simple purpose. It is to bring this bill in line with the budget resolution, the outlay ceiling that this Congress set several weeks ago, and here is how we propose to do that.

First, our amendment deletes the $5.8 billion in procurement, research and development, and other accounts, which the committee added back after the bill had been marked to $285 billion. We leave in place, however, $1.5 billion for a pay raise of 3 percent on January 1, which we and most of the committee feel is vitally important. This $5.8 billion we cut is very selectively cut. It is not an across-the-board reduction. It is not our personal choice of reductions. It is a selection of cuts each of the subcommittees made when we were marking this bill down to $285 billion. Basically, all we do is bring the bill back down to the level to which the committee itself had marked it before learning that we had more BA than we thought we would have—with the one exception I mentioned. We keep the pay raise for military personnel, and that costs $1.5 billion if it is made on January 1.

These program cuts—deducting $5.8 billion from $292.2—take BA to $286.5 billion, but they leave us still with an outlay problem. The corresponding outlays are $283.5 billion. To get down to $279.2 billion in outlays, which is the level of outlays Congress set, our amendment makes two more changes:

First, we would rescind $1.4 billion of BA in the procurement accounts, which Congress overappropriated for inflation in fiscal year 1986 and fiscal year 1985, when we gave DOD more to cover inflation than DOD needed. That's no gimmick; it's a real cut in spending, developed with the help of DOD, and it has an outlay impact in fiscal year 1987, which CBO will score at $1.4 billion.

Second, we would change the military pay date from September 30 to October 1, a change which leaves BA unaffected, but shifts $2.9 billion in cash flow from fiscal year 1987 to fiscal year 1988. This is an accounting gimmick. I make no pretense about it. But CBO will score the pay date change as having a $2.9 billion outlay impact.

Even more importantly, the pay date change is a cash-flow adjustment that will not cost the Government more in the long run. The Dickinson-Courter alternative adopts both our pay date change and our inflation rescission—so on two of the three elements of our amendment, Dickinson and Courter agree with us. Indeed, they copy us. But to get from $292.4 billion in BA down to $279.2 billion in outlays, Dickinson and Courter need some tricks.

They pull two out of the hat that may reduce outlays in the short run, although I don't know how anyone can accurately calculate the impact. But they may also cost DOD more in the long run. Dickinson-Courter would delay progress payments by 10 days, and they would stop DOD from taking early deliveries.

The problem is that defense contractors understand cash flow too. They know money has time value; and they price their product based on time lags in payment and the cost of carrying inventory. If DOD slows down its rate of payment, it will not take the contractors long to raise prices. And that's not my opinion; that's the conclusion of DOD's recent profit study and the Congressional Budget Office.

Just yesterday, CBO's Director Rudolph Penner, testified:

> In those instances where delays are legally possible, they may induce contractors to raise future contract bids, thereby raising the cost of procurement.

The Dickinson-Courter alternative, which they will offer after our amendment is offered, deals with the fiscal year 1987 outlay problem in a different manner. It deals with it really in a manner that we have grown accustomed to. It puts the problem off. It puts off the BA outlay mismatch until the following year, and in fiscal year 1988 when those early deliveries that they propose to pay for late start coming in, when the extra BA of $5.8 billion which they want to keep starts spending out, the outlay mismatch

that we have this year will be back and it will be back in spades.

So the question before us as we open up this bill is an old and a simple one. Are we going to deal with the deficit this year? Are we going to deal with a mismatch between outlays and BA this year, or resort to gimmicks?

The question before us is simply this: Are we going to come to grips with fiscal reality or not? We mustered the courage to adopt Gramm-Rudman-Hollings. Can we muster the courage to carry it out?

We have a solution to the problem which is an honest solution and I urge that we adopt it.

Mr. DICKINSON. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, it is unfortunate that our audience this morning on the Chamber floor is as diminutive as it is, because there is nothing facing the American people and the security of this Nation more important than what we are doing in setting the spending levels in the items that are to be bought and contained in this bill. My fervent hope is that there will be adequate numbers of Members watching in their own offices, because this is a very complicated matter that we have to discuss today, very complicated. I am not sure if everyone were here and we had ample time, which we do not, that we could adequately explain it, but let me start with the basics of it to try to develop how we got to where we are now and how the problem we are facing developed.

This year the administration requested $320 billion for its defense budget. This is what they said that they actually needed.

Now, was this something just plucked out of the air? Was it something substantive? How did they arrive at this figure? They arrived at the figure by saying this is the minimum that we need to have to spend, plus we are owed by an agreement some money from last year, because instead of a positive growth or even a neutral growth, we had a 3-percent negative growth last year, and they put in inflation for this year, so this came to the $320 billion.

Now, the Senate Budget Committee, in looking at that figure, said, "Well, we don't think we have that much to spend. We cannot afford it, so we will not restore what was in there. We won't put any real growth in there"—abrogating the agreement of last year—"but we will budget $301 billion." That was the budget authority that the Senate put in there, $301 billion, which represents no growth.

Now, the House Budget Committee said, "Hey, we don't think we can get there. We don't believe that the Members will support that," so in the House budget figure, and keep in mind now that we on the authorizing committee are looking to the Budget Committee to tell us how much our slice of the pie is so we know how much to spend, the House Budget Committee set our figure at $285 billion.

OK, we got our marching orders and in the Armed Services Committee we apportioned that out among the subcommittees, so in our subcommittees on research and development, procurement, seapower, all the spending subcommittees, readiness, we took what our portion of the pie would be. We marked down to that and we came back and we saluted and said, "Yes, sir; they gave us a $285 billion figure. This is what we can buy for $285 billion."

That is what the House did. We marked to that figure. After we had marked and reported out our bill, then a joint committee of the House and the Senate on budget got together and came up with a new figure. They said, well, we have cut too much, obviously the Senate did not cut enough and the House cut too much, and so in order to reconcile the differences the joint committee on budget gave a budget authority, a spending authority of $292 billion.

Well, now, why do I talk about two different figures? Well, there are two figures that we have to deal with. One is budget authority, which means that is the same as using a credit card or a charge account. You go out and put your credit card down and you purchase that. Now, at the end of the month when you have to pay that with money, that is your outlay. That is what you really lay out.

□ 1045

So you can charge it and you get credit and use your credit here, but then what you actually have to pay in that year is the outlays.

Never before has the authorizing committee, the Committee on Armed Services, been constrained by outlay figures. The Committee on Appropriations does that. We have to look at what our credit is, how much we can afford to spend. If we spend more than that, the Appropriations Committee has the authority and the duty to say that we cannot go over the outlay figure.

With the advent of Gramm-Rudman this has been exacerbated, let us say, to really put teeth into it, and so they dare not go over, where they have in the past.

I might add, though, that some of the appropriations bills that have already come to the floor from other committees have already exceeded the outlay figure for this year, but we will discuss that perhaps later.

We are talking outlay figures over here which are not binding on our committee, which are not legally binding or morally binding, and historically have never been binding. We have only been dealing historically and up to this point with what is our authority to spend.

Now for the first year we have to be concerned with, they tell us, the outlay figures instead of the Appropriations Committee. Of course the responsibility is still with the Appropriations Committee, but politically, I suppose, in order to convince enough Members on the floor that this is the right number, they have to say, "If you spend this much in budget authority, how does that affect your outlays, and will we meet that target, too?"

When we went on the recess, or work holiday, after we had already marked up to the $285 billion, we were given a new figure. The Budget Committee finally acted and came to the new figure. So the Armed Services Committee went back in and said, "We have approximately $7 billion more than we had marked up to the 285." So those things that had not been included and those things that had been deleted from the administration's request we put back in, and that is the 292 figure.

We voted on whether to stay at the same figure or go to the 292. The committee voted by a very substantial margin to stay at our authorized figure, and if anything is going to fall out, it will have to be done in the appropriations process, and they just will not fund over the outlay figure. So the figure that I bring to you and that we are debating today is the committee figure, and the amendment that has been discussed that is cutting the committee figure is supported by the chairman, which is rather anomalous, but is perfectly right to do, to cut what the committee said that we were going to do after we knew what the figures were.

The reason given for that is that we have to reach the outlay figures. First, that is not true. There is no obligation on us. Politically it is expedient, but we do not have to meet the outlay figures. The Appropriations Committee might, but not us.

If, though, we say that we have to, how do we get there? Well, you cannot get there from here dealing honestly. You have to use gimmicks, and the gimmicks that the proponents of the cut would lay out are just that—they are not real reductions in spending. They are supposed to be, but they are not.

Do you know how they are going to get there? They are going to slip a pay date from the last day of September to the first day of October to get into a new quarter. It does not save a dime, it just spends it in another year, but that is the gimmick that they are using to get there.

Do you know what other gimmick they are using? They are saying well, we have some understanding inflation, or overestimated inflation, in the

budget from last year that was really not used up because inflation was lower, so we are going to take that and get credit for that, too. It is a gimmick. You are not saving any money; you are not spending any less. It is just smoke and mirrors. It is a gimmick. But they will technically meet the argument.

So that is what they are proposing to do, not reduce spending, not really cut back on anything. They simply say that we are just going to change this date from one day to another day, and thereby we save $x$ billions of dollars, and we are going to go back and the money that we did not spend that was allocated, because inflation was low, we take credit for that savings, because we will not spend it. So, therefore, we have met our outlay figure.

The CHAIRMAN pro tempore (Mr. DASCHLE). The time of the gentleman from Alabama [Mr. DICKINSON] has expired.

Mr. DICKINSON. Mr. Chairman, I yield myself 5 additional minutes.

So if you want to play a game, and we will get into it when I offer my amendment, or the gentleman from New Jersey [Mr. COURTER], we say, OK, if you want to do that, we have a gimmick. We will take your same gimmicks—the same misleading, deceptive gimmicks that do not cut spending a dime—we will take your figures, we will do what you do, and we will go you one better. We have to reduce a little more if we keep the higher figure, so we will say that if a contractor delivers a weapons system early, we will not pay him early, so we pay him when he delivers. In progress payments, instead of paying—we pay 80 percent as they go along—instead of paying in 5 days, we will slip that to 15 days, and that is a savings. It is a gimmick. But we meet the outlay figures just as well as does the proponent, the chairman or the gentleman from South Carolina [Mr. SPRATT], we meet them just the same using the same tools they use. We just reached in their bag, too. If they want to play games, we will play games.

But the difference is that we are keeping our spending authority at what the Budget Committee said we had the right to. We are meeting that target, and in doing so, we are keeping in the purchase of F-15 aircraft, F-16 aircraft, and there is a litany of things which I will read when we get into the amendment, that makes a big difference, because, let me tell you, if you cut down on say the purchase of the F-15 aircraft, the production rate, as they would propose to do, if we do not get the budget authority—I would like you to hear this; it is hard to believe.

The Air Force says that if we cut the production rate in half, which they propose to do if they lower it from the 292 to 285, each aircraft will cost $6 million more, just by slowing down the production rate. You have not saved a dime, you have cost money, you get them later, and you pay $6 million more for the same aircraft, just by the false economy of stretching it out. If they delete those and cut the production rate in half by lowering the figure from 292 to 285, that is exactly what you are doing on the F-15. The same would be true on the F-14 and other weapons systems that we put in here. If you stretch out the program, you pay more for it, and you get it later.

So we have brought you an honest bill. We have met every parameter that has been laid upon us, and we have gone as far as we could toward reaching what the Department of Defense and the administration say that they want.

Let me tell you something. Last year the Budget Committee made an agreement, the House and Senate, joint committee. They said we will look into the future, we will have a 0-3-3-percent growth: 0 percent the first year, 3 percent last year, and 3 percent this year.

They did not meet it last year. We had a negative growth last year. This year by their amendment we will have another. The 2 years combined will give us a 10-percent negative growth, reduction in growth, not just holding our own for the 2 years.

It is imperative if we are going to maintain our credibility as a world power, the free world's leader, that we maintain our defense capabilities, and you cannot do that if you go back to the Carter years of cut, cut, cut, and not keep up with inflation. We are not only keeping up with inflation, we are having a real reduction in the amount spent for our defense.

□ 1055

I think we are being penny-wise and pound-foolish if we do not go on and fund the amount that the Budget Committee says we are authorized, the joint committee says that we are authorized to have and to spend for the defense of this Nation. To do anything otherwise, anything otherwise than to spend to the full amount that we are allowed by the Joint Committee on the Budget, I think we would not be meeting the trust put in us, and not be meeting our responsibility. We would not be providing or doing our best to provide for the adequate defense of this country.

I think if the American people understood it and if the Members of this House understood it that they would support the committee's position, arrived at after long hours of deliberation and innumerable witnesses testifying, and they would support our position.

Mr. BROOMFIELD. Mr. Chairman, at $292 billion, this bill represents the heart and soul of our Nation's defense effort. Not surprisingly, given its sheer magnitude, consideration of this legislation will involve days of discussion, major policy debates and literally dozens of amendments. In the past, when the dust settled, we usually had a bill which, while not satisfying everyone, reaffirmed our Nation's commitment to a strong and viable defense.

Unfortunately, this year the situation is shaping up differently and, I'm afraid, to the possible detriment of our national security effort. This year's debate is more of an arms control policy discussion than an opportunity to put the finishing touches on legislation designed to bolster our Nation's security.

Under the guise of arms control, a number of my colleagues have decided to use the DOD authorization bill as a vehicle for pushing through their own ideas of how we should be dealing with the Russians. The problem with this is that the basic premise for their loosely defined idea of arms control is one-sided disarmament without verification. These principles are embodied in the five main "arms control" amendments which my Democratic colleagues are planning to offer to the DOD authorization bill. Taken as a whole, these amendments would gut our Nation's strategic security policy. This group of amendments is composed of: First, an attempt to cut funds for the strategic defense initiative; second, an amendment to prohibit all nuclear testing; third, an amendment to prohibit funds for any strategic weapons procurement which go above the numerical sublimits contained in the now defunct SALT II Treaty; fourth, an amendment legislating a moratorium on U.S. antisatellite programs; and fifth, an amendment prohibiting all funds for production of chemical weapons.

Responsibility for this group of amendments as the key amendments to the DOD authorization can be laid directly at the doorstep of a group of liberal Democrats in the House of Representatives who want a political confrontation with the President on the question of arms control. As they themselves state, they have their own agenda, and it is diametrically opposed to that of the President. These Members want disarmament at any cost. In this legislative struggle, genuine security based upon an equitable, verifiable balance of forces is unimportant. Their target is our weapons programs and our programs alone.

The timing of this attack on the President couldn't be worse. While in the past people could have accused the President of not doing enough in the arms control field, that's certainly not the case today. I don't think anyone can deny that we are at a critical juncture in our negotiations with the Soviets on a wide range of arms control issues. The President and Mr. Gorbachev are exchanging high level proposals on how to end the arms race. Our negotiators in Geneva are guardedly optimistic about prospects there. We have just concluded the first round of discussions with the Soviets on the question of verifying existing nuclear testing agreements. The United States has recently met with the Soviet Union in regard to the U.S. SALT II announcement and our concerns over Soviet SALT violations. And, Secretary Shultz has just concluded a series of meetings with high ranking Soviet officials to discuss an expected summit later this year.

There is, without any doubt, a multiplicity of very important arms control discussions going on with the Soviets at the present time, and they are at the highest level. And yet, just as the President is coming to grips with the Soviets on these extremely important issues, Members of Congress are doing their best to undercut him here at home with their shadow arms control policy. I would hope that my colleagues in the House will step back and take a good hard look at the cumulative effect that these five amendments will have on the President. The timing of these amendments is all wrong, and contrary to what their proponents say, they undermine genuine arms control, not support it.

Mr. Chairman, I yield 3 minutes to the gentleman from Mississippi [Mr. MONTGOMERY], the very distinguished chairman of the Veterans' Affairs Committee, and an outstanding member of our committee.

Mr. MONTGOMERY. Mr. Chairman, I thank the gentleman from Alabama for giving me this time.

Mr. Chairman, I rise in support of the Dickinson-Courter defense budget amendment, basically because the bill that we have before us today, H.R. 4428, as pointed out by the gentleman from Alabama [Mr. DICKINSON] calls for $292 billion in budget authority. Two-thirds of the committee, voting on a rollcall vote in our committee, voted for the $292 billion budget authority.

We have always, as I recall, and I have been on the committee for a number of years, we have always marked to the budget authority and never have marked to the outlays, which seems to be the big, big argument here this morning.

Under the budget resolution for 1987, which I supported, and was supported by the majority of the Members for fiscal year 1987, we were given the budget figure of $292 billion, and that is what I want to repeat that the committee marked to.

This bill represents the second year of negative growth in defense spending. I know some of my colleagues on this side of the aisle are very concerned that we continue to spend, spend, spend, in the military. But we are having negative growth. The figures might be higher because of inflation, but it is really negative growth for 1987 and for 1986. We really had more growth in our defense spending in 1985.

Under the Aspin-Spratt amendment, the reduced budget authority as proposed by these two gentlemen would result in a negative 4-percent growth, a negative 4-percent growth.

Let me point out that the $292 billion does not cover everything we wanted. In the military personnel accounts, the services recommended that we increase the end strength for the National Guard and Reserves. We did increase these strengths, but we were not able to increase the full-time Reserve personnel. We could only increase it by the figures we were given of one-third. So we really are not keeping up with the missions given to the Reserves because of this restriction of $292 billion.

So in closing, Mr. Chairman, I say why not go along with what we have in the bill. Two-thirds of us voted for it. Why continue to change this bill out here on the floor?

I rise in support of the Dickinson amendment.

Mr. DICKINSON. Mr. Chairman, I yield 5 minutes to the distinguished gentleman from Virginia [Mr. BATEMAN].

Mr. BATEMAN. Mr. Chairman, I appreciate the distinguished gentleman from Alabama [Mr. DICKINSON], the ranking member of the House Armed Services Committee for yielding the time.

Members of the House, we will shortly be facing a question of whether or not, within the limitations, totally within the limitations of the budget resolution, we choose to reduce the amounts of money authorized to be expended in the defense of our country.

There is no way to avoid the alternate issue that to vote for budget authority that is less than the $292 billion provided in the budget resolution, that binds us, when there is an alternative that goes with that $292 billion which meets also an outlay level that is not technically or legally binding upon us, translates purely and simply into a vote to unnecessarily and unduly restrict that which we authorized to be provided for the national security.

We meet through the Dickinson-Courter amendment the $292 billion budget authority. We meet the outlay requirement of $279 billion and a fraction. To cut below it is simply to unnecessarily undo what the committee, in its wisdom, felt was required in our Nation's defense.

I think it is significant to point out that when the committee went forward and marked its bill under the original House passed budget resolution to $285 billion, it was understood in the committee we would not report that bill marked to that level unless we were required to do so by the ultimate, final action on the budget. The ultimate, final action on the budget raised that authority to $292 billion, and we then proceeded to add back authorization for programs and numbers of items that were regarded as vitally important to our national security. It was then that the committee hung fast by a two-thirds vote within committee that we should stay with the $292 billion that was the final Budget Committee action because we needed those things that were authorized between the $285 billion and the $292 billion figure.

I hope that this House will not today unnecessarily undo what the committee has done over months of effort to separate out competing priorities, recognizing as we do within the committee that even at $292 billion there are many things that this country would be well served if it had, but which are not in the $292 billion. But we have the best mix that could be arrived at in the collective wisdom of the committee.

The committee has also given consideration in its $292 billion authority to what you can buy that will most enhance the competition in the acquisition and procurement of major systems so that the taxpayers can get what we are going to have to have and get it at the cheapest rate. As illustrated by the gentleman from Alabama [Mr. DICKINSON] with reference to the number of airplanes, and how if you reduce the number being produced you increase the cost of every one being procured by as much as $6 million. What is being done in naval ship construction tends to enhance competition between shipbuilders so that that will drive the cost of procuring those ships down.

To limit the number, to change the mix, adversely affects the competitive environment, stretches out the program, and increases the cost.

□ 1105

There is no reason for this House to take such action, because the Dickinson-Courter amendment gives you $292 billion within the budget authority conferred upon this committee and by the Dickinson-Courter amendment you meet the outlay requirements that are imposed upon the Appropriations Committee.

I would conclude by saying that the Appropriations Committee has not been idle through all of these weeks and months. It has taken the bill that the committee has reported with budget authority of $292 billion, and has proceeded to informally go forward and mark their appropriation bill to that level.

I am assured that they can and will meet the outlay requirements imposed upon them within the parameters of the $292 billion, and to do less than that in this body today is simply to savage the defense budget unnecessarily.

Mr. DICKINSON. Mr. Chairman, I yield 5 minutes to the gentleman from California [Mr. BADHAM].

Mr. BADHAM. Mr. Chairman, Members, we did not even used to discuss very much around here the differences between budget authority and outlays because that was before the years of Gramm-Rudman and it was during the years of level or increasing defense expenditures.

However, last year when, as Mr. DICKINSON said, we went into a situation of reducing—even though we had agreements for zero growth followed by 2 years of 3 percent real growth, we got to the point that rather than do that in this body, and together with the other body in conference, we went from 1985 fiscal year $292 billion to last year's, down to $286, which is a real negative growth, or a reduction of 6 percent; and then if we are faced this year with a further reduction of 10 percent or of 6 percent or 4 percent, that will add up to a reduction of 10 percent overall.

Now, in our deliberations this year, we came to the conclusion that with Gramm-Rudman, we were going to have to do several things; and as we started out, we were given a figure, a target figure of $285 billion for authority. I stress the word authority, because we are the authorizing committee. We do not appropriate; we authorize expenditures to be made.

The appropriation or the outlay is done, as we all know, by the Appropriations Committee.

We came to the $285 billion authority mark, and we estimated that that would be for whatever reason about $282 to $283 billion of outlay. Before we were able to report that bill, we were given a reprieve by the Budget Committee who said, you have $292 billion of authority in the authorizing committee. That will be coupled with an unmakeable figure of $279 in outlays.

Now, for the first time this argument really came to a head. So the committee voted, by a substantial margin, to use our authority to authorize $292 as the authority was given us to authorize that by the Budget Committee; and indeed we did.

Now we are faced with getting the $279. When the distinguished gentleman, the ranking minority Member, the gentleman from Virginia says that this takes gimmicks to get there; indeed, gimmicks it does take to get there.

Last year we called it smoke and mirrors, this year we call it gimmickery. The fact remains that we cannot get to $279 outlays without doing something that might be considered gimmicky or a little weird.

The difference is that the Dickinson-Courter amendment, which will be offered very soon, will use the same bag of gimmicks that is used by the chairman and Mr. SPRATT, and it gets us there without reducing any programs whatsoever.

On the other hand, to get from $292 authority from the committee down to the outlays of $279 to go to $285.4, the situation is different with the Spratt amendment. That will reduce this Nation's strength by refusing to buy 30 F-16 aircraft; the price will go up if we do not buy them efficiently. Twelve F-15 aircraft; the cost will go up several millions of dollars per copy if we do not buy them efficiently. Twelve F-18's, five F-14's, one *Aegis* class destroyer.

These are but a few of the things that will be cut from the guts of the program of the defense of this country. I would just like to say that I impugn no one's motives, because every member of this committee is trying as hard as he can under the budget restraints to come into proper scope.

This fact is, we have the choice here today and this is the meat of the whole argument. We can do it with smoke and mirrors and cut programs, or we can do it with smoke and mirrors and not cut programs.

I think the latter is far preferable because the committee has also been working to do other things; to reduce manpower needs by increasing technological advance, by procurement reform which will save us money in our relationships with contractors.

So I urge you to support the Dickinson-Courter amendment, which will not cut programs but will get us to where we want to go.

Mr. ASPIN. Mr. Chairman, I yield 2 minutes to the gentleman from Texas [Mr. STENHOLM].

Mr. STENHOLM. Mr. Chairman, it pains me to come to the well today and to support a cut in the budget authority for the defense budget, just as it pained me to be one of the 19 Members to vote to eliminate the COLA's for military and civil service retirees; just as it pained me to vote for the $170 million in outlay reductions in order to conform the ag budget to the target of Gramm-Rudman-Hollings.

Just like it will pain me when the opportunity, should it arise, to vote no COLA's for Social Security recipients this year. That, too, will pain me and incur the wrath that I am incurring.

I am here today to support the Spratt amendment, because it is time we do that which the Packard Commission suggested we have not yet fully appreciated the necessity of doing, and I quote:

> Today there is no rational system whereby the Executive Branch and the Congress reach coherent and enduring agreement on national military strategy, the forces to carry it out and the funding that should be provided in light of the overall economy and the competing claims on national resources.

That is the bottom line, my colleagues. Gramm-Rudman-Hollings I thought was serious. I thought we were serious about recognizing our economy, the money we have to spend, and trying to put together a package to do it within that budget.

If we do not support the Spratt amendment, we are just saying to the world: Forget it. There is no way we avoid sequestration. To my colleagues who suggest that $286 is not enough in budget authority, we are going to have much less for defense, if we go the way it is being suggested in the substitute amendment.

This is "gut-up" time for a lot of us, and I hope folks on my side of the aisle that have literally done everything to stop the Davis-Bacon Reform Act will also "gut-up" when it comes time to doing hard time.

The only thing that we have cut with Gramm-Rudman-Hollings so far, it appears to me, is Hollings.

Mr. DICKINSON. Mr. Chairman, I yield 2 minutes to the gentleman from Ohio [Mr. KASICH].

Mr. KASICH. Mr. Chairman, let me just say very quickly that there are two methods that are used in the Aspin-Spratt amendment to try to get down to the budget authority/budget outlay numbers.

We have two additional ones; one that delays progress payments; those are payments that we make to contractors, and second, we prohibit the early delivery of systems so that we do not have to pay money out up front.

What does that allow us to do? Well, when we combine the two methods that the Aspin-Spratt amendment uses along with our two methods, we are able to hit $292 in authority and $279 in outlays.

□ 1115

Let me tell you, last year we had a 6-percent reduction in budget authority. Last year's budget represented a negative 6-percent growth. The Spratt-Aspin amendment will give us another additional 4-percent negative growth. And those people who have been the most critical and the most analytical about what we ought to do within the Department of Defense, including former members of this administration who have come forward with plans to cut defense spending, have told us that if we consistently move to reduce the outlay figures or to reduce the authority figures for defense, we are going to roll back all the gains we made for the last 4 or 5 years.

So what do we do in our budget? We simply take the two methods that Aspin-Spratt take, we add to them. One is prohibit early delivery. We do not need to take early delivery on these systems because we end up having to have storage space problems and everything else until the systems can be joined together and we also delay the payment for 10 days of progress payments to contractors. Contractors have been getting 90 percent progress payments for longer than what they needed. It is now down to 80 percent. We do not reduce it below 80. We just simply say we delay the payments for 10 days and are able to meet $292 in budget authority and $279 in outlays. So it gets us right on our target and also assures that we

can be more generous in the area of authority than is provided for in Aspin-Spratt which represents a 4-percent decline in authority. We simply cannot go 2 years with a 6-percent and 4-percent decline in authority when we can do it with our program that makes good sense.

Mr. ASPIN. Mr. Chairman, I yield 6 minutes to the gentleman from Oklahoma [Mr. MCCURDY].

Mr. McCURDY. Mr. Chairman, I would have preferred to mark the defense number at the higher BA level, as permitted under the budget resolution. But quite frankly, that number is unachievable if defense outlays are to be within the budget outlay target and if we are to preserve military personnel and readiness from the devastating cuts of Gramm-Rudman.

Historically we have just been concerned with budget authority. But today, in today's world we are concerned with outlays. Outlays are the real numbers because that is what Gramm-Rudman is based upon. That is what the deficit is based upon. That is what the headlines you see today about growing deficits, record deficits, is based upon.

Many experts are predicting that we face a potential Gramm-Rudman sequester in October of this year of $24 billion in outlays, one-half of which is to come out of defense.

In order to get $12 billion in outlay cuts, DOD will have to cut approximately $30 billion in budget authority from the appropriated level. I would prefer reducing the impact of those cuts by preserving the decisions that the Committee on Armed Services made to protect operations and maintenance and personnel.

We made those priority decisions in June. But when the conference report came back, it allowed greater budget authority. The committee, by close vote, chose to add nearly $5.8 billion in new spending.

Ladies and gentleman, we have to wake up and live in the real world of record deficits and outlay cuts. If we honestly do not bring the outlay number in line with the budget, we are going to face across-the-board cuts in a number of areas.

In personnel, let me give you an example: They are talking about $3 billion to $4 billion reduction in military personnel. Do we really want to furlough or release thousands of active-duty personnel?

We could face $7.3 billion in readiness accounts. Let me give you one example: In my district Tinker Air Force Base is a large air logistics center. In March of this year they had to take a $75-million Gramm-Rudman sequester. That meant aircraft repairs were cut and because of lack of spares and trained personnel and inspectors, they had to make further cuts.

If we do not either raise the revenue to pay for defense, which the President opposes, or bring this bill and others into line, then the next cuts will be far worse than those that were taken in March.

My friend, Mr. DICKINSON, argued that this bill is only an authorization bill and that the Appropriations Committee will take care of the cuts. You know, that sounds vaguely familiar with what we have heard around here for the last few years that continue to build the deficits. It is no wonder we cannot balance the budget around here with talk like that.

Furthermore, the Subcommittee on Appropriations for defense is over the budget in outlays and did not use all of their budget authority.

My colleagues, often in politics perception counts more than substance, and in this case the perception is clear that if we do not use all of the budget authority, the credit card, then we may look as if we are not for a strong defense. But the truth is and the facts reveal that, unless we watch the real numbers, the outlays, the money actually expended, the cash that is used, then we will do irreparable harm to the readiness posture of our military.

Let us be honest, let us not add to the credit card when we do not have the cash available nor the willingness to raise it.

Let us not, again, postpone the hard choices. Let us not bring about even harsher cuts on defense. We cannot have it both ways.

Let me speak to my colleagues, the moderates and the conservatives: if you voted for Gramm-Rudman as I did, if you voted for a balanced budget amendment as I did, if you voted for across-the-board cuts by Mr. FRENZEL or by Mr. ARMEY which I have, then you have to vote for this amendment.

Mr. HAMILTON. Mr. Chairman, will the gentleman yield?

Mr. McCURDY. I yield to the distinguished chairman of the Permanent Select Committee on Intelligence, the gentleman from Indiana.

Mr. HAMILTON. I thank the gentleman for yielding.

Mr. Chairman, my question for the distinguished gentleman from Oklahoma then is this: In the reductions made by the gentleman's amendment are any of the so-called inflation savings taken from intelligence or intelligence-related accounts?

Mr. McCURDY. The gentleman's question is an important one. The McCurdy-Spratt-Aspin amendment makes reductions in certain fiscal year 1985–86 accounts which have been identified by the Department of Defense as areas where inflation savings could be made. It is the intent of the amendment that these savings do not come from National Foreign Intelligence Program accounts or tactical intelligence and related activities accounts. Therefore, beyond the fiscal year 1987 reductions made in specific intelligence and intelligence-related programs which are known to both the Committee on Armed Services and the Permanent Select Committee on Intellience there are no further deductions intended, nor should the Secretary apply reductions, for intelligence and intelligence-related activities.

Mr. HAMILTON. I thank the gentleman.

Mr. McCURDY. Mr. Chairman, I yield back the balance of my time.

Mrs. COLLINS. Mr. Chairman, for years Congress has acquiesced to President Reagan's inflated military budget requests, stripping vital social programs to throw money at defense. This policy has purchased little in the way of real security—it has only lined the pockets of arms manufacturers and produced weapons that don't work.

Now before I am accused of being unrealistic about U.S. military needs, let me point to an article from Sunday's Washington Post written by a retired marine officer, Lt. Col. David Evans. Colonel Evans is a combat veteran, served as an artillery and infantry officer, and for 3 years was Director of Manpower Planning and Analysis under Secretary of Defense Caspar Weinberger. Certainly, this is not a man who would be naive about America's defense requirements.

So Congress would be advised to listen when a man like Colonel Evans calls for a freeze on defense spending. He states that the weapons which the Pentagon has been purchasing are overly complicated and will fail on the battlefield, leaving our soldiers defenseless. In other words, generals have been spending the taxpayers money gleefully, like little boys in a candy store, buying useless toys, while totally neglecting legitimate defense planning. In Colonel Evans' view, an end to congressional largess might prod the Pentagon into addressing this liability.

It is about time that Congress took the advice of conscientious military officers such as Colonel Evans and stopped throwing money into the black hole of the Pentagon. Just look at some of the unnecessary weapons included in the present Defense authorization bill. Star wars, a dangerously destabilizing system. Antisatellite weapons, which are just as bad as star wars. The MX and Trident D–5 missiles, weapons which are increasing the threat of the arms race. Chemical munitions, barbaric devices of mass destruction which will kill more civilians than enemy soldiers. The Bradley fighting vehicle, which has been described as a rolling coffin. And that's just the tip of the iceberg.

The Dellums-Schroeder Defense budget amendment will put America back on the right track. This amendment will cut many unnecessary weapons and establish some fiscal discipline at the Pentagon. By adopting Dellums-Schroeder, Congress will gain a lean, effective force, and save money to boot. This is the kind of commonsense Defense budget that our Nation so desperately needs.

Mr. HOPKINS. Mr. Chairman, the National Defense Authorization Act of 1987 contains two measures of prime importance to the wel-

fare of our troops and the effective defense of our national security.

First, the Bill Nichols Department of Defense Reorganization Act is the logical next step in the reorganization effort following last year's initiative modifying the structure of the Joint Chiefs of Staff.

This year, we focused our attention on redefining the manner in which the Pentagon conducts its day-to-day business, from combat planning and execution to officer promotions, with one guiding principle—the defense of our Nation should not suffer due to the bureaucratic and parochial rivalries plaguing the Defense Department.

For instance, our package strengthens the operational authority of our theater combatant commanders, enabling them to exercise full authority over all American forces in the field as was originally intended by Presidents Truman and Eisenhower. Currently, our field commanders are hampered by a combination of ambiguous and overloaded chains of command and the counterproductive competition for authority and resources with the individual military services.

We urge your support of this effort to maximize the abilities of our Nation's defense and in the process also enhance the welfare, support, and effectiveness of our men and women in the field.

Second, the committee adopted a package of initiatives to enhance the safety and reliability of charter aircraft used by the Department of Defense to transport defense personnel.

These recommendations resulted from the tragic charter crash last December which resulted in the death of 248 servicemen and women in Gander, Newfoundland, on a return flight to Fort Campbell, KY, from peacekeeping duty in the Sinai Desert.

This legislation clearly reaffirms that the Department of Defense has primary responsibility for ensuring the welfare and safety of military personnel traveling on civilian air carriers.

Our committee found responsibilities for safety neglected and diffused among several agencies and departments with no one willing to take charge in this area. We also found a high degree of safety violations and deficiencies among those charter companies who contract with DOD.

The legislative initiatives incorporated as part of this authorization bill will help ensure that air carriers contracted for transportation of our troops are as safe and reliable as it is humanly possible to make them.

I stand today in support of this legislation and accordingly urge my colleagues' support.

Mr. KRAMER. Mr. Chairman, I rise in support of the fiscal year 1987 national defense authorization bill that is before the House today.

As the gentleman from California [Mr. DELLUMS] has explained, division B of the bill contains the authorization of military construction. It represents an effort by the Armed Services Committee to respond to the military services' most pressing construction needs and at the same time do it within the fiscal constraints that face.

Earlier the gentleman from California explained some of the major adjustments to the bill made by the committee. The Department of Defense [DOD] requested nearly $10 billion for fiscal year 1987 for military construction. This request represented an 8-percent increase over the amount authorized by Congress for the fiscal year 1986 military construction program.

After a very careful review of the military construction program, the committee was able to reduce the request by more than $1.3 billion. Thus, we are presenting to the House today a military construction budget of $8.6 billion which is well below the $9.2 billion authorized for fiscal year 1986.

I believe we were able to bring this about without damaging our defense readiness or postponing badly needed projects to improve the facilities where our military personnel live and work. Even with the changes made by our committee, this bill provides a level of authorization that maintains the committee's priority for quality of life projects. This means that, besides providing facilities for new weapon systems, many substandard structures built during World War II can be replaced, modern barracks and working spaces will be provided for our forces at home and overseas, and programs to comply with environmental laws and for conserving energy will continue at an uninterrupted pace.

Although the committee has brought to the House a bill that represents a smaller total program than that requested by the administration, it preserves our defense readiness and in many instances improves our fighting capabilities. I urge that this bill be passed by the House.

Mr. ASPIN. Mr. Chairman, we yield back the balance of our time.

The CHAIRMAN pro tempore. All time for general debate has expired.

AMENDMENT OFFERED BY MR. SPRATT

Mr. SPRATT. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SPRATT:

At the end of division D (page 365, after line 23), add the following new sections:

SEC. 4005. ADJUSTMENT IN DATE MILITARY PAY TO BE PAYABLE.

(a) PAY TO BE PAYABLE FIRST DAY OF FOLLOWING MONTH.—(1) (Chapter 19 of title 37, United States Code, is amended by adding at the end the following new section:

"§ 1013. Payment date for pay and allowances

"(a) Amounts of basic pay, basic allowance for quarters, basic allowance for subsistence, and other payments of military compensation (other than travel and transportation allowances and separation allowances) shall be paid on the first day of the month beginning after the month during which the right to such compensation accrues.

"(b) Subsection (a) does not preclude one payment in midmonth for any element of compensation and does not affect any authority to make advance payments of pay and allowances.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end the following new item:

"1013. Payment date for pay and allowances.".

(b) RETIREMENT ACCRUAL CHARGE.—Section 1466(a)(2) of title 10, United States Code, is amended by striking out "paid" and inserting in lieu thereof "accrued".

(c) EFFECTIVE DATE.—Section 1013 of title 37, United States Code, as added by subsection (a), and the amendment made by subsection (b) shall take effect on September 1, 1987.

SEC. 4006. REDUCTIONS IN AUTHORIZATIONS.

(a) REDUCTIONS THROUGH ELIMINATION OR REDUCTION IN CERTAIN PROGRAMS.—Sums authorized to be appropriated in this Act are hereby reduced as follows:

| *Section and Account* | *Reduction amount* |
|---|---|
| Department of Defense authorizations: | |
| 101(a): | |
| Missile procurement, Army | $129,500,000 |
| Weapons and tracked combat vehicles, Army | 49,300,000 |
| Ammunition, Army | 37,800,000 |
| Other procurement, Army | 182,300,000 |
| 102(a)—Aircraft procurement, Navy | 680,900,000 |
| 102(b)—Weapons procurement, Navy | −138,200,000 |
| 102(c)—Shipbuilding and conversion, Navy | 798,600,000 |
| 102(d)—Other procurement, Navy | 74,900,000 |
| 102(e)—Procurement, Marine Corps | 40,200,000 |
| 103(a): | |
| Aircraft procurement, Air Force | 994,200,000 |
| Missile procurement, Air Force | 11,700,000 |
| Other procurement, Air Force | 214,700,000 |
| 104—Procurement, Defense Agencies | 41,000,000 |
| 201: | |
| Research, development, test, and evaluation, Army | 54,400,000 |
| Research, development, test, and evaluation, Navy (including the Marine Corps) | 456,100,000 |
| Research, development, test, and evaluation, Air Force | 407,100,000 |
| Research, development, test and evaluation, Defense Agencies | 461,600,000 |
| 301: | |
| Operation and maintenance, Army | 700,000 |
| Operation and maintenance, Navy | 60,000,000 |
| Operation and maintenance, Air Force | 268,800,000 |
| Operation and maintenance, Defense Agencies | 31,300,000 |
| National Board for the Promotion of Rifle Practice | 3,400,000 |
| Foreign Currency, Fluctuations, Defense | 495,000,000 |
| 312—Aid to Afghanistan | 6,000,000 |
| Military Construction Authorizations: | |
| 2110: | |
| Military construction, Army | $99,100,000 |
| Inside the United States | 50,210,000 |

| Section and Account | Reduction amount |
|---|---|
| Outside the United States | 48,890,000 |
| 2210: | |
| Military construction, Navy | 100,350,000 |
| Inside the United States | 78,480,000 |
| Outside the United States | 1,870,000 |
| Military family housing construction | 20,000,000 |
| 2306: | |
| Military construction, Air Force | 97,730,000 |
| Inside the United States | 53,150,000 |
| Outside the United States | 44,580,000 |
| Department of Energy National Security Programs: | |
| 3011—Operating Expenses | $100,000,000 |
| 3011(1): | |
| Weapons activities | 81,000,000 |
| Research and development | 41,000,000 |
| Weapons testing | 22,000,000 |
| Production and surveillance | 18,000,000 |
| 3011(4): | |
| Defense nuclear materials production | 10,000,000 |
| Uranium enrichment for naval reactors | 6,000,000 |
| Processing of defense nuclear materials | 4,000,000 |
| 3011(5): | |
| Defense nuclear waste and byproduct management | 9,000,000 |
| Interim waste management | 6,000,000 |
| Long-term waste management technology | 3,000,000 |
| 3012—Plant and capital equipment: Weapons activities, project 84-D-211 | 10,000,000 |
| 3013—Strategic Defense Initiative | 63,000,000 |

(b) OBLIGATION LIMITATIONS.—Limitations on obligations in this Act are hereby reduced as follows:

| Section and program | Reduction amount |
|---|---|
| 102(b): | |
| Missile programs | $115,400,000 |
| MK-48 Torpedo Program | −253,400,000 |
| 102(c)—DDG-51 Guided Missile Destroyer Program | 798,600,000 |
| 102(d): | |
| Aviation support equipment | 34,900,000 |
| Civil engineering support equipment, supply support equipment, and command support equipment | 40,000,000 |

Section 4007. Limitation on obligation of fiscal year 1985 and fiscal year 1986 funds.

Funds appropriated for fiscal year 1985 and 1986 and remaining available for obligation may not be obligated as follows:

| Account | 1985 amount | Fiscal year 1986 amount |
|---|---|---|
| Aircraft Procurement, Army | $21,000,000 | $100,800,000 |
| Missile Procurement, Army | 21,400,000 | 91,900,000 |
| Procurement of Weapons and Tracked Combat Vehicles, Army | 43,900,000 | 211,400,000 |
| Procurement of Ammunition, Army | 3,900,000 | 30,300,000 |
| Other Procurement, Army | 15,600,000 | 123,600,000 |
| Aircraft Procurement, Navy | 86,300,000 | 446,100,000 |
| Weapons Procurement, Navy | 48,800,000 | 215,600,000 |
| Shipbuilding and Conversion, Navy | 168,700,000 | 367,500,000 |
| Other Procurement, Navy | 16,100,000 | 117,110,000 |
| Procurement, Marine Corps | 18,200,000 | 52,000,000 |
| Aircraft Procurement, Air Force | 212,500,000 | 714,500,000 |
| Missile Procurement, Air Force | 53,400,000 | 326,400,000 |
| Other Procurement, Air Force | 19,100,000 | 181,100,000 |
| National Guard and Reserve Equipment | 900,000 | 17,900,000 |
| Procurement, Defense Agencies | 4,000,000 | 31,000,000 |
| Research, Development, Test and Evaluation, Army | 1,900,000 | 71,200,000 |
| Research, Development, Test and Evaluation, Navy | 2,800,000 | 71,900,000 |
| Research, Development, Test and Evaluation, Air Force | 6,000,000 | 176,400,000 |
| Research, Development, Test and Evaluation, Defense Agencies | 1,400,000 | 84,700,000 |
| Director of Test and Evaluation, Defense | 0 | 700,000 |
| Military Construction, Army | 6,800,000 | 64,400,000 |
| Military Construction, Navy | 6,800,000 | 45,200,000 |
| Military Construction, Air Force | 6,300,000 | 43,200,000 |
| Military Construction, Defense Agencies | 1,900,000 | 5,300,000 |
| Military Construction, Army National Guard | 0 | 2,500,000 |
| Military Construction, Air National Guard | 200,000 | 3,300,000 |
| Military Construction, Army Reserve | 0 | 1,800,000 |
| Military Construction, Naval Reserve | 0 | 1,200,000 |
| Military Construction, Air Force Reserve | 200,000 | 1,800,000 |
| North Atlantic Treaty Organization Infrastructure | 0 | 8,000,000 |
| Family Housing, Army | 900,000 | 19,400,000 |
| Family Housing, Navy and Marine Corps | 400,000 | 8,800,000 |
| Family Housing, Air Force | 2,400,000 | 12,300,000 |

Mr. SPRATT (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

The CHAIRMAN pro tempore. Under the rule, the gentleman from South Carolina [Mr. SPRATT] will be recognized for 15 minutes and a Member opposed will be recognized for 15 minutes.

The Chair recognizes the gentleman from South Carolina [Mr. SPRATT].

Mr. SPRATT. Mr. Chairman, I also have to add to my remarks on the amendment a statement of the programmatic adjustments and deletions that will be necessitated by this amendment.

Except where otherwise noted, all amounts are in millions of dollars.

PROGRAMMATIC ADJUSTMENTS—DELETIONS

| | Budget authority | Outlays |
|---|---|---|
| PROCUREMENT | | |
| Army | | |
| Missiles | 129.5 | 10.3 |
| Patriot | 30.0 | |

Mr. SPRATT. Mr. Chairman, we have discussed and I have outlined the purpose, the details and the context of this amendment. Let me simply say without taking up any unnecessary amount of time that the purpose of this amendment is simply to bring the budget, the defense budget, the defense authorization bill in line with the budget. The budget as it is, as it comes to the floor, is $6.2 billion over in outlays. The committee was aware of this problem. We were aware of this problem when the budget was at $285 billion, and we addressed that by adding another $5.8 billion in budget authority to the amount to which we had marked the bill.

The Courter-Dickinson amendment ratifies this logic. By this amendment we simply attempt to return the defense budget down to the level of outlays that we have already agreed to, $279.2 billion, and we do it by honest means.

We do it first by deleting $5.8 billion in program authority which we cannot provide for. We can accommodate $279.2 billion in agreed-upon outlays, and we use other accounting changes

which CBO will score as having an outlay impact sufficient to take us down to the level in our concurrent budget resolution.

Mr. Chairman, I yield 4 minutes to the chairman of the Committee on the Budget, the gentleman from Pennsylvania [Mr. GRAY].

Mr. GRAY of Pennsylvania. Mr. Chairman and colleagues, today we are at a critical point in terms of dealing with the problem of the deficit. OMB, which is the executive branch Office of Management and Budget, came out with its projections for the deficit for 1986 of a record $230 billion. CBO predicts $224 billion. We now have the Gramm-Rudman-Hollings Deficit Reduction Act which we must comply with. That act measures outlays as the measurement for deficit reduction. It sets a hard, fixed target of $144 billion that must be reached.

We now know that CBO is predicting that their August 15 snapshot will show that we are $30 billion over that target. We also know that OMB will probably predict that we are at least $10 billion over that target. Under the Gramm-Rudman law there must be an average. Thus the average will mean that we are minimally $20 billion over Gramm-Rudman $144 billion.

The reason I raise that is because I think it is important to this debate today. The gentleman from Alabama is absolutely right when he says the budget conference set the budget authority at $292 billion. The gentleman is right.

He is absolutely right by saying that the committee is within the conference by building its authority on that ceiling. And so what we really have here today is a choice, a choice as the gentleman pointed out, between one budget authority ceiling which was the conference report and another one based upon some recognition of the Gramm-Rudman reality.

And I, today, urge the Members to choose the Spratt-McCurdy-Aspin choice. And let me tell you why.

Because I think if we do not make that choice, what will happen is that we are going to face, in September, a sequester order which will mean a reduction of minimally $4 billion in our national defense in outlays.

It could mean, ladies and gentlemen, $10 billion. Now I know none of us want that.

The gentleman from Alabama is absolutely correct when he points out that defense growth has been held back, and the reality is that last year we had hoped that we were going to do 3-percent growth. But the deficits have increased. One of the reasons the deficits have increased, even OMB admits it, is that we have overspent defense above the budget of 1986 by $7 billion.

So I would say to you if you do not want to hurt national security in September vote for McCurdy-Spratt-Aspin in August.

Mr. Chairman, I yield to the gentleman from Alabama [Mr. DICKINSON].

Mr. DICKINSON. I thank the gentleman for yielding.

I just want to clear up one point, and I believe the gentleman will agree. This is the first time ever that the authorization committee has even felt obligated, certainly have no responsibility, to reach the outlay figures. It has always been budget authority, and we have marked to the figure the gentleman from Pennsylvania has given us, is that not correct?

Mr. GRAY of Pennsylvania. The gentleman is absolutely correct. This year, though, because of the Gramm-Rudman reality, which is the outlay reality, by reducing budget authority in the Spratt-Aspin-McCurdy, you are assuring that your outlays will be lower and thus you are posing a cap that will prevent the executive branch from overspending in 1987 as they have done in 1986.

□ 1130

Mr. DICKINSON. Mr. Chairman, I rise in opposition to the amendment.

The CHAIRMAN pro tempore (Mr. DASCHLE). The gentleman from Alabama [Mr. DICKINSON] is recognized for 15 minutes.

Mr. DICKINSON. Mr. Chairman, I yield 6 minutes to the gentleman from New Jersey [Mr. COURTER].

Mr. COURTER. Mr. Chairman, I thank the gentleman for yielding this time to me.

Mr. Chairman, first of all, I would like to mention the fact that really this House has two choices. One choice is to retain the authority that this House has already voted and meet outlays, or cut the authority and meet outlays.

There is no debate over whether we are going to reach outlays. Both the amendment and the substitute reach the same outlays.

And no one can make the argument that if we pass one or the other, therefore, we will be more likely toward sequestration because the outlay figures in both are the same. As a matter of fact, under the substitute, the Dickinson substitute, they are less. They are about $1 million less than the outlays under the Spratt amendment.

I would like to go on and say that if there is going to be a sequestering problem, it is not because of this bill. It is because Agriculture is $173 million above outlays; Commerce, State and Justice, $610 million; Washington, DC, appropriations is over in outlays; Energy, Water over in outlays; Transportation over in outlays; Treasury and Postal Service over in outlays. We have not made any of them.

We are going to make them in this bill. We are going to make them in this bill whether the amendment passes or the substitute passes, and I think that is a crucial distinction.

I would like to go into what really the Spratt amendment does. What does it cut? They say, we were more realistic. We cut $6 billion in real program authority. Well, they certainly did.

The first thing that they did was to make some cuts in some very important programs that deal with some issues that everybody recognizes are important.

I remember there was a report that was filed by the staff of a committee saying, what have we purchased for $1 trillion over a period of time? And the administration was criticized, excoriated, because there was insufficient money for readiness and R&D and spare parts, those types of things.

But the Spratt amendment reduces in those areas. I takes nothing from strategic weapons. It takes nothing from strategic defense. It takes nothing from the Stealth technology bomber, B-1's, it cuts in readiness. It cuts in fuel.

For instance, that report said that under the Reagan administration we see an absolute decline in two categories, and one was defense missiles, being very critical in that report.

What does this amendment do with regard to defense missiles? It cuts defense missiles, three of them. The Chaparral missile is cut by a number of millions of dollars, $20 million, and $52 million, 150 missiles for Patriot, $21 million for Hawk missiles.

Then when it comes to readiness, what does the Spratt amendment do on readiness? It cuts spare parts, repairs, training targets and ammunition. To be specific $36 million in spare parts for the Army, $17 million in spare parts for the Navy, $37 million cut from the Army ammunition account, $32 million from the Air Force ammunition account.

Mr. KASICH. Mr. Chairman, will the gentleman yield?

Mr. COURTER. I yield to the gentleman from Ohio.

Mr. KASICH. Mr. Chairman, what the gentleman is pointing out is there are cuts under Spratt-Aspin that do not occur under the Dickinson-Courter amendment, and yet we are able to meet the outlay target just like they can.

Maybe the gentleman ought to spend at least a few minutes explaining exactly how our budget amendment can allow us to hit outlays and yet have greater authority and still provide for these systems.

Mr. COURTER. Mr. Chairman, that explanation was already made by the gentleman from Alabama [Mr. DICKINSON]. I only have a few minutes, and I know that the gentleman from Ohio can make those explanations. I would

like to use my time to point out another thing.

The Aspin-Spratt amendment cuts $20 million for training, Navy aerial targets, drones and decoys accounts.

Also, I might add that we found out that if assistance to Afghan refugees who are being carpet bombed as we are debating, if that is important, the Spratt-Aspin amendment cuts $6 million for the refugees in Afghanistan.

Also, we notice there is an obligation that the Defense Department has to NASA. That obligation is made by interagency agreement, $500 million. This amendment cuts $268 million from that existing obligation that cannot be changed. So they are going to have to come up with that money in a new bill or in some way anyway. That money is an obligation. There is no sense in trying to say you are saving money by cutting the payment to NASA when that obligation is already made.

The point here, and I think the gentleman from Ohio was making it, it is a choice between ratifying the work of the Budget Committee—the Dickinson substitute says that the Budget Committee did a good job. We notice that the chairman of the Budget Committee came to the floor saying they preferred something else. What the Dickinson amendment does is ratifies the work of the Budget Committee on outlays and authorization. Also, it gets you the same outlays, actually less, gives you the pay raise and does not gut the important areas of readiness, training, spare parts and conventional capabilities.

So once again the House has a choice of ratifying the work of the Budget Committee, and ratifying the work of this body. We already voted on 292 in authorization. The Dickinson amendment ratifies the work of this body.

A yes vote is a proper one. A yes vote maintains the readiness accounts, the spare parts accounts, and those other things such as training that essentially are important for our national defense.

Mr. SPRATT. Mr. Chairman, before yielding time to Mr. LEATH of Texas, let me respond and yield myself such time as I may consume.

Mr. Chairman, the cuts made in this amendment are not cuts that we have made. The amendment simply reinstates reductions made by each of the subcommittees very deliberately in the authorization bill prior to the time that we knew we had or would be allowed more than $285 billion of budget authority.

Mr. Chairman, I yield 2 minutes to the gentleman from Texas [Mr. LEATH], a member of the committee.

Mr. LEATH of Texas. Mr. Chairman, as my friend, the gentleman from Texas [Mr. STENHOLM] quite accurately put it, this is a painful thing. It is a painful thing for me. I do not very often disagree with my friend, the gentleman from Alabama [Mr. DICKINSON].

But I think what we are having to recognize here is something that just happens to be the truth. And it is not only in the area of defense, it is across the entire budget spectrum.

We have a country today, a nation today, that is in chapter XI. We are bankrupt. The administration says the way we get out of that is we start selling off the assets of the country.

The truth is, for those of us who have been deeply involved in the budget process for some time and those of us who are deeply concerned about the defense of this country, we have played games with these budget authority outlay figures, just as we have played games with every function of the budget.

My friends over here are absolutely right. We need the things that are going to be cut out under this scenario. But it is not the Spratt amendment that is causing that to be cut out. It is the unrealisitic knowledge of the White House in particular on what they signed off on when they said, we are not going to face up to the responsibility of solving the simple problems of the country; we are going to have Gramm-Rudman do it for us.

This is just the first of a great many painful acts that this institution is going to have.

As my friend, the gentleman from Pennsylvania [Mr. GRAY] pointed out, we are fixing to get a new set of rosy scenarios from OMB. That is going to postpone this problem into another year or two.

Let me tell you what. The danger to the defense of this country is not in us attempting to restrain that growth at this point. The danger in the defense of this country is for us to continue turning our backs on this fiscal problem and wake up a year or two from now and find out that the cuts are going to be enormous and that we really are going to cut into the bone of the defense of this country.

□ 1140

I think that this amendment helps to move us in that direction. I do not like it, but I think it is something that has to be done.

The CHAIRMAN pro tempore. The time of the gentleman from Texas [Mr. LEATH] has expired.

Mr. DICKINSON. Mr. Chairman, I yield 1 minute to the gentleman from Texas.

Mr. Chairman, will the gentleman yield?

Mr. LEATH of Texas. I yield to the gentleman.

Mr. DICKINSON. The gentleman and I do not differ in where we are trying to go; we just differ in the effect of what we are trying to do.

Would the gentleman agree with me that in the gimmicks that are put forth in the Spratt amendment or in my amendment neither one saves the spending of a dime?

Mr. LEATH of Texas. No, sir, I do not think I would agree with that.

Mr. DICKINSON. Please tell me what is the difference in the two? They are just changing dates, they are claiming savings. It is all smoke and mirrors. If they want more smoke and mirrors we can out-smoke and mirror them. But it does not save the spending of anything. I just wish that the gentleman was not making such a terrible mistake in this one instance.

Mr. ASPIN. Mr. Chairman, will the gentleman yield?

Mr. LEATH of Texas. I yield to the gentleman from Wisconsin.

Mr. ASPIN. I thank the gentleman for yielding.

Mr. Chairman, it seems to me that it does save money. We have got two cases, very important cases, where it does save money. One is also in your amendment which is the inflation money. That is saved because that could be spent. The second is the real cuts in budgetary authority.

Mr. SPRATT. Mr. Chairman, I yield 2½ minutes to the gentleman from Georgia [Mr. RAY].

Mr. RAY. I thank the gentleman for yielding me this time.

Mr. Chairman, I rise in support of the Spratt-McCurdy-Aspin amendment. This amendment seeks to realistically address the principles of defense budget outlays, which is the key to preventing a Gramm-Rudman sequestration.

I won't attempt in this limited amount of time to go into the details of budget authority and budget outlays. Mr. Spratt and others have done that very well already, but the outlays is simply the amount of dollars that we are concerned with spending in 1987.

Mr. Chairman, I am strongly pro-defense. I believe that it is imperative that we maintain a strong deterrent, but I support an affordable defense. in opinion, the Spratt amendment better addresses a realistic approach than does any other proposal being offered.

My colleagues, I don't have to tell you that we have a serious problem facing not only the Defense budget but also the entire 1987 Federal budget. I don't have to tell you that we owe foreign nations more than they owe us, which gives us the unwelcome title of being the largest debtor nation in the world.

But, despite this fact, we have the administration, the Department of Defense, and some Members of Congress lobbying for exotic new programs, such as SDI, the Stealth bomber, the light infantry division, homeporting, the C-17, and other new programs

running into the billions of dollars. Programs which I support, but would be nice to have, but programs which will strain the operatings and maintenance of the existing defense structure.

We have a growing defense overhead as it is, incurred by the present defense program, which threatens to go into default within this century—because of the debtor nation status of our country and because of our inability to curb deficit spending and to bring it in line with budgetary income.

It is a mystery to me that the administration, the Department of Defense, and some of us in this body, can't use simple arithmetic.

The fact is: First, we owe more than $2 trillion. The interest on this debt in 1986 is $165 billion, second, Gramm-Rudman caps borrowing in 1987 at $144 billion, third, it puts a limit on the giant Federal credit card, fourth, let's face it, we have to cut spending or increase taxes.

The heart of the American free enterprise system is built on such economic principles—so, let's face it!

The truth, Mr. Chairman, is that the Fed—Santa Claus has died, Gramm-Rudman delivered the death notice! And the administration, DOD, and the Congress can't seem to accept it.

Mr. Chairman, we have to protect our present defense system, bought and paid for with borrowed dollars, yet to be paid for by our children and grandchildren, and their children.

To overspend to the point of causing of Gramm-Rudman sequestration will hollow out our defense in the areas of: The operations and maintenance; the spare parts; the personnel; the flying time; the steaming time; and the training.

We cannot jeopardize our defense by adopting unreasonable spending levels and by mismatching budget authority and budget outlays!

The Spratt amendment is the best way to prevent this and I urge its adoption.

Mr. DICKINSON. Mr. Chairman, I yield 5 minutes to the gentlewoman from Illinois [Mrs. MARTIN].

Mrs. MARTIN of Illinois. I thank the gentleman for yielding me this time.

Mr. Chairman, realistically, for most Members this discussion has been reaching for People magazine. Spending hours on outlays versus authority does not set the heart a-trembling and beating. As a matter of fact, there are very few Members who understand this discussion, and very few of the rest of the Members have any desire to indicating their great, good sense.

What we have today is a rather esoteric argument. We have two sides not based in any partisan way that I can see, using gimmicks to get to numbers that are not as accurate as they should have been, that were imposed upon the Armed Services Committee by another committee.

Now, it is never nice to have another committee impose numbers on one. But the fact is that that right was given to the Budget Committee, and with incredible support. In fact, for the first time in the 6 years since I have been here, by bipartisan support. The Budget Committee passed numbers imposing not just on armed services, but on every jurisdictional committee, outlay and authority targets.

Early in the process, the very distinguished chairman from the State of Wisconsin, the distinguished ranking member, suggested that there would be some problems with the outlays versus the authority numbers. That letter was given to members of the Budget Committee and there were attempts made to answer the difficulties that the chairman and ranking member suggested were a problem.

That issue then is over. Next year, maybe the Budget Committee can do better, but right now the Budget Committee has given those numbers to us all. To look at the Spratt-Aspin-McCurdy et cetera amendment is not going to make one bit of difference. It in fact, though, will be the only time this Congress will be changing the BA authority in any Department, which is rather fascinating.

In fact, the Budget Committee's numbers which we, I would say "all," there was a huge, overwhelming vote, which drives the 302(b) allocations. Thus far, this same Congress has ignored those and gone up on every single one of them. Now, we have the rather unique situation that we are going to go back and change the budget and take it lower in this one category or another.

If we had started this at the beginning, I might have a slightly greater belief that this is done in seriousness. To infuriate both sides, it is nuts. Both sides, let us not suggest they are lying because Members of Congress would never lie. Members of Congress can fantasize though, and we are surely doing it here today.

May I suggest that we stick with the budget numbers, go on with the discussion of the items. There are 150 brilliant amendments that other Members have come up with. Stay with the budget and get down to work.

Mr. SPRATT. Mr. Chairman, I yield 1 minute to the gentleman from Florida [Mr. MACKAY].

Mr. MACKAY. I thank the gentleman for yielding to me.

Mr. Chairman, the gentlewoman just alluded to what I consider to be the major point in this debate. This is the first time that an authorizing committee has seen it as its responsibility to set priorities from an authorizing committee standpoint within the constraints of the budget.

When you start thinking about how the budget process is going to work and whether authorizing committees are going to continue to have any relevance when you are cutting back, you have got to realize that every authorizing committee is going to have to start doing what Mr. SPRATT and his colleagues have done here.

I congratulate them. I hope everybody will understand this to be a very central issue in the way the budget process is going to work under Gramm-Rudman. If authorizing committees continue to set blank checks hoping they can get more and more and that the Appropriations Committee will do it, that is not going to work when you are cutting back. In fact, what is going to happen is you are going to get Frenzel amendments, Morrison amendments and other amendments and authorizing committees are going to be irrelevant.

I congratulate Mr. SPRATT and I urge adoption of this amendment.

□ 1150

Mr. DICKINSON. Mr. Chairman, I yield the balance of my time to the gentleman from Indiana [Mr. BURTON].

The CHAIRMAN pro tempore (Mr. DASCHLE). The gentleman from Indiana [Mr. BURTON] is recognized for 4 minutes.

Mr. BURTON of Indiana. Mr. Chairman, I thank the gentleman for yielding this time to me.

Mr. Chairman, I get a kick out of many of my colleagues who have been in the well talking about fiscal responsibility and how we should live within the constraints of Gramm-Rudman. The gentleman from New Jersey [Mr. COURTER] pointed out that the agriculture bill was $173 million over, the Justice, Commerce and State bill was $610 million over, District of Columbia was $2 million over, Energy and Water was $518 million over, Transportation was $13 million over, and Treasury and Postal Service was $209 million over. Many of my colleagues who were in the well just previous to me voted for these excessive spending bills; yet they are up here on the Defense bill saying that we have got to live within Gramm-Rudman or face sequestration later in the session. I believe that most of us think that sequestration is inevitable anyway the way we are headed.

But it really bothers me that my colleagues come up here and sanctimoniously talk about living within Gramm-Rudman and cutting spending. I just, out of curiosity, got a copy of the National Taxpayers Union list, and I note that several of my colleagues who were down here talking about fiscal responsibility are listed as the biggest spenders in the Congress of the United States, according to the National Taxpayers Union. So I think it is kind of

hypocritical to be up here taking that position on one issue and not doing it on the others.

Let me just say one other thing that I am very concerned about. That is the point that was brought out by the ranking Republican on the committee. He pointed out that it was going to cost $6 million for each F-15 if we went through this cut and adopted this amendment. Now, $6 million times an estimated 12 F-15's that would be cut over and above the Dickinson amendment amounts to an additional $72 million in expenditures while we are cutting back on aircraft.

On F-16's it is going to cost $18 million in additional expenditures because we are cutting back, because they are going to cut back on the assembly lines and extend the length of production time. The F-18's are going to cost $24 million more. So just on the F-16's, the F-15's, and the F-18's, in addition to reducing the number of aircraft and reducing the military preparedness of the United States of America in the process, we are also going to increase the expenditure for those airplanes by $114 million.

I submit to my colleagues that we are not doing any service for the United States of America by making these cuts. I also submit that a more responsible approach would be to support the Dickinson proposal.

The CHAIRMAN pro tempore. The gentleman reserves the balance of his time, so the gentleman from Alabama [Mr. DICKINSON] retains 1 minute.

The Chair recognizes the gentleman from South Carolina [Mr. SPRATT].

Mr. SPRATT. Mr. Chairman, I yield 1 minute to the gentleman from California [Mr. PANETTA].

Mr. PANETTA. Mr. Chairman, the basic point comes down to this: That sequester under Gramm-Rudman is based on outlays, not budget authority. But outlays are dependent on budget authority. We cannot separate the two out. There is a fixed ratio, a fixed spend-out rate between budget authority and outlays. We all know that. High budget authority means that we have high outlays. It may not happen in 1987, but it will happen in 1988 or 1989 or 1990.

Once we build in that budget authority we are going to have the outlay expenditures. Lower budget authority means that we are going to have lower outlays.

So the basic issue here comes down to this: Which one of these amendments does the most with regard to budget authority? The Spratt amendment reduces budget authority by $5.8 billion. That means we have a much better chance of meeting our outlay target. The Dickinson amendment maintains the budget authority at a higher level, and that means higher outlays. We cannot get away from that.

So, Mr. Chairman, if Members are serious about abiding by the terms of Gramm-Rudman, they have no alternative but to reduce budget authority and vote for the Spratt amendment.

The CHAIRMAN pro tempore. The gentleman from Alabama [Mr. DICKINSON] has 1 minute remaining.

Mr. DICKINSON. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN pro tempore. The Chair recognizes the gentleman from South Carolina [Mr. SPRATT].

Mr. SPRATT. Mr. Chairman, I yield myself the balance of my time.

Mr. Chairman, in conclusion, let me just hit four highlights.

First of all, the other side has continually said that we are using gimmicks here. The biggest cut we make in bringing budget authority into line with outlays—and that is the single purpose of this amendment—is that we cut $5.8 billion in budget authority. That is no gimmick. If it were a gimmick, they would not be opposing it so arduously. That is a real cut, and it has to be made realistically to bring this Defense authorization bill down to $279.2 billion in outlays.

Second, we rescind $1.9 billion in an overappropriation, an excess amount that we appropriated for inflation in the procurement accounts in fiscal year 1986 and fiscal year 1985. That is a real cut. The number was generated with the help of the Department of Defense, and it will result in outlay reductions of $1.4 billion in fiscal year 1987. CBO will score it that way. It is no gimmick.

Now, we do have a gimmick. We change the pay date from September 30 to October 1. There is no pretense about it, that is a gimmick, but they use it, too. And I emphasize this: CBO will score that as an outlay reduction for fiscal year 1986 of $2.9 billion

Let me also emphasize that we have not and do not wish to make cavalier, haphazard, meat ax, across-the-board cuts. All we do by this amendment is reinstate the mark that the committee itself made when we thought our budget authority was $285 billion. These cuts have been very selectively chosen by the subcommittees of the Committee on Armed Services. This is not an argument about what we should spend on defense. We had that argument. It lasted for 6 months. We agreed the level of spending for next year should be $279.2 billion.

Mr. Chairman, this amendment is simply to conform to the agreement and the conclusion we earlier reached about outlays for the coming fiscal year.

The CHAIRMAN pro tempore. The time of the gentleman from South Carolina [Mr. SPRATT] has expired. All time on the amendment has expired.

Mr. FRENZEL. Mr. Chairman, throughout this year I have strongly advocated strict fiscal control, usually in the form of a freeze on all areas of Federal spending. Failing that, I believe that it is critical that we at least adhere to the levels set by the budget resolution recently passed by Congress. We are in the midst of a deficit crisis which, in my judgment, is of far greater importance than any other issue before Congress.

Because I believe the need to put our fiscal house in order is paramount, I support the Spratt amendment to bring the defense authorizations bill within the outlay target for defense that Congress passed earlier this year.

The Budget called for Budget Authority of $292.2 billion for defense, but only $279.2 billion of actual expenditures, or outlays. The committee's bill is within its budget authority target, but exceeds its outlay target by $6.2 billion. Those outlays are what actually determine our deficit, and exceeding our target by $6 billion would be an irresponsible action that will drastically compound our existing budgetary dilemma.

I grant that this is an authorizations bill, and that expenditures are controlled in the end by appropriations. However, this year in particular no defense appropriation will be passed. Defense will be funded in a continuing resolution which will be set at the rate in the authorization bill.

Obviously, this bill is the main annual congressional statement of defense policy. It should conform to the fiscal realities of the day. As usual, the nonprofessional management of the House has made it impossible for appropriations process to control spending.

The Spratt amendment brings the defense bill back in compliance with the budget resolution's requirements. It does so with a blend of real reductions and accounting gimmicks. It is not the freeze I sought, but it brings us closer to our fiscal deficit targets.

The Spratt amendment calls for reductions to some procurement and research accounts, while preserving essential readiness portions of the bill. It also rescinds $1.4 billion of budget authority from procurement accounts which in previous years received overgenerous inflation adjustments, and it achieves a paper-only savings of $2.9 billion by changing military payday from the last day of each month to the first.

Mr. SPRATT provides some real savings as well as some gimmicks. His principle rival's amendment, the Dickinson amendment, is more reliant on smoke and mirrors. It contains fewer real cuts. In my judgment, the only way to achieve real savings is to reduce real expenditures. Mr. SPRATT does not do the full job, but Mr. DICKINSON does it even less well.

In fact, the Dickinson amendment, by adding a 10-day additional delay in reimbursement on Defense contracts, may in the long run add expense to the Government. If we adopt the Dickinson amendment, contractors sooner or later will raise prices to compensate for the lost time value of their money.

Mr. Chairman, though the savings achieved in the Spratt amendment come through fairly complex means, the goal of the amendment and the reason for my vote are simple. In an age of soaring deficits, we cannot afford to exceed our budget resolution's limits. The Spratt amendment is the only available means

71-059 O-87-19 (Pt. 14)

to bring the Defense authorizations bill back within those limits.

The question is on the amendment offered by the gentleman from South Carolina [Mr. SPRATT].

The question was taken; and the Chairman pro tempore announced that the ayes appeared to have it.

RECORDED VOTE

Mr. DICKINSON. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 245, noes 156, not voting 30, as follows:

□ 1200

The Clerk announced the following pairs:

On this vote:

Mr. Ford of Tennessee for, with Mr. Lungren against.

Mr. Barnes for, with Mr. Campbell against.

Messrs. WALDON, STANGELAND, and RINALDO changed their votes from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

□ 1215

AMENDMENT OFFERED BY MR. DICKINSON

Mr. DICKINSON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DICKINSON: At the end of division D (page 365, after line 23), add the following new sections:

SEC. 4005. ADJUSTMENT IN DATE MILITARY PAY TO BE PAYABLE.

(a) PAY TO BE PAYABLE FIRST DAY OF FOLLOWING MONTH.—(1) Chapter 19 of title 37, United States Code, is amended by adding at the end the following new section:

"§ 1013. Payment date for pay and allowances

"(a) Amounts of basic pay, basic allowance for quarters, basic allowance for subsistence, and other payments of military compensation (other than travel and transportation allowances and separation allowances) shall be paid on the first day of the month beginning after the month during which the right to such compensation accrues.

"(b) Subsection (a) does not preclude one payment in midmonth for any element of compensation and does not affect any authority to make advance payments of pay and allowances.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end the following new item:

"1013. Payment date for pay and allowances.".

(b) RETIREMENT ACCRUAL CHARGE.—Section 1466(a)(2) of title 10, United States Code, is amended by striking out "paid" and inserting in lieu thereof "accrued".

(c) EFFECTIVE DATE.—Section 1013 of title 37, United States Code, as added by subsection (a), and the amendment made by subsection (b) shall take effect on September 1, 1987.

SEC. 4007. LIMITATION ON OBLIGATION OF FISCAL YEAR 1985 AND FISCAL YEAR 1986 FUNDS.

Funds appropriated to the Department of Defense for fiscal year 1985 and fiscal year 1986 and remaining available for obligation may not be obligated as follows:

| Account | 1985 amount | Fiscal year 1986 amount |
|---|---|---|
| Aircraft Procurement, Army | $21,000,000 | $110,800,000 |
| Missile Procurement, Army | 21,400,000 | 91,900,000 |
| Procurement of Weapons and Tracked Combat Vehicles, Army | 43,900,000 | 211,400,000 |
| Procurement of Ammunition, Army | 3,900,000 | 30,300,000 |
| Other Procurement, Army | 15,600,000 | 123,600,000 |
| Aircraft Procurement, Navy | 86,300,000 | 446,100,000 |
| Weapons Procurement, Navy | 48,800,000 | 215,600,000 |
| Shipbuilding and Conversion, Navy | 168,700,000 | 367,500,000 |
| Other Procurement, Navy | 16,100,000 | 117,100,000 |
| Procurement, Marine Corps | 18,200,000 | 52,000,000 |
| Aircraft Procurement, Air Force | 212,500,000 | 714,500,000 |
| Missile Procurement, Air Force | 53,400,000 | 326,400,000 |
| Other Procurement, Air Force | 19,100,000 | 181,100,000 |
| National Guard and Reserve Equipment | 900,000 | 17,900,000 |
| Procurement, Defense Agencies | 4,000,000 | 31,000,000 |
| Research, Development, Test and Evaluation, Army | 1,900,000 | 71,200,000 |
| Research, Development, Test and Evaluation, Navy | 2,800,000 | 71,900,000 |
| Research, Development, Test and Evaluation, Air Force | 6,000,000 | 176,400,000 |
| Research, Development, Test and Evaluation, Defense Agencies | 1,400,000 | 84,700,000 |
| Director of Test and Evaluation, Defense | 0 | 700,000 |
| Military Construction, Army | 6,800,000 | 64,400,000 |
| Military Construction, Navy | 6,800,000 | 45,200,000 |
| Military Construction, Air Force | 6,300,000 | 43,200,000 |
| Military Construction, Defense Agencies | 1,900,000 | 5,300,000 |
| Military Construction, Army National Guard | 0 | 2,500,000 |
| Military Construction, Air National Guard | 200,000 | 3,300,000 |
| Military Construction, Army Reserve | 0 | 1,800,000 |
| Military Construction, Naval Reserve | 0 | 1,200,000 |
| Military Construction, Air Force Reserve | 200,000 | 1,800,000 |
| North Atlantic Treaty Organization Infrastructure | 0 | 8,000,000 |
| Family Housing, Army | 900,000 | 19,400,000 |

| Account | 1985 amount | Fiscal year 1986 amount |
|---|---|---|
| Family Housing, Navy and Marine Corps | 400,000 | 8,800,000 |
| Family Housing, Air Force | 2,400,000 | 12,300,000 |

SEC. 4008. COST REDUCTIONS IN CONTRACT ADMINISTRATION.

(a) EARLY DELIVERY OF GOODS AND SERVICES.—(1) The Secretary of Defense shall direct that during fiscal year 1987 a component of the Department of Defense may not accept early delivery of goods or services from a contractor unless acceptance of such early delivery is necessary in the interests of national defense.

(2) For purposes of paragraph (1), the term "early delivery", with respect to a contract, means delivery to the Department of Defense of goods or services under the contract before the date on which delivery of such goods or services is otherwise required or scheduled.

(b) PROGRESS PAYMENTS.—The Secretary of Defense shall direct that during fiscal year 1987 a progress payment to a defense contractor (other than a payment to a small business concern) shall, notwithstanding any other law or regulation, be paid 10 days later than the date on which the payment would otherwise be made.

Mr. DICKINSON (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore (Mr. DASCHLE). Is there objection to the request of the gentleman from Alabama?

There was no objection.

The CHAIRMAN pro tempore. Under the rule, the gentleman from Alabama [Mr. DICKINSON] will be recognized for 15 minutes and a Member opposed to the amendment will be recognized for 15 minutes.

The Chair recognizes the gentleman from Alabama [Mr. DICKINSON].

Mr. DICKINSON. Mr. Chairman, I yield myself 9 minutes.

Mr. Chairman, I had planned to speak last on this, but this is the first chance that I have had to speak to this many Members to discuss this, and I thought that I would go first before they leave.

Mr. Chairman, this is a unique opportunity, in that if we are determined to force on the authorizing committee that they come up with a road map to reach an outlay figure that has never been put on us before, and by which we are not really legally bound. If this is what we are to do to reach an outlay figure, then we have been mesmerized and enthralled and enchanted by how the offerors of the first amendment would arrive at their outlay figure, and we have used the same tricks and gimmicks that they have used. It is great.

According to this, we offer the best of both worlds. We will save the budget authority at the figures that the Committee on the Budget gave us, which we should do, $292 billion, and the programs stay in. We will show you, if they want to go through whatever device they have used, we will use the same techniques to get to the same outlay figure. Thereby, we can have the programs, we do not lose them, and we will arrive at the same outlay figure.

If Members will give their attention to the chart that I have drawn here, I am using the same figures that were used by the offerors of the first amendment, if they will notice, the committee position using the budget authority given to us, $292 billion. The outlay figure that the original committee had was $285 billion. When the budget authorty was given to us after the joint meeting, the BA went up to $292 billion, so we have used that figure. But the outlay figure went down to $279 billion. So all right, we will reach that figure just like they have.

How do we do that? If the Members would give me their attenton for just 5 minutes, I will conclude, if I could just have their attention for that short, brief attention span. We have the same figures in both amendments, mine and the Spratt amendment. They want to slip the pay date, that is a trick, slip it from September to October so that it goes into another time. All right, we are going to save outlays of $2.9 billion. If they want to play tricks, same trick, $2.9 billion in both amendments.

Inflation figures are the same in both: 1.4 savings in both.

Now in order to get to the additional savings in outlays, to save the same budget authority, we say that we will not pay for early delivery. That does not hurt anything. We say that we will not pay the full—we will wait 10 days on progress payments. It will result in the savings shown here, one-half billion and $1.8 billion. We will arrive at the same target as they do while keeping the same budget authority.

What is the alternative? This is important. The alternative is that if we do not keep the budget authority that we were given, what do we lose? I will tell you what we lose. We lose 30 F-16's. We lose 12 F-15's. I do not know in whose States these are made, and I do not care. I am just telling you what the defense picture is. We lose 12 F-18's, 5 F-14's, an Aegis cruiser, 115 Patriot air defense missile systems, 285 HARM systems—the ones that went into Libya and knocked out the radars that came up to knock down our planes—and $17.8 million in spare parts. Everything that we needed for the conventional forces that was in the bill we are saving if we can mark to what the budget authority said that we could mark to.

We are not over. We are the only committee, I think, that has come to this floor with an authorization that is not over. We are where we should be, and if you want to worry about the triggering of Gramm-Rudman, the sequestation, the same reduction by this same road map gets us to exactly the same outlay figures that the Spratt amendment gets to.

What I am trying to tell the Members is, if they want to save these programs, they can vote for my amendment. You can vote for the programmatic changes that we put back in when they gave us the additional $7 billion. We have used it wisely, and still did not get all that we needed, but we saved the programs. We reached the same outlay figure, and from there on it is up to the Appropriations Committee, which appropriates the money, to reach the outlay figure, and it is also up to the Department of Defense and the administration as to whether or not they are going to spend it.

□ 1225

But we have the authority to do it. We are doing what we are charged with doing.

I will have to say, Mr. Chairman, I was very disappointed at the partisan flavor of the last vote. It looked like we had some sort of partisan vote going, if you counted the votes, and when you see the breakout. Defense is not a partisan issue. It has never been and should never be a partisan issue. Our committee is not partisan. We do not even have majority and minority staff. But the votes just seemed to come out that way this last go-around.

I know I have heard my chairman, the gentleman from Wisconsin [Mr. ASPIN], chiding his colleagues, saying that the Democrats are labeled as the party against defense. I do not know if this is so or not, but if this is so and you do not want that to be the case, then go on and vote for the budget authority that the Budget Committee gave us. We will reach the same outlay figure as they are with the same gimmicks that they are using. You have the best of both worlds, and we will let the Appropriations Committee come in with the market they are supposed to get.

Mr. COURTER. Mr. Chairman, will the gentleman yield?

Mr. DICKINSON. I yield to the gentleman from New Jersey.

Mr. COURTER. Mr. Chairman, it is important I think to keep in mind that the gentleman's substitute reconfirms the work of the Budget Committee because it takes the Budget Committee numbers on authorizations and outlays and folds them into the gentleman's amendment. That is No. 1. I think that it is extremely important to know that these numbers that are in the Dickinson substitute are the precise numbers that came out of the budget conference, the precise numbers that this House voted in favor of by about 3 to 1 a few weeks ago.

Second, I think it is important to keep in mind, and I tried to make this point before, that if you believe in money for helping the Afghan refugees you have to vote for the Dickinson substitute because it does not delete $6 million for that particular category.

Also, and finally, there is a great debate in the House, and a good and a proper one, about whether we should spend money for strategic systems or conventional systems, whether we should increase readiness by increasing spare parts, and fuel, and exercises. The Dickinson amendment keeps the money that we badly need for readiness. The other amendment deletes substantially from defense missiles. It reduces substantially from spare parts, repairs, training, targets, ammunition, stocks, and also additional millions of dollars for training.

So if readiness is important, if the high level of alert of our troops is important, if training is important, if spare parts are important, it is important to vote for the Dickinson substitute.

Mr. DICKINSON. Mr. Chairman, I thank the gentleman for his comments, and I reserve the balance of my time.

The CHAIRMAN pro tempore (Mr. DASCHLE). The gentleman from Alabama [Mr. DICKINSON] has consumed 9 minutes.

The gentleman from Wisconsin [Mr. ASPIN] rises in opposition to the amendment, and the gentleman is recognized for 15 minutes.

Mr. ASPIN. Mr. Chairman, I yield myself such time as I may consume.

Let me say to the gentleman from Alabama [Mr. DICKINSON] and to the Members of the House that we do not have a lot of people to speak on this issue because, in fact, most of the people who wanted to address the subject have already addressed it in the previous discussion.

But let me say about the amendment of the gentleman from Alabama, first of all I would like the extra money. If it were not for the problems we are having with Gramm-Rudman, this outlay problem would not be anything that we would be discussing. We would be marking to the BA number, and we would be marking happily to the full BA that was given us by the budget conference report, which is $292 billion.

That is not the case. We are now living in a new world, and the new world is that outlays are driving the process because outlays determine the deficit, and the deficit determines whether Gramm-Rudman kicks in, and sequestration, and so on.

So we have got to start to pay attention to the outlays.

I think the amendment offered by the gentleman from Alabama is better than where we were in the committee position coming into the debate this morning. The amendment of the gentleman from Alabama is better than what we have coming out of the committee because it does, smoke and mirrors and all, do something about the outlay problem. So it is better than where we were.

However, it is not better than the amendment of the gentleman from South Carolina [Mr. SPRATT].

Let me explain two or three reasons why it is important.

What the amendment of the gentleman from Alabama says is that we can cut $6 billion worth of outlay without cutting any budget authority, and that we can say that this amendment then, if we pass the $292 billion in budget authority, we will only spend $279 billion in outlays.

There are a couple of things to be said about that. No. 1, we are not doing very well in controlling outlays over there in the Pentagon now. This year, for example, we were estimated to spend $267 billion in outlays, and we are running at $273 billion. We are not very good at controlling outlays. Adding more BA is going to make that controlling outlay problem even worse.

Point No. 2, the Dickinson amendment solved the outlay problem for 1986 by pushing some of those costs into 1988. We are postponing the day of reckoning on some of these issues, so we are temporarily solving the problem, but in the long run the problem is still there and, in fact, it gets worse.

Finally, and most importantly, we cannot keep doing this. We cannot keep passing budgets which have high BA and low outlays. It does not work.

When budgets are flat as we are now with a flat budget under the new attitude toward defense spending, budgets are going to be flat. When budgets are flat, budget authority has got to equal outlays. It is only in a growing budget that the budget authority could be much higher than outlays. We are essentially perpetuating an imbalance here that is eventually going to catch up with us.

We have got to understand that defense is an important part of the budget deficit problem, as is all other programs. In order to stop that deficit we have to control the outlays. In order to control the outlays, without totally distorting our defense priorities, we have to bring the budget authority into line with the outlays.

As I told the gentleman from Pennsylvania [Mr. GRAY] before he brought his bill to the floor, and when he brought his conference report to the floor, please, please, as you are doing this, give us more outlays if you can. But if you cannot give us more outlays, give us less budget authority. Those two numbers have got to be consistent.

Mr. Chairman, I reserve the balance of my time.

Mr. DICKINSON. Mr. Chairman, as proponent of the amendment I think I have the right to close debate.

Mr. ASPIN. Mr. Chairman, I yield myself such time as I may consume.

I have no other speakers. I would just like to emphasize that I think the best vote here on the Dickinson amendment at this time is for the House to vote no, to have a budget resolution, have a budget bill, a Defense bill in which there is at least a semblance of consistency between the budget authority and the outlays.

We now have that with the passage of the Spratt amendment. I hope that we do not undo with the passage of the Dickinson amendment.

Vote no on the Dickinson amendment.

Mr. Chairman, I yield back the balance of my time.

Mr. DICKINSON. Mr. Chairman, I yield myself the balance of my time.

Mr. STUMP. Mr. Chairman, will the gentleman yield?

Mr. DICKINSON. I am glad to yield to the gentleman from Arizona.

Mr. STUMP. Mr. Chairman, would the gentleman please comment on my understanding of the reductions made by the gentleman's amendment—the accounts from which these inflation reductions are taken do not reflect inflation adjustments specially calculated for intelligence programs. Is it the intent of the amendment that the inflation reductions made here do not come from the National Foreign Intelligence Program or Tactical Intelligence and Related Activities?

Mr. DICKINSON. Let me say that we have discussed this privately and we have discussed this on the floor before, and I would like to assure the gentleman again that the programmatic changes we are proposing, the increases would protect the gentleman. I do not know whether there is a line item that is being deleted as offered by the gentleman from South Carolina [Mr. SPRATT]. It is my understanding that yes there is. The gentleman is on the Intelligence Subcommittee and perhaps he is more aware of it than I am.

□ 1235

Mr. DICKINSON. Let me say in conclusion, and I realize that we are working against time constraints and I will try to be brief; but this is so very important.

We have shown you that if you are concerned about outlays, you can get to the outlay figure as I have designated and shown from the well. You do not make advance payments; you delay by 10 days the progress payments.

You then use the same formula that they are using to slip a payday and to

absolve the inflation that was not used, and we came out at the same outlay figure. But in doing so we maintain and preserve the programs, the weapons systems that the Department of Defense says it needs and which our committee has said that we need.

Now, let me ask those who voted for the lower figure, where have you been on all these other appropriations bills? You have been voting a high figure on almost every bill that has come to this floor; appropriations and authorizations. Now all of a sudden you want to get righteous and take it out of defense.

Somebody is going to be looking at those voting records. You are always voting for the high figure, many of you over there, high figure, high spending. Then when it gets to defense, "Oh, well, I'm going to be righteous here and I'm going to go with what the chairman of the committee says, and I am going to save the day by reaching down and meeting an outlay figure that we are not even obligated to meet, as far as the authorization committee is concerned."

So let us be honest with our votes here. Let me say, if we cut the F-16's, the F-15's, all of these items that have been enumerated here, I looked at 150 proposed amendments here. Most of them are asking for add-ons. You want to add something back; you want to add something additional, whether it be in military construction or a Trident submarine or whatever. Are you going to continue to add on even though you cut the lower figures? There is no money there for that.

We have cut this as much as we can. Are you going to really be that inconstant that you are going to vote to cut the spending figure and then come in and say, "Yes, but I want to add mine on."

No. We are going to resist every one of those. I would hope that the chairman would, too. So we are not going to add anything on this spending thing, wherever we wind up. We have got the committee mark. I would hope that we do not add anything, and that we can be true to ourselves and the taxpayers, too.

The committee has come in with a 292 mark; we have shown you how to get to the outlay figure if that is the thing that is bothering you. The same way, using the same cuts as do the proponents of the other amendment, the Spratt amendment.

So if you are worried about outlays, we have got you there. If you are concerned about your programs, we keep them in. If there is not enough money to go around, we will let the Appropriations Committee come in with its bill and they will show us how to meet their obligations in outlays.

We are in a good position. We can keep the programs, meet the outlay figure, and we are going to let somebody else worry about, does it really work. I am telling you it is not a real savings, but that is the way they want to play the game; we are playing it.

Please, please vote for the figure that the budget authority gave us. We are playing by the rules. They say, this is what you can have, we mark to it. If they give us a lower figure, we mark to that. We mark to what they told us we could have in joint committee with the Senate; now we want to abrogate that and walk away from it, it just does not make sense. Why should we bother even to wonder about meeting the budget authority if it does not mean anything? If it means absolutely nothing?

We are pretty soon going to wind up with just one committee in this House, I think, and that might be the Budget Committee. I guess everything else is out the window.

So if it means something to play by the rules, to meet what the Budget Committee says we should do, and that we also give you a road map to show you how you can reach, without doing damage to the programs, the outlay figure, there is a way to do it in this amendment, not the Spratt amendment.

I urge—if you are for a strong defense, this is it. If you are not for a strong defense, go on and cut it; it is your choice.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Alabama [Mr. DICKINSON].

The question was taken; and the Chairman pro tempore announced that the noes appeared to have it.

RECORDED VOTE

Mr. DICKINSON. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 181, noes 224, not voting 26, as follows:

[Roll No. 313]

□ 1245

The Clerk announced the following pairs:

On this vote:

Mr. Lungren for, with Mrs. Long of Louisiana against.

Mr. Campbell for, with Mr. Barnes against.

Mr. DeWine for, with Mr. LaFalce against.

Mr. JENKINS changed his vote from "aye" to "no."

Mr. BROWN of Colorado and Mr. DANIEL changed their votes from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

The CHAIRMAN pro tempore (Mr. DASCHLE). Pursuant to House Resolution 531, it is in order to debate the topic of limitations on nuclear testing for 1 hour and 30 minutes, equally divided and controlled by the chairman and the ranking minority member of the Committee on Armed Services. After the completion of such debate, it is in order to consider the following two amendments to the committee substitute, as modified, contained in House Report 99-766 relating to limitations on nuclear testing, which shall not be subject to amendment or to a demand for a division of the question but each shall be debatable for 20 minutes equally divided and controlled by the proponent and a member opposed thereto:

First, an amendment if offered by Representative DICKINSON or his designee; and

Second, an amendment if offered by the chairman of the Armed Services Committee or his designee.

The gentleman from Wisconsin [Mr. ASPIN] will be recognized for 45 minutes and the gentleman from Alabama [Mr. DICKINSON] will be recognized for 45 minutes.

The Chair recognizes the gentleman from Wisconsin [Mr. ASPIN].

Mr. ASPIN. Mr. Chairman, I would like to say that we are already at 1 o'clock. We would like to, if possible, complete this matter before we adjourn. We have a number of people who are interested in catching planes. So we are going to try to hold down on our side. A lot of Members want to speak.

Mr. Chairman, I cannot speak for the minority. He has the time, and he can do with it what he wishes.

But on our side we are going to try to hold it down.

Mr. Chairman, I yield such time as he may consume to the gentleman from Florida [Mr. FASCELL] the chairman of the Committee on Foreign Affairs.

Mr. FASCELL. I thank the gentleman for yielding.

Mr. Chairman, last February, the House of Representatives passed, by an overwhelming bipartisan vote of 268–148, House Joint Resolution 3, legislation urging the President to request the ratification of two nuclear testing limitation treaties signed in the 1970's and urging the President to propose to the Soviet Union the resumption of negotiations on a comprehensive test ban treaty. The other body just yesterday passed House Joint Resolution 3 as an amendment to the fiscal year 1987 Defense authorization bill by a vote of 64 to 35.

In passing this legislation, the House and Senate have sent a very clear message. A bipartisan majority in Congress firmly supports an end to the arms race fueled by the unlimited continuation of nuclear testing. By continuing to add new nuclear weapons to our arsenals, both the United States and the Soviet Union cancel out the effectiveness any reductions might make in their nuclear arsenals. We are saying what every President since Eisenhower has been saying: We must put an end to this escalation through a mutual, vertifiable, and comprehensive test ban.

As a follow-on to House Joint Resolution 3, this amendment calls for continued action toward that arms control policy objective. Under this amendment, effective January 1, 1987, we would engage in a moratorium on nuclear testing above a certain level—1 kiloton—unless the President certifies to the Congress that the Soviets have tested above this level.

If the Soviets choose to resume their testing, funds are immediately released for the resumption of United States testing. This amendment reflects a grave concern on the part of the American people and the world community that something desperately needs to be done to stop the proliferation of nuclear weapons and the nuclear arms race between the superpowers. One way to begin this process is for the United States and the Soviet Union to limit tests of their high yield nuclear weapons.

For almost a year now, the Soviets have not tested. They are sending us a "message." Some view this as a propaganda move on their part. I say we should question their seriousness by calling their bluff. Let's send them a signal that we are serious. By continuing to test, as we have since the Soviet moratorium, we send the wrong message. In my judgment, there is very little time to reach an agreement with the Soviets in this area. Mr. Gorbachev is being pushed just as hard as President Reagan is being pushed by certain elements in their defense establishments who oppose any agreement at all in this area. The "window of opportunity" is closing fast. Let's see if the Soviets will negotiate a genuine and effective nuclear test ban.

The Soviets have pledged to accept enhanced verification arrangements in the nuclear testing area. In fact, as part of an agreement with the Natural Resources Defense Council, a private organization, the Soviet Union has accepted and has in place right now equipment onsite to monitor nuclear tests and earthquakes. This could be expanded to incorporate a wider network of monitoring stations on their territory which would provide even greater monitoring confidence. At issue is not the technical ability to monitor testing, but the political will to reach an agreement. The onus should be on the Soviet Union not the United States to deliver.

What this amendment does is to call for a moratorium on testing above 1 kiloton as long as the Soviet Union doesn't conduct such a test. If they test, we are free to test.

We have much to gain and nothing to lose by limiting the addition of new nuclear weapons into the Soviet arsenal.

I urge my colleagues to support this reasonable and effective arms control amendment.

Mr. ASPIN. Mr. Chairman, under the debate time, I yield 5 minutes to the gentleman from Missouri [Mr. GEPHARDT].

□ 1300

Mr. GEPHARDT. Mr. Chairman, I am tired of hearing people talk about arms control as if we are diluting, or eroding our national security. Nothing could be further from the truth. Those of us in Congress who support arms control—LES ASPIN and PAT SCHROEDER, my cosponsors, TOM DOWNEY, ED MARKEY, JOHN SPRATT, and so many others—are vitally concerned with protecting our rights and freedoms. And we know that arms control progress may be the most important way to ensure that our children and grandchildren enjoy the same freedoms in a safe and democratic society.

Our amendment secures so much for us that I have a hard time understanding the arguments posed against us. Let me outline why I think this legislation is necessary and prudent.

Both we and the Soviets have more than enough missiles and bombs to destroy the world as we know it. That's why deterrence is so necessary and that's why deterrence works. At the same time, America's nuclear forces have never been stronger: Our weapons are more accurate than the Soviets' and our warhead modernization programs are substantially complete. A mutual halt in warhead development leaves us in an advantageous position. The warhead for the mobile

Midgetman system is almost production-ready and testing for the Trident D-5 missile warhead can be completed before January 1. Certainly, even the most critical of Pentagon generals would not trade our sophisticated nuclear arsenal for the sturdy giants in the Russian silos.

But this relatively secure position is in danger. By performing last rites for SALT, President Reagan has left the Soviets free to ignore the real safeguards SALT provided. A new testing program would allow the Russians to refit their powerful missiles with greater numbers of more accurate multiple warheads and develop other warheads that threaten the United States. True, this would be a major effort, but with their hotter production line and coercive society, Soviet leaders might decide the expense was justified. Certainly, the administration's hostility to arms control sends an undesirable message to the hawks in the Kremlin.

For years, even arms control advocates have been unable to give satisfactory answers to all the vexing problems of monitoring and verification. In our open society secrets don't stay secret long, and the Soviets might be reasonably certain of our compliance even without onsite monitoring. We had no such guarantee. And arms control goals are meaningless unless we are confident that promises are being kept.

Recent advances in seismic research provide that confidence in the technical ability to detect any Soviet testing violations. And the historic cooperative arrangement between the Natural Resources Defense Council and the Soviet Academy of Sciences demonstrates that in-country monitoring is possible. Government-to-Government agreements will be necessary for any long-term accord, but the principle is proven. Our amendment builds on these two essential components.

Setting our level at 1 kiloton was not an arbitrary decision. We can now detect tests at lower levels with proper onsite monitoring, but at 1 kiloton, even a determined effort to muffle the blast would be detected. Since this agreement restricts tests to a single area, any test in another location and any test over the 1-kiloton limit would be a violation. A final agreement might be set at a slightly different level, to satisfy concerns of both sides, but verification is no longer an issue.

We all agree that the psychological blocks to arms control are at least as important as the technical ones. So this could be the catalytic first step in proving to ourselves that, despite deep and abiding differences, we can reduce the chances of nuclear war. Sound agreements will lessen the temptation to launch a first strike. Significant reductions will mean more resources for sensible defense expenditures and other productive programs.

Proponents of testing claim it is essential to guarantee the reliability of our weapons. This is a hollow excuse, for the vast majority of reliability checks are mechanical and we have never conducted more than one or two explosive tests a year. What these people really mean is that without nuclear tests, we—and the Soviets—cannot develop new nuclear warheads. As the columnist Ellen Goodman said this week, "that's the point."

Indeed it is, for escalating the nuclear arms race is pointless, expensive, and potentially fatal. That is why our amendment is so timely. We need to stop this futile treadmill while deterrence still works and while verification is still possible. We need to protect the robust defense we now enjoy.

Congress is rightfully hesitant to intrude on the President's responsibility to conduct negotiations with the Soviet Union. At the same time, we have the constitutional duty to raise the funds for Government expenditure and to make sure that the taxpayers' money is used wisely. We also have a responsibility to reflect our citizens' deep-felt desire for a saner nuclear future. Our 1-year pause will facilitate a more lasting agreement. We are asking Mr. Reagan to honor his own responsibilities, to take advantage of the most promising negotiating atmosphere in years. We are calling on him to act while there is still time. We ask our colleagues in the House to support this amendment.

Mr. DICKINSON. Mr. Chairman, I yield 5 minutes to the distinguished ranking member of the Committee on Foreign Affairs, the gentleman from Michigan [Mr. BROOMFIELD].

Mr. BROOMFIELD. Mr. Chairman, I rise in opposition to the amendment being offered by the chairman, the gentleman from Wisconsin [Mr. ASPIN], the gentleman from Missouri [Mr. GEPHARDT], and the gentlewoman from Colorado [Mrs. SCHROEDER] on this subject.

Mr. Chairman, test ban proponents all too often label the test ban idea as a simple, benign panacea for most, if not all, the problems associated with nuclear weapons and the arms race. Its alleged "simplicity" is its most publicized strength. The unfortunate reality is that the test ban issue is not, and never has been, an innocuous, confidence-building measure. It is an extremely complicated question with ramifications extending far beyond the scientific and technical considerations of the nuclear testing program itself.

The question: Do we need testing to determine the reliability of our current nuclear systems? The answer, while admittedly controversial, is still "yes." Computer simulations alone are not adequate at the present time to ensure warhead reliability. At some point a computer program must be related to a nuclear test so as to reestablish the essential link between software hypotheses and physical reality.

Is the safety of our nuclear weapons at issue? While this is also a very controversial question, the old maxim "when in doubt, err on the side of safety" dictates our responses. We owe this to the people who live and work around our strategic forces. Chernobyl has at least taught us that, at least I hope it has.

What about verification of a test ban? There is little doubt that we have made substantial strides toward new verifications technologies in the testing area. But are we completely there yet? "Not quite" is the grudging answer of most experts. Test ban proponents should keep in mind that verification technology is developed and improved by measuring actual U.S. nuclear tests.

How would a test ban affect strategic weapons modernization? On this fact there is almost complete agreement—it would hurt. For some this is an exciting prospect and, after all, the whole purpose of banning tests. But has the nuclear modernization program of the past three decades, facilitated by nuclear testing, been all bad? Are smaller warheads and a substantial cut in total U.S. megatonnage in this period a bad thing? What about Midgetman which is currently under development and is thought by many to represent a stabilizing future contribution to the Soviet-American military balance? Will it be negatively affected by a test ban? If so, is that really a positive development?

And what about the strategic defense initiative? The nuclear-fueled x-ray laser is one of the most promising areas of SDI research. It would certainly be stopped dead by a test ban. Do we really want to gut this key facet of the SDI Program at the present time?

Some proponents of a test ban moratorium view it simply as a means of wreaking havoc with weapons systems that they have been unable to defeat in open votes in Congress. They see nuclear testing as the soft underbelly of our Nation's nuclear weapons program. To them, and I say some of them, a test ban offers a potentially devastating means of indiscriminately gutting major strategic weapons systems, many of which enjoy the broad support of both Democrats and Republicans. When a ban on nuclear testing is viewed in this way, the threat it poses is truly insidious.

Finally, a particularly misleading argument repeated by test ban proponents is that "every American President for the past 30 years has supported a comprehensive test ban treaty" and Ronald Reagan is the only one to

break with this "hallowed" tradition. One has to ask what would seem to be a very obvious question. If this is the case, if so many Presidents, for so many years have supported a test ban, then why don't we have a comprehensive test ban treaty right now? It seems to me that President Reagan is being given hell for having the courage to tell the American people the truth—namely, that a test ban is a bad idea at the present time; it would not enhance security; and, above all, it would deliberately thrust us into a nightmare world of nuclear uncertainty and instability.

For these important reasons, Mr. Chairman, I urge my colleagues to oppose the test ban amendment which we are currently considering.

□ 1310

Mr. ASPIN. Mr. Chairman, I yield 4 minutes to the gentleman from New York [Mr. DOWNEY].

Mr. MAVROULES. Mr. Chairman, will the gentleman yield?

Mr. DOWNEY of New York. I yield to the gentleman from Massachusetts.

Mr. MAVROULES. I thank the gentleman for yielding to me.

Mr. Chairman, I rise today to wholeheartedly support the amendment being offered by Congressman ASPIN, Congressman GEPHARDT, and Congresswoman SCHROEDER. This amendment calls for the imposition of a 1-year moratorium on all nuclear tests by the United States in excess of 1 kiloton, provided that the Soviet Union does the same.

For over a year now the Soviets have abided by a self-imposed moratorium on the testing of nuclear weapons in the hopes that serious negotiations with the United States could be pursued. Yet the U.S. testing has continued unabated.

In February, the House passed by an overwhelming vote of 268 to 148, House Joint Resolution 3, the comprehensive nuclear test ban resolution. Two years earlier, the Senate passed a similar bill by a vote of 77 to 22. Yet negotiations on any type of comprehensive test ban have not been reinstated since President Reagan took office in 1981, more than 5 years ago.

The vicious cycle of technological advances in nuclear weaponry by both the United States and the U.S.S.R. can only be broken by a negotiated treaty. A comprehensive test ban is a viable way to halt all weapon production while negotiations for such a treaty take place. And it is true—modern history proves that solid arms agreements with the Soviets are possible if sought with honesty and skill.

Forty-one years ago, in an effort to bring World War II to an end, the United States unleashed the most powerful, the most devastating weapon ever known to man—the atomic bomb was dropped on Japan.

The resulting horror and destruction is unmatched anywhere in history. Even today, thousands of people still suffer the effects of that decision.

It seems rather appalling that we now stand here arguing over an amendment which has the potential to bring about a new treaty which could end the possibility of ever being forced to repeat that decision. The amendment before us simply halts for 1 year all nuclear tests over 1 kiloton, provided that the Soviets do the same. In addition, it allows the United States to be freed from the moratorium should the President certify certain violations by the Soviets.

By approving this amendment we are in no way undercutting the arms negotiations of the administration, nor are we trying to second guess the President. For how is it possible to undercut negotiations when Edward Rowny, one of the negotiators, has publicly stated "We've tried in the Reagan administration to get away, to distance ourselves, from making arms control the centerpiece of our foreign policy. To some extent, we've succeeded."

Even Kenneth Alderman, Director of the Arms Control and Disarmament Agency, has described his reaction to the arms control negotiations by stating that "my policy would be to do it for political reasons, but I think it is a sham * * * I can't think of any negotiations on security or weaponry which have done any good * * *.

Solid arms agreements are possible with the Soviets—but only if sought with honesty and skill.

The Reagan administration has been in office for almost 6 years—and we still have not one shred of arms control treaty to speak of today. It is hard to believe that President Reagan, with his unmatched power of persuasion, has not been able to negotiate even one small treaty with the Soviets.

I urge my colleagues to vote in favor of this amendment—to vote in favor of establishing a sensible environment in which to seriously pursue an arms control agreement. For in the words of H.G. Wells, some 60 years ago, "We must put ourselves and our rulers on trial. We must ask, what have you done and what are you doing to bring peace and order to mankind?"

Mr. DOWNEY of New York. I thank the gentleman for yielding me this time.

Mr. Chairman, in the 41 years that this world has seen nuclear weapons, both sides have sought, elusively, greater security with the accretion of more and more nuclear weapons. They have failed; they have achieved less security, not more security.

An interesting thing has happened over the last few years, and that is that leaders on both sides have begun to recognize the one, fundamental truth of nuclear weapons: That they are not weapons in any conventional sense, but that they are instruments of mass destruction. And that the only purpose that nuclear weapons serve is to deter the other side from using theirs. That is the only possible purpose for nuclear weapons.

At the dawn of the nuclear era, Albert Einstein said that "Everything in the world had changed except our thinking." We have a chance today to prove with this amendment that Einstein was wrong. This amendment is a very small step forward for arms control, but it is a gigantic leap forward in our thinking and a gigantic step forward in our relationship with the Soviet Union.

As has been mentioned before, six Presidents have sought, and for one reason or another, failed to achieve a comprehensive test ban. We have the opportunity to set the record straight. We have the opportunity to make what Ronald Reagan calls his ultimate goal an immediate reality.

No one likes the idea of legislative negotiations. It does not work and it is not a precise instrument. But it is the only tool that we have to encourage and prod this President. Pauses and moratoriums, my colleagues, have been successful in the past. We see a successful pause working with Asat and President Kennedy saw a successful moratorium on the testing of above ground nuclear weapons begun in June 1963 to lead to an effective ban on the testing of above ground weapons in November of that very same year.

Let me say that we have today with this amendment the opportunity to move to a comprehensive test ban. We have two very clear paths that are available to us. On the one hand, we can continue to test and develop more and more nuclear weapons of greater destructiveness and lethality. On the other hand, we can recognize the other fundamental truths of the postwar era: That security can only be achieved in a collective sense, that economic growth and economic power and political dialog are the underpinnings of national and international security.

This testing pause, this congressional action will say to the majority of the American people who support us that we are prepared to act, and act in their interests. We will be sending a signal around the world that America is prepared to practice what it preaches. That if nuclear weapons are dangerous for the rest of the world, we believe they are dangerous for us and we are prepared to call a halt to their testing. Starting January 1, it will begin the dawn of a new era. Let us make history by supporting the Aspin-Gephardt approach today.

Mr. DICKINSON. Mr. Chairman, I yield 5 minutes to the gentleman from New Jersey [Mr. COURTER].

Mr. COURTER. I thank the gentleman for yielding me this time.

Mr. Chairman, I am really very frankly distressed about what is going on here today. I thought that the prior amendment was important enough to debate; there was not a great deal of time devoted to it in the rule. A few minutes on each side; less than an hour. There was a great suggestions by a number of people that we not use the full amount of time to debate because people want to go home; they want to take planes. They would rather be playing tennis or golf

or swimming than debating the Defense budget, and that distresses me greatly.

The same thing with regard to this amendment. This amendment is an important one. It is important for full airing and debate, and the same thing is occurring. The suggestion is that we are trying to keep the debate down; let us not debate this before the American people. My God, they may find out about what we are doing here. Let us have a quick vote because Members want to leave this body, they want to get on planes and go home to their congressional districts and not get the work down. Frankly, I find that to be an outrage and disappointing at the very least.

I think this amendment deserves full, complete debate, and I know full well that if this amendment were brought up on a Tuesday, or Wednesday, or Thursday, there would be people here saying that it should be debated to all hours of the night because it is that important. But it is brought up on a Friday, and it does not deserve even the 45 minutes devoted on each side. I think that is a real shame.

I would like to go on by mentioning a couple of problems in a test ban such as this. First of all, it is based on an assumption that is illogical. I mentioned yesterday or the day before that it is basically called the post hoc ergo propter hoc fallacy. If the rooster crows before the Sun comes up, the rooster causes the Sun to go up.

The assumption in this amendment or any type of comprehensive test ban is that tests are essential for nuclear weapons, and that if you do not have tests, you will not have nuclear weapons. Ladies and gentlemen, if that were so, I would be for a comprehensive test ban. If I knew there could be building of no nuclear weapons, if we had a test ban, a comprehensive test ban, then there is great logic to it. But the assumption of that is not correct.

Proven, maybe unfortunately, maybe fortunately; we do not know, that debate is not here and now, by the fact that the United States and other countries tested, deployed, and particularly the United States, deployed very effectively, in one sense, two nuclear weapons with no tests whatsoever during World War II. It was not the fact that we had to test for a few years before we could develop the Bomb. The fact of the matter is, you can stop all testing and country after country after country can develop the Bomb. So there is no nexus between a test and no nuclear weapons. I think that is the first thing that this place should get clear. Because the logic of the proponents of a comprehensive test ban or a limitation on tests is the assumption that if you do not test, you will not have the weapon. That is false.

□ 1320

I think that is something that is important for people to keep in mind.

Second, the United States has a significant number of nuclear weapons, and so does the Soviet Union. At the present time there is a sincere effort, which I support—and I am sure everybody in this body supports it—in driving the number of strategic reentry vehicles down rather than up, which is, of course, one of the great reasons why SALT II is a hoax on the American people.

The Soviet Union has increased warheads from SALT-I to SALT-II by 4,500. Is that arms control? It is a hoax. That is another reason why we should not ratify it.

But if you reduce the number of strategic weapons down, as we are hoping to do, as the President is hoping to do, and as the negotiators in Geneva are hoping to do, ergo you have to have a greater confidence in those that you have.

So it seems to me if we are going to reduce the number of nuclear weapons we have from 10,000, which is an important goal, to 5,000 and to 3,000, which I hope we can do and which is eminently achievable if we can deploy defenses, it seems to me we have to have a greater confidence in that which we have.

So it makes no sense and it is an inconsistent negotiating position to take the position that we should drive the number of warheads down by 50 or 75 percent and reduce the test or eliminate effective testing.

The CHAIRMAN pro tempore (Mr. GLICKMAN). The time of the gentleman from New Jersey [Mr. COURTER] has expired.

Mr. HUNTER. Mr. Chairman, I yield an additional 2 minutes to the gentleman from New Jersey [Mr. COURTER].

Mr. COURTER. Third, Mr. Chairman, if we do not have significant testing capabilities and the United States relies on our nuclear arsenal and other countries of the world rely on our nuclear deterrent and then they are stripped of that reliability factor because we do not test the reliability of our weapons, it seems to me that they, therefore, will be less inclined to be protected by our deterrent because they have no confidence in our deterrent.

So if we are concerned about nuclear proliferation, if we are concerned about other countries getting the bomb, if we are concerned about the proliferation of nuclear weapons, we would want those other countries to have confidence in our deterrent because they rely on it. If we do not test and they lack the confidence in our deterrent, they simply will want a deterrent of their own. That is one reason why France may be difficult in this area. They want their own deterrent; they do not want to rely on the United States' deterrent. It is not that they do not believe that our weapons will work; they believe politically that they should have their own deterrent. But if at the same time countries around the world were looking at the U.S. arsenal and saying, "We can't rely on them anymore, they haven't tested for 5 years," we are going to increase the pressures toward proliferation. So that is another reason why this amendment is the wrong way to go.

Finally, we have had testing over the last number of years which in fact has reduced the yield and the size of nuclear weapons. If you do not test, you have to make sure your weapons will achieve their military goal, and if you do not test, therefore, you have a tendency to build big warheads. But if you can test and reduce the yield of the warheads, the accuracy, et cetera, the warhead yield and the explosive megatonnage goes down. It has been proven. The United States, with its testing program, had driven the yield of the U.S. weapons down by about 75 percent in the last number of years.

The CHAIRMAN pro tempore. The time of the gentleman from New Jersey [Mr. COURTER] has again expired.

Mr. HUNTER. Mr. Chairman, I yield 30 additional seconds to the gentleman from New Jersey [Mr. COURTER].

Mr. COURTER. Finally, Mr. Chairman, if the assumption is that the Soviets do not test and, therefore, they will not build nuclear weapons, I would say that it is false by looking at what they have during the time they have had a unilateral moratorium.

They have built hundreds and thousands of nuclear reentry vehicles and hundreds of nuclear launchers all during the time there has been a moratorium. So logic, I think, commands that we vote no on this very dangerous amendment.

Mr. MAVROULES. Mr. Chairman, I yield 2 minutes to the gentleman from Iowa [Mr. BEDELL].

Mr. FEIGHAN. Mr. Chairman, will the gentleman yield?

Mr. BEDELL. I am glad to yield to the gentleman from Ohio.

Mr. FEIGHAN. Mr. Chairman, I appreciate the gentleman's yielding.

Mr. Chairman, I rise to add my enthusiastic support to the amendment offered by my distinguished colleagues from Wisconsin, Missouri, and Colorado.

A comprehensive test ban treaty has always been at the top of the arms control agenda. It brough millions to the streets in the 1950's. It was the dream of President John F. Kennedy when he signed the Limited Test Ban Treaty. It has been a goal of every President since Eisenhower.

Why? Because it makes perfect sense—common sense. If we want to turn away from the nuclear abyss—and slow the race for more arms—we first must stop. Nothing could be so simple—or so difficult.

This amendment—so skillfully drafted by so many of our colleagues—addresses all of the difficulties raised in the past—without sacrificing any of the real advantages a test ban would bring.

First, it is not a unilateral measure. It won't give the Soviet Union license to test while we sit idle. If they test, we can test. But if they take us up on our offer—if they continue to refrain from more large underground testing—this amendment obligates us to do the same.

Second, it is not a sweeping bill that binds us for all time. It doesn't go into effect until January, and it lasts for only 1 year. Under the terms of this amendment, we can complete any tests already schedule—and then try for a test ban next year. Nothing more.

Third, it doesn't stand in the way of any arms control agreements we might be fortunate enough to reach before then. The President is free to replace this provision with any other such agreement negotiated between the United States and the Soviet Union. We would not be complicating the Geneva process by passing this amendment today.

That still leaves one unanswered question—the question that has plagued arms controllers and blocked progress on a test ban since the idea was first proposed in the 1950's: Verification. Can we make sure the Soviets won't conclude an agreement and then continue to test behind our back?

Without that guarantee, we won't get an agreement. To use the code words of President Kennedy, a test ban is worthless if it isn't "fully effective."

Now we have the chance to sign a treaty that can be tested—and agreement that will be "fully effective." The recent agreement between the National Resources Defense Council and the Soviet Academy of Sciences is taking the sting out of the thorny problem of verfication. On their own initiative, these two groups have agreed to establish seismic monitoring stations near the principal nuclear test site of each country.

Don't underestimate the significance of this pact. Never before has the Soviet Union allowed any foreign citizens on its soil to monitor nuclear tests. Never before have they shown so much willingness to open their doors and address our concerns.

This step would set a crucial precedent if we act on it—if we pass this amendment and use the data NRDC would make available to us. The administration has already expressed its implicit support for this effort by granting an immediate export license for the seismic equipment. Now its our turn to show our support for this groundbreaking project.

This amendment is a modest proposal, but it will have far-reaching effects. It would prove that we mean what we say about getting an agreement in Geneva. It would enhance our commitment to nonproliferation, and it would slow the breakneck development of new weapons systems which drives the arms race and dashes hopes for a future free from the threat of nuclear war.

More Americans than ever want a comprehensive test ban. Over 600 of our colleagues in other legislatures around the world have urged us to pass a ban. If we want to answer their concerns—and the plea of millions more who dream of peace and look to the day when nuclear weapons will no longer cast a long shadow over every shred of our existence—then we should pass this amendment—and bring the long-held dream of a test ban one step closer to reality.

Mr. BEDELL. Mr. Chairman, by a vote of 268 to 148 in February this Chamber passed House Joint Resolution 3, which I had introduced, calling on the President to resume negotiations toward a comprehensive test ban. Yesterday the Senate passed that same resolution by a large majority. Now we have a chance to say that we mean what we say.

The CHAIRMAN pro tempore (Mr. DASCHLE). The Chair will remind the gentleman that he should not refer to votes in the other body.

Mr. BEDELL. I thank the Chair.

Mr. Chairman, I urge the 268 Members who voted for House Joint Resolution 3 to show that we mean what we say and support this amendment.

Mr. Chairman, I come from an agricultural area. This vote is an important agricultural vote. If we want to sell more grain to the Soviets, if we want to have more money for agriculture because we need to spend less on the military, this vote is important. For my farmers, for my children, for all of civilization, I urge a "yes" vote on the Aspin-Gephardt amendment.

Mr. Chairman, on February 26 of this year, an overwhelming bipartisan majority of the House supported final passage of the House Joint Resolution 3—a measure to prevent nuclear explosive testing. Yesterday, the other body passed the exact language of House Joint Resolution 3 by a similarly significant margin of 65 to 24. Today, the House has a unique opportunity to again nudge the administration toward truly negotiating an end to nuclear weapons testing, and as such an end to the arms race, through supporting the Aspin-Gephardt-Schroeder amendment.

Opponents of this measure argue that the attainment of a mutual, verifiable comprehensive test ban treaty is not at present in the best long-term national security interests of the United States. They also assert that negotiations on such a treaty should not occur until such time that we have achieved mutual, verifiable, and militarily significant arms reductions. We also hear that a comprehensive test ban treaty is not verifiable and that continued nuclear weapons tests are necessary to ensure the reliability of our present nuclear weapons stockpiles. Each of these contentions miss the point that as long as we continue to test nuclear weapons, we shall continue to produce newer and more lethal nuclear weapons, and as long as we continue to test and produce newer and more lethal nuclear weapons, the Soviet Union will continue to test and produce newer and more letahl nuclear weapons. When will it end?

Today, we have an opportunity before us to take a small step toward ending the nuclear arms race through congressional endorsement of a funding cutoff for nuclear weapons testing that is mutual and verifiable. At the very heart of this language is a stipulation that the Soviet Union must accept intrusive onsite inspections of their indigenous territory by United States experts to verify their compliance with a moratorium on all nuclear weapons testing of explosive yields in excess of 1 kiloton. It is these intrusive inspection measures that six previous Presidents determined to be necessary before United States participation and entry into a comprehensive nuclear test ban treaty with the Soviet Union. It is these intrusive inspection measures that the Soviet Union have now accepted to be a centerpiece of any comprehensive test ban agreement that may be negotiated between the United States and the Soviet Union.

Mr. Chairman, the Aspin-Gephardt-Schroeder amendment allows the United States negotiating team the flexibility to test Soviet intentions through its reliance upon these intrusive onsite inspection measures. This amendment also remains in the best long-term national security interests of the United States as it preserves current United States leads in warhead miniaturization. It accomplishes this benefit through preventing the Soviet Union the opportunity to test smaller warheads which could be deployed on their current missile inventories. Thus, the Aspin-Gephardt-Schroeder amendment locks the Soviets into their current missile payload mixes of larger, more combersome and less accurate nuclear warheads.

In my view, it seems imminently clear that the best way in which to end the nuclear arms race rests with the achievement of mutual, verifiable comprehensive test ban treaty. The amendment before us today furthers us along that path which we embarked upon through our endorsement of House Joint Resolution 3. For these reasons I urge each of the 268 of my colleagues who supported House Joint Resolution 3 to remain firm in their support for the achievment of a comprehensive nuclear test ban by voting in support of the Aspin-Gephardt-Schroeder amendment.

Mr. MAVROULES. Mr. Chairman, I yield 3 minutes to the gentleman from Pennsylvania [Mr. FOGLIETTA].

Mr. FOGLIETTA. Mr. Chairman, I rise in support of the Aspin amendment to achieve a verifiable reduction of nuclear tests.

This week, nations all over the world paid homage to the victims of Hiroshima and Nagasaki. The sheer destructive power of the two atomic bombs killed thousands of people instantly and left a generation of individuals scarred by the memories of that day. Over 1,300 nuclear tests have been conducted since the destruction of Hiroshima and Nagasaki. The result has been an arms race that continually produces more sophisticated—and more deadly—nuclear weapons.

A Test Ban Treaty has been a major foreign policy goal for at least six administrations. The present political climate suggests that the time is now for the implementation of such a treaty. It is up to the present administration to limit its vigorous nuclear testing schedule and capitalize on the interest expressed by the Soviet leadership re-

garding reductions and onsite inspections of nuclear tests.

Today, we have a chance to lead other nations on a more responsible and peaceful path to arms control. By establishing a verifiable, 1-kiloton limit for nuclear tests in 1987, the Soviet Union and the United States would make unprecedented headway toward a treaty banning all nuclear weapons testing.

In previous debate, concern has centered on the Soviet's refusal to allow on-site inspections. But, developments in both the diplomatic and scientific fields have assured many of us in Congress that this obstacle, for all intents and purposes, has been removed. The Soviet unilateral testing moratorium, the Geneva talks, and the "natural resources defense council agreement" with Soviet Academy of Sciences have provided an atmosphere favorable to on-site verification measures.

With the escalation of the arms race and the spread of nuclear weapons to other countries, world security is seriously threatened. But, by agreeing to limit nuclear testing both the United States and the U.S.S.R. will be taking an important first step toward ending the nuclear arms race.

I urge my colleagues to join me in support of this amendment. The time for a reduction in nuclear tests has never been more opportune. Not only would the proposal put forth by this amendment control the overall strategic competition between the Soviet Union and the United States but, it would provide a strong incentive for the near nuclear countries to forego developing a nuclear arsenal of their own.

Mr. Chairman, I strongly urge my colleagues to join me in voting for this historic amendment.

Mr. DICKINSON. Mr. Chairman, I yield 3 minutes to the very distinguished gentleman from Arkansas [Mr. ROBINSON].

Mr. ROBINSON. Mr. Chairman, in an address to the American people in March 1962, President Kennedy summed up the U.S. experience with the 1958–61 test moratorium as follows:

On September 1 of last year, while the United States and the United Kingdom were negotiating in good faith at Geneva, the Soviet Union callously broke its moratorium with a 2-month series of 40 tests.

He went on to add:

Some may urge us to try it again. But in actual practice, particularly in a society of free choice, we cannot keep top-flight scientists concentrating on the preparation of an experiment which may or may not take place on a certain date in the future, nor can technical laboratories be kept fully alert on a stand-by basis waiting for some other nation to break an agreement.

He further stated:

This is not merely difficult or inconvenient. We have explored this alternative thoroughly and found it impossible to execute.

Mr. Chairman, test ban treaties come and go, but our responsibility to maintain a safe and reliable nuclear deterrent is the benchmark of the security for this Nation.

□ 1330

There are four basic reasons why we need to test. First, we need to test to maintain our confidence in the reliability of the stockpiles of weapons that we currently have. History will demonstrate that over a third of all weapons designed and introduced into the stockpile since 1958 have encountered reliability problems of one type or another, including the Poseidon, Minuteman I, Little John, Sergeant, ALCM, and GLCM. We need to test these weapons to make sure that they maintain their reliability.

Second, we need to make sure that these weapons are safe. Unlike the Soviet Union, which does not place a high priority on nuclear safety, as evidenced by the Chernobyl accident; we in this country do. Our citizens demand that we have safe nuclear warheads. These are not toys. They are very dangerous weapons that must be tested through nuclear testing to make sure that they are safe.

Third, there is no way that we can continue on the path of SDI without the capability to test. It is very critical that we not place a moratorium on testing.

And last but not least, we have to test to make sure that our other equipment that we use in our deterrent capabilities can withstand a threat from the Soviet Union, including our satellites, our tanks that the military use, and the list goes on and on.

I ask you to vote no on the Aspin-Gephardt-Schroeder amendment.

Mr. DICKINSON. Mr. Chairman, I yield 3 minutes to the distinguished gentleman from California [Mr. HUNTER].

Mr. HUNTER. Mr. Chairman, to my colleagues who have not had a lot of time to put in on the subject, and Lord knows we are moving very quickly on this DOD bill and it is a very complex bill, the gentleman who just spoke, the gentleman from Arkansas [Mr. ROBINSON] made some good, clear arguments, and the gentleman from New Jersey [Mr. COURTER] made some very clear arguments. It is acknowledged that a number of these arguments are very complex, but I think there are some compelling reasons that the House can readily understand right now for voting against the Aspin amendment and for voting to continue testing.

Our system of strategic deterrence is based on our being able to deliver in response, in retaliation, warheads to our adversary, the Soviet Union.

We use nuclear testing not only to test our offensive warheads in their destructive capabilities or their safety qualities, but also their capability to survive against a defensive system in the Soviet Union.

Let me just tell my friends that the Soviet Union now is ready to produce and deploy a missile system, a defensive system known as SAX-12. The SAM-12, according to our open literature, can destroy the Pershing II. It can take it down like a pheasant at the top of the rise. It can destroy submarine-launched ballistic missiles. It has some capability against our ICBM's.

If we do not test our warheads and their capability to get through the SAM-12 or to get through any of the other defensive systems that the Soviet Union has, that deterrence that we have established right now will be in great question.

The second important thing that every Member of the House should think about and realize has to do with our Midgetman system that was proposed by the chairman of the Armed Services Committee. It is his baby. We do not have a warhead that will work on the Midgetman system.

It is going to be argued that, well, we can take the Mark 21 warhead and we can use that one, but our staff has done a pretty good analysis. Mr. Adam Klein of the Armed Services staff did a pretty extensive analysis on this. I think it is fairly clear that you cannot take the Midgetman system that is going to be bouncing around over country roads on some type of a road carrier, that is going to be horizontal, that is to have great vertical stress on that warhead, and presume conclusively that the Mark 21 is going to work.

So the point is that the House should realize you cannot build the Midgetman if this becomes a reality. The Midgetman is our baby. It was put together by the House of Representatives. We cannot simply make a statement to the Soviet Union a couple months before the election——

The CHAIRMAN pro tempore (Mr. DASCHLE). The time of the gentleman from California has expired.

Mr. DICKINSON. Mr. Chairman, I yield 30 additional seconds to the gentleman from California [Mr. HUNTER].

Mr. HUNTER. Mr. Chairman, it would be unwise for this House in making a statement to our constituents and a statement to the Soviet Union to shoot ourselves in the foot and to preclude the rapid development of the Midgetman system.

For that reason, I ask my colleagues to vote against the amendment.

Mr. BEREUTER. Mr. Chairman, will the gentleman yield?

Mr. HUNTER. I yield to the gentleman from Nebraska.

Mr. BEREUTER. Mr. Chairman, so the gentleman is saying that if we

really support that Midgetman missile that we have really insisted on in the House and in the Senate, it is important that we endorse the gentleman's position, is that correct?

Mr. HUNTER. Precisely; we have to test to build that missile.

Mr. ASPIN. Mr. Chairman, I yield 4 minutes to the gentleman from Massachusetts [Mr. MARKEY].

Mr. AUCOIN. Mr. Chairman, will the gentleman yield?

Mr. MARKEY. I yield to the gentleman from Oregon.

Mr. AUCOIN. Mr. Chairman, I rise in support of the amendment.

Mr. MARKEY. Mr. Chairman, I rise in strong support of the amendment.

The Soviets have asked the United States to resume negotiations toward a Comprehensive Test Ban Treaty, and they have made a serious offer to accept the emplacement of onsite monitoring equipment on their soil if the United States is willing to join them in a testing halt.

They have actually allowed United States scientists under the auspices of an American group—the Natural Resources Defense Council—to come into areas of the Soviet Union that are normally restricted to foreigners and install seismic monitoring equipment around the main Soviet testsite.

Now, I've got a visual aid here. It's the first seismogram from an in-country monitoring system to come back from the Soviet Union.

Look very closely. I know, it's boring. Nothing much is happening. Television probably won't pick it up. This, my friends, is the Soviet moratorium in action, a graphic depiction of what happens when a nuclear explosion doesn't go off.

It should have been a U.S. official agency installing this equipment, not a private American environmental organization. These signatures that are on this seismogram should read: Adelman, Perle, Weinberger, Gaffney, not the names of independent scientists, and that is what our amendment calls for, onsite inspection by the United States Government inside the Soviet Union on Soviet territory. No onsite inspection, no deal.

We could have a vast seismic network within the Soviet Union that would assure us the Soviets were not conducting militarily significant nuclear tests. The Soviets have told the head of the United States Geological Survey that if we were willing to halt testing, they would accept a broad seismic network within their borders.

This is an important, indeed an unprecedented offer from the Soviet Union. But to listen to the Reagan administration's response to these proposals, you would think the Russians had asked us to give back Alaska.

The administration has championed onsite inspection and improved verification measures, but now they are unwilling to take yes for an answer.

In a rare feat of public relations brilliance, it responded to the initial Soviet offer to stop testing with a sweeping counterproposal of its own. Come on down to the Nevada testsite, the White House told the Soviets, and watch us blow one off.

In the intervening months, the administration has deployed an ever modernizing arsenal of lame excuses to justify its refusal to negotiate limits on nuclear testing. Every time the Soviets have taken another step toward redressing United States verification concerns, it adds a new and more absurd precondition to CTB talks. I know we're going to be hearing that we can't pass this amendment today because the administration may be reaching an agreement even as we speak.

But we need results, not just promises and lost opportunities. As a direct result of our nuclear testing nonpolicy, we are on the verge of letting this rare opportunity slip through our fingertips.

Unfortunately, this won't be the first time that a chance for arms control has been squandered for want of political will and vision. The primary obstacles have been disputes over verification and of course, bureaucratic sabotage from those who are wedded to a never-ending nuclear arms race. For whatever reason, Gorbachev has extended his moratorium three times. As a result of these decisions, the Soviets have not tested a nuclear weapon since last July 1985, while the U.S. has tested 16 times.

Does anyone here believe that the Red army general staff isn't champing at the bit to start testing again?

We may have it in our power today to stop those tests from occurring. We may have it in our power to push both sides forward toward the agreement that has been eluding American Presidents for more than 25 years.

Forty-one years after the first nuclear weapon was detonated over Hiroshima, we may have it in our power to start a process that could halt nuclear explosions on this planet.

We are faced with a momentous choice. We can either sit back and let this chance pass us by, and let the Soviets develop and deploy a new generation of warheads, or we can take advantage of this opportunity and pass the Aspin-Gephardt-Schroeder amendment.

The choice is up to us.

Mr. DICKINSON. Mr. Chairman, I yield 2 minutes to our distinguished Republican leader, the gentleman from Illinois [Mr. MICHEL].

Mr. MICHEL. Mr. Chairman, I don't want to speak on the substantive question of this issue I'll leave that to the experts on both sides.

What I do want to do is remind our colleagues—and especially those on my side of the aisle—that this vote is concerned with more than nuclear testing.

It is the first step of a radical and unprecedented attack by the President's critics to capture and dominate arms control policy and foreign policy.

It is no coincidence that we are going to be voting on amendments dealing with SDI and SALT II and other aspects of arms control and foreign policy.

A cut taken from testing; a slice of SDI; a chop here, a chop there—this is their strategy for radically revising arms control policy and even foreign policy. It is a butcher shop approach to policy: cut, slice, and chop until, eventually you get your way.

So the vote we will take on this particular question is more than an ordinary vote. This amendment is the first part of a strategy to cripple the President's ability to conduct arms control and foreign policy as he sees fit.

I urge all our Members to take this into consideration as we vote. Don't subject the President's policy to the death of 1,000 cuts. Give him the chance to continue to work for peace, a chance the American people gave him in 1980 and again in 1984.

Either the President' vision of arms control and a just peace will be served or else another radically different vision will be served. There is no middle ground.

I would plead with you to not permit the erosion of our arms control negotiators position inch by inch, amendment by amendment. We certainly don't want our foreign policy to be hampered by a legislative strategy of slow death by amendment.

I would urge you to stand with the President on this vote.

Mr. DICKINSON. Mr. Chairman, I yield 10 minutes to the very distinguished gentleman from Illinois [Mr. HYDE].

Mr. HYDE. Mr. Chairman, I must say about my friend, the gentleman from Massachusetts, he is very straightforward and you know where he stands. For example, I have a press release of his that says, "In the long run I think a world of unreliable nuclear weapons would be a more secure world."

Well, I do not think so. I think we have to have secure weapons as long as we are going to rely on a nuclear deterrent. Now, when that day comes—I will not yield now, but I will later, but I will be glad to show the gentleman this if he wants to see it.

I want to make a statement that I base my own philosophy about this issue on. The security of the United States and the free world depends on a credible, safe and effective U.S. nuclear deterrent. Nuclear testing is indis-

pensible to a credible, safe, effective nuclear deterrent.

Now, if you do not believe that, this amendment is a great idea. If you do believe it, this amendment is a dangerous idea.

Coincidentally, it is unforunate that our national security has to get embroiled in the internal politics of the Democratic Party's left wing, but to understand what is really going on here, I suggest you read Mary McGrory yesterday. She chronicles who the players are and what is going on. In one of the expositions in her column, she talks about the chairman of this committee being the chief sponsor and the peace mix stepping aside for him.

Well, somebody else says, unattributed, "he has used us so many times, it is about time we used him."

I suggest that if you people stop using each other, we could face up to the security of this country.

□ 1345

This is an effort by the chairman, for whom it is not enough that he is chairman, to become chief arms negotiator, too, Ambition knows no bounds. But this is the chairman's effort to rehabilitate himself with the Sister Boom-Boom wing of the Democratic Party.

Somebody somewhere ought to write a dissertation on the burdens——

POINT OF ORDER

Mr. HOYER. Mr. Chairman, I have a point of order.

The CHAIRMAN pro tempore. The gentleman will state his point of order.

Mr. HOYER. Mr. Chairman, I would make the point of order that the Member is coming pretty close to having his words taken down. The motives of the Members are not to be called in order under the rules, and I would suggest that the point of order under the rules would be that the gentleman refrain from personal observations as to Members' motivation and spend his time on the substance of the issue before the House.

Mr. HYDE. Well, if I may respond, I would like to say that I am simply paraphrasing Mary McGrory. If the gentleman wishes to reject her analysis, it is all right with me. I am not exactly a member of her fan club, either. But I would say that I would like to see an article sometime on the burdens of being upwardly mobile in the Democratic Party.

However, I do digress. Let me set this in context. On February 23 on this floor we passed, to the great applause of the sponsors of this bill, House Joint Resolution 3. That was sold to us as not tying the President's hands.

Congressman FASCELL: "We urge the President to consider at the earliest possible time a comprehensive test ban. We do not tell him when to do it. We say we would like him to do it as immediately as possible. The judgment is still the President's."

Congressman BEDELL: "This resolution calls on the President to resume negotiations. This does not tie his hands in any way."

Another Congressman: "This simply urges our side and their side to talk."

One Congressman from Ohio said: "This doesn't presume to instruct the President on the posture he must take. This resolution contains our best advice."

And on and on and on. But what has happened in 6 short months? What happened to Presidential flexibility? Well, I will tell you what has happened. The U.S. team of arms advisers is to visit Moscow next week. They are negotiating. They are negotiating. But no, this amendment rejects negotiation, and it mandates a moratorium on nuclear testing. There is nothing negotiable about it. It is compulsory. It is mandatory.

If I were Ambassador Kampelman, frankly I would quit. We do not need him. He is redundant. He is superfluous. We have the liberal members of the Democratic Party who are omniscient. Not only can they handle the economy brilliantly, and the environment, they can control arms too, and they are doing it here.

This is not micromanagement, this is usurpation. They are taking over. That is great. It does not provide for negotiation.

Well, what is it? I might say, by the way—and I hope that I am not questioning anybody's motives, this is just a fact. Some Members are great arms controllers. The problem is they just control our arms, they never control their arms. And that is a major flaw in what they do.

What about the mutual and balanced force reduction talks? Ten years have been going on. The Soviets have an overwhelming advantage in conventional. Some want to take the nuclear equalizer out of our hands, have us lose confidence in it, and leave them with an overwhelming superiority. Do they provide for reinstituting the draft? Are they going to triple our conventional? How much money will that cost? Ask your local bishop. If we are going to save money on nuclear, do we not have to build up our conventional? Nobody even wants to think about that.

This amendment is based on a major false assumption—that tests are conducted primarily for the purpose of adding still more weapons to existing arsenals.

But that is not so. Today's weapons are vastly different from those in the sixties and beyond. As a matter of fact, the total destructive potential of our nuclear arsenal was four times as great then, in 1960, as it is today. In the 20 years testing, testing, has provided warheads that are smaller, incorporate less fissionable material, are safer for handling, less susceptible to tampering, and create less fallout. They are now designed for military targets, and not civilian populations. These improvements were all required by new weapons designs and testing.

Chernobyl. Chernobyl proves that we rely more on technology than they do. The *Challenger.* Did we learn anything from that? If you had a chance to vote on whether the *Challenger* should be launched, knowing as you should have known that the seals were defective, they could not operate in the cold, how would you vote? Well, you would vote "no," of course. Well, Members have a chance now to vote on whether our soldiers are going to work around safe, effective, believable nuclear weapons, but some Members want to take that away and erode that confidence by not permitting testing. I do not think that that is very smart.

How do you stop China?

Mr. MARKEY. Mr. Chairman, will the gentleman yield?

Mr. HYDE. Yes, I yield to the gentleman, because I did mention his name, and I know that he will get me some time.

Mr. MARKEY. I thank the gentleman very much for yielding.

Mr. Chairman, once again I want to compliment the gentleman for once again demonstrating his remarkable ability to harness voluminous amounts of information to defend knowingly erroneous premises.

Mr. HYDE. Did I yield for that?

Mr. MARKEY. The gentleman misquoted me, and I just would like to set the record straight. The gentleman quoted me as saying that I think that the world of unreliable nuclear weapons would be a more secure world, because neither side would have confidence it could execute a first strike. But then he forgot to finish off the quote. So I would like to read the conclusion of that statement which he was quoting.

I said that we are not talking about a nuclear freeze, we are talking about a comprehensive test ban, and under a CTB you can expect to stockpile, conduct nonnuclear testing, and remanufacture new warheads using proven designs——

Mr. HYDE. Thank you, sir, very illuminating. I recapture my time.

Now we went through a moratorium from August of 1958 to August of 1961, and the Soviets broke out of it, much to the chagrin of John F. Kennedy, and they performed over 100 tests in the atmosphere, many underground, several at very high altitude, and they then detonated the largest megatonnage in history—58 megatons.

Let me tell you about another purpose for testing. Did you ever hear of electromagnetic pulse? I am sure that the gentleman is an expert on that. When the Soviets start a sneak attack, they will detonate an H-bomb beyond the atmosphere which will cause an electromagnetic pulse, an electric surge, which will kill every computer

in the country, every communications system, every radio, and every telephone.

The gentleman is smiling, but he is obviously a student of this. I am suggesting that we will not be able to communicate with our submarines or with any aircraft at all. We will not have a computer worth a nickel. We test to try to see what the effects of a nuclear weapon are against our equipment. Weapons-effects tests. Do you want to stop that? Do you want to leave us naked, totally vulnerable to electromagnetic pulse, blind our satellites, blind our radars? I think not.

Verification. I do not care what they say, the top scientists working for the Government, working for Los Alamos, working for Lawrence Livermore, say——

The SPEAKER pro tempore. The time of the gentleman from Illinois [Mr. HYDE] has expired.

Mr. DICKINSON. Mr. Chairman, I yield 1 additional minute to the gentleman from Illinois [Mr. HYDE].

Mr. HYDE. Mr. Chairman, I just want to say this. We do not have the verification down to 1 kiloton. You may have some scientists roaming in Russia. That is like looking for a needle in a haystack. It is a big country, and they can have tests of 1 kiloton and we will never find them. We will never find them.

I think that the bottom line is that this amendment plays Russian roulette with our security and the security of the free world. The test ban halts the SDI. The test ban erodes mutual assured destruction, because we do not have confidence in our nuclear stockpile. The test ban leaves conventional superiority with the Soviets. So we are left with no offense, no defense. That is not even pacifism.

□ 1355

Mrs. SCHROEDER. Mr. Chairman, I yield 4 minutes to the distinguished gentleman form Illinois [Mr. FAWELL].

Mr. FAWELL. Mr. Chairman, I rise in support of the amendment to H.R. 4428 to achieve a verifiable reduction of nuclear tests.

I do so because, in my view, the most important part of nuclear arms control is stopping the proliferation of new and sophisticated nuclear weapons. The best way to do this is for the United States and the Soviet Union to stop the testing of increasingly deadly offensive nuclear weapons. If such weapons are not tested, they won't be produced or deployed.

However, as such new nuclear weapons are tested and then deployed, with ever-increasing sophistication, miniturization, decreased time of delivery, and deadly accuracy, each of the super-powers has less and less time in which to react to a real or imaginary nuclear attack. Each nation therefore finds itself more on hair-trigger alert. The possibility of an accidental launch of a nuclear warhead, by human or computer error or by act of terrorism or extremist-dictator, escalates proportionately as each new and sophisticated nuclear weapon is designed, tested, produced and then deployed by our nation or the Soviets.

In addition, so long as the superpowers continue the race to produce and deploy smaller and state-of-the-art offensive nuclear weapons, such weapons become less verifiable and less subject to count under any arms control agreement and the danger of the proliferation of use of such weapons by countries not now in the "nuclear club" is increased. Indeed, I believe that our country and the Soviet Union, because of our mutual appetites for more sophisticated nuclear weapons, are approaching a point of no return, if we have not already done so, after which the world-wide proliferation, and ultimate use, or nuclear weapons will be assured.

Which nation, the United States or the Soviet Union, is most to blame for the arms race is almost irrelevant. It is, however, a fact that most of the nuclear technological breakthroughs have came via this Nation's technological genius. Since we live in an open society, sooner or later—and usually much sooner than we thought possible—the Soviets obtain our nuclear weapons' secrets. We then find ourselves eventually looking down the nuclear gun-barrel of a weapon we first conceived, designed, manufactured and deployed. The MIRV'd missile is a good example of this. Ironically, it is the MIRV'd Soviet land-based missiles which now pose what is generally viewed as the Soviets' major nuclear threat to America—their greater land-based throw-weight or warhead numbers.

Today, our Nation is busy working on the design and possible production and deployment of a third generation of nuclear weapons. Hundreds of underground nuclear tests may be needed to perfect these third-generation weapons, the first two generations being atomic and hydrogen bombs. The technology of these weapons too, when and if deployed, will eventually be in the hands of America's adversaries, including the Soviet Union.

Indeed, the inclination to produce and deploy new and sophisticated nuclear weapons today even includes clip-in or insertible nuclear warheads designed to easily transform conventional arms to nuclear arms. With such deployment an adversary would have to guess if an incoming missile or a military unit was or was not armed with nuclear explosives, causing an adversary to have to assume the worst.

This amendment is not the "end-all" and "be-all" to nuclear arms control. But it does, in my view, constitute a needed change from the numbers game of an arms control agreement which only counts down the number of launchers or warheads to which each side may be entitled. A reduction in the number of warheads per super power is not to be disparaged. But an arms control agreement which only calls for the reduction of numbers of warheads while allowing the continued growth of more sophisticated state-of-the-art, more deadly and more accurate nuclear weapons, will, in my view, do little to stem the nuclear arms race. As long as the United States and the Soviet Union have the right to introduce new and sophisticated nuclear weapons into the arms race, they will do so in an effort to gain dominance over the other. And fluctuations, destabilization of nuclear forces and escalation of the nuclear arms race will also continue. A cutoff of new nuclear weapons appear to be an essential first step toward nuclear arms control. Only a verifiable ban on nuclear testing will significantly slow down the growth of new and more deadly, and less verifiable, offensive nuclear weapons.

The concept of a ban of nuclear testing has been the policy of the last six Presidents of the United States. President Eisenhower expressed it in these terms:

> It is precisely because of my deep desire for a complete discontinuance of nuclear weapons tests that I urge again that we enter into an agreement to ban nuclear testing.

President Nixon stated:

> The United States supports the conclusion of a comprehensive test ban adequately verified.

President Ford said:

> We will continue our efforts to reach an adequately verifiable agreement banning all nuclear weapon testing.

I do not know if Mr. Gorbachev's current unilateral test ban offer—made without any conditions to assure monitoring compliance with the test ban—was given in good faith. I do believe that by tendering an offer to the Soviets of a verifiable nuclear test reduction—of a temporary nature—as set forth in this amendment, we can test the good faith of the Soviet offer. And there is basis to hope that the verification provisions of this amendment will work. On May 28, 1986, the Natural Resources Defense Council entered into an unprecedented agreement with the Soviet Academy of Sciences to establish three seismic monitoring stations near the principal nuclear test site of each country. The stations will be jointly manned by American and Soviet scientists and will operate for at least 1 year. The data from the stations will be made available to both governments and to the public.

The team of Western scientists have already set up an array of sensitive in-

struments to monitor the main underground site where the Soviet Union explodes its nuclear weapons.

This project demonstrates that verification may no longer be an obstacle to a test ban or test reduction arrangement.

If it is possible to have a new direction in our security relationship with the Soviet Union which adopts the longstanding American policy of a verifiable ban on nuclear explosions—even if one of a temporary and restricted nature—I believe we should move expeditiously to achieve it. When shall it be possible if it is not possible now, with the Soviet leadership facing major problems and far less encumbered by the past and by its military structure?

It is a goal which has been sought by many administrations and one which is long overdue.

Mr. DICKINSON. Mr. Chairman, I am pleased to yield 2 minutes to the distinguished gentlewoman from Nevada [Mrs. VUCANOVICH].

Mrs. VUCANOVICH. Mr. Chairman, I rise in opposition to the amendment.

I thank the Chairman and the gentleman from Alabama for yielding me the time.

Mr. Chairman, the Nevada test site is in my district and employs approximately 700 people. The test site generates millions of dollars to the economy of Nevada because of the many contractors and other support industries that are required to maintain and operate the test site.

By barring further U.S. nuclear testing during the calendar year 1987, this amendment wastes an enormous amount of money and time. It takes a minimum of 2 years to train technical personnel at the test site and another 5 months is needed for these employees to be granted security clearances. Employees at the test site will probably not be laid off until there is a definite decision by Congress to ban U.S. nuclear testing forever. Therefore, employees at the Nevada test site will not be able to conduct their duties at the Nevada test site during the entire 1987 calendar year. It is a terrible waste of American tax dollars to have these employees stand idly by for an entire year, not able to do their jobs, because the Congress cannot decide whether testing should continue or not. Now supporters of this amendment will say that testing below 1 kiloton can continue. Tom Clark, manager of the Nevada test site, has informed me that tests under 1 kiloton are so minimal that this amendment could virtually shutdown the majority of the activities at the Nevada test site.

I support nuclear testing at the Nevada test site. I believe it is crucial for the United States to test future weapons systems and to ensure that our current nuclear deterrent system is reliable and safe. Until true reductions in nuclear weapons can be negotiated by both sides and verification can be made that both the United States and the Soviet Union are actually reducing their nuclear arsenal, I believe the United States should continue its testing.

I hope my colleagues will oppose this amendment. If not for their views on nuclear testing then as a wasteful spending amendment that will affect several hundred employees at the Nevada test site for an entire year and could jeopardize their jobs forever.

Mrs. SCHROEDER. Mr. Chairman, I yield 3 minutes to the distinguished gentleman from Iowa [Mr. LEACH].

Mr. LEACH of Iowa. Mr. Chairman no resolution reflects more the frustration of Americans on arms control than the test ban issue. At the profoundest level the issue is simply this: a good planet is hard to find,

For six administrations—Eisenhower, Kennedy, Johnson, Nixon, Ford, and Carter—the United States has held it favors a comprehensive test ban once the Soviets accept an intrusive level of onsite inspection.

Ironically, today the signals coming out of the Kremlin are that Gorbachev has caved on the verification issue and embraced the Eisenhower line—the position three Republican and three Democratic Presidents consistently held for a quarter of a century—while in Washington key policy makers in the Reagan administration have opted in the direction of the old Khrushchev position—no test ban, no matter what.

It should be understood that a test ban confronts issues that are both time sensitive and important beyond the East-West arena. It is time sensitive because of the number of countries at the technological takeoff point where access to nuclear weapons is becoming more likely. It is time sensitive because we are well ahead of the Soviet Union in number and sophistication of tests.

A test ban would close the last moral loophole in our nonproliferation efforts and would lock us in a position of strategic superiority over the Soviet Union.

Not inconsequentially, a test ban would also contribute mightily to regional stability. For instance, in the Mideast, there are few things that would be more in Israel's interest than a comprehensive test ban. Simply stated, slowing the proliferation of nuclear weapons will decrease the possibility of a modern day Armageddon between smaller as well as larger countries.

Finally, the possibility that nuclear weapons could be used by anarchist groups for blackmail cannot be lightly dismissed. Diminishing prospects of nuclear proliferation is the single most significant antianarchy initiative that the world community can contemplate at this time. The world is simply going to be easier to police if international criminals are not given access to weapons of mass destruction.

Arms control is the issue of our age. We cannot afford to wait another decade for action. Otherwise, we may not have enough fingers and toes to count the number of nuclear powers. Worse yet, we may not have fingers and toes with which to count.

□ 1405

Mrs. SCHROEDER. Mr. Chairman, I yield 2 minutes to the very distinguished coauthor of the amendment, the gentleman from New York [Mr. GREEN].

Mr. GREEN. Mr. Chairman, I would like to focus on the nonproliferation aspects of this amendment because of the very limited time I have.

I have always been persuaded that the greatest risk of a nuclear holocaust was not between the United States and the Soviet Union, but the N-nation problem; the fact that more and more countries will develop nuclear weapons.

To that end, to avoid that, the Soviet Union and the United States and more than 120 countries around the world have signed the treaty on the nonproliferation of nuclear weapons.

Article VI of that treaty states that the United States and the Soviet Union will, and I quote:

> Pursue negotiations in good faith on effective measures relating to cessation of the nuclear arms race at an early date.

Obviously, testing is an important part of that, and obviously, the nonnuclear powers who are members of that treaty have felt terribly betrayed at the fact that the Soviet Union and the United States have not lived up to their obligations under that treaty.

I therefore think it is important that we take this step today, because only if we bring a halt to this testing, will we be able to have confidence that we can achieve the goals of the nonproliferation treaty.

If we allow this testing to go on, the nuclear arms race to go on, at some point the genie is going to be out of the bottle; at some point more and more countries are going to start saying, "If the Soviet Union and the United States won't comply with their obligations under the nonproliferation treaty, we won't either and we have the right to go ahead." That will be a terrible day for the human race. I think we can take a major step to see that that terrible day does not occur by passing this amendment this afternoon.

Mr. COUGHLIN. Mr. Chairman, will the gentleman yield?

Mr. GREEN. I yield to the gentleman from Pennsylvania.

Mr. COUGHLIN. Mr. Chairman, I rise today to express my strong support for the Aspin-Gephardt-Schroeder nuclear test ban amendment.

It has long been this Member's view that a verifiable nuclear test ban is in the best interest of all parties to the arms race. The test ban approach to arms control—which has applications to many spheres of military competition between the world's powers—holds out the greatest promise for braking the arms race today. By entering into a verifiable moratorium on the testing of nuclear weapons with the U.S.S.R., we will take a concrete step toward halting nuclear weapons competition in its tracks.

The principle behind the nuclear test ban is simple. By disallowing further nuclear testing, we halt the seemingly inexorable drive to develop bigger and better nuclear weapons. Without the qualitative advances in nuclear technology and the design confirmation that atomic testing provides, the superpowers will be unable to field even more destructive weapons with confidence. Once we have stopped the drive for new nuclear weapons, establishing reductions in existing superpower arsenals will be easier.

The proposal before us is carefully constructed. It requires on-site verification and limits allowed testing to one site per nation. It does not seek to control tests below 1 kiloton in established test areas, because of the difficulty of verifying such low yields under certain conditions, even with in-country seismographic equipment. Meanwhile, outside the designated test area all nuclear blasts whatsoever would be banned. Any violations of these provisions will be easily detectable.

Moreover, the pending proposal provides us with the ability to pursue certain important research. Although detonations smaller than 1 kiloton have little military significance in terms of developing new weapons, they still can provide useful information on nuclear weapons physics, so we could continue to expand our knowledge in this field. Furthermore, the pending proposal takes into account needed testing for certain high priority weapons development. By making the ban effective starting January 1, 1987, we can complete work on our most pressing programs.

Critics of a nuclear test ban have in the past objected on two main grounds. The first is that such a ban cannot be verified. But with their recent decision to allow the Natural Resources Defense Council to establish test monitoring sites near the Soviet test facility in Kazakhstan, the Soviets have made clear, for the first time, their willingness to accept on-site verification. I believe the Soviets have now committed themselves to negotiating realistic, government-to-government verification schemes. We should not fail to take advantage of this crucial concession.

The second argument put forward by test ban critics concerns the need for periodic testing of our current arsenal, to ensure that our deployed weapons still function properly. But arms experts indicate that we can accurately gauge the reliability of our weapons by testing their components. According to Norris Bradburg, the former director of the Los Alamos National Laboratory, for instance, "the assurance of continued operability of stockpiled nuclear weapons has in the past been achieved almost exclusively by nonnuclear testing—by meticulous inspection and disassembly of the components."

In addition, it is important to note that the Soviets will be compelled to live by the same rules that we will be observing. They too will be prohibited from detonating their weapons to assess reliability. I would contend that we have far less to worry about in terms of the reliability of our weapons than the Soviets do about the reliability of their weapons.

Mr. Chairman, the time for a verifiable nuclear test ban is now. I urge my colleagues to support the Aspin-Gephardt-Schroeder amendment.

Mr. DICKINSON. Mr. Chairman, I yield 2 minutes to the gentleman from Nevada [Mr. REID].

Mr. REID. Mr. Chairman, I rise in opposition to the amendment. I would like to disengage myself from the same old political rhetoric that we hear every time this issue comes to the floor of the House. I would, however, like to confirm and validate those statements indicating the necessity scientifically and militarily why testing should continue. I am less concerned with international politics or statements of lofty principle than I am about a few concrete, down-to-Earth questions relating to my State of Nevada. I want my colleagues to think about the immediate and devastating affects of a yes vote on Nevada's unemployment, and the subsequent impact on my State's overall economy.

I also want you to think about what was once some of our country's most beautiful land, land that could have been used for grazing, mining, or recreational use. On my trips out to the test site, I have seen how hundreds of bombs have laid waste Nevada's countryside, leaving only destruction and poisonous contamination which renders the land worthless for future generations.

We in Nevada have given a lot to our country, and we are only asking for fair treatment. We compensated Micronesia for nuclear destruction after World War II, but somehow we cannot extend the same privilege to the State of Nevada. I have introduced a bill, House Concurrent Resolution 293, which calls for retraining and reemployment of workers at the Nevada test site should they lose their jobs due to ratification of a comprehensive nuclear test ban treaty and pays compensation to the State of Nevada for degradation of the land at the test site caused by nuclear weapons tests.

The drafters of the amendment now before the House were very careful to include provisions that would bring the United States and the Soviet Union closer to an agreeable position. Unfortunately, they made no effort to include provisions to protect the interests of the people of the State of Nevada.

We in Nevada are being told to accept nuclear waste, and we've put up with decades of military installations all over the State because we knew it was in the interest of our country. We're only asking for fair treatment, a square deal. When the test range is no longer used for testing weapons, Nevadans must be left with more than the eyesore of a devastated countryside.

Mrs. SCHROEDER. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from North Carolina [Mr. NEAL].

Mr. NEAL. Mr. Chairman, the question is this: Do we have enough nuclear weapons in the world? Well, I think so. We have enough to destroy the world and all of its inhabitants many times over; we have enough to destroy creation itself. Is not that enough?

I think so. Do we need more because the Soviets are ahead? Clearly not. I know it is a technical question, but no leading expert in this area will say that they would like to trade our nuclear forces with those of the Soviet Union. I do not believe anyone in this room would, either.

Mr. Chairman, every U.S. President, from Dwight Eisenhower to Jimmy Carter has supported the goal of reaching an agreement with the Soviet Union to ban nuclear weapons testing. President Reagan unfortunately, abandoned that goal in 1983. But, Mr. Chairman, it is clear that a nuclear test ban, if verifiable, would contribute significantly to ending the arms race and reducing the threat of nuclear war.

Mr. Chairman, the amendment under consideration is not an arms ban, but it offers the next best thing, by lowering the permissible yield on nuclear blasts below the point at which the tests are militarily significant. Importantly, the agreement would be totally verifiable. If the Soviets do not accept on-site means for verification or confine new tests to one existing test area, the deal is off.

Mr. Chairman, the Soviet Government has laid down a diplomatic challenge by unilaterally halting its own nuclear testing program. The recent private agreement between Soviet and American scientists to set up seismic monitoring stations in the Soviet Union, manned by Americans, to ensure compliance with their test moratorium indicates a new willingness on the part of the Soviets to meet our demands for verification.

Mr. Chairman, this is an opportunity of historic proportions. Let us call the Soviets on this challenge and raise them one with this amendment and its verification provisions.

Perhaps this might start a series of one-upmanships that could lead to general progress in ending the nuclear arms race and with it the threat of nuclear annihilation. It continually

would set a good example for many other nations around the world and and reduce the likelihood that nations not now capable of nuclear weapons technology will gain it.

Mr. Chairman, verification has always been a concern of mine, but I am convinced that this amendment more than adequately addresses this issue. This is a good amendment Mr. Chairman. I urge its adoption.

Mr. DICKENSON. Mr. Chairman, I yield 3 minutes to the gentleman from Ohio [Mr. KASICH].

Mr. KASICH. Mr. Chairman, let me start by just quoting a member of the Reform Caucus who says:

> Insufficient operational testing prior to full rate production decisions by the Department of Defense poses a grave and unnecessary risk to our Nation's fighting men who must accept faulty weapons. In addition, it swindles the American taxpayers out of billions of dollars.

The member of the Reform Caucus who says that we in fact need the test in order to assure the reliability of our weapons and weapons systems.

So first of all to those Members who are watching this debate, we need to ensure reliability of our systems; but second, and perhaps the faultiest of all the arguments that have been advanced here is that testing somehow leads to more weapons, let us talk about what testing has done.

Since the 1960's, America, because of its ability to develop more accurate and in fact smaller megatonnage, has been able to reduce the total numbers of megatonnage in this country since the mid-1960's by two-thirds.

We have two-thirds less megatonnage today because of our ability to develop weapons, and hopefully in the future, weapons that give us greater stability.

What are those weapons? The Midgetman system; which our chairman of the Armed Services Committee supports, which people bipartisanly support because it gives us greater stability and gives us less emphasis on each platform.

In order to have the Midgetman system, we have to test. Everybody knows that.

We talk about the D–5, which is on a submarine. Submarines are not first strike, because you do not have to use-them-or-lose-them like what the Soviet Union has invested their resources in. In order to develop that D–5, we are going to have to test; but by deploying Midgetman, we are actually going to have to have fewer. We are going to have less megatonnage and fewer weapons with the deployment of that system.

Reliability, less megatonnage. Two very critical items in making up your mind.

There is one third thing that we have to consider.

In the Washington Post of August 7:

U.S. TEAM OF ARMS ADVISERS TO VISIT MOSCOW NEXT WEEK

The Reagan administration is sending a high-powered delegation to Moscow next week to discuss nuclear and space arms issues that are central to U.S.-Soviet relations • • •

Mr. Chairman, does it make any sense whatsoever to send our negotiators with marching orders that they may not be able to live with?

□ 1415

This goal is the same as ours, to reduce the total number of weapons, to reduce tensions between the United States and the Soviet Union. But let us give this great President of ours and his negotiators a chance to do it on their own. Let us not give them marching orders, let us not give them specific instructions, let them go and negotiate with the Soviets in the best way they possibly can for our country and for our world.

Mrs. SCHROEDER. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, I rise in strong support of the Aspin-Gephardt-Spratt-Green-Leach-Schroeder-Markey-Downey nuclear test moratorium amendment. The amendment before us today is a highly refined version of legislation (H.R. 3442) I introduced to stop American nuclear testing as long as the Soviet Union continues its own pause in testing. This bill put teeth into House Joint Resolution 3 which we passed on February 26 by a vote of 268 to 148.

The amendment before us is based on the tenet that we do not trust the Russians, that we cannot trust the Russians, that we have no reason to trust the Russians.

Rather, the amendment asserts that it is in American self-interest to prevent the Soviet Union from resuming their nuclear testing program. The reason for this is simple: we have conducted 35 percent more tests than the Soviets. Our warheads are more advanced and more reliable than Soviet warheads now. We have been testing for the past year, the Soviets have not. We can halt our testing program and, if the Soviets continue their moratorium, we stand in no danger of losing our lead.

The amendment only stops American testing above the 1 kiloton level. This is because, with seismic monitoring stations on Soviet territory, we can only be sure that the Soviets are not testing above the 1-kiloton level. Below 1 kiloton, we can conduct interesting tests relating to the strategic defense initiative and can test certain primary explosion devices.

Given the fact that a mutual pause in testing is overwhelming to the advantage of the United States, the important question is how do we make sure the pause is mutual. To ensure that the Russians do not cheat, the amendment before us gives the President three escape hatches. He can order testing to begin again if the the Soviet Union has conducted a test above the 1-kiloton level. He can order testing to begin again if the Soviet Union conducts a test outside its designated test areas. And, he can order testing to begin again if the Soviet Union has refused to accept reciprocal in-country monitoring arrangements, such as unmanned on-site seismic monitoring stations.

We stand at the verge of a historic breakthrough. Since the Soviet Union exploded its first nuclear device, the American arms control position has always been that verification of an arms control agreement requires on-site monitoring. The Soviets have always resisted inspection. Two historical forces seem to be converging to change the generation-old Soviet position.

The first factor is technological. Only recently have we developed and tested unmanned seismic stations which transmit real time data through communications satellites to computers for analysis. These devices can be placed on Soviet territory and visited from time to time for calibration and to check for tampering. The Soviets seem much more willing to allow us to place these sort of machines on their soil than to have a contingent of American engineers resident in restricted testing areas.

The second factor is political. There is new leadership in the Soviet Union which, whether for reasons of public relations or of peace, seems more inclined to negotiate an arms control agreement. The new leadership seems less insecure about a preemptive American attack and more secure about its own arsenal. Whatever the reason, General Secretary Gorbachev seems willing to accept on-site American inspection as part of an arms control agreement. This amendment says that we believe that a deal which gives us on-site inspection and no Soviet testing in exchange for no testing on our part is a deal we ought to accept.

Some have said that we should not pass the amendment at this time because, for the first time, the administration seems to be moving slowly toward real negotiations with the Soviet Union on arms control. This reasonable position has only come after nearly 6 years of hard-line refusals to negotiate. We must encourage the administration on this path.

I do not think passage of this amendment will force the administration to stray from the road toward sanity on nuclear arms negotiations it is now following. Rather, I believe passage of the amendment today will tell the administration that the American people want real arms control negotiations with the Soviets. It will tell the

administration that their previous policy has no supporters. Passage of the amendment should speed the administration's journey toward real arms control negotiations.

It will be a historic moment if the House votes to adopt the amendment before us now. It will be a vote for peace.

Ms. OAKAR. Mr. Chairman, will the gentlewoman yield to me?

Mrs. SCHROEDER. I am delighted to yield to the gentlewoman from Ohio.

Ms. OAKAR. I want to pay personal tribute to the gentlewoman and her efforts. She has provided the leadership, really, that we all look to on this issue.

I also want to add that I have been taken by the demeaning approach to what is a very, very sensitive issue. This is not a zany, crazy, or odd issue or, by innuendo and diversionary kinds of language, somehow un-American. This is as American as CHARLIE BENNETT, who served in World War II and who supports this amendment.

The CHAIRMAN pro tempore (Mr. DASCHLE). The time of the gentlewoman has expired.

Mr. ASPIN. Mr. Chairman, I yield 1 additional minute to the gentlewoman from Colorado.

Ms. OAKAR. Mr. Chairman, will the gentlewoman continue to yield?

Mrs. SCHROEDER. I yield to the gentlewoman from Ohio [Ms. OAKAR].

Ms. OAKAR. I thank the gentlewoman for continuing to yield.

Mr. Chairman, as I was saying, this is as American as our distinguished colleague, CHARLIE BENNETT, who served during World War II, contracted polio while in combat. He supports this amendment.

Mr. Chairman, this is as American as the gentlewoman from Colorado, the mother of two children concerned about the future not only of herself and her husband, Jim, and their children. It is as American as the majority of the American people who want a control on these horrendous weapons. This is an all-American issue, and we ought to support the efforts of the gentlewoman.

Mrs. SCHROEDER. I thank the gentlewoman from Ohio.

I would like to point out that over 150 communities in this country from Provo, UT, to every other place you can think of have passed resolutions asking for this kind of a resolution. So yes, it is very American. People outside the cities want this very much because they really understand how important it is to our future and to where we are going. And I thank the gentlewoman from Ohio.

The CHAIRMAN pro tempore. The time of the gentlewoman from Colorado [Mrs. SCHROEDER] has expired.

The Chair would inform the Committee that the gentleman from Wisconsin [Mr. ASPIN] has 10 minutes remaining and the gentleman from Alabama [Mr. DICKINSON] has 6 minutes remaining.

Mr. DICKINSON. Mr. Chairman, I yield 1 minute to the gentlewoman from Maryland [Mrs. BYRON], a member of our committee.

Mrs. BYRON. Mr. Chairman, I rise in opposition to the amendment on halting nuclear testing.

Let me first commend the Chairman of the committee and the gentleman from Missouri for offering what is truly a creative amendment. And although I certainly respect the gentleman's effort to achieve a consensus on the test ban issue, which seems to reemerge every decade or so, his amendment still, unfortunately, misses the mark for several reasons.

Although the amendment is being packaged as a compromise between those who support threshold reductions and those who favor a test ban now, it is clearly a legislative moratorium on nuclear testing. The testing of new warheads usually requires tests of approximately 50–150 kilotons. The testing of existing warheads or what is known as reliability testing can usually be done by tests of between 10 and 15 kilotons. In a recent article in the Washington Post in support for continued nuclear testing, former NSC Chairman Brent Scowcroft argued that test threshold could be only reduced to around 10 to 15 kilotons if we were serious about maintaining the reliabilty of our existing nuclear stockpile. The type of testing allowed in this amendment is useless in terms of weapons development and more importantly, it is useless in terms of maintaining the reliability of the existing stockpile.

What kind of testing then is permitted under the chairman's amendment? Basically, only minimal weapon-effect testing would be permitted. This type of testing tells us how well our conventional weapons systems sustain the impact of a nuclear blast. I don't mean to disparage this particular type of testing because it is important. Ironically, however, in my opinion it is not a type of testing which is used to enhance our ability to deter nuclear war but rather, it is a type of testing which is only applicable to a scenario after a nuclear strike has been initiated. In other words, after deterrence has failed.

Second, we must once again deal with the issue of verification as chairman of the House Armed Services Control Panel, I have received testimony from our weapons labs and from outside scientific experts which indicate the difficulty in verifying, with a high degree of confidence, low threshold testing. Attempts to accurately monitor nuclear testing at or below 1 kiloton exasperate the problem tenfold. Such explosions could be masked as chemical explosions or mine explosions when challenged.

Furthermore, the numbers of seismic events below this level increases dramatically. For example, the number of seismic events which are picked up at the "state of the art" Noress Array Monitoring Station at or below 1 kiloton are approximately 40 a day. And to comply with one of the provisions of the amendment, the President must be certain that none of these events were of a nuclear weapons nature. This is virtually a verification nightmare. It would seem to me that it would be in our best interest to stipulate that the Soviet Union had agreed to on-site monitoring along the lines the administration has been proposing prior to such a provision gone into effect rather than after the fact as prescribed by the gentleman's amendment.

Finally, let me briefly address the current situation regarding our discussion with the Soviets on the issue of nuclear testing. Recently officials from Arms Control Disarmament Agency met with their Soviet counterparts and put forth proposals to increase the confidence of both sides to monitor existing threshold treaties. It is my feeling that come December 31, 1987, we will be further away from resolving this issue rather than closer because of the constraints imposed by this amendment if it is adopted. It is also somewhat ironic that we would pass a resolution urging the President to enter into discussions with the Soviets on a comprehensive test ban and then in the same session, pass an amendment which makes the point of such talks meaningless.

In summary, with all due respect to the gentlemen from Wisconsin and Missouri, I oppose his amendment because it will, halt nuclear testing, especially reliability testing, which is critical to our national security, it will be difficult to verify and it undercuts current negotiations on threshold verification.

Mr. ASPIN. Mr. Chairman, I yield such time as he may consume to the gentleman from Wisconsin [Mr. MOODY].

Mr. MOODY. Mr. Chairman, I rise in strong support of the amendment.

Mr. ASPIN. Mr. Chairman, under the provisions of the rules, we really have no more need for extra time. We yield back the extra time on the general debate.

Mr. DICKINSON. Mr. Chairman, I yield 4 minutes to the gentleman from New York [Mr. STRATTON], a member of the committee.

Mr. STRATTON. I thank the gentleman from Alabama for yielding me this time.

I was in receipt just the other day of a letter from the Assistant Secretary of Defense, Programs, in the Depart-

ment of Energy, Admiral Foley. Admiral Foley points out that a 10-kiloton yield threshold would severely reduce our ability to perform competence tests of current stockpiled systems, and he said a yield limit as low as 1 kiloton, which is included in the amendment, would virtually eliminate our ability to perform these competence tests. These limits would prevent detection and correction of possible stockpile problems of the future. And in the past many problems would have gone undetected had it not been for these nuclear tests.

Once again, as has been mentioned during this debate, without these tests it would be impossible to field the Midgetman, which the chairman of the Committee on Armed Services in the House is delighted with, and would make it impossible to put the SHRAM-II as part of our antisubmarine warfare system and the Earth penetrator warheads needed to attack hardened and deeply buried targets, and that Trident-II missile would also be impossible to be utilized on the Trident submarines that a number of Members of the House are counting on getting in this bill by the time the debate is over.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN pro tempore. The gentleman from Alabama [Mr. DICKINSON] has 3 minutes remaining.

Mr. DICKINSON. Mr. Chairman, I yield myself the balance of my time and yield at this time to the gentleman from New Jersey [Mr. COURTER].

Mr. COURTER. I thank the gentleman for yielding.

Mr. Chairman, I just would like to make the point eminently clear that the idea that you can stop building nuclear weapons by stopping or eliminating nuclear tests is a fallacy. The Soviets, as everybody knows, for whatever public relations reasons that they have in their mind, have decided not to test weapons for a period of time. During the period of time that they have not tested weapons they have built 100 intercontinental ballistic missiles with warheads, at the same time the United States is producing none; 125 intermediate-range ballistic missiles, 450 short-range ballistic missiles, and 50 sea-launched ballistic missiles, and 50 strategic bombers, all during the time they curtailed or stopped their tests.

So there is really no relationship between stopping tests and stopping the proliferation of weapons.

I thank the gentleman for yielding.

Mr. DICKINSON. I thank the gentleman.

Mr. Chairman, in closing let me say without getting into the technology involved here, I think the most pertinent point that could be made was made by Dr. Robert Barker, who is the head of the delegation to the nuclear talks in Geneva. He was appointed by the President the head of nuclear talks.

I would like to read this quote for the Members. In discussing this amendment:

This is the most foolish thing we could do. We have just started negotiations in Geneva. We have our agenda and they have theirs. This tells the Soviets that they need not discuss our agenda at all. We have given them what they want ahead of time and put it in law.

He says, and I agree with him:

What more foolish thing could we do than to put in law what they would like to have?

And to further emphasize my point, Mr. Chairman, I would like the RECORD to show and the Members to have the benefit of a letter just received from Hon. John C. Whitehead, acting Secretary of State. The letter reads as follows:

DEPARTMENT OF STATE,
*Washington, August 8, 1986.*

Hon. WILLIAM S. BROOMFIELD,
*Chairman, Committee on Foreign Affairs, House of Representatives.*

DEAR MR. CHAIRMAN: I appreciate your concerns for tangible progress towards the eventual goal we all share—a world free of nuclear weapons. However, that goal is not furthered by the measures concerning nuclear testing being considered by the House today. Now, and for the foreseeable future, the security of the United States and our allies must rely on a credible and effective nuclear deterrent. In my view, that makes our carefully structured program of nuclear testing imperative.

Moreover, the heart of the problem we face in working to preserve peace and stability is not the testing of nuclear weapons but the size and composition of the Soviet offensive nuclear forces. We are energetically pursuing negotiations with the Soviet Union in Geneva to sharply reduce the number of nuclear weapons on both sides. This is our highest priority.

As you know, we have recently begun experts discussions with the Soviet Union on nuclear testing issues. We hope those discussions will lead to the resolution of our concerns about verification. Satisfaction in this area would allow us to move forward on ratification of the Threshold Test Ban Treaty (TTBT) and the Peaceful Nuclear Explosions Treaty (PNET). The President hopes these meetings mark the beginning of a constructive dialogue with the Soviet Union on nuclear testing.

I am convinced that Congressional limitations on our testing program such as those being considered today in the House will be counterproductive. These measures, if enacted, will undermine our negotiators in Geneva and encourage the Soviets that they need not engage in hard, serious negotiations because their ends can be achieved without addressing our concerns. I strongly urge you not to tie our hands in ways that will harm both our ability to maintain a credible and effective deterrent and our arms control efforts.

Sincerely,

JOHN C. WHITEHEAD,
*Acting Secretary.*

I think we all ought to vote against the amendment.

Mrs. LLOYD. Mr. Chairman, Dr. Richard Perle, Assistant Secretary of Defense for International Security Policy, is generally not known as a master of the understatement. However, Dr. Perle recently commented on the role of the private United States monitoring group for Soviet Nuclear tests in which he dismissed the group explanations as "not useful" and expressed a view that we ought to have a government to govern arrangements that provides for adequate verification. I believe that is a classic understatement.

As I understand it, the scientists from the National Resources Defense Council, an environmental group which I believe has quite suspect nuclear credentials, comprise the test monitoring team. It is worth nothing that Dr. Thomas Cochran, the NRDC team leader, has spent the past 15 years of his life in an effort to kill civilian nuclear power in the United States. It hardly seems to me good public policy to have an avowed zealot against the atom for peaceful purposes be involved in a critical monitoring function where the government has such tremendous concern.

Dr. Perle went on to point out that the private arrangement with NRDC does not constitute adequate verification and I must confess that I am alarmed that this body would seriously consider having critical monitoring activity performed by the National Resources Defense Council. This is why I am supporting Mr. DICKINSON's amendment. This is why I believe the Aspin-Gephardt-Schroeder substitute must be defeated.

We are being asked to have amateurs with a documented conflict of interest regarding civilian nuclear power and a weapons phobia do the job of highly skilled professionals who would have U.S. national security at the forefront of their concerns. I also understand that Dr. Cochran insists that we send vax computer systems to the U.S.S.R. and presumably let Dr. Perle worry about the technology transfer consequences. I urge my colleagues to vote for the Dickinson version and reject the other amendment which to me represents a terribly naive approach to nuclear test monitoring and United States Soviet technology transfer relations.

Mr. KOSTMAYER. Mr. Chairman, I rise in strong support of the amendment now pending. August 6 is the first anniversary of the Soviet Union's unilateral ban on the testing of underground nuclear weapons.

General Secretary Gorbachev announced last August that the Soviet Union would refrain from underground tests until the end of the year. His proposal for a ban on testing, offered in the hope that the United States would soon comply, was extended to March 31, 1986. When the Soviet ban ended on March 31 without a favorable United States response, Gorbachev extended it again, until the next United States test explosion, which occurred on April 9. The Soviet leader then extended the ban by his nation until August 6, despite the fact that more than a dozen nuclear tests were conducted by the United States during the year long ban.

The Soviets have not yet announced whether they will now renew testing. The United States has not only continued a schedule of nuclear testing, but we have actually accelerated our program. The Soviets now fear we will advance even further ahead than we al-

ready are in the development of nuclear warhead technology leaving them increasingly vulnerable.

The failure of the administration to consider abiding by a bilateral, verifiable moratorium on the testing of nuclear weapons has made the world a more dangerous place in which to live than it was a year ago.

It is very much in the interest of our Nation to abide by a mutual, verifiable, bilateral ban on nuclear testing with the Soviets. First, we enjoy a considerable technological edge in this area of nuclear weaponry and a test ban would help to ensure that we preserve that edge. Second, we spend about $60 million for each of these tests—precious funds that could be more effectively spent on far more worthwhile causes. Finally, a test ban undertaken by the two major powers would send a powerful signal to the rest of the world that we must halt the proliferation of nuclear weapons on our planet.

I strongly support the amendment offered by the distinguished chairman of the Committee on Armed Services, Congressman ASPIN, to the 1987 defense bill which would limit nuclear testing of devices over 1 kiloton by the United States for 1 year beginning January 1, 1987, provided the Soviets agree to do the same.

Enactment of the Aspin amendment will help to apply the brakes to the runaway arms race and provide for the first time, a framework in which to begin serious and long overdue arms control negotiations with the Soviet Union, without jeopardizing United States national security.

Mrs. COLLINS. Mr. Chairman, it's time to put some sanity into U.S. nuclear policy. A moratorium on nuclear testing represents a first step, away from the nuclear brink and toward a safer, more secure world.

The Soviet Union has not detonated a nuclear device since last August and has called on the United States to join them in a testing moratorium. This represents a golden opportunity to achieve nuclear stability. For years, those of us who support arms control have called on the Soviets to undertake steps which would demonstrate their sincerity. Now that they have done so, it is imperative that the United States follow suit.

Many believe that the Soviet action is only a smokescreen, a propaganada ploy designed to deceive the world. If this is true, there can be no better way to call their bluff than to accept their offer. If they then reject the motatorium, they will have shown the world their true stripes.

There are others who state that Moscow would cheat, secretly testing weapons to achieve superiority over the West. This is a very real concern—time and again the Soviets have proven that they cannot be trusted. A moratorium, however, would not rely on Moscow's honesty. The technical means to verify such an agreement exists. There are already more than 1,000 seismographic stations, operating worldwide, which can detect underground nuclear explosions. The United States operates monitoring stations in over 35 countries, many of them bordering the Soviet Union. Experts believe that we can detect underground nuclear explosions inside the Soviet Union of less than 1 kiloton in magnitude. With this ability, if the Soviets cheat, our intelligence will know it.

But if Moscow is indeed serious this time, if they too have finally come to recognize the danger of nuclear weapons, than a moratorium could bring the world back from the brink of nuclear war. This represents just the first move. A moratorium will allow an easing of tensions and create an atmosphere in which a verifiable total test ban can be negotiated. After such an agreement, a real reduction in nuclear weapons will be possible.

The Aspin-Gephardt-Schroeder amendment is a step in the right direction. It does not commit the United States to unilateral action, but only precludes tests as long as the Soviets also refrain. Furthermore, tests under 1 kiloton, which might be difficult to detect, are excluded. To further insure verification, the moratorium only applies if the Soviets agreed to onsite monitoring. The United States has nothing to lose, and everything to gain from this amendment and I urge my colleagues to support it. The future of the world may depend on it.

Mr. JEFFORDS. Mr. Chairman, for the past 6 years, there has been little, if any, real progress toward reaching solid and sound arms control agreements. The one exception to this bleak strategic landscape has been in the area of a nuclear test ban moratorium.

One year ago, the Soviet Union announced that it would temporarily halt all weapons tests provided that the United States did the same. Since then, the Soviet leaders have continued the moratorium, despite the fact that the United States has conducted several large tests. This Soviet unilateral moratorium expired 2 days ago. Yet the Soviet leadership has indicated that it will wait until Congress considers the testing issue before it decides whether to continue the moratorium.

Last week, Soviet and American negotiators met in Geneva for the sole purpose of discussing issues surrounding a test ban. Unfortunately, there was considerable divergence between the two agendas. The Soviets would only discuss the possibility of comprehensive test ban negotiations, and the Americans would only discuss alleged Soviet violations of the Threshold Test Ban Treaty—even though that treaty, like the Peaceful Nuclear Explosions Treaty, has never been ratified by the Senate.

Despite lack of resolution in the Geneva negotiations, however, there have been indications that a positive atmosphere prevailed, and the talks have been scheduled to resume in September.

I also have been encouraged by the conclusion of an agreement between the National Resources Defense Council [NRDC] and the Soviet Academy of Sciences to allow NRDC to set up seismic monitoring equipment near the main Soviet test site at Semipalatinsk. The agreement calls for three seismic stations near the major test site in each country. This is a very important development for both diplomatic and scientific reasons. The traditional Soviet reluctance to in-country monitoring stations has clearly been discarded. Therefore, the Reagan administration's insistence that adquate verification is not possible has been considerably diminished.

Support for a United States-Soviet testing moratorium is widespread. Last August, the Five Continent Peace Initiative, consisting of leaders from India, Mexico, Sweden, Greece, Argentina, and Tanzania, called for a halt to all nuclear testing and production. These leaders urged the Soviets to extend their moratorium this spring and, during a meeting in Mexico City this week, renewed their call for a test ban.

In my own State of Vermont, lawmakers and concerned citizens held press conferences around the State last Wednesday, urging Congress to support nuclear test ban legislation. In the second such statewide initiative, over 70 State senators and representatives signed a resolution asking Washington to take action immediately to bring about a testing moratorium. I also have heard from many Vermonters who feel strongly that controlling nuclear weapons testing is crucial to slowing down the arms race.

The Aspin-Gephardt amendment we have before us today is a very reasonable and moderate proposal. It calls for a 1-year pause, beginning January 1, 1987, in all nuclear weapons testing over 1 kiloton. This pause would remain in effect only as long as the Soviets abide by the same restraints. The moratorium is contingent upon both sides accepting onsite emplacement of seismic verification stations. With this equipment, the low threshold of 1 kiloton can be verified with a high degree of confidence. If there should be any indication that the Soviets had tested in the 1 to 10 kiloton range, or if they refuse to permit the in-country monitoring equipment, then the threshhold would be raised to 10 kilotons, which can be verified with a high degree of confidence using existing techniques.

Today we have a critical window of opportunity. We must not pass up this chance to advance this important aspect of nuclear arms limitation. In addition to slowing the destabilizing and fiscally debilitating spiral of nuclear weapons production, the testing pause provided in the Aspin-Gephardt amendment would provide renewed impetus for further United States-Soviet cooperation in the arms control arena. With the improved atmosphere generated by any successful United States-Soviet cooperation, other possibilities for accord would be enhanced.

I urge all of my colleagues to support the Aspin-Gephardt amendment.

Mr. KASTENMEIER. Mr. Chairman, Albert Einstein once remarked that seeking security through armanents is a dangerous illusion. This is a precise description of the situation in which the United States and the Soviet Union find themselves today.

Both nuclear superpowers are pursuing security through the development of powerful new weapons systems which produce only greater insecurity. This dangerous cycle must be ended.

As a first step, I urge my colleagues to support the Aspin-Gephardt-Schroeder amendment which imposes as 1-year moratorium, beginning January 1, 1987, on all nuclear tests by the United States in excess of one kiloton, provided that the Soviet Union also observes such a moratorium.

With both the United States and the Soviet Union abiding by a moratorium on nuclear testing, the two superpowers could then proceed with the resumption of negotiations for a comprehensive test ban treaty.

Mr. Chairman, the deadly arms race is the most paramount issue facing civilization today, and the American people want and expect progress on arms control. A comprehensive test ban treaty can be the key to controlling the nuclear arms race, and it would enhance the security of the United States, the Soviet Union and that of the entire world.

Mr. LEVINE of California. Mr. Chairman, I rise in support of this amendment offered by a bipartisan group of our colleagues, including House Armed Services Committee Chairman ASPIN, Congresswoman SCHROEDER, and Congressmen GREEN and LEACH.

The amendment before us bans during calendar year 1987 the use of funds by the Department of Defense or the Department of Energy to carry out any nuclear explosion with a yield exceeding 1 kiloton, or a nuclear explosion that is conducted outside a designated test area, unless the President certifies to Congress (1) that the Soviet Union has carried out a nuclear explosion with a yield exceeding 1 kiloton after December 31, 1986; or (2) that the Soviet Union has carried out a nuclear explosion outside a designated test area after December 31, 1986; or (3) that the Soviet Union has refused to accept and implement reciprocal in-country monitoring arrangements to be in effect for calendar year 1987.

This amendment has the same goal as H.R. 3442, authored by our distinguished colleague from Colorado [Mrs. SCHROEDER], and which I cosponsored, and is the result of negotiations among Members from across the political spectrum who have agreed to this much-needed amendment.

The language of this amendment is well-thought-out and in no way compromises our national security or our national interests. The testing moratorium is conditioned upon Soviet willingness to accept mutual emplacement of in-country monitoring equipment and to confine testing to 1 kiloton at a single test site. If the Soviets refuse to accept in-country monitoring equipment or violate the one-kiloton threshold, the United States would be released immediately from the moratorium. If the two sides reach an accord limiting nuclear testing, the provisions of the amendment would automatically lapse.

Mr. Chairman, almost exactly 1 year ago—on August 6, 1985—the Soviet Union announced that it would refrain from all nuclear testing on a temporary basis for as long as the United States refrained from testing. This self-imposed moratorium has been extended twice and has been broadened from a conditional moratorium to an unconditional, unilateral one. It was due to expire last Wednesday. During this time, even the most hard-line opponents of a moratorium have not alleged that the Soviets have conducted nuclear tests.

There are many important goals to accomplish in this body and in our country. But Mr. Chairman, none is more important than putting an end to the arms race.

It was 41 years ago yesterday that the *Enola Gay* dropped the first atomic bomb on Hiroshima. That bomb incinerated people on the spot, killed as many as 130,000 people, and wounded thousands more. Every one of us in this body knows of the disfigurement—the maiming—the lives forever changed—the destruction that the dropping of that bomb wrought. And that bomb was miniscule compared to those in the Soviet and American arsenals today.

It is estimated that today the United States and the Soviet Union have between them some 50,000 weapons in their nuclear arsenals. The destruction these weapons can wreak is hard to imagine. We have within our arsenals enough power to destroy ourselves and the Soviet Union as functional societies. But we need not do so.

Mr. Chairman, the world awaits a nuclear rapprochement between the two superpowers. Starting in May 1984, six respected world leaders formulated the Five Continent Peace Initiative calling for a halt to all nuclear testing and production. Most recently, these leaders, which include Argentine President Alfonsin, Mexican President de la Madrid, Indian Prime Minister Gandhi, and Greek Prime Minister Papandreou, called on President Reagan and Premier Gorbachev to suspend testing until further discussions can be held at the next summit. There seem to be hopeful signs that a summit will in fact take place later this year.

Now is the time for the United States to show the Soviet Union that we are serious about arms control. The Reagan administration has an abysmal arms control record. It has not negotiated one arms control agreement since it took office in 1981. In fact, it has the worst record of any administration since the nuclear arms race began. But Congress can play a constructive role in arms control. It is our responsibility to do so. Let us use this amendment as an opportunity to send a signal to the Soviet Union that we, as representatives of the people of this country, are deeply concerned about the arms race and deeply desire an end to it. The time is now.

I urge my colleagues to support this welcome and constructive amendment.

Ms. MIKULSKI. Mr. Chairman, I rise in strong support of the Aspin-Gephardt-Schroeder amendment to achieve a verifiable reduction of nuclear tests. I was a cosponsor of the original Schroeder bill that would have prohibited the use of funds for nuclear testing. This Aspin-Gephardt-Schroeder amendment is a useful compromise that would set up a 1-year halt of nuclear tests above 1 kiloton.

Before 1981, six Presidents negotiated for a test ban. In 1963 the United States, Great Britain, and the Soviet Union ratified a Limited Test Ban Treaty prohibiting nuclear tests in the atmosphere, outer space, and under water. One hundred other nations have ratified or acceded to this treaty.

The United States and the Soviet Union signed a Threshold Test Ban Treaty prohibiting underground nuclear weapons tests above 150 kilotons in 1974 and its companion treaty, the Peaceful Nuclear Explosions Treaty, in 1976. I have continually urged the other body to ratify these treaties. Unfortunately, no progress has been made.

In 1984 the Senate overwhelmingly passed a resolution calling for a resumption of Comprehensive Test Ban Treaty negotiations. Just 6 months ago, the House of Representatives did likewise.

Gradually, we are making our way toward a Comprehensive Test Ban Treaty [CTBT]. The chief barrier to CTBT has been the Soviet refusal to accept adequate verification measures. But last month, a private group of American scientists, under agreement with the Soviet Academy of Sciences, installed seismic monitoring stations in Kazakhstan, the Soviet Union's primary nuclear testing site. We must act now to keep this momentum going.

Mr. Chairman, arms control negotiations are like a hallway that has two doors, one marked "U.S.S.R.", the other marked "U.S.A." The Soviets have opened their door by unilaterally imposing a moratorium on testing. This amendment would open our own door. Hopefully, we can meet in the hallway someday soon to negotiate a comprehensive, mutually verifiable test ban.

Mr. BROWN of California. Mr. Chairman, I rise in support of the Aspin amendment calling for a 1-year moratorium on nuclear weapons tests. The time has come to bring a halt to all nuclear testing, and this amendment would do that for 1 year starting in January of next year.

Since 1945, the superpowers have detonated more than 1,500 nuclear bombs in the atmosphere, in space, in the oceans, and underground. These tests have enabled the superpowers to amass evergrowing stockpiles of increasingly sophisticated nuclear arms. Each new nuclear device—the neutron bomb, the American MX, the Soviet SS-24—has emerged only after a series of nuclear tests.

Put simply, nuclear testing is an engine to the arms race. It provides the power that weapons designers (both American and Soviet) need to modify and create dangerous new nuclear weapons. In my view, the time has come to turn this engine off.

The Soviets already have done so, for more than a year now. And they have been asking us to do the same. The Aspin amendment would take the Soviets up on their offer, and result in a turning off of the engines in both the United States and the Soviet Union for 1 year.

The administration argues against this amendment, claiming that the measure would undermine our negotiators. This is not a new charge by any means; indeed, we hear this same argument prior to consideration of every piece of arms control legislation introduced in this chamber, whether the administration is negotiating on the subject in question or not.

If one looks closely at the actual language in the Aspin amendment, however, it is clear that passage of this measure would help—not hurt—the negotiation of further limitations on nuclear testing.

The amendment does not impose an immediate cut-off of funds for nuclear testing. Rather, the 1-year moratorium would not go into effect until next January, thus allowing our negotiators in Geneva plenty of time to strike an alternative deal should they truly want limitations on nuclear testing.

And the Aspin measure is contigent on Soviet acceptance of on-site verification. This is precisely what the administration has been calling for since it came to office. How could we possibly be undermining our negotiators by

calling on the Soviets to agree to on-site verification?

Mr. Gorbachev has said repeatedly that on-site verification is not a problem, that the Soviets would agreed to whatever verification measures were necessary in order to monitor a test ban. Passage of this amendment would allow the United States, and the world, to find out if the Soviets are serious in making this offer.

In order to find out whether an adequate verification regime can be established, it is essential that the United States join the Soviets in a mutual moratorium. Mutual restraint on nuclear weapons testing is what this amendment is calling for. The Soviets would continue their restraint, they would refrain from restarting the engine that's powering their nuclear weapons program, and we would demonstrate some restraint in return.

Mr. Chairman, since May of this year, when the President announced that he would be scrapping the SALT II treaty, administration officials have said that the existing treaty regime should be replaced by, what they have called, truly mutual restraint. Well, this amendment provides the perfect opportunity to establish such a situation.

What could be a better example of mutual restraint than an agreed upon moratorium on nuclear testing for 1 year, combined with newly established on-site verification to monitor the moratorium. This amendment would test the seriousness of both the Soviet Union and the United States in their statements of support for progress in arms control. I urge my colleagues to give it their full support.

Mr. DICKINSON. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN pro tempore. All time has expired.

Under the rule, the Chair calls on the gentleman from Alabama [Mr. DICKINSON] and recognizes him to offer the first amendment.

□ 1430

Mr. DICKINSON. Mr. Chairman, it was my intention to offer an amendment which simply made a change in the entity of the countries involved. The statement of the gentlewoman from Colorado made it clear that their amendments referred to the U.S. Government.

That being the case, and since that was the principal change in my amendment, I will not offer mine, if I understood the gentlewoman correctly.

AMENDMENT OFFERED BY MR. ASPIN

Mr. ASPIN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

An amendment offered by Mr. ASPIN: At the end of title I of division C (page 341, after line 4), add the following new section:

SEC. 3036. LIMITATION ON NUCLEAR TESTING.

(a) ONE-YEAR LIMITATION.—During calendar year 1987, funds appropriated to the Department of Defense or the Department of Energy may not be obligated or expended to carry out any nuclear explosion with a yield exceeding one kiloton, or a nuclear explosion that is conducted outside a designated test area, unless the President certifies to Congress—

(1) that the Soviet Union has carried out a nuclear explosion with a yield exceeding one kiloton after December 31, 1986;

(2) that the Soviet Union has carried out a nuclear explosion outside a designated test area after December 31, 1986; or

(3) that the Soviet Union has refused to accept and implement reciprocal in-country monitoring arrangements to be in effect for calendar year 1987.

(b) TERMINATION FOR CERTAIN NEW AGREEMENTS.—The limitation on nuclear explosions in subsection (a) shall cease to apply if supplanted by an agreement, accord, or treaty between the United States and the Soviet Union establishing significant limits on nuclear explosions by such countries that is negotiated after the date of the enactment of this Act.

(c) DEFINITIONS.—For the purposes of this section:

(1) The term "in-country reciprocal monitoring arrangements" means arrangements between the United States and the Soviet Union to supplement national technical means of verification through the emplacement by each country of seismic monitoring stations on the national territory of the other so that the seismic monitoring network of each nation will be capable of detecting and identifying nuclear explosions with a yield exceeding one kiloton at known nuclear weapons test sites of the other nation and at any other site of the other nation that currently has the capability to accommodate decoupled nuclear explosions with a yield exceeding one kiloton.

(2) The term "designated test area" means an area within the Soviet Union or the United States which—

(A) is known to be composed of strong-coupling rock; and

(B) is located within the boundaries of a single existing nuclear weapons testing site in such country.

Mr. ASPIN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

The CHAIRMAN pro tempore. Under the rule, the gentleman from Wisconsin [Mr. ASPIN] will be recognized for 10 minutes, and a Member opposed thereto will be recognized for 10 minutes.

The Chair recognizes the gentleman from Wisconsin [Mr. ASPIN].

Mr. ASPIN. Mr. Chairman, I reserve my time.

Mr. DICKINSON. Mr. Chairman, I yield such time as he may consume to the gentleman from Illinois [Mr. HYDE].

Mr. HYDE. Mr. Chairman, I thank the gentleman for yielding this time to me.

Mr. Chairman, I just want to make one point that has not yet been made. When you put a moratorium on for 1 year on a very complicated program, we will lose our scientists. No scientists worth his salt is going to stay in a program that is at a standstill, that is going nowhere. They will go to private industry. They will go to the academic world. But they are not going to sit in a laboratory and do crossword puzzles.

I suggest the Soviets will keep their scientists, because that is the kind of society they have.

That is just one little aspect of this very complicated issue that we are summarily disposing of.

The second thing is, for God's sake, let our negotiators negotiate. We are cosmic kibitzers standing behind the table as Mr. Kampelman and Ambassador Glitman try to negotiate with the toughest negotiating agenda in the world and the toughest negotiators. We are standing behind them waving our hands and saying. "Look at us. We will tell you what they ought to do."

We would not tell a brain surgeon what instruments to use while he is performing surgery. We are not competent to do so.

We should be passing a resolution commending our negotiators and saying we in Congress support you instead of micromanaging, usurping a function that we are not capable of fulfilling.

Mr. ASPIN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, let me just say on behalf of this amendment here, and just respond to the gentleman from Illinois for just a second, it seems to me that there are some very, very important national security reasons to be for this amendment which we have before us.

They are summarized by two words, "miniaturization" and "verification."

The current situation in the United States-Soviet nuclear balance is such that the United States has a great advantage over the ability to make smaller nuclear weapons. That is tremendously important in being able to pack a number of warheads onto the MIRV missiles. In fact, if the President of the United States is going to do what we hope he will not do, which is to do away with the SALT limits, one of the great advantages that the Soviet Union has is extra throw-weight on which they can put more warheads onto their weapons. They cannot do that now without further development, and that means further testing.

So one very clear advantage is that we retain the advantage in miniaturization if we have a testing moratorium.

Second is verification. This language says that it does not take place unless there are additional verification steps taken, mainly onsite verification in the Soviet Union by the Soviet Union. If that does not happen, this moratorium never takes place.

There has been some talk by the Soviets about them doing that. Let us find out. Let us call the cards. Let us put it out on the table. Let us find out.

One way to do it is with this amendment.

And if we can get a breakthrough with onsite verification in this area, that would be a major breakthough, because clearly for other arms control issues like MBFR and other things, it would be clearly in our interest to have additional verification.

Let me point out that the gentleman from Illinois was talking about the need to have the negotiators negotiate. One of the things that we did with this amendment was to deliberately delay the implementation date to January 1, 1987, in order to provide time for the negotiators to negotiate. The best kind of legislation towards arms control puts incentives for both sides, incentives for the Reagan administration to negotiate and incentives for the Soviets to negotiate.

What we have done with this piece of legislation is to put in some clear incentives for the Soviets to improve the verification, to conduct these negotiations with the United States.

There are also incentives for the Reagan administration, because it does say that this testing moratorium or this testing pause does not take place until we have had a chance to negotiate this fall and let the negotiations take place.

We do have incentives for both sides.

Mr. Chairman, I reserve the balance of my time.

Mr. DICKINSON. Mr. Chairman, in order to give the gentleman from New Jersey an opportunity to respond, I yield 3 minutes to the gentleman from New Jersey.

Mr. COURTER. Mr. Chairman, I thank the gentleman for yielding this time to me.

Mr. Chairman, I would like to clear up three statements that were made by the chairman of the committee, one of which was the assumption that if there is pressure placed on the negotiators, therefore, we are better off.

I would agree that if there is a lot of artificial pressure placed on our negotiators, there is a tendency to cave in, there is a tendency to come back with something. I think it is very important to recognize that a good treaty is better than no treaty, but indeed a bad treaty is worse than no treaty. So the idea that this will create pressure, I think, is working against our interests and not in favor of our interests.

Second, the chairman was clearly and obviously highly erroneous when the gentleman said that if we passed this particular amendment, the Soviets will not be able to increase their lift capabilities or their throw-weight capabilities.

This amendment has everything to do with the warhead tests. It has nothing to do with testing ICBM's. So one cannot extrapolate from the passage of this amendment that tests and modernization of ICBM's and SLBM's can continue to go on to increase the massive Soviet advantage that they already now have in throw-weight capability.

Finally, very frankly, the Soviets do not need to miniaturize. The chairman of the full committee said that the reason you vote in favor of this amendment is for the purpose of miniaturization. The Soviets do not need miniature weapons. With the type of lift capability, which is twice ours, it is no great advantage for them to miniaturize. Their warheads are larger by weight. Their warheads are larger by yield. And there is nothing in this amendment that would reduce their capability of doing research, development, testing and evaluation of ICBM's that have greater thrust and greater throw-weight than the ones they have now.

Mr. ASPIN. Mr. Chairman, I would like to say that we only have one more speaker on our side, so we would like to wait and close debate with the concluding speaker.

The CHAIRMAN pro tempore. The gentleman from Wisconsin [Mr. ASPIN] holds the right to conclude the debate.

Mr. DICKINSON. Mr. Chairman, if the gentleman will conclude, I will yield back the balance of my time.

Mr. ASPIN. Mr. Chairman, I yield the remainder of my time to the majority leader of the House, the gentleman from Texas [Mr. WRIGHT].

Mr. WRIGHT. Mr. Chairman, surely nobody could question my personal credentials as a supporter of national defense. For 30 years in the Congress, serving with seven Presidents of both political parties, I have consistently created a policy and established a record of supporting our President, whoever he be, in his negotiations with other countries.

□ 1440

I think we have come to a time after 40 years of the nuclear arms race in which it is vitally important for the Congress to take a stand. Having taken that as we did in February when the House overwhelmingly passed House Joint Resolution 3, the substance of which was reaffirmed by the Senate last night, we must insist that the President pay some attention at least to what level we in the Congress are prepared to support and sustain from the standpoint of ever-increasing military expenditures.

Surely every sane person in the world wants to end the nuclear arms race. Emphatically it would be a dereliction of our duty were we to fail to do everything possible to create a condition permitting the end of the nuclear arms race.

Manifestly, the only way we ever shall end the nuclear arms race is for both sides to stop testing and developing new nuclear weapons.

Surely the world wants an end to the nuclear arms race. That end will not come by one nation dominating the world; that end will come by both nations involved in that race for 40 years coming together and mutually saying "enough."

We both have enough weapons to destroy one another many times over. It serves no purpose whatever for us to continue developing and testing of newer and ever-more expensive and ever-more sophisticated nuclear weapons and consuming an ever-greater portion of our limited resources in each of our two countries on the unproductive implements of terror and destruction if, instead, we can act as mature human beings and sit down together and negotiate a mutual and verifiable moratorium on the exploding of nuclear weapons.

That is what this proposes. It is very simple; it is a modest step in the path to peace. It simply proposes that for 1 year, beginning in 1987, both nations shall be required, mutually, to abstain from exploding nuclear weapons.

Is that too much to ask? It does not put us at any jeopardy. Surely for the last year during which the Soviet Union unilaterally has voluntarily observed a moratorium on test explosions, we have had every ample opportunity to catch up if we were behind. Surely in the months remaining in the year 1986 we shall have the opportunity to do whatever testing those in our Defense Department think is absolutely necessary.

Surely it will be to our advantage then and the advantage of mankind if we could have truly mutual, truly verifiable cessation of this continuous leap-frogging in the development of ever-more costly weapons that has continued for the last 40 years. We do not need any more nuclear weapons. Neither side needs any more nuclear weapons. Between us we already have enough to destroy civilization." The route proposed in this amendment provides the best and perhaps the only way, it seems to me, in which jointly we can begin diverting some of that disproportionate share of our limited resources that we have put upon destruction into those things that enoble the human race.

Would it not be a tragic mistake for us in the United States if we were to allow ourselves to be put in the embarrassing position of appearing in the eyes of the world to be the ones who obstruct the search for peace? Surely, that is exactly what would happen if, in the face of the announced willingness on the part of the Soviet Union—something we have awaited for over four decades—to cease the exploding and testing of nuclear weapons, we were to demur and demonstrate an unwillingness to join them in a verifiable and mutual reduction.

Mr. Gorbachev announced on August 6 of last year that Russia would explode no more nuclear weapons so long as we did not. I've heard no denial that the pledge has been kept. Even when we refused to stop testing, the Soviet leader has twice extended the moratorium unilaterally. He now asserts his willingness to let us place official United States monitors at the Russian test sites.

Some may say that is just a propaganda ploy on the part of the Soviet Union. Perhaps it is; I do not know how to fathom the unfathomable. I cannot pretend to you that I understand what is in the minds of the people in the Kremlin. But I do know this: The way to determine whether it is a propaganda ploy or a sincere, genuine gesture toward peace is to call their hand. To put them on the spot. Say, "Very well; let us do it. For 1 year, both of us will mutually bind ourselves in a way that the other can verify, not to explode nuclear weapons."

Please understand, the moratorium proposed by this amendment is fully verifiable. I, for one, was and am prepared to support the amendment that would have been offered by the gentleman from Alabama making it abundantly clear that representatives of the United States Government must be permitted on Soviet soil at testing sites to monitor and determine for certain that this agreement is being abided by.

Bear this in mind further, that by our very language we provide that should the President determine the Soviet Union was not abiding by this agreement, then he, the President of the United States, could cancel it on that ground and it would have no further force and effect.

Surely we do not stand at any jeopardy. It surely does not hurt us. I believe it could help us, not only in the eyes of mankind, but in the eyes of future generations.

The single, overriding fallacy of the President's negotiating stance is that he wants to do away with old weapons that we have already bought and paid for but continue to build new, more sophisticated, more destructive, evermore expensive weapons. That is not the way to end the nuclear arms race.

The way to end the nuclear arms race manifestly is to stop testing new nuclear weapons. The way to do that is for both sides, mutually, and in a verifiable way in which each side can test the sincerity of the other, to call a halt. We are at that point.

Perhaps this is the historic point when we may truly hasten that moment in which nations may beat their swords into plowshares, and their spears into pruning hooks, and nation not lift up sword against nation, and neither learn war anymore.

Mr. MOODY. Mr. Chairman, this country has a tremendous opportunity to slow the quantitative and qualitative growth of nuclear weapons through an agreement limiting nuclear testing. The Soviets have unilaterally stopped nuclear testing and invited the United States to join them in test ban negotiations. Yet the administration has refused the offer, over the objections of the Congress and the American people, thereby ceding all leadership on this issue to the Soviet Union.

If President Reagan truly wants to render nuclear weapons impotent and obsolete, he should support a test ban. If he truly wants to limit the growth of Soviet forces, he should support a test ban. And if he truly seeks to reduce the Soviets' first strike counterforce capability, he should continue the efforts of six previous administrations and seek limits on testing. We have the opportunity to negotiate real testing limits, but so far President Reagan has not taken advantage of it.

Although the President has often questioned our ability to verify a testing agreement, it took the efforts of a private U.S. organization to challenge the Soviets' claim that they would allow incountry monitoring devices. As we now know, the Soviets fulfilled their pledge and U.S. seismometers are being installed on Soviet territory. We have the ability to confidently verify testing limits.

But the administration continues to forego negotiations in order to continue a buildup of nuclear arms. In fact, President Reagan requested over a billion dollars this year to expand and modernize nuclear materials and weapons production centers in the United States.

This amendment does not mandate a test ban. It simply imposes a 1 year pause in U.S. nuclear testing over 1 kiloton beginning on January 1, 1987—If the Soviets agree to the necessary verification measures, if the President enters into a testing agreement with the Soviet Union, this amendment is null and void.

This amendment is not a unilateral concession. It limits the United States to nuclear tests below 1 kiloton only so long as the President is confident the Soviets are not testing above 1 kiloton.

The amendment is contingent on the Soviets accepting adequate verification measures.

The testing pause does not take effect until January 1 of next year, so the United States will have time to conduct any required reliability tests.

This testing pause will not undermine the President's ability to negotiate testing limits. It is intended to encourage him to do so. The restrictions in this amendment are waived if the President negotiates a testing agreement.

The American people overwhelmingly support limits on nuclear testing. It is time for Congress to act, time for the United States to join the Soviets' testing moratorium. We must lend impetus to serious nuclear testing negotiations before the opportunity to control Soviet forces slips away.

I urge my colleagues to support this amendment.

Mr. SPRATT. Mr. Chairman, I rise in support of the Aspin-Gephardt-Schroeder nuclear testing amendment.

The amendment would establish a 1-year limitation on underground nuclear explosions above 1 kiloton beginning January 1, 1987. Mr. Chairman, I believe this amendment comes at an opportune moment; I think our Government should pursue the opportunity; and that is why I support the amendment.

I became a supporter of this amendment only after intensive discussion and negotiation on its content amongst the authors. As finally agreed upon, the amendment simply prevents the U.S. Government from spending money to perform nuclear tests above 1 kiloton if the Soviet Union meets three conditions:

First, the Soviets must not test any nuclear weapons with a yield over 1 kiloton;

Second, the Soviets must not conduct any nuclear test outside a designated test area;

Finally, the Soviets must agree to accept and install in-country monitoring devices.

Until the Soviet Union has met these conditions, there will be no moratorium.

Let me explain how we came to an agreement over this amendment.

Recently, the Soviet Union appears to have indicated a willingness to accept verification devices on its own soil. It has allowed a nongovernmental group, the Natural Resources Defense Council, to place seismic monitoring devices near the Soviet's primary nuclear testing site at Semipalatinsk. For years, in-country and onsite inspection have been bones of contention between the United States and the U.S.S.R. In part, it was concern over verification that kept SALT II from being ratified; and right now, problems over in-country inspection are an obstacle to a treaty banning chemical weapons. We may have a breakthrough; we may have an historic opportunity to install verification devices inside the Soviet Union, which will not only make a comprehensive test ban possible, but also open the door to other arms control measures ranging from nuclear to chemical weapons.

Is this an opportunity or is it an illusion? I don't know. All this amendment would dictate is that our Government approach theirs and find out how far each will go. If the Soviets will not agree to in-country seismic monitoring, if they will not agree to test only in set locations, then there is no moratorium.

At first, I had reservations about this amendment. I did not want Congress to limit the President's ability to negotiate with the Soviets on limiting nuclear testing. But as it is now drawn, this amendment gives the President ample room to reach a separate arrangement with the Soviet Union. And any agreement, accord or treaty limiting nuclear explosions reached by the United States and Soviet Union would supplant the amendment.

I also wanted to make sure that the amendment allowed enough time for the two nations to agree on and implement reciprocal in-country seismic monitoring arrangements. The decision to set the date of implementation to January 1, 1988, rather than the date of enactment or the beginning of the fiscal year on October 1, 1987, was made for exactly this reason—to provide time for implementing verification arrangements.

Setting the implementation date to January 1, 1988, also allows the Defense Department to complete testing on high-priority nuclear weapons projects, such as the D–5 warhead for the Trident II missile, and carry-out the

necessary reliability test required to certify our nuclear arsenal during the yearlong period of the 1 kiloton threshold moratorium. Earlier agreements on nuclear testing provide a precedent for this approach. The Threshold Test Ban Treaty [TTBT] was signed 2 years before its provisions came into force.

We have heard today that a testing pause would prevent the United States from developing a variety of new nuclear warheads. Let's examine the facts. The Midgetman warhead is a derivative of the Mk–12A warhead being used on the MX. The nuclear weapons labs claim that to make the warhead mobile will require additional nuclear tests. The program manager for the Midgetman, however, points out that the MX was originally designed to be a mobile system. It is unclear if additional testing is required. The Trident II D–5 warhead is very close to being certified. The remaining testing can be accomplished prior to January 1, 1987.

For these reasons, Mr. Chairman, I support this amendment, and urge its adoption.

Mr. RICHARDSON. Mr. Chairman, I rise in support of this amendment, to impose a 1-year moratorium on all nuclear tests by the United States in excess of 1 kiloton, provided that the Soviets also observe such a moratorium and meet certain other conditions. I am pleased to note that this amendment is strong on verification provisions. I am very concerned about this issue—without an adequate verification process, we can have no real confidence in arms control agreements.

The result of a broad bipartisan effort in both the House and the Senate, this amendment is significant. Its goal is to slow down the ever-escalating and threatening nuclear arms race. I support this amendment because I believe that we must take serious steps toward real and lasting arms control policies.

This amendment calls for a 1-year moratorium. The Soviet Union has, for more than a year now, observed a unilateral moratorium on nuclear explosive testing. It is now time for the United States to show its serious intent to pursue arms control by reciprocating. The Aspin amendment has been carefully crafted—should the President certify to Congress that the Soviets have violated the moratorium on testing, the United States moratorium would be lifted. The amendment will not have an adverse impact on funding of testing facilities. It does not cut off the money for either staffing or overhead for the testing and testing-related facilities. Retaining funding will ensure that should a need arise to resume testing, the United States will be ready.

While I support this amendment, I would like to bring to the attention of my colleagues some concerns and reservations I have about this test ban moratorium. I have been briefed on nuclear explosive testing by Los Alamos National Laboratory, which is in my district, and the Department of Energy. They have raised some important issues which I feel we must all seriously consider as we debate legislation relating to arms control and test bans. These issues relate, among other things, to the maintenance of our confidence in the functioning of weapons in the stockpile, the maintenance of an effective nuclear deterrent force, the ability to incorporate modern safety and security forces on our existing stockpile and the ability to accurately assess, research and develop weapons systems which can effectively address changing strategic targets and policy.

I have given much thought to these questions, and I still support the Aspin amendment. I believe that it is an important signal of the committment of the United States to achieving effective arms control. Because I believe in a strong defense for this Nation that is second to none, I will continue to seriously and regularly consider the questions raised by experts at Los Alamos. I urge my colleagues to do so also. Thank you.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Wisconsin [Mr. ASPIN].

The question was taken; and the Chairman pro tempore announced that the ayes appeared to have it.

RECORDED VOTE

Mr. DICKINSON. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 234, noes 155, not voting 42, as follows:

□ 1500

The Clerk announced the following pairs:

On this vote:

Mr. Durbin for, with Mr. Shelby against.
Mr. Donnelly for, with Mr. Badham against.
Mr. Barnes for, with Mrs. Smith of Nebraska against.
Ms. Kaptur for, with Mr. Lungren against.
Mr. Ford of Tennessee for, with Mr. Campbell against.
Mr. LaFalce for, with Mr. Shaw against.
Mr. Mitchell for, with Mr. Franklin against.

So the amendment was agreed to.

The result of the vote was announced as above recorded.

Mr. ASPIN. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. NEAL) having assumed the chair, Mr. DASCHLE, Chairman pro tempore of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 4428) to authorize appropriations for fiscal year 1987 for the Armed Forces for procurement, for research, development, test, and evaluation, for operation and maintenance, and for working capital funds, to prescribe personnel strengths for such fiscal year for the Armed Forces, and for other purposes, had come to no resolution thereon.

## LEGISLATIVE PROGRAM

(Mr. LOTT asked and was given permission to address the House for 1 minute.)

Mr. LOTT. Mr. Speaker, I take this time so that Members may get the latest information on what our schedule will be for the balance of the day, the week, and for next week.

Mr. FOLEY. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I am glad to yield to the gentleman from Washington.

Mr. FOLEY. I thank the distinguished Republican whip for yielding.

Mr. Speaker, this completes the program for today and for the week.

On Monday, August 11, the House will meet at noon to consider nine bills under suspension of the rules. Recorded votes on suspensions only will be postponed until Wednesday, August 13. They are:

H.R. 4174, the Indian Self-Determination Act;

H.R. 4814, the Federal Land Exchange Facilitation Act;

H.R. 4883, Admiralty Island;

H.R. 4811, San Pedro National Conservation Area; Arizona;

H.R. 4971, the Socorro County Land Conveyance;

H.R. 4645, the Cuyahoga National Recreation Area amendments;

H.R. 4467, Peace Garden;

H.R. 4037, Indiana Dunes National Lakeshore amendments; and

H.R. 5185, the Job Training Partnership Act amendments.

We will return then to H.R. 4428, the Defense Department authorizations for fiscal year 1987, and we will continue consideration, with votes taken on Monday. I repeat that for the Members' attention, that we will have votes on Monday, and Members should expect that Monday will again be a late session.

On Tuesday the House will meet at 10 a.m. and consider 11 suspensions. Again we will be postponing votes on those suspensions until Wednesday, but we will be taking votes on Tuesday on other matters. The suspensions are:

H.R. 4351, military withdrawal of public lands, Nevada;

S. 991, NOAA fisheries authorization;

H.R. 5013, the Fishing Vessel Safety and Liability Act;

H.R. 5316, the Bankruptcy Judges and United States Trustees Act of 1986;

H.R. 5073, the Asbestos Hazard Emergency Response Act of 1986;

H.J. Res. 683, the Maine Central Railroad labor dispute;

H.R. 4393, Uniformed and Overseas Citizens Absentee Voting Act;

H.R. 4260, the Small Business Innovation Research Program;

H.R. 2889, computer security;

H.R. 4354, National Bureau of Standards; and

H.R. 3102, the Technology Education Act of 1986.

We will then return again to H.R. 4428, the Defense Department authorizations for 1987, and will be considering first amendments on the strategic defense initiative, followed by consideration of the SALT II amendments, and that will be followed by chemical warfare, I believe.

On Wednesday and the balance of the week the House will meet at 10 and consider H.R. 4428 to complete consideration, and if we do complete consideration, we will proceed to H.R. 3129, the Surface Transportation and Uniform Reallocation Assistance Act of 1986.

□ 1510

This announcement, of course, is subject to the usual conditions that conference reports may be brought up at any time and a further program may be announced later.

Mr. LOTT. I would like to repeat again one thing the gentleman said. We will have the suspensions on Monday, but those votes will be deferred until Tuesday. We will go back to the DOD bill, and we will have recorded votes on amendments to the DOD, is that correct or not?

Mr. FOLEY. Not quite correct. We will have suspension votes on Monday and Tuesday. But voting on those suspensions, when ordered, will be postponed until Wednesday in both cases. In other words, suspensions ordered on Monday and Tuesday will be voted on on Wednesday.

But we will have votes on the Department of Defense Authorization Act on Monday, Tuesday, Wednesday, Thursday, and perhaps Friday. And we will be meeting late every day, with the exception of Friday next.

Mr. LOTT. Mr. Speaker, I note that the reconciliation bill is not on the schedule. The Rules Committee had hearings on that this week. We were anticipating that we would get back together. The snapshot is going to be August 15 to see what we need to do in trying to get the deficit down.

I do not understand why reconciliation is not coming up before the August recess.

Mr. FOLEY. I think there has been discussion with the leadership in the other body. Of course, the Reconciliation Act is not just a matter for this body, but for both bodies. It would have to be completed and signed by the President before it could have an effect on the August 15 snapshot.

But, as we have said in the last announcement on this subject, the leadership reserves the right to bring the reconciliation bill forward.

Mr. LOTT. Is the gentleman saying that we are not going to take it up because the other body may not take it up?

Mr. FOLEY. The gentleman said he thought it was important to take it up in order to precede the August 15 snapshot of the so-called Gramm-Rudman-Hollings bill. I think it is unlikely, frankly, that that could be accomplished through both bodies and signed by the President in time.

Mr. LOTT. We should expect the debt ceiling to be brought up in some form, I presume, later in the week; is that correct?

Mr. FOLEY. The other body, in its judgment, has decided to add to the debt ceiling legislation a number of amendments, I think they now number 28, on various subjects totally or relatively unrelated to the debt ceiling of the United States, and they are continuing consideration on additional amendments. I cannot tell the gentleman at what time the debt ceiling bill will be coming from the other body. I expect some time next week.

I am told that the Speaker publicly announced today an understanding with the distinguished leader of the other body to consider the possibility of an extension of the debt ceiling for the purpose of consideration.

Mr. LOTT. Mr. Speaker, I would like to suggest maybe we ought to put the reconciliation package on the debt ceiling and send it back to the other body. But we can discuss that later.

I do think the distinguished majority whip would like to join this Member and the other Members of this body in congratulating and extending best wishes to our very fine floor assistant, Bill Pitts, who is getting married this weekend, at long last.

Mr. FOLEY. Mr. Speaker, I know I speak for everybody on this side of the aisle in extending our warmest congratulations and best wishes to Mr. Pitts and his fiance. He is one of those exceptional assistants in both parties whose knowledge and capacity and judgment facilitate our work, and we have nothing but the warmest regards.

Mr. LOTT. But whose late hours will be substantially reduced in the future, I am sure.

Mr. FOLEY. For the new Mrs. Pitts, I hope she will understand that the scheduling of the House occasionally requires very late hours, and it is to be expected as a part of the responsibilities.

Mr. LOTT. I would certainly agree. I thank the gentleman.

## ADJOURNMENT TO MONDAY, AUGUST 11, 1986

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at noon on Monday next.

The SPEAKER pro tempore (Mr. NEAL). Is there objection to the request of the gentleman from Washington?

There was no objection.

## HOUR OF MEETING ON TUESDAY, AUGUST 12, 1986

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that when the House adjourns on Monday next, it adjourn to meet at 10 a.m. on Tuesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

## DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule shall be dispensed with on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

## GENERAL LEAVE

Mr. McCURDY. Mr. President, I ask unanimous consent that all Members may have 5 legislative days in which to insert their remarks on amendments considered today in the Committee of the Whole on H.R. 4428, the National Defense Authorization Act for fiscal year 1987.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

## PERMISSION FOR COMMITTEE ON INTERIOR AND INSULAR AFFAIRS TO FILE SUPPLEMENTAL REPORT ON H.R. 4430, MINIMUM ALTITUDE REQUIREMENTS FOR AIRCRAFT OVER NATIONAL PARKS

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent to file a supplemental report on behalf of the Committee on Interior and Insular Affairs on the bill, H.R. 4430.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

## PERMISSION FOR COMMITTEE ON INTERIOR AND INSULAR AFFAIRS TO FILE A REPORT ON H.R. 4883

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent that the Committee on Interior and Insular Affairs may have until 5 p.m. today to file a report on the bill, H.R. 4883.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

## NATIONAL CIVIL RIGHTS DAY

Mr. DYMALLY. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the joint resolution (H.J. Res. 686) to designate August 12, 1986, as "National Civil Rights Day," and ask for its immediate consideration.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object, but simply would like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, under my reservation, I yield to the gentleman from Indiana [Mr. VISCLOSKY], who is the chief sponsor of House Joint Resolution 686.

Mr. VISCLOSKY. Mr. Speaker, I am aware that here, as in any viable political Chamber, differences of opinions exist and deep divisions over policy questions occur.

I am therefore proud to have witnessed the immediate and broad support House Joint Resolution 686, a resolution to designate August 12, 1986 "National Civil Rights Day" received in this House.

Within 8 days of the introduction of this measure along with Messrs. DYMALLY, GARCIA, LELAND, MARTINEZ, and SAVAGE, this measure has received the clear support of the majority of our colleagues.

It is our hope that this day will be set aside to acknowledge the gains which have been made in the area of civil rights over the past two decades, and will constitute a rededication of ourselves to the values upon which this country was founded, and which still bear special significance to each American citizen. It is fitting, proper, and most appreciated that Members of this House, regardless of where each of us may be on the broad political spectrum, have elected to support this measure—this value—so fundamental to each of us not only as Representatives, but also as citizens of the state.

Mr. Speaker, I also would like to extend my thanks and congratulations to Mayor Richard G. Hatcher in the city of Gary in my district for originating the idea of having National Civil Rights Day on August 12.

Mr. HANSEN. Further reserving the right to object, Mr. Speaker, I yield to the gentleman from California [Mr. DYMALLY].

Mr. DYMALLY. Mr. Speaker, may I just add my word of congratulations to the gentleman from Indiana [Mr. VISCLOSKY] for doing an outstanding job. He had a very limited time in which to collect the necessary signatures, over 218, and I think that is a testimony to the high regard in which he is held in this House. The people of Gary and his district ought to be very proud of his accomplishment in the House, and I join with Mayor Hatcher in congratulating the gentleman for this outstanding accomplishment.

Mr. HANSEN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 686

Whereas the people of the United States are the heirs and beneficiaries of the courageous men and women who have struggled to achieve legal and social equality in the United States for men and women of every race, religion, and country;

Whereas such men and women include Martin Luther King Jr., Susan B. Anthony, Malcolm X, and Mary McLeod Bethune;

Whereas the people of the United States should not forget that constant vigilance is necessary to ensure that civil rights are protected;

Whereas the people of the United States should not forget that much yet remains to be accomplished with respect to securing civil rights for all the people of the United States;

Whereas, in August 1963, Martin Luther King Jr. led a march in Washington, D.C., to demonstrate the need for legislation to

protect the civil rights of the people of the United States;

Whereas August 12, 1986, is an appropriate date on which to commemorate the progress made in securing civil rights and the need for continued progress;

Whereas, at noon on such date, it would be appropriate for the people of the United States to pause for a moment of silence to pay tribute to the men and women who have struggled to secure civil rights for all the people of the United States;

Whereas, during the moment of silence, it would be appropriate for all church bells to ring 11 times as a reminder that the hour is late with respect to continuing progress in securing civil rights for all the people of the United States;

Whereas, in the evening of such date, a concert will be held in Gary, Indiana, to raise $1,000,000 for the construction of a National Civil Rights Museum and Hall of Fame; and

Whereas the concert will be broadcast live to the Nation: Now, therefore, be it

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That August 12, 1986, is designated "National Civil Rights Day", and the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to observe such day with appropriate ceremonies and activities.

The SPEAKER pro tempore. The question is on the engrossment of the joint resolution.

The joint resolution was ordered to be engrossed.

AMENDMENT TO THE PREAMBLE OFFERED BY MR. DYMALLY

Mr. DYMALLY. Mr. Speaker, I offer an amendment to the preamble.

The Clerk read as follows:

Amendment to the preamble offered by Mr. DYMALLY: In the 2d paragraph of the preamble, strike Malcolm X,".

At the end of the 8th paragraph of the preamble, insert "and".

Strike the 9th and 10th paragraphs of the preamble and insert the following:

Whereas the National Civil Rights Museum and Hall of Fame will be constructed in Gary, Indiana, to pay continued tribute to the fallen national heroes of civil rights and the cause which they embraced: Now, therefore, be it

The SPEAKER pro tempore. The question is on the amendment to the preamble offered by the gentleman from California [Mr. DYMALLY].

The amendment to the preamble was agreed to.

The joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

## WALT DISNEY RECOGNITION DAY

Mr. DYMALLY. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the joint resolution (H.J. Res. 377) to designate December 5, 1985, as "Walt Disney Recognition Day," with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the joint resolution.

The Clerk read the Senate amendments, as follows:

Page 2, line 3, strike out "1985" and insert: 1986.

Amend the preamble as follows: Strike out the first 4 lines on page 1 and insert:

Whereas in 1986 there occurs the 31st anniversary of the founding of Disneyland and the 15th anniversary of the founding of Disney World;

Whereas December 5, 1986, is the 85th anniversary of the birth of the founder of Disneyland and Disney World, Walter Elias Disney;

Amend the title so as to read: "Joint resolution to designate December 5, 1986, as 'Walt Disney Recognition Day'.".

□ 1520

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I shall not object, but would simply like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, under my reservation, I yield to the distinguished gentleman from California [Mr. DORNAN], who is the chief sponsor of House Joint Resolution 377, to authorize and request the President of the United States to issue a proclamation designating December 5, 1986, as "Walt Disney Recognition Day."

Mr. DORNAN of California. Mr. Speaker, I thank the distinguished ranking Republican and beg the Speaker's indulgence to take the well on this, because this is a big deal.

My colleagues, I do not think there has been an American folk hero that has touched so many lives in such a positive way as Walter Elias Disney. Born in the middle of our country, moving across Kansas, Missouri, taking one of these God-given talents—which most of us do not have—where you can put a pencil or a piece of chalk or clay to a piece of paper and create lifelike-looking figures.

He came to the then-growing State of California and in a little back garage, which has been preserved as a museum, penciled out Steamboat Willie and gave the world Mickey Mouse.

In his short life—and 65 years is really short today—the span of his life, from 1901 to 1966 saw a lot of history; and he left behind such a legacy that even after he was gone, Americans rush to our beautiful vacation sunshine State of Florida to see the wonder of Epcot and the most beautiful park of lakes and exhibits and recreated European and Asian and South American little villas and buildings, it is a joy to see coming up the 17th anniversary of Disney World, rivaling Disneyland, which is now into its 32d year as of July 17, which is in my district.

I went to my Disneyland just a few weeks ago with my fourth grandchild—I have another one due in a few days here; and he is pretty young, barely three, and I thought it might be over his head, and they had something called the Magical Electrical Parade.

Now, I wonder when I am going to get jaded going to Disney World or Disneyland. I went to that parade and I was 7 years of age again. I could not believe this electrical parade at Disneyland, and I know they have the same thing at Disney World.

If there ever was an American worthy of a day of recognition, it is Mr. Disney. His beloved cartoon characters—and you cannot say Mickey Mouse without saying Minnie and Donald and the whole rest of that gang. The books, the films, the records, the wildlife series, the fabulous documentaries that are tools, educational tools in our schools forever.

The internationally known theme parks that I mentioned. It has made that name Disney literally almost immortal, whatever mortal world we have; and it is synonymous with joy, good will, integrity, and no down side.

My first environmental lecture kind of took on all mankind. Who could criticize all of us without making one politician, or one person angry?

When that word went out that Man was in the forest and Bambi's father stood tall and then Man started a forest fire, and you saw all those little animals running, you knew that we owed something to our grandchildren to preserve our beautiful natural parks and everything that God has given us in the physical wonders of this country.

All these drug lectures we are trying to give our kids, all the work that Mr. RANGEL is doing and all of our committees on drugs—what better lecture to kids than to have Lampwick, the ultimate smart aleck—then it was cigars and booze—saying to Pinocchio: "Hey, Pinoch, come on to Pleasure Island and I'll show you a good life," and all it led them into was the slavery and bondage as little donkeys pulling around mine carts somewhere.

How did little Pinocchio redeem himself? At the depths of the sea with Monstro, looking for his adopted father. And who was that little guiding light, his conscience, "Jimminy Crickett"? And that beautiful fairy that gave him life, the life that comes when you amount to something as a human being and fulfill God's desire for you.

One story after another, whether it is taking that Italian classic, "Pinocchio," or a British classic like "Peter Pan," he took the past works, added to his own creations, and has given us a timeless legacy where, centuries from now when everybody is forgotten in

this House—and I know the President would not mind my saying even Ronald Reagan retreating to a few paragraphs—they will be adding more stereophonic sound quality, more Dolby sound quality and more color enhancement and probably three-dimensions to all of these works of Walt Disney.

In order that we are a nation might pay tribute to the memory of a truly great American, I have introduced this resolution and changed the date from last year to this so that it could land on his 85th birthday; and I only wish he were with us.

Walt Disney Recognition Day. What a joy. His good works have been recognized worldwide; one of those theme parks is a smashing success outside Tokyo, and I thank all of you who helped me in record time get 240-some signatures.

I now submit for the RECORD a biography of Walt. It just cannot be told in five pages, and express my own love and respect for this great American and the joy that he gives every young child, all those grandchildren who will be born this year and all of our children and children to all of us in this Chamber and the other body, what a joy that we will pause for one moment on Walt's 85th birthday and say, "Thank you, Mr. Disney."

WALT DISNEY BIOGRAPHY

During a 43-year Hollywood career, which spanned the development of the motion picture medium as a modern American art, Walter Elias Disney, a modern Aesop, established himself and his product as a genuine part of Americana. David Low, the late British political cartoonist, called Disney "the most significant figure in graphic arts since Leonardo." A pioneer and innovator, and the possessor of one of the most fertile imaginations the world has ever known, Walt Disney, along with members of his staff, received more than 950 honors and citations from every nation in the world, including 48 Academy Awards and seven Emmys. Walt Disney's personal awards included honorary degrees from Harvard, Yale, the University of Southern California, and UCLA; the Presidential Medal of Freedom; France's Legion of Honor and Officer d'Academie decorations; Thailand's Order of the Crown; Brazil's Order of the Southern Cross; Mexico's Order of the Aztec Eagle; and the Showman of the World Award from the National Association of Theatre Owners.

The creator of Mickey Mouse and founder of Disneyland and Walt Disney World was born in Chicago, Ill., on December 5, 1901. His father, Elias Disney, was an Irish-Canadian. His mother, Flora Call Disney, was of German-American descent. Walt was one of five children, four boys and a girl.

Raised on a farm near Marceline, MO., Walt early became interested in drawing, selling his first sketches to neighbors when he was only 7 years old. At McKinley High School in Chicago, Disney divided his attention between drawing and photography, contributing both to the school paper. At night he attended the Academy of Fine Arts.

During the fall of 1918, Disney attempted to enlist for military service. Rejected because he was only 16 years of age, Walt joined the Red Cross and was sent overseas, where he spent a year driving an ambulance and chauffeuring Red Cross officials. His ambulance was covered from stem to stern, not with stock camouflage, but with Disney cartoons.

After the war, Walt returned to Kansas City, where he began his career as an advertising cartoonist. Here, in 1920, he created and marketed his first original animated cartoons, and later perfected a new method for combining live action and animation.

In August 1923, Walt Disney left Kansas City for Hollywood with nothing but a few drawing materials, $40 in his pocket and a completed animated fairy tale subject. Walt's brother, Roy O. Disney, was already in California, with an immense amount of sympathy and encouragement, and $250. Pooling their resources, they borrowed an additional $500, and set up shop in their uncle's garage. Soon, they received an order from New York for the first "Alice in Cartoonland" featurette, and the brothers expanded their production operation to the rear of a Hollywood real estate office.

On July 13, 1925, Walt married one of his first employees, Lillian Bounds, in Lewiston, Idaho. They were blessed with two daughters, Diane, married to Ron Miller, former USC football star, and now president and chief executive officer of Walt Disney Productions; and Sharon Disney Lund. The Millers have seven children: Christopher, Joanna Sharon, Tamara, Jennifer, Walter Elias Disney, Ronald Williams, Jr., and Patrick. Mrs. Lund has three children: Victoria Diane and twins, Bradford Disney and Michelle Ann.

Mickey Mouse was created in 1928, and his talents were first used in a silent cartoon entitled "Plane Crazy." However, before the cartoon could be released, sound burst upon the motion picture screen. Thus, Mickey made his screen debut in "Steamboat Willie," the world's first synchronized sound cartoon, which premiered at the Colony Theatre in New York on November 18, 1928.

Walt's drive to perfect the art of animation was endless. Technicolor was introduced to animation during the production of his "Silly Symphonies." In 1932, the production entitled "Flowers and Trees" won Walt the first of his studio's 51 Academy Awards. In 1937, he released "The Old Mill," the first short subject to utilize the multiplane camera technique.

On December 21 of that same year, "Snow White and the Seven Dwarfs," the first full-length animated musical feature, premiered at the Cathay Circle Theatre in Los Angeles. Produced at the unheard cost of $1,499,000 during the depths of the Depression, the film is still accounted as one of the great feats and imperishable monuments of the motion picture industry. During the next 5 years, Walt completed such other full-length animated classics as "Pinocchio," "Fantasia," "Dumbo," and "Bambi.".

In 1940, construction was completed on the Burbank Studio, and Disney's staff swelled to more than 1,000 artists, animators, storymen and technicians. During World War II, 94 percent of the Disney facilities were engaged in special Government work, including the production of training and propaganda films for the armed services, as well as health films which are still shown throughout the world by the U.S. State Department. The remainder of his efforts was devoted to the production of comedy short subjects, deemed highly essential to civilian and military morale.

Disney's 1945 feature, the musical "The Three Caballeros," combined live action with the cartoon medium, a process he used successfully in such other features as "Song of the South" and the highly acclaimed "Mary Poppins." In all, more than 100 features have been produced by his studio.

Walt's inquisitive mind and keen sense for education through entertainment resulted in the award-winning "True-Life Adventure" series. Through such films as "The Living Desert," "The Vanishing Prairie," "The African Lion," and "White Wilderness" Disney brought fascinating insights into the world of wild animals and taught the importance of conserving our nation's outdoor heritage.

Disneyland, launched in 1955 as a fabulous $17 million magic kingdom, soon increased its investment tenfold and entertained, by the beginning of its second quarter-century, more than 200 million people, including presidents, kings and queens, and royalty from all over the globe.

A pioneer in the field of television programming, Disney began television production in 1954, and was among the first to present full-color programming with his "Wonderful World of Color" in 1961. "The Mickey Mouse Club" was a popular favorite in the 1950's.

But that was only the beginning. In 1965, Walt Disney turned his attention toward the problem of improving the quality of urban life in America. He personally directed the design on an Experimental Prototype Community of Tomorrow, planned as a living showcase for the creativity of American industry.

Said Disney, "I don't believe there is a challenge anywhere in the world that is more important to people everywhere than finding the solutions to the problems of our cities. But where do we begin? Well, we're convinced we must start with the public need. And the need is not just for curing the old ills of old cities. We think the need is for starting from scratch on virgin land and building a community that will become a prototype for the future."

Thus, Disney directed the purchase of 43 square miles of virgin land—twice the size of Manhattan Island—in the center of the State of Florida. Here, he master-planned a whole new Disney World of entertainment to include a new amusement theme park, motel-hotel resort vacation center and his Experimental Prototype Community of Tomorrow. After more than 7 years of master planning and preparation, including 52 months of actual construction, Walt Disney World opened to the public as scheduled on October 1, 1971. Epcot Center opened on October 1, 1982.

Prior to his death on December 15, 1966, Walt Disney took a deep interest in the establishment of California Institute of the Arts, a college level, professional school of all the creative and performing arts. Of Cal Arts, Walt once said, "It's the principal thing I hope to leave when I move on to greener pastures. If I can help provide a place to develop the talent of the future, I think I will have accomplished something."

California Institute of the Arts was founded in 1961 with the amalgamation of two schools, the Los Angeles Conservatory of Music and Chouinard Art Institute. The campus is located in the city of Valencia, 32 miles northeast of downtown Los Angeles. Walt Disney conceived the new school as a place where all the performing and creative arts would be taught under one roof in a

"community of the arts" as a completely new approach to professional arts training.

Walt Disney is a legend, a folk hero of the 20th century. His worldwide popularity was based upon the ideals which his name represents: imagination optimism, and self-made success in the American tradition. Walt Disney did more to touch the hearts, minds, and emotions of millions of Americans than any other man in the past century. Through his work he brought joy, happiness, and a universal means of communication to the people of every nation. Certainly, our world shall know but one Walt Disney.

Mr. ARMEY. Mr. Speaker, will the gentleman yield?

Mr. HANSEN. I yield to the gentleman from Texas.

Mr. ARMEY. Mr. Speaker, I would just like to take a moment to congratulate the gentleman. That is the most articulate, the most well-presented, Mickey Mouse speech I have heard on this floor today.

Mr. DORNAN of California. I thank the gentleman, and may I never give another Mickey Mouse speech.

Mr. HANSEN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

A motion to reconsider was laid on the table.

## NATIONAL NEIGHBORHOOD CRIME WATCH DAY

Mr. DYMALLY. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 256) designating August 12, 1986, as "National Neighborhood Crime Watch Day," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object but would simply like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, under my reservation, I yield to the gentleman from Pennsylvania [Mr. COUGHLIN], who is the chief sponsor of House Joint Resolution 512, to authorize and request the President to issue a proclamation designating August 12, 1986, as "National Neighborhood Crime Watch Day."

Mr. COUGHLIN. Mr. Speaker, I want to thank my colleague from Utah [Mr. HANSEN] for yielding and thank him and my colleague from California [Mr. DYMALLY] for bringing this before the Congress. Certainly this is a self-help effort in our neighborhoods, and it is worthy of recognition, and I thank you for so doing.

Mr. HANSEN. Mr. Speaker, I appreciate the gentleman's fine remarks, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the Senate joint resolution as follows:

S.J. RES. 256

Whereas neighborhood crime is of continuing concern to the American people.

Whereas the fight against neighborhood crime requires people to work together in cooperation with law enforcement officials;

Whereas neighborhood crime watch organizations are effective at promoting awareness about, and the participation of volunteers in, crime prevention activities at the local level; and

Whereas citizens across America will soon take part in a "National Night Out", a unique crime prevention event which will demonstrate the importance and effectiveness of community participation in crime prevention efforts by having people spend the period from 8 to 9 o'clock postmeridian on August 13, 1986, with their neighbors in front of their homes: Now, therefore, be it

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That August 12, 1986, is designated as "National Neighborhood Crime Watch Day", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such day with appropriate programs, ceremonies, and activities.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

## GENERAL LEAVE

Mr. DYMALLY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the various resolutions just passed and the Senate amendments just adopted.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

□ 1530

## THE TEXTILE AND APPAREL IMPORT LICENSING ACT

(Mr. McMILLAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McMILLAN. Mr. Speaker, although I am disappointed we were not able to pass the Textile and Apparel Enforcement Act, I feel we must move forward. We must find a successful way to control the ever-increasing number of textile products entering the United States by enforcing our trade agreements.

I am introducing the Textile and Apparel Import Licensing Act today.

One thing most have consistently agreed upon in this week's debate over textiles was the need for tougher agreements and stronger enforcement. The administration has negotiated somewhat tougher agreements. Now we must ensure that we don't lose the benefits of these positive steps through lack of strong enforcement. Failure to enforce is what gave rise to the bill in the first place.

The Textile and Apparel Import Licensing Act is designed to strongly enforce the quota restrictions set forth in the recently renegotiated multifiber arrangement as well as our textile bilateral agreements.

Specifically, the law would shift the enforcement of our textile quotas from overseas—where they are abused and traded as a commodity—to enforcing them here in the United States where we will have greater control.

This bill is designed to place the burden of proof within the jurisdiction of the United States and fix responsibility on licensed importers, where we can take appropriate, corrective action when violations of our textile agreemetns are discovered.

I urge you to take a serious look at this bill.

## REORGANIZATION OF MILITARY COMMAND STRUCTURE

(Mr. DYSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. DYSON. Mr. Speaker, when our Defense Department authorization debate is finished, I think one of the things that will be most significant will be the reorganization of the military command structure. One individual, a member of our Committee on Armed Services, I believe is most responsible for that, our colleague from Alabama, Representative BILL NICHOLS.

Mr. Speaker, the House on Tuesday, August 5, by an overwhelming vote of 406 to 4 passed the Bill Nichols Department of Defense Reorganization Act as an amendment to the Department of Defense authorization bill.

Naming that legislation after BILL NICHOLS is a tribute to his perseverance and determination. Ever since he became chairman of the Investigations Subcommittee in 1983 he has worked diligently at reorganizing the Joint Chiefs of Staff and the Department of Defense.

Last year he succeeded in passing the Joint Chiefs of Staff legislation. This year he has topped that achievement with the comprehensive legislation which strengthens the role of the combatant commanders, provides for

more joint action in the military services, and reduces the combined military and civilian staffs of the military department.

Due to his efforts the Armed Forces will be much better prepared to deal with any situation they will face in the future. Also contributing very much to the enactment of this legislation, credit goes to our chairman, Mr. ASPIN, also Mr. SKELTON of Missouri, certainly Mr. HOPKINS of Kentucky and Mr. KASICH of Ohio.

I think all of America could be very proud of this and very proud of their efforts. I submit for the RECORD an editorial which appeared in today's Baltimore Sun on this very subject:

HAWK REFORM OF THE PENTAGON

The most sweeping reorganization of the military command structure in a generation is still on a fast track for passage. This week the House gave its approval to a bill that, if anything, is a bit more radical than the highly innovative measure that won unanimous Senate approval in May. While the differences will generate arguments in conference committee, they will not hinder enactment of a final measure designed to enhance the "jointness" of the separate armed services.

What gives this reform its special impetus is that it comes not from the executive branch or from liberal critics of the Pentagon but from leading pro-defense members of Congress. In the Senate, military reorganization has become a sort of last hurrah for Barry Goldwater, chairman of the Armed Services Committee. Over in the House, Reps. Bill Nichols (D-Ala.) and Larry J. Hopkins (R.-Ky.) may not be as well known nationally, but their support carries clout in military circles.

It took just such a legislative powerhouse to override the opposition of Defense Secretary Caspar Weinberger, Navy Secretary John Lehman and a number of top brass. Lack of inter-service coordination during combat operations in Iran, Lebanon and Grenada; "horror stories" about waste, fraud and bad judgment in the procurement of weaponry; insider misgivings about the war-fighting capacity of the armed services—all these contributed to the drive for reform.

Basically, the changes pending will funnel more power to the chairman of the joint chiefs of staff and to the seven commanders in chiefs [CINCs] who are in charge of geographic theaters of military operations. Both at the Washington level and at the theater command level, the separate services will become more subordinate to officers with cross-service responsibilities. Concurrently, procedures will be invoked to protect the career pathing of officers assigned to joint duties.

If the House bill is a bit too ambitious, it is because it tends to over-correct perceived shortcomings that the separate services view as assets in terms of morale, expertise and, yes, healthy competition. Thus, it would seek to end discrimination of officers assigned to joint duties by making them into a kind of elite corps. It would integrate the staffs of the service secretaries and the service commanders-in-chief in ways that might deny the secretary of Defense clearly delineated military and civilian viewpoints. And it would give CINCs so much control over component services that seven "little Pentagons" could emerge.

The more cautious Senate bill smooths some of the sharper edges of the House bill and is a good vehicle for compromise. Congress must not miss this chance for much-needed military reform, for another opportunity will be a long time coming.

## THE COALITION FOR SOUND MONEY

(Mr. DANNEMEYER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. DANNEMEYER. Mr. Speaker, I have believed for a long time that the root of many of our national problems—Federal budget deficits, high interest rates, chronic inflation, unacceptable levels of unemployment, foreign trade imbalance, farm credit crisis, industrial stragnation—lies at the foot of dishonest money. A money system which allows the uncontrolled printing of paper currency is guilty of perpetrating fraud by constantly devaluing the money in order to pay for unrestrained Federal spending.

For the past few years, I have attempted to formulate a legislative position which addresses the fundamental issue of monetary reform. Accordingly, I have come to believe that only a return to a gold standard can provide an adequate framework in which we can retrieve fiscal and monetary sanity. Gold, of course, has been out of fashion for years: it is something we wear, not something we buy automobiles with.

In pursuing this course, I have found that it is an exceedingly difficult issue to comprehend, let alone explain. Most Members of Congress are not necessarily opposed to a gold standard, they just don't understand how it works. Any initiative to reinstate gold, then, requires a preliminary process of disseminating the requisite information. It is in this context that I have come to know and work with the Coalition for Sound Money.

I have had the privilege to be associated with this organization since its inception last year and can personally attest to the dedication, veracity, and proficiency which the individuals that comprise the Coalition for Sound Money bring to this issue. I am pleased to introduce the Coalition and present its statement of purpose.

THE COALITION FOR SOUND MONEY

Founded in 1985, the Coalition for Sound Money is the only nationwide organization whose purpose is to achieve sound money through freedom.

Many organizations have been formed to balance the federal budget, reduce regulations on business, lower taxes, cut federal spending, and accomplish other worthwhile goals, but only one nationwide organization exists for the purpose of genuine monetary reform. This is an extraordinary situation because of the fundamental importance of sound money.

Money plays a very important role in our economy. It is the link between taxes, spending, prices, unemployment, debt, and income. If this link is weak, as our dollar is, the effects of this weakness are felt throughout our economy.

Without sound money, it will prove impossible to balance the budget, to cut spending, or to accomplish any other important economic reform. High taxes, enormous budget deficits, an increasing national debt, rising unemployment, rising interest rates, rising prices, and an increasing number of business and bank failures are all the inevitable results of an unsound banking and money system. Unless our money and banking problems are solved, all our other efforts at economic reform are futile.

THE GATHERING STORM

The Coalition believes that a massive educational program is needed in order to prepare the American people for the next series of economic storms that are gathering strength right now. Without a good grasp of economic and moral principles and an understanding of the basic causes of our economic problems, the American people will be easily manipulated by unknowing politicians who want to impose their plans for a new global economic order on all Americans.

Governments have always taken advantage of crises to strengthen their power, but it is precisely the growth of government power that has caused most of our economic problems. Since the federal government began interfering in money and banking in the early twentieth century, we have had the most severe recessions, depressions, inflations, and unemployment in our history. The Coalition for Sound Money believes that there is an unbreakable link between money and freedom: Without freedom, there can be no sound money, and without sound money, there can be only partial freedom.

EDUCATION IS OUR STRATEGY

Knowing this, the Coalition for Sound Money has launched an ambitious educational program designed to inform the American people and their leaders about the importance of sound money.

The Coalition has organized two conferences in Washington, D.C. on the subject of money and freedom, conferences at which leading economists and Members of Congress have spoken. The Coalition sponsored and is now distributing an important new book on money by the Chairman of the Economics Department at Grove City College, *Money and Freedom* by Professor Hans Sennholz. More books, booklets, pamphlets, audio and video tapes, seminars, speaking tours, and a regular newspaper column on monetary issues are in the planning stage.

WHO IS THE COALITION FOR SOUND MONEY?

The Coalition consist of both individuals and orgnizations that are concerned about America's economic future. They have come to realize that government intervention in money and banking is the major cause of the present instability of our banking and monetary systems. They have agreed to support our efforts to increase freedom and individual responsibility in economics. They are part of a constantly growing group of Americans that understands the need for educating the American people about money and freedom. At the present time, about two dozen organizations and many individuals are cooperating in the Coalition. Several Members of Congress are serving on our Congressional Advisory Board.

## BRADLEY FIGHTING VEHICLE

(Mr. MACK asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. MACK. Mr. Speaker, one of the mistakes being made by many of our colleagues critical of the Bradley fighting vehicle is that they think it was designed to be another tank. In a recent article, Gen. Donald R. Keith, former Army Deputy Chief of Staff for Research, Development, and Acquisition, points out that this was never the case. The requirement from the beginning was for a true fighting vehicle because the Army found that the combination of mechanized infantry in vehicles designed to maneuver and fight with tanks had a synergism on the battlefield that greatly enhanced the effectiveness of the force.

General Keith then outlined the tough tradeoff analyses which drive the designs of combat vehicles for the modern battlefield.

He also responds to allegations of "unrealistic testing." "The only testing that the Army was reluctant to overdo was to demonstrate what we already knew." That seems to be plain common sense to me.

Finally, General Keith writes that, "* * * the Bradley is not a perfect weapon system, but it is the best fighting vehicle in the free world."

Mr. Speaker, I am including General Keith's article as a part of the RECORD.

[From the Chicago Tribune, Jan. 16, 1986]

A GENERAL DEFENDS THE BRADLEY

(By Gen. Donald R. Keith)

Over the last few years, I have become a calloused reader of the well-orchestrated assault by some elements of the media on many of the weapons systems that are a part of the badly needed, long overdue modernization of our defense forces. Most of the articles are flawed at best by selective use of facts wrapped in editorial opinion, or at worst by downright misinformation.

I am not just a casual observer of the most recent program under attack. I was involved with the Bradley Fighting Vehicle from the early 1970s until I retired in June, 1984.

The infantry fighting vehicle never was intended to be an armored personnel carrier like the M113. The requirement from the beginning was for a true fighting vehicle, because in a cooperative effort with our German allies we found that the combination of mechanized infantry in vehicles designed to maneuver and fight with tanks had a synergism on the battlefield that greatly enhanced the effectiveness of the force.

When the situation called for the infantry squad to dismount and occupy a piece of terrain, that option was also available. From the very beginning, the armament for our fighting vehicle was a 26mm. gun. During the development of the Bradley, a number of studies conducted by both the Army and the office of the secretary of defense suggested that if we did not thicken our antitank guided missile defense in Europe, we risked losing to Warsaw Pact blitzkreig tactics early in any conflict.

The Army and the secretary of defense agreed that the least costly solution—both in people and dollars—was to add a TOW missile launcher to each Bradley so that every infantry squad could participate in the defensive phase of any battle by engaging enemy tanks at over 3,000 meters.

The bottom line is that the Bradley was designed to fill an urgent need, and its fielding along with the M-1 has revolutionized our ability to cope with an adversary who has fielded very similar vehicles in far greater numbers.

Now, bear with me while I run through a brief tutorial on how combat vehicles are designed and the tradeoffs that are inherent in the process. There is no such thing as a totally invulnerable armored vehicle. You can always come up with some sort of gun or missile warhead that will defeat any armor known to man—even though it might be difficult and the weapon unwieldy.

Tough tradeoff analyses drive the designs of the combat vehicles for the modern battlefield. The designer begins with the main threat the vehicle must survive while performing a specific set of missions—remembering that survivability involves much more than having armor that is impenetrable to threat munitions.

Things like agility, being able to fire accurately on the move and having ammunition and fuel compartmented can be as important as toughness of armor.

In the case of the Bradley (and with every infantry fighting vehicle in the free world and the Warsaw Pact), the judgment has been to armor them to a level that protects the occupants from artillery, mortar and bomb fragments, small arms and the medium-caliber cannons found on other infantry fighting vehicles.

These threats change over time, of course, so product improvements will be called for. In fact, the Army has had R&D requests before the Congress for the last several years to deal with the needed upgrades. These requests did not ask for money to turn the Bradley into a main battle tank as some might suggest.

In fact, all the smoke about "unrealistic testing" involves what happens when a tank main gun round or an antitank guided missile hits it. The Army has made no bones about the fact that, if hit by those weapons, it will be penetrated. The only testing that the Army was reluctant to overdo was to demonstrate what we already knew.

Rather, the tests were designed to verify that the Army was getting what it was paying for from the contractor, to check new armors what would help keep pace with threat evolution and to enhance survivability, given a penetration, by new compartmentation techniques.

The results of these tests were quite favorable. The flammability assertions by critics were proved to be grossly overstated. The aluminum armor does not burn, as has been repeatedly stated.

No, the Bradley is not a perfect weapon system, but it is the best fighting vehicle in the free world. It has met every performance and reliability specification that it was designed for and has become the well-respected backbone of the mechanized infantry and armored calvary units that have received it.

## TRIBUTE TO HON. JOHN GROTBERG

(Mr. ARMEY asked and was given permission to address the House for 1 minute.)

Mr. ARMEY. Mr. Speaker, I would like to take a minute today to remember our good friend to all of us in this body, JOHN GROTBERG. JOHN GROTBERG, a very able Congressman from Illinois, 14th District, who is, as we know, home with an extended illness. JOHN probably cannot hear us today, but JOHN, I think, has a special place with all of us.

JOHN had the office adjoining mine in the Cannon Office Building. I can remember so many times when I would walk by his office and pick him up to come over here for a vote and with his cutting wit JOHN would have observations on any legislation that was under consideration which led me to consider him my favorite curmudgeon in the House.

Yet JOHN has that quiet sincere ability that makes him a good Congressman, a good statesman for our Nation, a man to be respected and a man to be missed. I know his staff misses him as I see them reflect the other side of JOHN GROTBERG as they work with quiet dignity in his office keeping the fires burning until that day, hopefully, we will see JOHN back here with us.

## A LETTER TO PRESIDENT ASSAD

(Mr. DORNAN of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORNAN of California. Mr. Speaker, first of all I want to thank the prior speaker, the gentleman from Texas [Mr. ARMEY], and join him in his remarks and say to JOHN, "Get well fast, we may have an extended month of September. We may even be back in November or December. JOHN, get back here."

Mr. Speaker, I have a second letter circulating among our colleagues, to the President of Syria asking him to intensify and redouble his efforts to get our three hostages, hopefully four if Mr. Buckley is alive, out of wherever they are held in a dungeon in the Beirut, Lebanon, area. The letter expresses gratitude for the good work he did in getting Father Jenco out together with some other people.

I started the second letter just today, though, and picked up the only 11 Republicans who had not been on the first letter to the President of Syria. I now have all 182 Republicans as signatories on the letter, and Mr. JIM WRIGHT, our majority leader, and over 100 Democrats on the other side.

I would like to get as close as we can to 400 or over 400 by the time we adjourn next week and then send this letter to Mr. Assad by diplomatic

pouch asking him to continue what has now become an almost careful house-to-house search. He does not want to get them hurt. I would ask all Members on the other side of the aisle to join your leadership and help intensify our pressure on Mr. Assad to do what is right to help these innocent people. I thank the Speaker.

□ 1540

## GRAMM-RUDMAN VERSUS ECONOMIC REALITY

The SPEAKER pro tempore (Mr. NEAL). Under a previous order of the House, the gentleman from Massachusetts [Mr. FRANK] is recognized for 5 minutes.

Mr. FRANK. Mr. Speaker, last week two economists who often disagree wrote articles in the Washington Post opposite the editorial page agreeing on a very important point. Given the slowdown in the economy that has occurred since December 1985, and particularly given the undeniable fact that the economy has failed to grow at the rate that was expected in 1985, in December, given the fact that the economy in particular has fallen far below the level assumed in the Gramm-Rudman-Hollings Act, it no longer makes any economic sense whatsoever to try to bring the deficit down for fiscal year 1987 to the figure specified in Gramm-Rudman-Hollings.

One of the problems with Gramm-Rudman-Hollings that led many of us to vote against it was precisely that.

It sought in December 1985 to make a binding legal economic projection for nearly the next 2 years in very specific terms. Gramm-Rudman-Hollings said, given that the economy will grow at $x$ rate, we mandate that the deficit for fiscal year 1987 be $144 billion.

People can debate whether that was rational given the degree of economic growth that was expected. There is not much room for argument about the following facts.

Economic growth, it is now clear, will be for the period between December 1985 and the end of the next fiscal year far less than was anticipated. As a result, the Government will take in much less in tax revenue. Therefore, to reach that $144 billion target will require a degree of either budget cuts or tax increases far beyond what people contemplated in December 1985. Specifically, the budget resolution adopted by the Congress earlier this year, which made a good-faith effort to meet the $144 billion deficit figure, is no longer even close, not because Congress suddenly decided to spend more or because there were grave errors in that budget resolution, although it was as all budget resolutions far from perfect, the economy has not grown. The trade deficit continues to be a serious source of drag, and we are not performing economically at the rate that was assumed by Gramm-Rudman.

So Herbert Stein, who was Chairman of the Council of Economic Advisers in Republican administrations, who is now a senior fellow at the American Enterprise Institute, who is not someone heretofore identified with the big spending school of American politics, he has written an article in last Thursday's Washington Post. The headline is, "The Wrong Time to Cut Government Spending."

He said:

Grown men with responsible positions stand up before television cameras and make this statement—

Grown women, too—

Since the economy is rising less than expected earlier in the year, and inflation is also lower, Federal revenues will be less than expected and it is therefore necessary to cut Federal expenditures below the level planned previously.

Mr. Stein said: "I do not understand it. Why are we punishing ourselves in this way?"

He goes on to say: "What leads to the present foolish talk about the budget is Gramm-Rudman."

That is not surprising, Mr. Speaker. Foolishness often begets foolishness.

What we have, however, is a danger. We have people in this body and in the other body determined to ignore economic reality. We have people who voted for Gramm-Rudman with a $144 billion target based on a certain level of economic growth. They are undeterred in their commitment to that goal by the fact that the assumptions on which it was formed no longer hold. And what they are now saying is, of course, we have an economic slowdown. We should make either a significant tax increase or substantial reductions in Federal expenditures.

As Mr. Stein says, and he says he is not a Keynesian, but he says, "My pre-Keynesian and anti-Keynesian professors knew better than that. Even Herbert Hoover knew better than that."

Hobart Rowen, economics reporter for the Washington Post, makes similar arguments. The facts are very clear. Whether or not Gramm-Rudman made sense at the time, it no longer makes sense factually in that the $144 billion was based on a set of outdated economic assumptions.

Paul Volcker, Mr. Speaker, at the most recent congressional appearance he made before the House Banking Committee concurred. He said that given the fact that the economy has fallen off, it is unlikely that you can reach the $144 billion, and it would be a mistake to make drastic further cuts to try to reach that, given that the economy has slowed.

I hope that when the House considers deficit reduction, and I am aware of the rule which prevents us from mentioning other branches of this Congress, but when a debt reduction bill appears before us, laden as it apparently will be with all kinds of extraneous matters, I hope we will recognize what Herbert Stein and Paul Volcker had said and that we will not ignore the fact that economic slowdown has undermined the assumptions of Gramm-Rudman.

The articles follow:

THE WRONG TIME TO CUT GOVERNMENT SPENDING

(By Herbert Stein)

Grown men with responsible positions stand up before television cameras and make this statement: Since the economy is rising less than expected earlier in the year, and inflation is also lower than expected, federal revenues will be less than expected and it is therefore necessary to cut federal expenditures below the level planned previously.

I do not understand it. Why are we punishing ourselves in this way? Does the slowdown in the U.S. economy mean that the Russians are weaker or more amiable and the buildup of our military strength is therefore less urgent? Is the need to look after the poor and homeless diminished? (Is the ebbing tide lifting all the boats?) Whatever was the previous justification for spending $30 billion on aid to agriculture—is that justification now weaker? Obviously not.

With both less output and less inflation than we previously forecast are we now less able to afford those things we previously thought we needed? Surely the answer to that is no. On the contrary, there will now be more unutilized productive capacity with which to meet the government's requirements, and less risk of inflation. The answer would be different if the economy were lagging behind previous forecasts because output was bumping up against a ceiling of capacity, but that does not seem to be the case.

Is our revulsion against the economics of Keynes so great that we not only deny what he said but assert with confidence that the opposite is true? That is, do we now think that cutting government expenditures is a reliable way to stimulate a sluggish economy or prevent a threatened recession?

The question may be put more concretely: In the past year output increased by 2.7 percent, which is probably somewhat below our potential growth rate, and unemployment was fairly steady at around 7 percent. Now there is an expectation that output will rise in the next year at about the same rate, or possibly less. In these circumstances, is it prudent to cut expenditures below the president's budget level in order to reduce the deficit from $210 billion in fiscal year 1986 to $144 billion in fiscal year 1987? (That figure, $144 billion, is the Gramm-Rudman target for the 1987 deficit. Because of the peculiarities of Gramm-Rudman accounting, it appears that about $25 billion of taxes collected in 1987 will not be counted and about $15 billion of expenditures will not be counted. Thus, if the "Gramm-Rudman deficit" is $144 billion the "real" deficit may be $134 billion.)

My pre-Keynesian and anti-Keynesian professors knew better than that. Even Herbert Hoover knew better than that. A thorough-going classicist or monetarist might deny that increasing government expenditures would have even a short-run stimulating effect on the economy. He would not say that cutting expenditures would have a

short-run stimulating effect on the economy, so that it was necessary to cut otherwise worthwhile expenditures in order to fend off a recession.

What leads to the present foolish talk about the budget is Gramm-Rudman. But even Gramm-Rudman does not imply that cutting expenditures is a good prescription for dealing with economic sluggishness. The Gramm-Rudman law provides that if the real GNP rises at less than an annual rate of 1 percent for two consecutive quarters the deficit limits are suspended for the current and following fiscal year.

This is recognition that cutting spending does not cure recessions. Once the GNP growth rate falls below 1 percent for two consecutive quarters the ceiling on the deficit is off. But as long as the growth rate remains at 1.1 percent—as it was in the second quarter of 1986—or higher, the targets must be met. They must be met even if, with the economy sluggish and revenues rising slowly, that requires holding expenditures below levels that are worthwhile, that are well within the economy's capacity, and that are not harmful but possibly helpful to the health of the economy.

Sophisticated people to whom I express my concerns about the idea of cutting expenditures to meet a shortfall of revenue tell me not to worry. The government will not really meet the Gramm-Rudman targets. All Gramm-Rudman requires is that at the beginning of fiscal 1987 there should be an official estimate that the deficit will not exceed $144 billion for the year. The law does not require that the deficit actually be less than $144 billion.

This solution is unsatisfactory for two reasons:

First, the government should not pretend to do what it does not intend to do. This is more than a moral injunction. It has pragmatic significance. The credibility of the government is an asset—more valuable as it becomes scarcer—and it should not be wasted.

Second, while a sharp reduction of expenditures in response to the slowdown of the economy would be unwise, to destroy completely the expectation that the size of the deficit will be brought under sufficient restraint to prevent continued increase in the size of the federal debt relative to the GNP would also be unwise. That could cause an increase in long-term interest rates that would be harmful to economic growth. The de facto abandonment of Gramm-Rudman, without the establishment of any substitute rule of fiscal policy, will destroy all hope of deficit restraint. We find ourselves in a position where we can't live with Gramm-Rudman and can hardly live without it.

We need a fiscal policy that will limit the long-run growth of the deficit and the debt while not enforcing inefficient and probably destabilizing changes of government expenditures in response to fluctuations of the economy. Fifty years ago people talked about balancing the budget over the business cycle as a solution to this problem. Forty years ago the Committee for Economic Development proposed the policy of balancing the budget at high employment for the same purpose. Even a few years ago people were talking about the difference between the "structural" deficit and the actual deficit, which was a way of distinguishing between our long-run position and our cyclical position.

The attractive nuisance of Gramm-Rudman diverted attention from all that, but our present situation shows the urgency of returning to the problem of reconciling our long-run and short-run fiscal requirements.

(The writer, former chairman of the Council of Economic Advisers, is a senior fellow at the American Enterprise Institute.)

---

BUSINESS JUST DOESN'T BELIEVE THEM

(By Hobart Rowen)

On Wall Street, the Reagan administration now has zero credibility: when the White House passed the word last week that, yes, the economy is sluggish, but it still sees a boom-like 4.5 percent economic growth in 1987, you could hear the snort of disbelief above the sound of stock tickers.

Just like as Barron's neatly put it, the old Brooklyn Dodgers' routine: when they lost the pennant race, as they usually did year after year, the Dodgers' management would intone: "Wait till next year!"

Says former Office of Management and Budget aide Lawrence Kudlow, now chief economist for Bear Stearns: "As a former spear-carrier myself, I regard [the White House forecast] as beyond even a leap of faith" from the dismal 1.1 percent growth in the second quarter of this year. Kudlow pedicts that when OMB issues its mid-year revision on Aug. 4, the one certainty is that the business and financial community will not believe the numbers, whatever they are.

For example, the word on Capitol Hill is that the OMB, to keep the 1987 budget-deficit figure from looking even worse than it may be, plans to use a fairly high inflation projection for 1987. This would tend to exaggerate revenue prospects.

Instead of a candid reappraisal of prospects, which would acknowledge the failure of the economy to respond to traditional expansionary elements—such as lower oil prices and declining interest rates, the Reagan administration keeps promising that everything is going to turn out all right. "Some of the slower growth we saw last quarter was actually the result of some very good news on the horizon, and that's the tax-reform bill," President Reagan said with a straight face in his Saturday radio chat.

Once the bill is passed, Reagan predicted, "we can expect business to really start moving.

Maybe it will. But the business community doesn't believe it for one minute. True, tax reform is overdue, and in the long run should be a plus for the nation. But as Sam Nakagama of Nakagama & Wallace, Inc., told his clients, tax reform in the short run deepens the recessionary elements in the economy. For example, it reduces incentives for capital investment. It also will have a major negative impact on commerical real estate, especially in the Southwest, compounding problems for banks already suffering from shaky oil loans.

Moreover, if the highly touted 27 percent top income-tax rate doesn't go into effect until July 1, 1987, while loopholes are closed Jan. 1, 1987—the present plan—then the nation is confronted with equivalent of a 1987 tax increase. That will dampen consumer spending, currently the main prop under the economy.

What it adds up to is a lot of doubt about the immediate future. As Federal Reserve Board Governor Wayne Angell told me: "There is no hard evidence that the economy is on a higher growth path" than the 2.5 percent first-half average—certainly not the 4 percent the administration sticks to for the remainder of 1986. Angell is not predicting a termination of the current long expansion—simply a continuation of the presently uninspired pace.

Does it make sense, some now ask, to pursue the Gramm-Rudman targets with all vigor, at a time that the economy is weakening?

Former Economic Council Chairman Charles Schultze says Congress should still pursue the goal of deficit reduction, but with the effective date of an ultimately necessay tax increase pushed into the future. In an ideal world, it would have made better sense, Schultze told me, if the Gramm-Rudman deficit targets had been tied to changes in the GNP growth rate.

Kudlow would like to link cutting the budget deficit to a further reduction of interest rates by the Federal Reserve Board. Paul Volcker, Ludlow suggests, could state that he looks favorably on lowering interest rates if Congress meets that 1987 Gramm-Rudman target.

These suggestions point up the dilemma of the moment: it has become apparent that chances of resolving the budget-deficit problem are fading.

When the administration's original Rosy Scenario went down the drain, it also took a toll of potential Treasury revenues. On Capitol Hill, experts figure the drop in growth estimates will cost about $25 billion in 1987 revenues. Thus, the $144 billion Gramm-Rudman deficit target for fiscal 1987 is now probably unreachable without Draconian budget slashes or a quick tax hike. (The Congressional Budget Office may use a figure in the neighborhood of $170 billion in its revisions next week.)

If I were a Republican running for reelection to Congress this November, I would wonder if the administration's lastest snow job could backfire. In his radio chat, the president berated the "doom and gloom artists who . . . have been painting dark pictures." Pay no attention, he said, "America's economy is strong; our future bright. . .

You ain't seen nothing yet.' " The true believers make up a short list, headed by Nancy Reagan and Economic Council Chairman Beryl Sprinkel—and I'm not sure about Mrs. Reagan.

---

## TRIBUTE TO WILLIAM ALMON CUNNINGHAM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kentucky [Mr. HUBBARD] is recognized for 5 minutes.

Mr. HUBBARD. Mr. Speaker, I would like to pay tribute to William Almon Cunningham of Benton, KY, who died Friday, July 18, 1986, at the age of 82 years.

I always considered it a privilege to call Almon Cunningham a dear friend of mine, and I know he was a treasured friend of many others in western Kentucky as well. Indeed, I will always remember him as a man of honesty who was ingrained with a sense of responsibility and, at the same time, a sense of humor. He was retired from the U.S. Army Corps of Engineers, having worked for many years on the Cumberland and Tennessee Rivers, including service at the Kentucky Lock and Dam. He was a 32d-degree Mason

and a 50-year member of T.L. Jefferson Lodge 611 Free and Accepted Masons.

A religious man, Almon Cunningham was a deacon in the First Baptist Church of Benton. He is survived by three daughters, Martha Lewis of Benton, Juanita Hill, and Joretta Palmer, both of Paducah; a son, 56th Judicial District Commonwealth Attorney Bill Cunningham of Kuttawa; a sister, Bessie Hines of Florence, MS; 12 grandchildren and four great-grandchildren.

Almon Cunningham was blessed with a wonderful wife, Estelle, who died in 1975.

Almon Cunningham loved his country and enjoyed working in and talking about politics. I have visited his home in Benton, KY, several times during the last two decades.

Almon Cunningham's favorite politicians were his son, Bill Cunningham, a respected, well-liked commonwealth attorney in western Kentucky; his son-in-law Richard Lewis, a Benton attorney with whom I served 6 years in the Kentucky Legislature where he was one of Kentucky's most outstanding State representatives; and another son-in-law, Andrew Palmer of Paducah, KY, an outstanding attorney who for 8 years served effectively as McCracken County Attorney and 4 years as McCracken County judge/executive in Paducah, KY.

My wife Carol and I join thousands of others in western Kentucky who knew and loved Almon Cunningham in extending to the family of this great Kentuckian our sympathy and prayers.

## PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts [Mr. DONNELLY] is recognized for 5 minutes.

Mr. DONNELLY. Mr. Speaker, due to my attendance at a funeral in Massachusetts earlier today, I was unavoidably absent for votes on amendments to the defense authorization bill including the amendment offered by Representatives ASPIN, GEPHARDT, and SCHROEDER. Initially, the vote on the test-ban amendment had been scheduled for Thursday. Had I been present for the vote today, I would have voted "aye" on the Aspin, Gephardt, and Schroeder amendment to impose a 1-year moratorium on all nuclear tests over 1 kiloton by the United States, to begin on January 1, 1987, provided that the Soviets also observe such a verifiable moratorium.

## BOWERS VERSUS HARDWICK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York [Mr. WEISS] is recognized for 5 minutes.

Mr. WEISS. Mr. Speaker, the June 30 decision of the Supreme Court in the Bowers versus Hardwick case marks a distressing setback for people everywhere concerned about individual liberties. In a 5-to-4 decision, the Court ruled that States may outlaw sodomy between consenting adults, even when conducted in the privacy of the home.

According to the tortuous logic of the Court, the Constitution now prohibits Government interference in such sensitive interpersonal matters as the decision to use birth control or have an abortion—but it does not protect people's right to engage in intimate acts of their own choosing.

The decision was based on two arguments. First, the Court ruled that consensual sodomy is not protected by the Constitution because intimate relations between gay men and between lesbians is not "implicit in the concept of ordered liberty," such that "neither liberty nor justice would exist if (it) were sacrificed." Second, the Court stated that homosexual relations can be banned by the State because "proscriptions against (it) have ancient roots," and that after all, "the law * * * is constantly based on notions of morality."

These meager rationales say more about the attitudes of a majority of the Court toward homosexuals than they do about the Constitution.

The Court seems to believe that liberty and homosexuality cannot coexist. But the truth is that the State cannot police our bedrooms and outlaw our most private, personal, intimate relations with others without destroying the most basic constitutional notions of liberty and justice.

In his eloquent dissent, Justice Blackmun pointed out that in the Bowers versus Hardwick decision, the majority ignored its own precedents on privacy decisions. "We protect those rights," he wrote, "not because they contribute, in some direct and material way, to the general public welfare, but because they form so central a part of an individual's life * * * what the Court really has refused to recognize is the fundamental interest all individuals have in controlling the nature of their intimate associations."

The Court also relied on a history of moral teaching for its decision against homosexual relations. Such a reference is not only inaccurate, since many modern religious groups do not condemn homosexuality, it is also dangerous. For centuries, the prevailing moral teachings told us that slavery was right and interracial marriage was wrong. Are we to follow these moral teachings as well?

Ours is a secular society, one where pluralism must take precedence over moralism. Yet according to this decision, our Constitution protects only those who follow the "moral teachings" of religious authorities. Adherence to this sanctimonious logic would place our Nation firmly in the 14th century.

The Bowers versus Hardwick decision assaults not just the sexual conduct, but the very identity of millions of men and women. There is no more personal decision a human being can make than how to express their inherent sexuality. Our Government has no legitimate—much less compelling—interest in interfering with these decisions.

The Constitution holds it "self-evident" that we have the "inalienable right" to pursue happiness. Surely it is also self-evident that our relationships with others is at the core of this search for happiness, and that the nature of these relationships differ widely.

A reading of the Constitution that allows the State to regulate and proscribe these relationships will leave the concept of liberty barren for millions of Americans.

## FOLLOW THE GRAMM-RUDMAN BACKUP PROCESS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. PANETTA] is recognized for 30 minutes.

Mr. PANETTA. Mr. Speaker, we will soon be considering a new proposal to fix the Gramm-Rudman law offered by the law's original authors and approved by the Senate as an amendment to the public debt limit. Basically this new procedure puts the sequestration power in OMB's hands instead of GAO, thereby curing, according to its authors, the constitutional problems found by the Supreme Court in the original Gramm-Rudman law.

The other choice we have is to follow the backup procedures provided in the original Gramm-Rudman bill, and preserved by the action of the Supreme Court. These basically require the House and Senate to vote on a sequestration order developed by OMB/CBO. If passed and signed by the President, this order would lead to cuts in most Federal programs this October unless we can reach the fiscal year 1987 deficit target.

The question that we will be trying to answer in the coming weeks is: Can the answer cut process in Gramm-Rudman be restored in a way that is constitutional and that does not hand too much power to the executive branch? The debate surrounding this question will, I have no doubt, be similar to arguing about how many angels can dance on the head of a pin. Unfortunately, the Supreme Court did not give us much guidance on what sort of automatic process is constitutional, nor is it going to be easy to determine how much power we are giving to OMB in the Gramm-Rudman II proposal. There are not going to be any hard and fast answers.

We ran into a similar problem last fall as conferees tried to improve the Gramm-Rudman bill. First CBO was our choice for the agency to kick off the automatic cuts. The ex-

perts said that would definitely be unconstitutional. So OMB was included in developing the sequestration order. Then it was argued that this wasn't good enough, so it was proposed that GAO be handed the order, and it in turn would pass it along to the President. We were assured that this would be constitutional. Well the Supreme Court disagreed with this analysis, knocked that procedure out in the Synar case, and we are back to square 1: with another debt limit bill attracting amendments seeking to reinstate an extraordinary deficit reduction mechanism, among other things.

I believe we should be very wary about any plan which supposedly claims to be both constitutional and protective of the powers of the Congress. The Synar case, in my opinion, strongly suggests that these conditions are mutually exclusive. It may very well be impossible to design a procedure which preserves the interests of Congress by reigning in the executive branch as it makes the cuts, while at the same time giving the executive branch enough discretion so that the entire mechanism passes constitutional muster. Proponents of curing the Gramm-Rudman law will claim that they have found the "fix," but it is incumbent on us to ask: First, whether the interests of Congress are protected, and second, ask whether the "fix" is constitutional.

ARE THE POWERS OF CONGRESS PROTECTED?

At the moment, the Gramm-Rudman II raises serious questions about the powers that will be given to the executive branch in designing the order. The problem is that we do not have a crystal ball which will show us how creative OMB can be under the Gramm-Rudman II procedures. But to give us a taste of the sorts of changes that could be made in a sequestration order, I think it is interesting to look at the changes GAO made last year in the fiscal year 1986 CBO/OMB sequestration report:

First, GAO increased the amount of funds that could be sequestered in the Department of Defense by $6.3 billion—finding that this amount of unobligated balances should have been in the base. This caused an increase in Defense BA cuts of $309 million. The amount to be sequestered was changed in 11 defense accounts.

Second, GAO deleted administrative expenses financed by prior year unobligated balances from the sequesterable base because of a different interpretation of the Gramm-Rudman law. This changed 22 accounts. Cuts in these accounts were smaller because of this decision.

Third, administrative expenses were added to sequesterable base for Ag Credit Insurance Fund and Rural Housing Insurance Fund, increasing the amount sequestered in each program.

Fourth, GAO added the National Bureau of Standards Working Capital Fund as a sequesterable item.

Fifth, GAO increased the sequesterable amount for the Comptroller of the Currency, resulting in a deeper cut for this office.

Sixth, in two other instances GAO included accounts OMB/CBO left out of their report, and in two other cases additional funds were added to the sequesterable base for accounts.

Many will say that these were just "technical" changes, and maybe they were in the collective mind of GAO. But one person's technical change is another person's policy change—cuts were altered in a variety of programs. The point is once you place the power of making technical changes in the executive branch, you leave the door open to a great deal of mischief. If Congress disagrees with games that have been played with the sequestration order—well that's too bad because you have already handed the power to OMB under the law.

Some may argue: "But you handed that same power to the GAO in Gramm-Rudman I." Yes we did, but there was no question that the conferees trusted GAO to do the best, most honest, job possible of carrying out the Gramm-Rudman law. OMB, to take nothing away from its professionalism and its technical competence, is a political arm of the President, has played all sorts of budget games over the past 6 years, and, in my opinion, just does not have the complete trust of Congress.

There are other problems with Gramm-Rudman II worth noting.

ECONOMIC ASSUMPTIONS

The new proposal requires OMB to use 14 specified economic assumptions for the fiscal year 1987 sequestration report.

In future years, GAO, OMB, and CBO would submit economic assumptions to the Temporary Joint Committee on Deficit Reduction—made up of House and Senate Budget Committee members. The committee could formulate economic assumptions using the range of estimates provided by the agencies and report out a joint resolution containing these assumptions. If the joint resolution is enacted then these economic assumptions would have to be used by OMB in drafting the sequestration order to be submitted to the President. If the joint resolution is not enacted then OMB gets to use its own economic assumptions in drafting the sequestration order for that year.

Unfortunately the 14 economic assumption numbers specified in Gramm-Rudman II do not constitute an economic forecast—hundreds of other numbers are required. This partial list leaves enormous flexibility in the hands of OMB when it develops its deficit projections. As a result, OMB could increase or decrease the deficit projection by up to $30 billion, thereby triggering or detriggering sequestration.

Second, assume the joint committee presents the House and Senate with a package of economic assumptions. Are these numbers we should be or want to be voting on? Who will want to vote on unemployment, economic growth rates and inflation every year for the next 4 years? And if we do not approve our own economic assumptions we hand the power to develop these assumptions over to OMB. The size of sequestration, or whether sequestration is needed at all, would then be in Jim Miller's hands.

SPENDING RATES

Gramm-Rudman II requires that the fiscal year 1986 spending rates for hundreds of programs be used for fiscal year 1987 sequestration. In the outyears, fiscal year 1988 to fiscal year 1991, the same rates would be used unless new rates can be enacted. The joint committee would be responsible for sending to the House and Senate a joint resolution containing new rates agreed upon by OMB and CBO. If approved by both Houses and the President these revised rates would replace the fiscal year 1986 rates.

Spending rates for programs can change drastically year by year, and cuts could become extremely damaging in the outyears unless Congress and the President agree on changes. For many large weapons systems the first year spend-out rates are extremely low, while in future years the rates are higher as more and more of the funds are expended. Locking ourselves into a low fiscal year 1987 spend-out rate matched with failure to enact new rates could devastate many defense procurement programs in years when sequestration is necessary.

HANDING POWER TO OMB

Finally, we must address the issue of giving OMB the power to design the sequestration order. Yes, Gramm-Rudman II attempts to put restrictions on OMB as it designs the order. But based on OMB's manipulation of the numbers over the past 6 years you cannot design a law which ties OMB's enough to make me feel comfortable. Frankly, the OMB staff is ingenious, and it will be able to play games with whatever you design, and you won't know what loopholes you left in the legislation until its too late: OMB will have designed a sequestration order which devastates programs based on the President's priorities and we will be left shaking our heads in disbelief.

Also, once we shift that power down Pennsylvania Avenue we won't get it back until 1991 when Gramm-Rudman expires.

CONSTITUTIONAL DILEMMA

Along with the procedural complications of the new Gramm-Rudman II proposal is the question of whether it is constitutional.

Some argue: "Well we will tie OMB's hands so that it has to develop a sequestration order which is fair." Yes, but if we tie OMB's hands aren't we crossing back over that line between a constitutional and unconstitutional deficit reduction mechanism?

And conversely, there is a line somewhere which we can cross to allow a constitutional automatic process. But after going across that line, do we then find ourselves in a position where we have given too much discretion over spending policy to the executive branch?

Gramm-Rudman II requires that after OMB receives the GAO report, it "shall," with due regard for the data, assumptions, and methodologies used in reaching the conclusion—in the GAO report—issue a report to the President ordering sequestration—if it is needed to meet the deficit targets.

Is GAO once again unconstitutionally ordering OMB to act? An argument can certainly be made that this is the case. If the anwer is yes, then Gramm-Rudman II is patently unconstitutional. If the answer is no, then can OMB do what it wants—choose sequestration or no sequestration based on the mood of Jim Miller or the President? And if this is the case then do we still have an automatic deficit reduction process?

Unfortunately the Court decisions on Gramm-Rudman do not give us clear guidance on what language constitutes an "order"

by a legislative branch agency to the executive branch. Instead we must rely on the general rule applied by Chief Justice Burger in his opinion: "* * * Once Congress makes its choice in enacting legislation, its participation ends. Congress can thereafter control the execution of its enactment only indirectly—by passing new legislation. By placing the responsibility for execution of the Balanced Budget and Emergency Deficit Control Act—Gramm-Rudman I—in the hands of an officer who is subject to removal only by itself, Congress in effect has retained control over the execution of the act and has intruded into the executive function. The constitution does not permit such intrusion."

If GAO is still ordering the executive branch to make cuts, then the constitutional problems in Gramm-Rudman I are not resolved in Gramm-Rudman II. If GAO is not ordering the executive branch to make cuts, then what is forcing OMB to order sequestration by the President?

FOLLOW THE FALL-BACK PROCESS

When you look at the complications associated with trying to develop another automatic process, and the dangers most proposals pose to congressional power, I think the backup process in the original Gramm-Rudman law begins to look better and better. Yes it will give us some tough choices to make, but we are going to have those choices anyway—the deficit is not going to disappear, one way or another we will be forced to deal with it.

The overwhelming votes on the March 1 sequestration—339 to 72 in the House and a voice vote in the Senate—are evidence that we can respond to the discipline imposed by the Gramm-Rudman targets.

There is also the real possibility that by enforcing our fiscal year 1987 budget resolution through passage of reconciliation, appropriation bills and a tax bill, we can get below the Gramm-Rudman deficit target—$154 billion—which triggers a vote on sequestration.

We can use up our energies trying to develop another automatic cut process which may or may not be constitutional, which may or may not preserve the rights of Congress, or we can concentrate on enforcing the budget resolution in an attempt to reach the deficit targets. If we can enforce the budget resolution but still come up short on the deficit then lets just vote on whether we want sequestration to complete the job, or whether some other course of action is preferable. Maybe further cuts, made necessary by a weaker economy, are not justified and will not pass, or maybe they will.

The point is that the backup process gives us a vehicle to make these decisions. And it leaves the decisions in our hands, not in the hands of the OMB.

## MY ADVICE TO THE PRIVILEGED ORDERS

**The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas [Mr. GONZALEZ] is recognized for 60 minutes.**

**Mr. GONZALEZ. Mr. Speaker, it is certainly not my intention to utilize the full hour requested and conceded, but I feel that in the light of some of the things that have happened that it is important that the RECORD reflect at least one Member's awareness and the fact the there must be somewhere in the RECORD that the concern resulting from these activities be reflected.**

**Last week, the Vice President made a tour of the Middle East. In the course of that tour, he made a visit to the peacekeeping forces that are in the Sinai desert and the story of that visit was very well reported in the Dallas Morning News, and I am inserting that article at this point, Mr. Speaker.**

BUSH, ENTOURAGE VISIT SINAI PEACEKEEPERS

(By Michael Precker)

EL GORAH, EGYPT.—On the hot, barren sands of the Sinai Desert, where soldiers from 11 countries carry out a lonely mission with little fanfare, this was clearly a special day.

"If you pass anybody you don't know and he looks important," Sgt. Maj. Sandy Knox told his assembled troops on Sunday morning in a rich Scottish accent, "for Christ's sake, salute him."

Soon afterward, a planeload of important people touched down at El Gorah, a former Israeli air base in northern Sinai that now houses the headquarters of the Multinational Force and Observers.

Vice President George Bush, taking most of the weekend off from Middle East politics, arrived with his entourage to pay tribute to a key element of the region's most successful peace initiative.

"You are a unique force," Bush told several hundred soldiers and civilians at the base. "You are here largely under the sponsorship of former enemies that you are helping to keep at peace. . . . For five years the MFO has been the angel of peace for both Egypt and Israel."

As part of the 1979 peace treaty under which Israel returned Sinai to Egypt, an international force was created to monitor the military limitations imposed on all of the Sinai and a narrow border zone inside Israel. The two countries have fought four wars in the desert peninsula, which is about the size of West Virginia.

When the Soviet Union blocked the United Nations from sponsoring the Sinai force, the United States stepped in. Washington shares the $85 million annual price tag for the force equally with Egypt and Israel, and about 1,200 of the 2,600 troops are from the U.S. Army.

Last Christmas, a planeload of Americans finishing their Sinai assignment crashed in Newfoundland, killing 248 soldiers.

But otherwise the troops are rarely in the news, attesting both to their good work and the fact that Egypt and Israel, despite political tensions, are adhering to the military portions of the treaty.

The peacekeepers carry out ground patrols and air surveillance, reporting any violations to both sides.

"We hope that someday the nations of the Middle East will not need forces like yours to keep the peace," Bush said Sunday. "You are just the first step toward that future."

Bush, who concludes a 10-day trip to the Middle East on Tuesday, said he had seen "a marked change in the mood in this region. Every leader agrees that we must have peace. . . . With this consensus in place, I can see a number of ways to build a comprehensive peace in this region—not this year or next year, perhaps, but certainly within a decade."

After talks in Israel and Jordan last week, the vice president headed for Cairo, where he and Egyptian President Hosni Mubarak are expected to discuss the Middle East peace process and Egypt's mounting economic crisis.

Although substantive talks aren't scheduled to begin until Monday, Bush was to attend a Sunday night dinner with Mubarak as host.

But Bush and his wife, Barbara, began their Egyptian visit as tourists, taking in some of the magnificent relics of its ancient civilization.

On Saturday afternoon, they walked through Karnak, a vast compound of temples dating back 3,500 years, and an antiquities museum in the city of Luxor, where they spent the night. Known in ancient times as Thebes, Luxor is about 400 miles south of Cairo on the Nile River.

After a short cruise along the Nile, the Bushes proceeded to the Valley of the Kings and the Valley of the Queens, where the rulers of ancient Egypt dug complex ornate tombs into the arid hills for their journey to the afterlife.

Although the tombs have been robbed of their treasures over the centuries, many of the walls are remarkably well preserved, with hieroglyphic inscriptions and paintings telling their rulers' stories.

At the tomb of Queen Nefertari, the Egyptian hosts turned off the lights to demonstrate how mirrors ingeniously placed along the chambers brought reflected sunlight deep inside the tomb.

The Bush party then flew to Sinai on Sunday. Once the formal reception was over, the vice president headed off to meet about 200 U.S. soldiers who waited in 95-degree heat to shake his hand and take pictures.

"This isn't so bad today," said Chief Warrant Officer Andrew Boston of Orange, Texas. "It's been a lot hotter. We have ceremonies out here from time to time, mostly to award medals, so we get practice in standing in the heat."

Bush told the Americans that he brought greetings from President Reagan, then eagerly waded into the crowd. One of the first soldiers he met was Spec. 4 James Holmes, 19, of Temple, in Central Texas.

"I'm glad to meet a fellow Texan," Bush said.

Greg Sutton, a 21-year-old private first class from Garland who arrived seven months ago, said the soldiers pass the time in Sinai with the help of a pool, gymnasium, library and furloughs to Cairo and Tel Aviv, Israel.

Another pastime is provided by the base's 14 bars, including at least one operated by each national contingent. "When you hit them all in one night, they call it the Thunder Run," said Sutton, a truck driver who delivers supplies to remote outposts in the desert.

Among the beverages available is a concoction from Fiji, which contributes 499 soldiers to the force, containing a potent root brought from the Pacific island.

"It's called grog, and it makes your face go numb," Sutton said. "That's not part of the Thunder Run."

**Mr. Speaker, for quite some time now, in fact, very much after the House of Representatives approved the resolution in December 1981, that embarked for the first time in its history, the Congress in the deployment,**

in the direct deployment of armed services personnel. Since the First Congress in 1789, this had not happened.

The reason given at the time this was considered on or about December 12, 1981, and as given to me by the then chairman of the Foreign Affairs Committee, President Reagan was requested this full-sized statutory commitment, and mandate from the Congress for the utilization in the Sinai of what eventually would be the composition of a peacekeeping group.

It was defined as an armed services component. That is, the peacekeeping component would be soldiers, and that the United States would commit itself to no more than 2,000. It was not stated and the chairman at that time could not tell me exactly who or what country they had in mind as to being invited to constituting this peacekeeping force.

I raised the issue of the purpose of the force. The answer, at first denied on a personal basis because there were only about 12 Members on the House floor at the time, rather angrily by the chairman who told me that they wanted no interruptions, that they needed to have this resolution passed with no questions asked because questions would likely give rise to other questions and therefore an undesirable delay in the enactment of that resolution.

I considered that an inadequate reply and being that I was denied time on the floor to propound the questions for the record, I then hastily prepared an amendment and was recognized on that amendment and directed several questions to the chairman for the record.

It was brought out in the course of my questioning that President Reagan was making this request because President Carter had written a letter some months after the agreement at Camp David between Israel and Egypt of which of course the United States was and is not a party signatory.

The fact is that that is the only instance I know that President Reagan ever asked us to honor anything that President Carter had ever suggested. I thought that was peculiar. I asked the chairman if that letter had been a part of a side memorandum or a codicil such as are called in international law or diplomacy, to the agreement itself.

The reply was "no." That President Carter had been impelled to send this letter to the then leader in Egypt and the then leader in Israel because some distrust had arisen and that Egypt wanted to be assured that Israel would keep the terms of the agreement and vice versa.

I then asked the question that if this force was going to be comprised of armed personnel, that in the event, and it was my prayer and hope as it is now, that there would be no outbreak or no challenges made to the honoring of the treaty by either party signatory, that if in the case, I hypothesized, Egypt accused Israel of violating, what was his force going to do? Invade Israel? Or if Israel accused Egypt of violating the terms of the agreement, was this group going to invade Egypt?

Well, those questions were never answered and remain unanswered even though I have since then propounded them to the executive branch as well as the proper members of the proper committee in the House.

It seemed to me, and I said, that what this force then was and continues to be was a hostage to both of these countries in this arrangement known as Camp David. They are indeed hostages, and I have been gravely concerned and noting that there was no expression of concern attributed to the Vice President, GEORGE BUSH, I take the floor to once again voice my concern in what I consider to be the most vulnerable spot for so-called "violence or terrorist activities."

Why do I say this? Because even in the reports, and incidentally, in the Texas newspapers, or for that matter, in any American newspaper I know of for the first time the composition of this group was printed as a matter of news.

I had placed the composition and the strength into the RECORD long ago after it was first organized. I pointed out that the United States had initially close to the 2,000 maximum but the Fiji Islanders have 500. Colombia in the beginning, mostly under compulsion by then-Secretary of State, General Alexander Haig, contributed 1,000 troops, but they had an emergency in 1985 or 1984 and they had to recall 500 of the 1,000, so they have about 500. The Fiji Islanders have about 500, but France and England do not even have 40 apiece. West Germany does not have one.

So, what are we talking about? Supposing we do have an attack on this force. Let us say that it is caused not by any Israeli or Egyptian agent, but by a mischief-seeking terrorist such as, let us say, Qadhafi. What would be the reaction on the part of our leaders in and out of the Congress, in and out of the Presidency? Would we then muster all available help? Would we mobilize and invade the Sinai in order to retaliate or do something? Or would we as in the case of the 240 marines in Beirut kill them necessarily because of the hard-headedness, the bull-headedness, the pig-headedness of the Commander in Chief against the judgment of his chief military advisers he had gone in deploying the 2,000 marines or so in Beirut. Every single one of the Joint Chiefs of Staff told him over a period of 14 months that it was wrong and yet the Commander in Chief did not think so because, as I have concluded time and time again, whether it is an authoritarian dictator or a despot somewhere, those who tend to exercise power out of ideology lose reality in the sense of it.

□ 1600

There was no way, even in 14 months of speaking out on this House floor, of attempting to communicate with the President.

Now, I have been here long enough to have worked with six Presidents, but this is the first one that does not answer a Congressman's letter, so the best I could do was take the floor as I am today, voice my concern, announce that the marines were under the shadow of death every day, and it was wrong, because if something did happen, it was inexcusable, as I have considered it to be.

So what do we do now? In the event that Qadhafi in his anger and in his astuteness, and obviously he is an astute man, contrives or somebody else contrives, it does not have to be Qadhafi, that this would be the point of vulnerability as far as terroristic attacks are concerned.

The composition of the force in the Sinai is such a nature that it has no armor, it has no air protection as such, and therefore, in my opinion, without necessarily claiming to be a military expert, any more than I was in the case of Beirut, can simply conclude that they are vulnerable to a minimally equipped terroristic, quick-hit group.

So I voice that concern because the stories in the newspaper in Texas, in the Dallas Morning News, reported fully the visit of Vice President GEORGE BUSH, but no time other than to say that he had visited with some individual soldiers who happened to have come from Texas and formed that part of the force. It is mainly an airborne component that we have.

Again I say, this is typical of what happens when we get ideologues to exercise power. As I had pointed out time and time again, for the first time in our history we have an ideologue as President of the United States. He is rigid. He is very much tunnel-visioned when there are certain code words, such as Russia, Russian, Communist, or Communists in general, or when somebody utters the phrase "Marxism-Leninism" or when somebody talks in terms of the old cowboy movies that he used to film in which he was many times the hero and in which those dastardly Indians were put down and shot and every time the hero won, because it was clear-cut that this was the enemy.

But it so happens that in the real world, as I think history since 1950 should have revealed to us in more modern-day times, even though perhaps we should have learned as far

back as 1918 when we first ventured into what the President accepts unquestioned as a matter of policy on the part of our Government, and that is armed intervention, no effort at diplomacy in order to put down an insurrection.

In 1918 we lost over 300 soldiers when President Wilson was President and we joined the French and the English in invading Russia to put down the Russian revolution. Of course, that was a very tragic misadventure. It was a miscalculation but we learned nothing because we have failed to learn in each succeeding case, and particularly since 1950 of the eruption of what has now been called the Korean war.

Had our leaders had a correct perception of that world, I doubt seriously that we would have ended up so ignominiously, where even today we have 45,000 of our soldiers in Korea, where we have 300,000 in Germany and where we are thrailing and flailing, with lack of leadership, because the President in presenting his so-called defense budgets, which are not in my opinion defense at all, but are war budgets, is of a mindset in the case of Europe, going back to 1947, and in the case of Latin America, pre-Coolidge 1929 and thereabouts.

I think that we have suffered along, we have lost much blood, much treasure with these misadventures based on misperceptions. Had our leaders, as I say and repeat, seen that world in what we now call Southeast Asia, but which generally had been known as Indochina, and I doubt seriously in May 1963, as I found out, President Kennedy, being President, there were very few in or out of the Congress who knew such a place as Vietnam really was, much less Laos or Thailand.

As a result, we have ended up in destroying in many parts of the world a credibility that had been building.

I doubt seriously that the hostage-taking in Iran would have happened if we had not been shoved out so ignominiously from Vietnam.

And the end is not in sight. Everywhere we look, we have been pushed out. We are pushed out of the Middle East now.

In Europe, in none of the so-called defense budget or authorization or appropriation discussions here on this floor have I heard anybody raise the question, such as, what part of this $300 billion-plus expenditure or authorization and expenditure that we are asking the American people to pay their taxes for, with priority over everything else including our own domestic needs, what part of that does the so-called defense of Europe represent?

Well, I have been raising that question for 20 years and this was at a time when the defense budgets were at about one-tenth of what they are today.

Then as they grew incrementally, I kept asking the question. I would ask it of the chairman of the Appropriations Committee, the chairman of the authorizations committee, the minority ranking members and they would all say, "Well, we can't give it to you all in one section of the budget."

And I would say, "Well, I know that."

But I have, because I have failed to receive an answer and I am not a member of either committee, on my own extrapolated figures where I have come to the conclusion that the sum total of this defense budget or expenditure, that over 55 percent is really for what you and I would call the defense of Europe.

I would ask, "Would you say I am in the ball park?"

And they would all answer me in the past, "Yes, that is about right, if you factor in everything else, such as defense, R&D and the like."

I say then, "What is that defense predicated on?"

Well, astoundingly, it is still on the same basis as it was in 1957 and 1958 in which the big thing was an overland invasion on the part of Russia through middle Europe or some ostensible purpose of taking over Western Europe.

But the world has changed. We have 300,000 of our troops in Germany alone. The British have about one-tenth of that number in that part that they kept from the beginning which is the Ruhr, the steel-producing area. Nobody can ever accuse the British of ever sacrificing national interest first for anything else, be it peace, as in the case of the 14 points of Woodrow Wilson, or anything else.

□ 1610

So they wanted that because they wanted to make sure that they would have the control of the competition in steel producing; that their British steel producing would not be sacrificed. And it has not been.

The French have less than 10 percent of the troops we have. We ended up with what? We ended up with that mass, and with Checkpoint Charlie. But the Russians—and I do not want to disappoint any of my colleagues whom I have heard discussing the Russians—are not exactly stupid.

There is a lot of history that we have blithefully ignored. For one, we changed the designation of our troops in West Germany from "occupation" to "defense." Now, does that mean that the inhabitants of West Germany look upon us as defenders or occupants of their homeland?

Well, I invite my colleagues to read the thinkers, the writers, the authors, the intellectuals in Germany. See what they are saying. Let us look at the political reality.

This administration and President Reagan are pinning such things as the deployment of Pershing II and everything else on the continuation of the present Kohl regime. But in the meanwhile we have now right on the threshold of power a brandnew generation that does not remember World War II. We are doing the same thing in our country. In Russian it is the same way. Both Kohl, the German leader, and Gorbachev, the Russian leader, were 15 years old at the time of World War II, but right on the threshold of power are these new generations that do not remember, but have this heritage of historical antecedents in middle Europe—the Slavs, the Poles, the Teutons.

You have Russia, that decided that they would forever and a day prevent another invasion that cost 20 million Russian lives by just dismantling or attempting to dismantle what we used to call "Prussia" but which today generally is East Germany.

We have had reports that in some of the German provinces there are real political issues having to do with demanding the return of a couple of provinces that are now in Polish jurisdiction such as Silesia, and one other, and Kohl temporarily placating them by saying "Hey, look, please keep quiet and don't rock the boat, because as soon as we have a peace treaty, we will take care of that."

How many Americans and colleagues of mine think that we do not have a peace treaty, that World War II is not over with? Well, the truth is that it is not. We complicate it further with having assumed and taken the mantle of power from the British and French, say in the Middle East, where France in Lebanon, for instance, after 50 years was so delighted to get rid of Lebanon that at the height of World War II, in 1943, said, "Boys"—meaning the Allies—"here it is."

Nobody has been able to do anything with Lebanon, so-called Lebanon. We have called it Lebanon since World War II, but it is a jerry-built configuration, and it is about as stable as anything that can't be stable.

Yet we are blithefully ignorant of these facts. We are all very much like the philosopher Plato's cave, in which he described that mankind in pondering problems was like an individual in a cave in which he was between the wall and a fire in that cave, and that all that he could see was the shadows moving on that wall.

This is the way in which we are being governed today. We have equal misperceptions, for example, about America in these other countries. We have a real unique set of misperceptions, and I way that it is time that we try to strip ourselves of these smoked glasses and look at it realistically, because it is all interconnected in such a

mesh, in such a complex economic, social, and governmental fabric, as is American society, as is what I call the most unique civilization ever, our participatory democratic form of government that now more than ever is threatened—threatened more domestically than it is by any threat of a Communist invasion, let me advise.

How is it all interconnected? Well, first, obviously if all of the policies that the Congress has been flummoxed on by the ideologues calling on us on weak economic and incoherent economic programs such as supply-side misadventures, what is the test of anything? The test of anything is that a good fruit, a good policy, produces a good tree, produces good fruit. Good policy produces good results.

But where are we? Well, for the first time since 1914 we are the biggest debtor nation in the world, at the same time that our financial institutional private enterprises are overhung on a lending orgy where the debtors cannot and will not be able to pay us back.

Is anybody other than one Senator in the U.S. Senate, whose intellect I greatly admire and has broached that subject matter with respect to one country only—and that is our next-door neighbor, Mexico, the Republic of Mexico—but are we anticipating, are we considering what these factors are as they mesh, because if we do not have a sound monetary and fiscal setup, we cannot have anything but an endangered defense system.

When I first came to the Congress, my political opponents and critics made big ado about getting on the Armed Services Committee, because of my district's traditional and historical place in the American defense posture. I had had 5 years' experience in the Texas State senate, where I think that the obstacles were a lot more severe than any I would face coming up here, and I tried to explain that time would tell, but that I was the only one of three that were simultaneously sworn into the House in the middle of the 87th Congress who got assigned to a standing committee, and that happened to be one that I really wanted to be assigned to, and that was the Banking, or as they called it then, the Banking and Currency Committee.

My answer to them was this: "If you don't have a sound dollar, you're not going to have sound defense."

The way things look to me, we are going to have to unite all of the greatest minds that we have, try to summon in modern 20th-century history the Alexander Hamiltons, the old financial wizards that made it possible at the birth of our Nation to endure as a financially free entity.

So today all of that is intertwined. You cannot tax beyond a certain point, no matter how much you justify it, whether it is for defense or anything else. This is what we are doing now with such things as Grambo legislation, in which it is obvious and apparent and lucidly clear that it cannot, it will not, and it will never function, never will work.

And what is happening? What is the reality? The reality is that we are on the verge of having to increase the debt ceiling once again. It will be the 12th or 13th time that this has been done since Ronald Reagan took office, sworn to balance the budget, blaming Jimmy Carter for everything from the deficit to carbuncles. Then he said that 4 years was not enough, that he needed another 4.

Well, we are now in 6, and where are we? For the first time since 1914, the biggest debtor nation in the world.

His so-called recovery, which has not really been a recovery—ask any American citizen who goes to the grocery store or has to pay his rent or has to pay his water bill or light and gas bill, and see if inflation has been controlled.

□ 1620

Now his salary has been controlled, that is deflated, but the other has not.

So let us assume that that is what it was. It has all been financed by fickle foreign money that once the drive is on to pull it out, as they did with respect to the Continental Illinois Trust Bank in Illinois, it will collapse, the whole shebang.

What I say is let us anticipate.

In the Dallas Morning News for yesterday on the front page, and mind you Dallas is not in my jurisdiction, Dallas is 300 miles from my district. The reason I always refer to these papers is because they all have credentials, they are one, solid Republican. Dallas is Republican Valhalla.

Second, they are newspapers that have been rated all along as the most conservative, or as they say, stable of any. Their front page says: "Federal deficit nears record as economy slows."

But the President was just saying Saturday before last we never had it as good.

Then in another article, this one in the Washington Post, the good old Washington Post for July 18, there is a table that I will place in the RECORD. It is entitled: "Forty major companies pay no Federal income taxes and collecting refunds; 1982-1985," that is, they are milking the Treasury's tittie.

The table referred to follows:

40 MAJOR COMPANIES PAYING NO FEDERAL INCOME TAXES AND COLLECTING REFUNDS; 1982–85

[Dollars in millions]

| Company | 4-year profit | Tax refund | Tax rate (percent) |
|---|---|---|---|
| AT&T | $24,898.0 | $635.5 | −2.6 |
| DuPont | 3,785.0 | 179.0 | −4.7 |
| Boeing Co | 2,271.0 | 121.0 | −5.3 |

40 MAJOR COMPANIES PAYING NO FEDERAL INCOME TAXES AND COLLECTING REFUNDS; 1982–85—Continued

[Dollars in millions]

| Company | 4-year profit | Tax refund | Tax rate (percent) |
|---|---|---|---|
| General Dynamics | 1,994.5 | 90.9 | −4.6 |
| Pepsico | 1,921.1 | 89.3 | −4.6 |
| General Mills | 1,215.7 | 78.7 | −6.5 |
| Transamerica Corp | 525.0 | 73.2 | −13.9 |
| Texaco | 1,587.0 | 68.0 | −4.3 |
| International Paper Co | 581.0 | 59.8 | −10.3 |
| Greyhound Corp | 338.9 | 53.7 | −15.9 |
| IC Industries | 561.2 | 53.7 | −9.6 |
| Great Northern Nekoosa | 427.8 | 47.2 | −11.0 |
| Internat'l Minerals & Chemical | 337.1 | 46.5 | −13.8 |
| Xerox | 670.3 | 42.8 | −6.4 |
| U.S. Bancorp | 238.6 | 41.4 | −17.3 |
| Union Camp Corp | 690.9 | 36.9 | −5.3 |
| Panhandle Eastern Corp | 1,063.5 | 34.7 | −3.3 |
| Grace (W.R.) & Co | 483.4 | 34.2 | −7.1 |
| American Cyanamid Co | 303.7 | 34.1 | −11.2 |
| Ashland Oil | 504.3 | 33.9 | −6.7 |
| Soundstrand Corp | 377.9 | 23.9 | −6.3 |
| Piedmont Aviation | 205.0 | 21.6 | −10.6 |
| Mitchell Energy & Dev. Corp | 362.9 | 19.9 | −5.5 |
| Burlington Industries | 293.0 | 19.8 | −6.7 |
| Westinghouse Electric Corp | 2,189.6 | 19.3 | −0.9 |
| Comerica | 169.3 | 17.3 | −10.2 |
| Tektronix | 163.3 | 13.8 | −8.5 |
| Baxter Travenol Laboratories | 591.8 | 13.6 | −2.3 |
| Sun Chemical Corp | 91.5 | 13.4 | −14.6 |
| Southwest Airlines Co | 225.5 | 11.8 | −5.2 |
| Harris Corp | 271.5 | 8.6 | −3.2 |
| Centex Corp | 301.0 | 6.8 | −2.3 |
| Northrop Corp | 697.9 | 5.2 | −0.7 |
| Philadelphia Electric Co | 2,155.2 | 4.4 | −0.2 |
| Singer Co | 250.0 | 3.4 | −1.4 |
| Niagara Mohawk Power Corp | 1,741.0 | 3.3 | −0.2 |
| American Standard | 166.0 | 3.3 | −2.0 |
| International Multifoods | 45.9 | 2.6 | −5.6 |
| Overseas Shipholding Group | 215.9 | 2.2 | −1.0 |
| SCM Corp | 131.5 | 2.0 | −1.5 |
| Totals, 40 companies paying no tax, 1982–85 | 55,043.7 | 2,070.8 | −3.5 |

Source: Citizens for Tax Justice.

Where was all this tax reform? I thought we had reform? I thought this was the President's big braggadocio.

The truth is otherwise. The truth is that all of this is not separate, disjointed, unconnected. It is all connected, and at the bottom of it was the initial sell-out of the American people, the American economy with the extortionate and usurious interest rates that have been flagellating our business, our average citizen, the household budget, and which all history, as long as we have a record of mankind's history, has indicated that no society survives, ancient or modern or Middle Ages with that kind of a festering cancerous situation.

So I have tried in the past to tie these things in. Last week I ran into a very distinguished former Member of this House that I only wish he were here now. He was, when I came to the Congress, a colleague of mine on the Committee on Banking, Finance and Urban Affairs, and then he went to the Ways and Means Committee, the tax writing committee.

I include in the RECORD at this point a summary of the present state of the tax conference, which you read about in the newspapers. It is a brilliant analysis and it is very typical of the brilliance and the genius of Mr. Vanik. In it I think we have the best summation in a few paragraphs of where we stand and how it is interconnected.

The summary referred to follows:

WASHINGTON, DC,
*July 30, 1986.*

In connection with the tax conference, I find it incredible to believe that Democrats, the traditional supporters of the progressive tax system, would be supporting a 27% top rate—with early low-income entry. The principal beneficiaries of this tax bonanza would be the 56% of those earning over $200,000 who would receive a tax reduction of $55,250 annually (Joint Committee figures).

The advantaged group would be the almost 800,000 to 1,000,000 who earn above $185,000 per year. The disadvantaged would include almost everyone else—because the revenue impact of this drastic tax change will not be known until it is discovered in April of 1988 (Primary time-Tax time).

In the past, tax policy constituted the fundamental difference between Democrats and Republicans. We believed in the doctrine of "each citizen contributing according to his means." Republicans traditionally supported the "trickledown approach." The 27% top rate is definitely the result of the latter. In supporting the 27% top rate, Democrats are exactly like Republicans. We have lost our important identity.

A great deal is made of the Tax proposal effort to remove 6,000,000 people from the tax rolls. The Joint Committee has never provided figures on the tax expenditure of either this change or the reduction of the top rate to 27%. My instincts tell me that the top rate reduction for 1,000,000 costs considerably more than the removal of the lower 6,000,000 from taxation!

In a drastic tax change such as the tax bill in conference, there is tremendous risk of miscalculating revenues and expenditures. There is no reserve for error—and it must be expected that the sum of $10 billion to $20 billion could be added to the annual deficit. The error rate of government and committee staffs on these estimates is frightening.

There is another vital issue. The recent study of the Joint Economic Committee indicates a tremendous concentration of wealth and power in the nation with shocking acceleration after 1981. The study was based on figures through 1983 which do not reflect the further trend to the present. The tax bill in conference further accelerates these forces of concentration which do not support a case for drastic immediate reduction of the top rates.

Therefore, I recommend that the House consider reducing the top rate from 35% to 27% over an eight-year period at the rate of 1% a year. This would reduce the cost of the bill by between $25 to $45 billion and also provide some degree of insulation against an error in either revenue or expenditure estimates.

It would be an act of providence to insure against new additions to the annual deficit.

Sincerely yours,

CHARLES A. VANIK.

Though we all talk here like we did this afternoon with respect to the so-called defense, and about throwweight and nuclear this and nuclear that, and everybody forgetting that the basic rationale upon which we are predicating our defense budget is no longer valid, we are acting as if there is still a viable NATO. There is not, and there has not been, though it was not as apparent then as it is now since France pulled out.

But I could go beyond that by reporting to you what I read in the European, in the German periodicals, in the French, even the British, even the Spanish periodicals were reporting. How many times did I see this reported in the American press? Not one time. When do I ever hear it in any debate? Never did.

But in 1959 NATO, after it had incorporated into its command some of the former Nazi generals, came out with the brilliant idea that they were going to have an exercise based on the deployment of 317 what they called small nuclear field warheads. The reason there was such an uproar in the European press, never reported here, was that when it was obvious that the field of action would be middle Europe, Germany, and you know, how are you going to confine that to noncivilian involvement, the uproar was so great that, of course, they had to kind of clamp down and say, oh, that was just a paper exercise. The truth is, it went further than that. But it was the beginning of the birth of the French idea of force de frappe. That is their own nuclear protection or umbrella, as they call it nowadays.

So I wanted to close out this by saying that I am very much concerned because in the fog of discussion I see no light of reality penetrating that fog, either with respect to the apprehension I feel about the safety and well-being of our troops and their colleagues that we have invited to join us in the Sinai. I say as we close out today that they are fellow Americans and neighbors, our allies in this venture who are under a very serious threat of bodily harm or death, and that much more than just that would fall by way of repercussion.

I have asked that we have a review. I think the Congress has a responsibility, since the Congress, the first and only time in its history that it has mandated troop movements, that it review and say what is the purpose here. Should we allow this situation of our troops actually being hostages and nothing else?

This is a no win deal because the nations we are supposed to be keeping the peace for are both supposed allies: Egypt and Israel.

So I hope that eventually I can persuade my colleagues, and I will recall for the record that when this resolution providing for this troop deployment came up, it came up out of the Foreign Affairs Committee, with no sequential reference to the Armed Services Committee. I think that was a prime error to begin with. But I think now that there is the responsibility on both committees to overview this, reconsider, and see if we have properly seen to the safety and well being of these men who are soldiers. They are armed, but they are not adequately armed in the case of an eventuality.

---

□ 1630

## IN MEMORY OF OFFICER KEVIN WELSH

(Mr. HOYER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HOYER. Mr. Speaker, the Washington area was rocked by a tragedy this week with the death of Officer Kevin Welsh in the line of duty.

Officer Welsh dove into the murky waters of the Anacostia River in an effort to rescue a woman who had jumped off the 11th Street bridge in a suicide attempt. The woman was saved; Officer Welsh was not. His body was reclaimed from the waters of the river more than 4 hours later.

Officer Welsh was 34 years old, a 7-year veteran of the force. He was a loving husband and a father. His wife, Judy, is expecting their third child in a matter of weeks.

The circumstances of this tragedy are heart-rending, and when we delve deeper, they become even more so. For Kevin Welsh was a man beloved by his colleagues and respected as an outstanding police officer. A captain in the District of Columbia Police Department's Emergency Response Team, of which Officer Welsh was a member, said of him, "He was [what we] commonly refer to as a policeman's police officer."

From every account we read in the newspaper or heard on television, we have lost an individual in love with life, who was very, very good at his job. In his career, Officer Welsh had received 31 commendations from his superiors, as well as more than 60 letters of praise from citizens. This year, he had made 72 felony arrests and 33 arrests of fugitives on warrants. He was a crack shot and an expert at finding stolen cars. In other words, Officer Welsh was the kind of policeman who is idealized on the television. But there was one difference—he was real.

The death of a brave man, a man who took a risk to do his job to the limit, who tried to save a life, reminds us all of the sacrifices made for each one of us everyday, by the men and women of our police departments. Across this country there are quiet heroes like Kevin Welsh, professionals who make it possible for us to walk on safer streets knowing that they will be there in times of distress. We honor all their contributions as we pause to mourn the loss of one of our Nation's finest, Officer Kevin Welsh.

## THE NATIONAL MEDIA SHOULD PAY MORE ATTENTION TO COVERING AFGHANISTAN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. DREIER] is recognized for 5 minutes.

Mr. DREIER of California. Mr. Speaker, in light of the press's coverage of the Soviets' recent announcement that it would withdraw 6,000 of its 115,000 invading troops from Afghanistan, I want to appeal to the Nation's media. We, in Congress, have devoted a significant part of this session to foreign policy decisions. From the Philippines to Nicaragua, we have taken positive action to aid the forces of democracy against totalitarianism.

Coinciding with this action, our national media have overcome significant barriers of censorship and harassment to draw international attention to corruption and human rights violations. The media's determination to report the situation in South Africa in spite of increasing censorship demonstrates a will and an ability to get around these restriction.

Unfortunately, Afghanistan is a place of extreme tragedy where TV and radio rarely go, and where they have failed to capture the imagination and attention of the world. As the media justifiably focuses on South Africa where the death toll ranges in the thousands, it ignores the millions killed in Afghanistan. Ignored is the fact that over half the population has been either killed off or driven off its lands by the invaders.

Mr. Speaker, I implore the media to spend a fraction of its time on Afghanistan that it has on such places as South Africa and the Philippines. I implore the entertainment and news media which was so helpful in Ethiopia to devote a similar effort to the Afghans who are suffering a famine proportinate to Ethiopia's but induced by defoliants and carpet bombing. Mr. Speaker, I implore the media to stop ignoring the Soviet Union's invasion of the sovereign nation of Afghanistan.

## SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. DREIER of California, for 5 minutes, today.

(The following Members (at the request of Mr. STRANG) to revise and extend their remarks and to include extraneous material:)

Mr. BURTON of Indiana, for 60 minutes, today.

(The following Members (at the request of Mr. FRANK) to revise and extend their remarks and to include extraneous material:)

Mr. FRANK, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. HUBBARD, for 5 minutes, today.

Mr. WEISS, for 5 minutes, today.

Mr. DONNELLY, for 5 minutes, today.

Mr. PANETTA, for 5 minutes, today.

Mr. GONZALEZ, for 60 minutes, today.

## EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. BROOMFIELD, following Mr. DICKINSON on H.R. 4428 in the Committee of the Whole, today.

Mr. DICKINSON, to include extraneous matter in his remarks during debate on the Aspin amendment in the Committee of the Whole today.

(The following Members (at the request of Mr. STRANG) and to include extraneous matter:)

Mr. LAGOMARSINO.

Mr. FAWELL.

Ms. SNOWE.

Mr. KEMP.

Mr. SWINDALL.

Mr. DENNY SMITH.

Mr. BEREUTER in two instances.

Mr. LENT.

Mr. WOLF.

Mr. DREIER of California.

(The following Members (at the request of Mr. FRANK) and to include extraneous matter:)

Mr. STARK.

Mr. BONKER.

Mr. UDALL.

Mr. LEVINE of California.

Mr. LELAND.

Mr. MILLER of California.

Mr. VENTO.

## ENROLLED BILL SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H.R. 4184. An Act to authorize appropriations to the National Science Foundation for the fiscal year 1987, and for other purposes.

## BILLS PRESENTED TO THE PRESIDENT

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee did on this day present to the President, for his approval, bills of the House of the following titles:

H.R. 1740. An act to direct the Secretary of the Interior to release a reversionary interest in certain lands in Orange County, FL, which were previously conveyed to Orange County, FL, and

H.R. 1795. An act to exempt certain lands in the State of Mississippi from a restriction set forth in the act of April 21, 1806.

## ADJOURNMENT

Mr. HOYER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 35 minutes p.m.) under its previous order, the House adjourned until Monday, August 11, 1986, at 12 o'clock noon.

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

4022. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Department of the Navy's intent to issue Letter(s) of Offer to sell certain defense articles and services to the Coordination Council for North American Affairs (Transmittal No. 86-51), pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

4023. A letter from the Secretary of Health and Human Services, transmitting a draft of proposed legislation to reduce costs in the Medicare programs, and for other purposes; jointly to the Committees on Ways and Means and Energy and Commerce.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. HAWKINS: Committee on Education and Labor. H.R. 4300. A bill to entitle employees to parental leave in cases involving the birth, adoption, or serious health condition of a son or daughter and temporary medical leave in cases involving inability to work because of a serious health condition, with adequate protection of the employees' employment and benefit rights, and to establish a commission to study ways of providing salary replacement for employees who take any such leave; with amendments (Rept. 99-699, Part 2). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. Supplemental report on H.R. 4430; with an amendment (Rept. 99-725, Part 2). Ordered to be printed.

Mr. BROOKS: Committee on Government Operations. Report on Foreign source income: Problems of tax return nonfiling and income underreporting by Americans living or investing abroad (Rept. 99-770). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 4062. A bill to provide for the conveyance of certain public lands in Oconto and Marinette Counties, WI. (Rept. 99-771). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 1891. A bill to direct the Secretary of the Interior to convey a certain parcel of land located near Ocotillo, CA; with an amendment (Rept. 99-772). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 4811. A bill to establish the San Pedro Riparian National Conservation Area in Cochise County, AZ, in order to assure the protection of the riparian, wildlife, archaeological, paleontological, scientific, cultural, educational, and recreational resources of the conservation area, and for other purposes; with an amendment (Rept. 99-773). Referred to the Committee of the Whole House on the State of the Union.

Mr. HAWKINS: Committee on Education and Labor. House Concurrent Resolution 321. Concurrent resolution expressing the sense of Congress in opposition to employment discrimination against persons who have, or have had, cancer based on such individual's cancer history. (Rept. 99-774). Referred to the House Calendar.

Mr. DINGELL: Committee on Energy and Commerce. H.R. 4843. A bill to amend the Energy Policy and Conservation Act for the purpose of improving national energy policy; with amendments (Rept. 99-775, Part 1). Ordered to be printed.

Mr. DE LA GARZA: Committee on Agriculture. H.R. 2631. A bill to provide for study and research on the decline in U.S. forest productivity and to determine the effects of atmospheric pollutants on forest environments, and for other purposes; with an amendment (Rept. 99-776). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 4883, A bill to provide options for land exchanges involving lands on Admiralty Island, AK, and for other purposes; with an amendment (Rept. 99-777). Referred to the Committee of the Whole House on the State of the Union.

## SUBSEQUENT ACTION ON REPORTED BILLS SEQUENTIALLY REFERRED

Under clause 5 of Rule X the following action was taken by the Speaker:

The Committee on Public Works and Transportation discharged from further consideration of H.R. 4430; H.R. 4430 referred to the Committee of the Whole House on the State of the Union.

The Committee on Merchant Marine and Fisheries discharged from further consideration of H.R. 4351; H.R. 4351 referred to the Committee of the Whole House on the State of the Union.

## PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. GLICKMAN (for himself, Mr. FRANK, and Mr. BERMAN):

H.R. 5362. A bill to extend the authority of the Supreme Court Police to provide protective services for Justices and Court personnel; to the Committee on the Judiciary.

By Mr. GLICKMAN (for himself and Mr. FISH):

H.R. 5363. A bill to amend the interest provisions of the Declaration of Taking Act; to the Committee on the Judiciary.

By Mr. BARNES (for himself, Ms. OAKAR, Mr. ACKERMAN, Mr. FAZIO, Mrs. BURTON of California, Mr. HOYER, Mr. DYMALLY, Mr. GEJDENSON, Mr. SMITH of Florida, Mr. DYSON, Mr. EDGAR, Mr. KOSTMAYER, Mr. GUARINI, Mr. FRANK, Ms. MIKULSKI, and Mr. BORSKI):

H.R. 5364. A bill to amend title 5, United States Code, to increase the amount of basic group life insurance available to Federal employees; to provide that amounts in the Employee's Life Insurance Fund be invested in certain Government securities; to provide for the amortization of the unfunded liability of the Government's life insurance program; and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. BONKER (for himself, Mr. ROTH, and Mr. MICA):

H.R. 5365. A bill to amend the International Claims Settlement Act of 1949 to provide that the value of claims be based on the fair market value of the property taken; to the Committee on Foreign Affairs.

By Mr. BROWN of California (for himself, Mr. ROE, Mr. LUJAN, Mrs. LLOYD, Mr. SENSENBRENNER, Mr. WALGREN, Mr. SCHEUER, Mr. LEWIS of Florida, Mr. YOUNG of Missouri, Mr. REID, Mr. HENRY, Mr. NELSON of Florida, Mr. LUNDINE, Mr. MCCURDY, Mr. MACKAY, Mrs. MEYERS of Kansas, Mr. GLICKMAN, and Mr. VOLKMER):

H.R. 5366. A bill to provide for the development of a long-range plan to implement the report recently submitted by the National Commission on Space; to the Committee on Science and Technology.

By Mr. CONYERS:

H.R. 5367. A bill to amend title 18, United States Code, to provide for dismissal of a criminal case, before or after judgment, upon a finding of error in the grand jury proceedings from which the indictment arose; to the Committee on the Judiciary.

H.R. 5368. A bill to amend chapter 215 of title 18 of the United States Code to allow assistance of counsel in connection with grand jury proceedings; to the Committee on the Judiciary.

By Mr. LENT (for himself, Mr. DOWDY of Mississippi, Mr. DANNEMEYER, Mr. SCHEUER, Mr. RITTER, Mr. WYDEN, Mr. BLILEY, Mr. SYNAR, Mr. SLATTERY, and Mr. SIKORSKI):

H.R. 5369. A bill to require asbestos manufacturers to submit information on their asbestos products to the Environmental Protection Agency and to require owners of buildings containing asbestos to inspect the buildings and take samples of asbestos before commencing civil actions relating to asbestos, and for other purposes; to the Committee on Energy and Commerce.

By Mr. MCMILLAN (for himself, Mr. BARNARD, Mrs. BENTLEY, Mr. BLILEY, Mr. CAMPBELL, Mr. CARPER, Mr. COBEY, Mr. COBLE, Mr. DANIEL, Mr. DARDEN, Mr. DERRICK, Mr. DICKINSON, Mr. DUNCAN, Mr. FRANKLIN, Mr. GINGRICH, Mr. HARTNETT, Mr. HENDON, Mr. HORTON, Mrs. JOHNSON, Mr. LENT, Mr. LOTT, Mr. MCEWEN, Mr. MOLINARI, Mr. MONTGOMERY, Mr. NEAL, Mr. OLIN, Mr. RITTER, Mr. ROBERTS, Mr. ROGERS, Mr. ROSE, Mr. ROWLAND of Georgia, Mr. SLAUGHTER, Mr. SMITH of New Hampshire, Mr. SPENCE, Mr. SPRATT, Mr. STRANG, Mr. SWINDALL, Mr. TALLON, Mr. THOMAS of Georgia, Mr. VALENTINE, Mr. VANDER JAGT, and Mr. WHITLEY):

H.R. 5370. A bill to establish an import licensing system for textiles and textile products; to the Committee on Ways and Means.

By Mr. ST GERMAIN (for himself and Mr. WYLIE):

H.R. 5371. A bill to extend until September 15, 1986, the emergency acquisition and net worth guarantee provisions of the Garn-St Germain Depository Institutions Act of 1982; to the Committee on Banking, Finance and Urban Affairs.

By Mr. SPENCE:

H.R. 5372. A bill to amend section 331A of the Consolidated Farm and Rural Development Act to authorize the Secretary of Agriculture to forgo foreclosure of certain loans and to make an adjusted loan schedule available to the borrower providing for equitable repayment terms consistent with the borrower's prospective cash flow; to the Committee on Agriculture.

By Mrs. COLLINS (for herself and Mr. LELAND):

H.R. 5373. A bill to amend the Internal Revenue Code of 1954 to deny deductions for expenses of advertising to persons who discriminate against minority owned or formatted communications entities in the purchase or placement of advertisements, and to permit persons aggrieved by such discrimination to bring civil actions to recover lost profits and other appropriate damages; jointly, to the Committees on Ways and Means, and the Judiciary.

By Mr. STARK:

H.R. 5374. A bill to prohibit the designation, as beneficiary developing countries under the Generalized System of Preferences (GSP), of countries that violate internationally recognized human rights or are governed by totalitarian regimes that are not implementing measures for a transition to a democratic form of government; to the Committee on Ways and Means.

By Mr. STARK (for himself and Mr. BEREUTER):

H.R. 5375. A bill to make Chile ineligible for preferential tariff treatment under the Generalized System of Preferences until action is taken by the government of Chile to improve human rights conditions and to restore democracy in that nation; to the Committee on Ways and Means.

By Mr. TRAFICANT:

H.R. 5376. A bill to amend title 11 of the United States Code to prevent the rejection of contracts, whether executory or not, that provide hospitalization and health benefits to current or former employees of the debtor; to the Committee on the Judiciary.

By Mr. WAXMAN (for himself, Mr. MILLER of California, and Mr. ATKINS):

H.R. 5377. A bill to amend the Public Health Services Act to establish school-based adolescent health services demonstration projects; to the Committee on Energy and Commerce.

By Mr. YATRON (for himself, Mr. SOLOMON, Mr. FASCELL, Mr. BROOMFIELD, Ms. MIKULSKI, and Mr. RICHARDSON):

H. Con. Res. 378. A concurrent resolution expressing the sense of the Congress concerning human rights in Nicaragua; to the Committee on Foreign Affairs.

## ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 1402: Mr. CLINGER.

H.R. 2502: Mr. CLINGER.

H.R. 2504: Mr. FLORIO.

H.R. 3024: Mr. FEIGHAN, Mr. ERDREICH, Mr. DIXON, Mr. HILLIS, Mr. GEJDENSON, Mr. GILMAN, Mr. WHITTEN, Mr. LIPINSKI, Mr.

LEWIS of California, Mr. DIOGUARDI, and Mr. MACKAY.

H.R. 3643: Mr. GOODLING.

H.R. 3799: Mr. VALENTINE.

H.R. 3842: Mr. BUSTAMANTE, Mr. DELLUMS, Mr. COELHO, Mrs. SCHROEDER, Mr. SAVAGE, Mr. TAUZIN, Mr. FRANK, Mr. STARK, Mr. SCHUMER, Mr. MCCURDY, Mr. GUARINI, Mr. ANNUNZIO, Mr. SISISKY, Mr. MAVROULES, Mr. MILLER of California, Mr. ACKERMAN, Mr. DOWNEY of New York, and Mr. FLORIO.

H.R. 4041: Mr. SHAW.

H.R. 4300: Mr. LUKEN, Mr. MCDADE, and Mr. MOAKLEY.

H.R. 4439: Mr. BARTON of Texas, Mr. CLINGER, Mr. SHUMWAY, Mr. WALKER, Mrs. VUCANOVICH, and Mr. VALENTINE.

H.R. 4524: Mr. CARPER.

H.R. 4567: Mr. PICKLE.

H.R. 4633: Mr. BRYANT, Mr. DEWINE, Mr. LANTOS, Mr. HAMILTON, Mrs. COLLINS, Mr. SCHEUER, Mr. SOLOMON, Mr. DAUB, Mr. CLINGER, and Mr. WOLPE.

H.R. 4838: Mr. SWIFT, Mr. ACKERMAN, and Mr. WHEAT.

H.R. 4872: Mr. BERMAN.

H.R. 4931: Mr. RAHALL and Mr. APPLEGATE.

H.R. 5064: Mr. WORTLEY, Mr. MCDADE, Mr. FUSTER, Mr. GARCIA, Mr. FAZIO, Mr. BRYANT, Ms. KAPTUR, and Mr. HUGHES.

H.R. 5065: Mr. WORTLEY, Mr. MCDADE, Mr. FUSTER, Mr. GARCIA, Mr. FAZIO, Mr. BRYANT, Ms. KAPTUR, and Mr. HUGHES.

H.R. 5066: Mr. HAYES.

H.R. 5098: Mr. KINDNESS.

H.R. 5099: Mr. HILER and Mr. FEIGHAN.

H.R. 5154: Mr. BERMAN, Mr. SCHEUER, Mr. CROCKETT, and Mr. ECKART of Ohio.

H.R. 5178: Mr. DARDEN, Mr. PACKARD, Mr. MOORHEAD, Mr. WHITEHURST, Mr. EDWARDS of Oklahoma, Mr. SHUSTER, Mr. SILJANDER, and Mr. CLINGER.

H.R. 5208: Mr. LAGOMARSINO, Mrs. JOHNSON, Mrs. HOLT, Mrs. KENNELLY, Mr. LEWIS of Florida, Mr. RANGEL, and Mr. TOWNS.

H.R. 5266: Mr. FUQUA, Mr. CONYERS, Mrs. COLLINS, Mr. WAXMAN, Mr. WEISS, Mr. SYNAR, Mr. NEAL, Mr. BARNARD, Mr. LANTOS, Mr. WISE, Mrs. BOXER, Mr. LEVIN of Michigan, Mr. OWENS, Mr. TOWNS, Mr. SPRATT, Mr. KOLTER, Mr. ERDREICH, Mr. KLECZKA, Mr. BUSTAMANTE, Mr. MARTINEZ, Mr. HORTON, Mr. WALKER, Mr. CLINGER, Mr. MCCANDLESS, Mr. CRAIG, Mr. NIELSON of Utah, Mr. SAXTON, Mr. SWINDALL, Mr. DELAY, Mr. DIOGUARDI, Mr. ARMEY, Mr. LIGHTFOOT, Mr. MILLER of Washington, and Mr. BOULTER.

H.R. 5311: Mr. SENSENBRENNER.

H.R. 5322: Mr. LUNDINE, Mr. FRANK, and Mr. MITCHELL.

H.R. 5338: Mr. RAHALL.

H.J. Res. 127: Mr. PERKINS, Mr. SNYDER, and Mr. CALLAHAN.

H.J. Res. 524: Mr. CARR, Mr. EMERSON, Mr. CALLAHAN, Mr. CHAPPIE, Mr. SISISKY, and Mr. VENTO.

H.J. Res. 594: Mr. SOLOMON.

H.J. Res. 611: Mr. LAGOMARSINO, Mr. VISCLOSKY, Mr. OLIN, Mr. COUGHLIN, Mr. ANDREWS, Ms. OAKAR, Mr. FRENZEL, Mr. PRICE, Mr. DASCHLE, Mr. EARLY, Mr. MCKINNEY, Mr. BROWN of California, and Mr. SPRATT.

H.J. Res. 617: Mr. BROOKS, Mr. SHUMWAY, Mr. EARLY, Mr. CALLAHAN, Mr. EMERSON, and Mr. PEPPER.

H.J. Res. 619: Mr. SIKORSKI, Mr. LOWRY of Washington, Mr. WYDEN, Mr. EMERSON, and Mr. CALLAHAN.

H.J. Res. 620: Mrs. LONG, Mr. COELHO, Mr. DAVIS, Mr. ROEMER, Mr. PETRI, Mr. WEAVER, and Mr. FASCELL.

H.J. Res. 631: Mr. KANJORSKI, Mr. BORSKI, Mr. REID, Mr. CROCKETT, Mr. DE LA GARZA, Mr. MCKERNAN, Mrs. MARTIN of Illinois, Mr. JONES of North Carolina, Mr. DWYER of New Jersey, Mr. AUCOIN, Mr. LUNDINE, Ms. MIKULSKI, Mr. LEWIS of Florida, Mr. WILLIAMS, and Mrs. BURTON OF California.

H.J. Res. 643: Mr. WORTLEY, Mr. TAUZIN, Mr. DYSON, Mr. JONES of Oklahoma, Mr. LEATH of Texas, Mr. PETRI, Mr. DANIEL, Mr. RALPH M. HALL, Mr. WATKINS, Mr. VALENTINE, Mr. JACOBS, Mr. ANTHONY, Mr. WHITLEY, Mr. HUBBARD, Mr. FRANKLIN, Mr. ORTIZ, Mr. SNYDER, Mr. NIELSON of Utah, Mr. ERDREICH, and Ms. SNOWE.

H.J. Res. 655: Mr. BLAZ, Mr. BORSKI, Mr. CARPER, Mrs. COLLINS, Mr. COYNE, Mr. DE LA GARZA, Mr. DOWDY of Mississippi, Mr. EMERSON, Mr. JENKINS, Ms. KAPTUR, Mr. KINDNESS, Mr. LEHMAN of Florida, Mrs. LLOYD, Mr. MCMILLAN, Mr. PORTER, Mr. SHUMWAY, Mr. TAUZIN, Mr. TOWNS, Mr. VENTO, Mr. WALGREN, Mr. WOLPE, and Mr. YOUNG of Missouri.

H.J. Res. 674: Mr. LAGOMARSINO, Mr. MAVROULES, Mrs. BENTLEY, Mr. HUGHES, and Mr. BEDELL.

H.J Res. 684: Mr. FROST, Mr. NIELSON of Utah, Mr. CROCKETT, Mr. CAMPBELL, Mr. MOORHEAD, Mr. MINETA, Mr. JACOBS, Mr. CHAPPELL, Mr. BOEHLERT, Mr. ECKERT of New York, Mr. EVANS of Illinois, Mr. HALL of Ohio, Mr. RAHALL, Mr. WHEAT, Mr. JONES of Tennessee, Mr. COYNE, Mr. BATES, Mr. BEDELL, Mr. BRUCE, Mr. DE LA GARZA, Mr. LEVIN of Michigan, Mrs. JOHNSON, Mr. LUKEN, and Mr. ROBINSON.

H.J. Res. 686: Mr. BURTON of Indiana, Mr. LEACH of Iowa, and Mr. HUTTO.

H.J. Res. 688: Mr. DARDEN, Mr. WATKINS, Mr. MCDADE, Mr. LIPINSKI, Mr. RANGEL, Mrs. BENTLEY, Ms. KAPTUR, Mr. COLEMAN of Texas, Mrs. LLOYD, and Mr. DE LA GARZA.

H.J. Res. 699: Mr. KOSTMAYER, Mr. RALPH M. HALL, and Mr. NIELSON of Utah.

H. Res. 529: Mr. LIGHTFOOT, Mr. FAWELL, Mr. LAGOMARSINO, and Mr. SLAUGHTER.

## REGULATION OF LOBBYING ACT

In compliance with Public Law 601, 79th Congress, title III, Regulation of Lobbying Act, section 308(b), which provides as follows:

(b) All information required to be filed under the provisions of this section with the Clerk of the House of Representatives and the Secretary of the Senate shall be compiled by said Clerk and Secretary, acting jointly, as soon as practicable after the close of the calendar quarter with respect to which such information is filed and shall be printed in the CONGRESSIONAL RECORD.

The Clerk of the House of Representatives and the Secretary of the Senate jointly submit their report of the compilation required by said law and have included all registrations and quarterly reports received.

## REGISTRATIONS

The following registrations were submitted for the second calendar quarter 1986:

(NOTE.—The form used for report is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective headings.)

FILE ONE COPY WITH THE SECRETARY OF THE SENATE AND FILE TWO COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19.....

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

| P | QUARTER | | | |
|---|---|---|---|---|
| | 1st | 2d | 3d | 4th |
| (Mark one square only) | | | | |

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:
(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)
(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".
(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:
(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.
(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:

1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (*a*) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (*b*) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(*a*) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§302(e).
(*b*) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).
(*c*) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, ☐ place an "X" in the box at the left, so that this Office will no longer expect to receive Reports.

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (*a*) Short titles of statutes and bills; (*b*) House and Senate numbers of bills, where known; (*c*) citations of statutes, where known; (*d*) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (*a*) Description, (*b*) quantity distributed; (*c*) date of distribution, (*d*) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out items "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

## QUARTERLY REPORTS*

*All alphanumeric characters and monetary amounts refer to receipts and expenditures on page 2, paragraphs D and E of the Quarterly Report Form.

The following quarterly reports were submitted for the second calendar quarter 1986:

(NOTE.—The form used for reporting is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective headings.)

FILE ONE COPY WITH THE SECRETARY OF THE SENATE AND FILE TWO COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19.....

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

| P | QUARTER | | | |
|---|---|---|---|---|
| | 1st | 2d | 3d | 4th |
| (Mark one square only) | | | | |

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:
(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)
(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".
(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:
(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.
(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:
1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (*a*) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (*b*) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(*a*) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§302(e).
(*b*) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).
(*c*) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, place an "X" in the box at the left, so that this Office will no longer expect to receive Reports. ☐

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (*a*) Short titles of statutes and bills; (*b*) House and Senate numbers of bills, where known; (*c*) citations of statutes, where known; (*d*) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (*a*) Description, (*b*) quantity distributed; (*c*) date of distribution, (*d*) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out items "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

AFFIDAVIT

[Omitted in printing]

PAGE 1

NOTE ON ITEM "D."—(a) *In General.* The term "contribution" includes *anything of value.* When an organization or individual uses printed or duplicated matter in a campaign attempting to influence legislation, money received by such organization or individual—for such printed or duplicated matter—is a "contribution." "The term 'contribution' includes a gift, subscription, loan, advance, or deposit of money, or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make a contribution"—Section 302(a) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN EMPLOYER.—(i) *In General.* Item "D" is designed for the reporting of all receipts from which expenditures are made, or will be made, in accordance with legislative interests.

(ii) *Receipts of Business Firms and Individuals.*—A business firm (or individual) which is subject to the Lobbying Act by reason of expenditures which it makes in attempting to influence legislation—but which has no funds to expend except those which are available in the ordinary course of operating a business not connected in any way with the influencing of legislation—will have no receipts to report, even though it does have expenditures to report.

(iii) *Receipts of Multipurpose Organizations.*—Some organizations do not receive any funds which are to be expended solely for the purpose of attempting to influence legislation. Such organizations make such expenditures out of a general fund raised by dues, assessments, or other contributions. The percentage of the general fund which is used for such expenditures indicates the percentage of dues, assessments, or other contributions which may be considered to have been paid for that purpose. Therefore, in reporting receipts, such organizations may specify what that percentage is, and report their dues, assessments, and other contributions on that basis. However, each contributor of $500 or more is to be listed, regardless of whether the contribution was made solely for legislative purposes.

(c) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE.—(i) *In General.* In the case of many employees, all receipts will come under Items "D 5" (received for services) and "D 12" (expense money and reimbursements). In the absence of a clear statement to the contrary, it will be presumed that your employer is to reimburse you for all expenditures which you make in connection with legislative interests.

(ii) *Employer as Contributor of $500 or More.*—When your contribution from your employer (in the form of salary, fee, etc.) amounts to $500 or more, it is not necessary to report such contribution under "D 13" and "D 14," since the amount has already been reported under "D 5," and the name of the "employer" has been given under Item "B" on page 1 of this report.

D. RECEIPTS (INCLUDING CONTRIBUTIONS AND LOANS):

Fill in every blank. If the answer to any numbered item is "None," write "None" in the space following the number.

*Receipts* (other than loans)

1. $.....Dues and assessments
2. $.....Gifts of money or anything of value
3. $.....Printed or duplicated matter received as a gift
4. $.....Receipts from sale of printed or duplicated matter
5. $.....Received for services (e.g., salary, fee, etc.)
6. $.....TOTAL for this Quarter (Add items "1" through "5")
7. $.....Received during previous Quarters of calendar year
8. $.....TOTAL from Jan. 1 through this Quarter (Add "6" and "7")

*Loans Received*

"The term 'contribution' includes a . . . *loan* . . ."—Sec. 302(a).

9. $.....TOTAL now owed to others on account of loans
10. $.....Borrowed from others during this Quarter
11. $.....Repaid to others during this Quarter

12. $.....Expense money" and Reimbursements received this Quarter

Contributors of $500 or more (from Jan. 1 through this Quarter)

13. Have there been such contributors?

Please answer "yes" or "no": .....

14. In the case of each contributor whose contributions (including loans) during the "period" from January 1 through the last days of this Quarter total $500 or more:

Attach hereto plain sheets of paper, approximately the size of this page, tabulate data under the headings "Amount" and "Name and Address of Contributor"; and indicate whether the last day of the period is March 31, June 30, September 30, or December 31. Prepare such tabulation in accordance with the following example:

| *Amount* | *Name and address of Contributor ("Period" from Jan. 1 through....., 19.....)* |
|---|---|
| $1,500.00 | John Doe, 1621 Blank Bldg., New York, N.Y. |
| $1,785.00 | The Roe Corporation, 2511 Doe Bldg., Chicago, Ill. |
| $3,285.00 | TOTAL |

NOTE ON ITEM "E".—(a) *In General.* "The term 'expenditure' includes a payment, distribution, loan, advance, deposit, or gift of money or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make an expenditure"—Section 302(b) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE. In the case of many employees, all expenditures will come under telephone and telegraph (Item "E 6") and travel, food, lodging, and entertainment (Item "E 7").

E. EXPENDITURES (INCLUDING LOANS) in connection with legislative interests:

Fill in every blank. If the answer to any numbered item is "None," write "None" in the spaces following the number.

*Expenditures* (other than loans)

1. $.....Public relations and advertising services
2. $.....Wages, salaries, fees, commissions (other than item "1")
3. $.....Gifts or contributions made during Quarter
4. $.....Printed or duplicated matter, including distribution cost
5. $.....Office overhead (rent, supplies, utilities, etc.)
6. $.....Telephone and telegraph
7. $.....Travel, food, lodging, and entertainment
8. $.....All other expenditures
9. $.....TOTAL for this Quarter (Add "1" through "8")
10. $.....Expended during previous Quarters of calendar year
11. $.....TOTAL from January 1 through this Quarter (Add "9" and "10")

*Loans Made to Others*

"The term 'expenditure' includes a . . . *loan* . . ."—Sec. 302(b).

12. $.....TOTAL now owed to person filing
13. $.....Lent to others during this Quarter
14. $.....Repayment received during this Quarter

15. Recipients of Expenditures of $10 or More

In the case of expenditures made during this Quarter by, or on behalf of the person filing: Attach plain sheets of paper approximately the size of this page and tabulate data as to expenditures under the following heading: "Amount," "Date or Dates," "Name and Address of Recipient," "Purpose." Prepare such tabulation in accordance with the following example:

| *Amount* | *Date or Dates—Name and Address of Recipient—Purpose* |
|---|---|
| $1,750.00 | 7-11: Roe Printing Co., 3214 Blank Ave., St. Louis, Mo.—Printing and mailing circulars on the "Marshbanks Bill." |
| $2,400.00 | 7-15, 8-15, 9-15: Britten & Blaten, 3127 Gremlin Bldg., Washington, D.C.—Public relations service at $800.00 per month. |
| $4,150.00 | TOTAL |

## QUARTERLY REPORTS*

*All alphanumeric characters and monetary amounts refer to receipts and expenditures on page 2, paragraphs D and E of the Quarterly Report Form.

The following reports for the first calendar quarter of 1986 were received too late to be included in the published reports for that quarter:

(NOTE.—The form used for report is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective headings.)

FILE ONE COPY WITH THE SECRETARY OF THE SENATE AND FILE TWO COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19.....

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

| P | QUARTER | | | |
|---|---|---|---|---|
| | 1st | 2d | 3d | 4th |
| (Mark one square only) | | | | |

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:
(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)
(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".
(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:
(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.
(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:
1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (a) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (b) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(a) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§302(e).
(b) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).
(c) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, place an "X" in the box at the left, so that this Office will no longer expect to receive Reports. ☐

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (a) Short titles of statutes and bills; (b) House and Senate numbers of bills, where known; (c) citations of statutes, where known; (d) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (a) Description, (b) quantity distributed; (c) date of distribution, (d) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out items "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

AFFIDAVIT

[Omitted in printing]

PAGE 1

NOTE ON ITEM "D."—(a) *In General.* The term "contribution" includes *anything of value.* When an organization or individual uses printed or duplicated matter in a campaign attempting to influence legislation, money received by such organization or individual—for such printed or duplicated matter—is a "contribution." "The term 'contribution' includes a gift, subscription, loan, advance, or deposit of money, or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make a contribution"—Section 302(a) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN EMPLOYER.—(i) *In General.* Item "D" is designed for the reporting of all receipts from which expenditures are made, or will be made, in accordance with legislative interests.

(ii) *Receipts of Business Firms and Individuals.*—A business firm (or individual) which is subject to the Lobbying Act by reason of expenditures which it makes in attempting to influence legislation—but which has no funds to expend except those which are available in the ordinary course of operating a business not connected in any way with the influencing of legislation—will have no receipts to report, even though it does have expenditures to report.

(iii) *Receipts of Multipurpose Organizations.*—Some organizations do not receive any funds which are to be expended solely for the purpose of attempting to influence legislation. Such organizations make such expenditures out of a general fund raised by dues, assessments, or other contributions. The percentage of the general fund which is used for such expenditures indicates the percentage of dues, assessments, or other contributions which may be considered to have been paid for that purpose. Therefore, in reporting receipts, such organizations may specify what that percentage is, and report their dues, assessments, and other contributions on that basis. However, each contributor of $500 or more is to be listed, regardless of whether the contribution was made solely for legislative purposes.

(c) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE.—(i) *In General.* In the case of many employees, all receipts will come under Items "D 5" (received for services) and "D 12" (expense money and reimbursements). In the absence of a clear statement to the contrary, it will be presumed that your employer is to reimburse you for all expenditures which you make in connection with legislative interests.

(ii) *Employer as Contributor of $500 or More.*—When your contribution from your employer (in the form of salary, fee, etc.) amounts to $500 or more, it is not necessary to report such contribution under "D 13" and "D 14," since the amount has already been reported under "D 5," and the name of the "employer" has been given under Item "B" on page 1 of this report.

D. RECEIPTS (INCLUDING CONTRIBUTIONS AND LOANS):

Fill in every blank. If the answer to any numbered item is "None," write "None" in the space following the number.

*Receipts* (other than loans)

1. $.....Dues and assessments
2. $.....Gifts of money or anything of value
3. $.....Printed or duplicated matter received as a gift
4. $.....Receipts from sale of printed or duplicated matter
5. $.....Received for services (e.g., salary, fee, etc.)
6. $.....TOTAL for this Quarter (Add items "1" through "5")
7. $.....Received during previous Quarters of calendar year
8. $.....TOTAL from Jan. 1 through this Quarter (Add "6" and "7")

*Loans Received*

"The term 'contribution' includes a . . . *loan* . . ."—Sec. 302(a).

9. $.....TOTAL now owed to others on account of loans
10. $.....Borrowed from others during this Quarter
11. $.....Repaid to others during this Quarter

12. $.....Expense money" and Reimbursements received this Quarter

Contributors of $500 or more
(from Jan. 1 through this Quarter)

13. Have there been such contributors?

Please answer "yes" or "no": .....

14. In the case of each contributor whose contributions (including loans) during the "period" from January 1 through the last days of this Quarter total $500 or more:

Attach hereto plain sheets of paper, approximately the size of this page, tabulate data under the headings "Amount" and "Name and Address of Contributor"; and indicate whether the last day of the period is March 31, June 30, September 30, or December 31. Prepare such tabulation in accordance with the following example:

| *Amount* | *Name and address of Contributor* |
|---|---|
| | (*"Period"* from Jan. 1 through....., 19.....) |
| $1,500.00 | John Doe, 1621 Blank Bldg., New York, N.Y. |
| $1,785.00 | The Roe Corporation, 2511 Doe Bldg., Chicago, Ill. |
| $3,285.00 | TOTAL |

NOTE ON ITEM "E".—(a) *In General.* "The term 'expenditure' includes a payment, distribution, loan, advance, deposit, or gift of money or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make an expenditure"—Section 302(b) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE. In the case of many employees, all expenditures will come under telephone and telegraph (Item "E 6") and travel, food, lodging, and entertainment (Item "E 7").

E. EXPENDITURES (INCLUDING LOANS) in connection with legislative interests:

Fill in every blank. If the answer to any numbered item is "None," write "None" in the spaces following the number.

*Expenditures* (other than loans)

1. $.....Public relations and advertising services
2. $.....Wages, salaries, fees, commissions (other than item "1")
3. $.....Gifts or contributions made during Quarter
4. $.....Printed or duplicated matter, including distribution cost
5. $.....Office overhead (rent, supplies, utilities, etc.)
6. $.....Telephone and telegraph
7. $.....Travel, food, lodging, and entertainment
8. $.....All other expenditures
9. $.....TOTAL for this Quarter (Add "1" through "8")
10. $.....Expended during previous Quarters of calendar year
11. $.....TOTAL from January 1 through this Quarter (Add "9" and "10")

*Loans Made to Others*

"The term 'expenditure' includes a . . . *loan* . . ."—Sec. 302(b).

12. $.....TOTAL now owed to person filing
13. $.....Lent to others during this Quarter
14. $.....Repayment received during this Quarter

15. Recipients of Expenditures of $10 or More

In the case of expenditures made during this Quarter by, or on behalf of the person filing: Attach plain sheets of paper approximately the size of this page and tabulate data as to expenditures under the following heading: "Amount," "Date or Dates," "Name and Address of Recipient," "Purpose." Prepare such tabulation in accordance with the following example:

| *Amount* | *Date or Dates—Name and Address of Recipient—Purpose* |
|---|---|
| $1,750.00 | 7-11: Roe Printing Co., 3214 Blank Ave., St. Louis, Mo.—Printing and mailing circulars on the "Marshbanks Bill." |
| $2,400.00 | 7-15, 8-15, 9-15: Britten & Blaten, 3127 Gremlin Bldg., Washington, D.C.—Public relations service at $800.00 per month. |
| $4,150.00 | TOTAL |

# SENATE—*August 18, 1986*

*(Legislative day of Monday, August 4, 1986)*

The Senate met at 8:45 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Father in Heaven, hard and long as the Senators work, there are those in this Chamber, in Senate offices, and on committee staffs who work as hard and as long, and they are equally vulnerable to all the human foibles and frailties. With profound gratitude we pray for all these unsung heroes of the Senate who labor tirelessly and sometimes thanklessly to expedite their Senator's efforts on the floor, and with their constituents.

We praise You for those whose duty requires precision in recording copious accounts involving tens of thousands of words and preserving them for history. Bless these indispensable public servants—encourage and strengthen them, assure them of our boundless respect and appreciation.

We pray for all our families who often most feel the burden of the relentless Senate schedules. Compensate in Your love, Father, as only You are able, for the sacrifices they make that the U.S. Senate can get its job done. In Jesus' name. Amen.

## RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. The able and distinguished acting majority leader, the Senator from Florida [Mrs. HAWKINS] is recognized.

## SCHEDULE

Mrs. HAWKINS. Mr. President, following the recognition of the leaders, we will have special orders for the following Senators, not to exceed 5 minutes each: Senator PROXMIRE, Senator BAUCUS, Senator HUMPHREY.

There will be routine morning business not to extend beyond 9:15 a.m., with Senators permitted to speak therein for not more than 5 minutes each.

At 9:15 a.m., the Senate will resume consideration of S. 2638, the DOD authorization bill.

At 1 p.m., under the provisions of rule XXII, a live quorum will begin, to be followed by a cloture vote on the Byrd amendment, No. 2414. If cloture is not invoked, a cloture vote will occur on the Dole amendment, No. 2417.

It is the intention of the majority leader to complete action on S. 2638, the DOD authorization bill. Therefore, votes will occur throughout the day today.

## THE WASHINGTON POST CAMPAIGN AGAINST DRUG CONTROL INITIATIVES

Mrs. HAWKINS. Mr. President, this week we heard President Reagan address the Nation with an eloquent appeal to all members of our society to join in a crusade against illicit drug use.

This major Presidential address was carried live to the Nation by network television. By contrast, the following morning's Washington Post downplayed the President's address with a minor article on page 6. And yesterday, the Post used their lead editorial to denounce as "crazy", the President's drug testing proposal.

A similar 1982 Presidential news conference at the White House on the drug issue was also buried by the Post. Meanwhile, the Post's editors see fit to place prominently on page 1, stories like the one on February 25, 1982, which announced that "recreational sniffing of cocaine through the nose is neither addictive nor harmful."

In sum, the Washington Post is a prime example of that predominate part of our national media which has often appeared to undermine, distort and discredit most if not all of the promising anti-drug initiatives devised by our Government and society.

Let's review the record. Beginning in March of this year, the Post and all of its regular opinion columnists who spoke to the issue launched a long and sustained attack on the recommendation of the Attorney General and the President's Commission on Organized Crime for drug testing in the work place. As usual, the Post's biased attack on drug testing was plain in its editorial stance, its opinion columns, and in its selection of and who to cover. The Post gave extensive coverage to the ACLU's opposition to drug testing and still refuses to drug test its own staff, despite the estimate made by the Post's own Bob Woodward on CBS Morning News, June 7, 1984, that some 40 members of the Washington Post's staff were current users of cocaine.

Earlier initiatives in years past to eradicate drug crops by spraying herbicides met determined opposition from the Post. U.S. assistance to the Mexican program eradicating marijuana and opium poppy with paraquat in the mid-1970's met determined resistance from the Washington Post. Our own domestic eradication program for marijuana in the 1980's has likewise been panned by the Post.

The initial cocaine eradication program in Peru's Upper Huallaga Valley, through simple foreign assistance programs back in 1982, drew and extremely critical analysis from the Post in a long story which criticized this little known program on environmental, anthropological, economic, and foreign policy grounds.

The tough but successful drug treatment program operated by Straight Inc., was given very bad press by the Post in 1983 when it arrived in northern Virginia. Likewise, our successful efforts to amend the Posse Comitatus Act in 1981, to allow greater involvement of our military in countering drug smugglers, met with opposition from the Post.

Meanwhile, legislative intitiatives supported by the drug culture, like the effort to legalize heroin and marijuana or for medical purposes, have found support from the Washington Post, despite opposition from the AMA and our national institute of health.

Long-time advocates of illicit drug use of every kind, from marijuana to LSD to heroin, have found favored access to the opinion pages of the Post. Drug culture promoters like Andrew Weil, Lester Grinspoon, Timothy Leary, Arnold Treback, Kevin Zeese of Normal, and others, have all had long opinion pieces or promotional puff pieces given prominent placement in the Post.

The list of opponents to the drug culture is much longer but very few of them have found ready access to the opinion pages of the Post, despite determined attempts.

Some of the Post's stable of liberal columnists, such as Richard Cohen, stand out in their tireless opposition to any new threats to the drug culture.

Cohen has dutifully lashed out savagely at drug testing, ridiculed the President's Bolivian operation with U.S. military personnel, and, most recently, on July 31 launched a preemptive attack on what he detects as the President's tough drug education massage against all illicit drug use. Cohen now blames our drug problem on what he claims were false exaggerations

about the evils of illicit drugs when he was in high school. What bunk.

This is the same Richard Cohen, whose April 29, 1982, column was pointed out to me, ridiculing the DC police for instituting drug testing for police recruits. Listen to Cohen in 1982:

> The DC police are looking for those rare birds who lack at the very least a certain zest for experimentation. Survey after survey indicates that a rather small percentage of young people have never, but never, used marijuana. Such a person is probably not fit to be a police officer.

Or take another Washington Post columnist, Courtland Milloy, who unloads on Lenny Bias in the June 29, 1986, outlook editorial: "Len Bias had his chance and he blew it" This is the same Courtland Milloy who gave us a sympathetic portrait of a Washingon, DC drug dealer on March 30, 1983, "A 14th Street Drug Trafficker Looks at Unemployment."

Or maybe we should re-read Milloy's respectful 1983 portrayal of Washington DC's most prominent drug paraphernalia dealer, in his Post column called "Head Shops" of July 27, 1983.

It is indeed unfortunate that newspapers and journalists, unlike judicial nominees, have so little scrutiny over their prior public record, let alone their personal behavior and their comments made in private. This is especially ironic, even though journalists probably have a much more powerful influence in our media-dominated society than do judges on what we know, what we think and how we act.

I'd like to suggest to any students or researchers, looking for a story or a subject to investigate, to analyze the past public record of our major media on the subject of illegal drug use. This is a story of shameful performance that really deserves to be uncovered and exposed, that the public really should have pointed out to them, lest we allow the same kind of thing to continue to happen again and again.

Those editors and journalists responsible for damaging our society's efforts to protect itself from illicit drug use certainly deserve all the notoriety we can provide for them.

Yesterday I chaired a Senate hearing on drug education materials used in our schools. This hearing exposed to a wider public some of the books and teaching materials which subtly portray illegal drug use, as acceptable social behavior to our children. I hope the media saw fit to pass this information on to the general public. But I won't hold my breath, based on their past performance.

## RECOGNITION OF THE ACTING MINORITY LEADER

The PRESIDENT pro tempore. The distinguished acting minority leader, Senator CRANSTON, is recognized.

## CONTRA AID

Mr. CRANSTON. Mr. President, many people are no doubt baffled by what has been occurring in the Senate. The long delays, the failure to come to grips with some fundamental issues, the scheduling of cloture votes, and then the cancellation of those cloture votes, and the rising testiness that has been displayed from time to time between Senators as frustrations have mounted and the strains and stresses of dealing with the monumental issues that confront us have taken their toll.

The fact is that a quiet filibuster has been going on for many days in this body against military aid to the Contras seeking to overthrow the Government of Nicaragua.

There are Senators of both parties—an overwhelming majority of Senate Democrats and a small minority of Republicans—who are strongly opposed to military aid to the Contras.

I am one of those deeply involved in this effort because I am strongly opposed to U.S. involvement in the conflict in Central America.

I feel very deeply about this issue.

The real issue before the Senate presents one of the fundamental war and peace issues of our time. Simply put, we must ask whether Nicaragua presents such a central threat to the security of the United States as to warrant our prosecution of war against the Nicaraguan people.

Here, in this small Chamber, we must decide this vital issue.

I, for one, was first elected to the Senate in 1968 on a pledge to do all in my power to end America's tragic military involvement in Indochina. I worked toward this end and I worked to help heal the wounds this divisive conflict inflicted in our own land as my first priority in the Senate. Today, yesterday, for a number of days and on into the immediate tomorrows, the Senate is being asked to give final approval for yet another war, the war in Central America.

Not one Senator has changed his or her mind since that time. The score remains 53 who are prepared to vote for the aid, 47 who are prepared to vote against aid.

Those of us who feel so very strongly on this issue have been prepared, and are now prepared, to resort to all of our rights in the Senate to prevent a vote on this issue because we feel so deeply that it threatens our country in many, many ways—threatens the principles for which we should stand, and threatens to involve us in a war that many of us feel we should not be involved in, and threatens not only to involve our money but our men. And we do not want to see young Americans fighting and bleeding and dying in a civil war in Nicaragua.

It is for that reason that we have refused to agree to a time agreement on the matter of the money for the Contras. A time agreement would limit debate and deprive us of the opportunity to prevent that money from being approved simply by preventing no action at all upon that matter.

That is what has led to a long impasse in the Senate. It is a quiet filibuster. We have not had to talk about it. We have not had to debate on the floor up to this point as a way of coping with this very, very serious problem. The majority leader has resorted to all the powers that he has in order to seek delay bringing this matter to a vote until and only when he feels that he will be able to win a cloture and end the debate and win the vote for military aid to the Contras.

And what has occurred has led to a second invisible filibuster, one over the issue of apartheid in South Africa. The majority leader has linked apartheid sanctions to the matter of Contra aid, and has stated that we will not deal with apartheid until we have first dealt with aid to the Contras.

And, also on the other side of the aisle—the Republican side—there apparently are those who have stated quietly to the majority leader that they intend to filibuster the issue of applying sanctions to South Africa. So, in effect, we have two filibusters going on at the present time.

There have been many, many meetings on these matters. I trust that it will be resolved by an agreement that will enable us to cope with both issues. But I assure all who are interested that it will not be an agreement that limits the right of those of us who feel so strongly against aid to the Contras from exercising our rights. We will insist that there will be no vote on that matter until 60 Members vote to end debate on this matter and bring it to a vote.

We are not being asked formally to declare a war, a prerogative reserved to Congress by the Constitution. But for all intents and purposes, that is the question that is before us.

The last time the Senate voted on this issue of aid or no aid to the Contras, 53 favored the aid, 47 opposed the aid.

There are those who charge that a vote for or against Contra aid is a vote for or against communism. Mr. President, there is no sympathy for communism in this Chamber. You know that. I know that. All of us know that.

On the last vote on this issue, as I earlier indicated, 47 of 100 U.S. Senators—none of whom have any sympathy for communism—had the guts to stand up to the pressures of a popular President and vote against aid to the Contras. They cast those votes knowing they would thereby open themselves up to the unpleasant and false charge of voting for communism.

What they were really saying with their votes was, "This is wrong and I cannot support it." That is what the current debate over this issue, quiet until now, is all about.

Many of us who were among those 47 are pledged to do all in our power to bring the people's will into this Chamber, to find a majority in the Senate who will stand up and say, "This is wrong. This is not in America's interest. This is not in America's tradition and I cannot support it."

Our principal concern, Mr. President, is that, if we continue on this course, sooner or later, it will lead to the involvement of Americans—Americans fighting in Nicaragua. I am sure that is not the intention of the President of the United States who seeks this aid to the Contras. But it is all too likely that that will be the end result if we do not change course.

In military matters, there is a certain momentum which can escalate, a certain inner drive in the course of events which, once past a critical point, propels us further than anyone may originally have intended to go. History is replete with examples of nations tinkering in other people's civil wars and ending up engulfed themselves. The last example in our own history was Vietnam.

Once a global power commits itself to military action, direct or indirect, to achieve political objectives, the operative word becomes "victory" and the code word for "victory" is "more."

We are told that more money, more guns, more ammunition, more planes, more bombs, more approved targets, more men will bring us to victory. And when, for all that, victory continues to elude us, the operative words become "still more"—still more money, still more weapons, still more men. But, as we found to our sorrow in Vietnam, still no victory.

Mr. President, those of us who want to prevent all of this from occurring once again in the days immediately ahead, are taking our stand now. That explains the situation that has confronted the Senate, the situation that confronts the Senate today, and will confront the Senate for several days to come—if not more.

Mr. President, I yield the floor.

## RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER (Mr. ANDREWS). Under the previous order, the Senator from Wisconsin is recognized for not to exceed 5 minutes.

Mr. PROXMIRE. Thank you, Mr. President.

## WITH THE FEDERAL RESERVE ABOARD THE INFLATION EXPRESS IS OFF AND AWAY!

Mr. PROXMIRE. Mr. President, if this Senator were a betting man I would wager my Senate office against a pair of worn-out jogging shoes that this country is heading squarely for a super inflation. Here's why:

The Federal Reserve Board—the great bastion against easy money and runaway inflation; the one and only major institute that can and will fight the tough and often unpopular fight against inflation—is throwing in the sponge. Now, consider our other Federal economic policymaking institutions. Every Congress and every administration in modern history has favored expansive Federal Government policies.

The specter of recession with unemployment, business failures, bankruptcies and foreclosures persist as the absorbing national nightmare, in fact, the economic obsession. Everyone wants policies that lower interest rates. Of course, borrowers love those policies. It makes borrowing cheaper. And today our country has become a nation of borrowers. We all know the national debt broke all records 5 short years ago when it rose to the fabulous level of $1 trillion. Today it has soared above $2 trillion, and it continues to rise at a $200-billion-plus clip every year. Individual Americans are even more deeply in debt than their reckless, irresponsible Federal Government. Personal debt in this country exceeds $2 trillion. That personal debt is not only absolutely greater than it has ever been. It is greater in relation to income than it has ever been. And it is rising at breakneck speed.

That is not all. It is worse. Corporate debt is not $2 trillion. It now exceeds $3 trillion! That is easily an all time record and also far greater than it has ever been in relation to income. So, of course, millions of Americans, in or out of business, love to see those interest rates fall. Even the lenders favor lower interest rates. Why should lenders like to see the rent they get for their money go down? Because the value of their loans—especially their long term loans—rises precisely as interest rates fall. In the past couple of years as interest rates have dropped very sharply, the value of bonds as well as common stocks have increased just as sharply.

□ 0910

So all the pressure in the financial community as well as from millions of borrowing and lending Americans plus all the rest of us who want higher pay and more secure jobs, this big fat majority, favor lower interest rates.

So if you are an elected official in this democracy, it is not hard to see why the pressure on the Congress and the administration—any Congress and any administration—is constantly in favor of just the kind of reckless and irresponsible fiscal policy the Congress and the administration has pursued for the past 5 years and the kind of equally reckless and irresponsible policy the Federal Reserve Board has been pursuing for the past year and a half. This is exactly why this Senator is concerned about the President's latest nominee to the Federal Reserve Board, Mr. Robert Heller. This Senator will not oppose Mr. Heller. I have opposed other Reagan nominees to the Federal Reserve Board whose economic convictions this Senator considers inflationary and irresponsible in the past. Why not Heller? Mr. Heller's experience and training in international finance and in top flight bank management technically equip him to be a competent Federal Reserve Board governor.

Unfortunately I cannot expect the President to appoint Federal Reserve Board governors who reflect my economic convictions instead of his own. But the Congress should take notice that the easy, expansive monetary policy that has characterized the Federal Reserve's policies since early 1985 have not been reinforced. Mr. Heller replaces former Governor Preston Martin. Martin's views were as expansive as Heller's so this appointment will not signal a change. But it will reinforce once again the expansive monetary majority on the Board. Governors Johnson, Seeger, Angell, and now Heller are all Reagan appointees. They will constitute a majority of four on this seven man board for easy credit, low interst rates, and the push for credit expansion. This is a legacy that will outlast Chairman Volcker whose term expires a year from now and President Reagan. It means that the last institutional bastion for policies that would stabilize prices and prevent run-away inflation is very probably on its way out.

Why does all this foreshadow huge inflation in the near future? Because it means that for the next several years Congress is very likely to continue to run massive deficits. The Federal Reserve Board with help from the likes of the newest Governor seems sure to continue to bloat the supply of credit and money. We will suffer that curious but deadly combination—a sinking economy, higher unemployment, and rising inflation. Do you say it cannot happen? Do you argue that if the economy collapses so will prices? Well, Mr. President, take a look at every economy that has pursued this buy-now-pay-later and-meanwhile-flood-the-country-with credit. What happens? For the answer: Check out the South American economies or Germany after World War I. Do you say, it cannot happen here? Just wait.

Mr. President, I yield the floor.

## ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business for not to extend beyond the hour of 9:15 a.m., with statements therein limited to 5 minutes each.

Mrs. HAWKINS addressed the Chair.

The PRESIDING OFFICER. The Senator from Florida.

## VITIATION OF SPECIAL ORDER FOR SENATOR HUMPHREY

Mrs. HAWKINS. Mr. President, I ask unanimous consent that the special order in favor of the Senator from New Hampshire [Mr. HUMPHREY] be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

## TWO SOVIET CIRCUS PERFORMERS WHO DEFECTED

Mrs. HAWKINS. Mr. President, yesterday morning two Soviet Circus performers arrived at Miami International Airport. Nikolai Nikolsky and Bertalina Kazakova, who were with the world renown Moscow Circus and performing in Argentina, made a daring escape to freedom. They walked to our Embassy in Buenos Aires from the hotel where their circus company was staying. They explained to our Embassy officials that they wanted to defect and come to the United States. Fortunately, our officials in Argentina were able to get the couple on plane to the United States.

Mr. President, the story of this brave couple reminds us of how lucky we are in this country. Nikolai and Bertalina were successful performers in the Soviet Union. They made a good living in the circus. But they were missing the critical element that makes life rich and full for all individuals, freedom. This case demonstrates the extraordinary risks people are willing to take to come to a country where they can live according to the dictates of their own conscience. The courage of Nikolai Nikolsky and Bertalina Kazakova can only serve to inspire us in our duty to the cause of freedom and renew us in our beliefs about the principles of democracy.

Mr. President, I am sure that I speak for all my colleagues in the Senate in welcoming Nikolai Nikolsky and Bertalina Kazakova to the United States and wishing them the best of luck in their new lives.

I yield the floor.

The PRESIDING OFFICER. Does the Senator suggest the absence of a quorum?

Mrs. HAWKINS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

□ 0930

Mr. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from West Virginia is recognized.

## AIR TRAFFIC COMPUTER FAILURE AT CHICAGO'S O'HARE AIRPORT

Mr. BYRD. Mr. President, the day before yesterday, the news media reported a major failure of the main computer used by air traffic controllers at Chicago's O'Hare Airport. The failure is reported to have occurred on August 5, and delayed hundreds of flights. The computer, which is located at Chicago center in Aurora, ILL, was down 16 hours, during which time a back-up computer was in operation. However, Mr. President, the story that appeared in the Washington Post indicates that this incident was the third computer failure since August 3. That's three failures in 3 days.

According to the UPI account of the incident, the failure of the computer stopped the flow of important information to the air traffic controllers in the tower at O'Hare Airport. Information on the departure and arrival of aircraft, as well as on destinations and flight routes, which is usually generated by the computer and transmitted to controllers, had to be complied by hand and transmitted by telephone to controllers. The back-up computer does not provide that type of information.

The UPI account also notes that the back-up computer does not display on the radar screens of controllers the ground speed of aircraft, or projections of an aircraft's flight path. This is information upon which air traffic controllers rely to maintain the proper distances between aircraft. However, Robert Buckhorn, an FAA spokesman, is quoted as saying that "that failure caused no safety-related incidents."

Mr. President, I find it hard to believe that the lack of adequate computer capability to compile, transmit, and diplay vital air traffic information at the Nation's busiest airport did not produce any safety-related incidents. Nevertheless, this latest incident underscores the current fragility of the Nation's aviation safety system.

On many occasions, I have expressed my concerns about the declining margin of aviation safety. I am pleased to note that yesterday, the Commerce Committee reported S. 2417, the Aviation Safety Commission Act, a bill I introduced on May 7. I believe that this latest incident at O'Hare Airport confirms the importance of expeditious Senate action on S. 2417.

Incidentally, that bill was cosponsored by the distinguished Senator from Arizona [Mr. GOLDWATER] who sits on the floor at this moment and who is manager of the DOD authorization bill.

Mr. President, I ask unanimous consent that the article from the Washington Post and the UPI wireservice story be printed in the RECORD.

There being no objection, the materials were ordered to be printed in the RECORD, as follows:

[From the Washington Post, Aug. 7, 1986]

AIR TRAFFIC COMPUTER FAILS THIRD TIME

The main air traffic control computer at the Federal Aviation Administration's busiest facility failed for 16 hours, delaying hundreds of flights at Chicago's O'Hare International Airport before it was repaired early in the day, FAA spokesmen said.

The outage at Chicago Center in Aurora, Ill., was the third since Sunday, and forced air traffic controllers to manually gather data provided via the computer.

AIR SAFETY

(By Timothy Bannon) WASHINGTON.—The main computer used by air traffic controllers at Chicago Center, the Federal Aviation Administration busiest facility, failed Tuesday, delaying hundreds of flights, an agency spokesman said Wednesday.

The failure, which lasted for 2 hours during which a back-up computer operated, caused no safety-related incidents, FAA spokesman Robert Buckhorn said.

The outage at 2 p.m. was caused by the failure of a computer element that funnels to the computer radar information and other data critical to tracking and directing flights in the crowded Chicago airspace, FAA sources familiar with the breakdown said.

The Chicago Center, in Aurora, ILL handles 2 million flights a year and controls all flights at O'Hare Airport, the world's most congested, which has nearly 2,000 takeoffs and landings a day.

In Chicago, FAA sources said some of the main computer's functions were restored Tuesday afternoon. Buckhorn said the problem was completely corrected at about 6 a.m. EDT Wednesday.

FAA officials in Chicago were meeting about the problem and were not immediately available for comment.

The failure halted the flow of computer-generated flight strips, containing vital information on aircrafts' departure and arrival times, destinations and flight routes. Sources said the backup computer does not generate the computer printout strips, which are used by controllers in the O'Hare tower.

As a result, controllers must compile the information by hand and transmit it to other controllers over the telephone—functions normally handled automatically by the main computer.

Additionally, the backup computer does not display on controllers' radar scopes the ground speed of aircraft or projections of a plane's flight path on which controllers rely to maintain required distances between aircraft in flight.

Buckhorn said flight delays attributable to the computer problem peaked at O'Hare

at about an average of 30 minutes Tuesday afternoon.

The Chicago sources said Tuesday's outage was the third since Sunday, when an outside contractor took over computer program-writing and maintenance functions of the center's computer system, work previously done by FAA employees.

The contractors were hired by the FAA to perform those service at seven air traffic controllers centers nationwide, where controller shortages are particularly acute, such as Chicago Center.

In implementing the plan, the FAA said it would permit the agency to transfer some of the controllers, who worked on computer programs, back to directing aircraft to relieve pressure on the air controller workforce.

The sources could not say, however, whether the outage was related to work performed by the contractors.

## OUR NATIONAL TRAGEDY: DRUG ABUSE

Mr. BYRD. Mr. President, this week, the Nation's attention is focused on a problem of grave magnitude—a true national tragedy. I am speaking of the tragedy of drug and substance abuse which, in many quarters of our country, is reaching epidemic proportions.

The list of those who recognize this tragedy in our midst is growing. I hope that will serve to help us join our efforts to find solutions which will work to turn the tide against drug use.

This week, the President announced his drug program, which is still on the drawing board. All of us—Democrats and Republicans alike, I am sure—will welcome specific recommendations from the President.

I take this moment also to commend Mrs. Reagan for the long fight she has been conducting against the menace. I hope some details of the President's plan will be available soon so we in Congress may consider those plans.

The attention of the President to this grave tragedy of human waste, the waste of our greatest national resource—our people, our children, our grandchildren—will prove extremely helpful. So, I am eager to see the President's plan, when it is ready.

But meanwhile, we must not wait, for there are needed responsible actions which we can take now to attack the problem. Earlier this week, Mr. President, a bipartisan group of 338 Members of the House of Representatives called on the Nation's television networks to begin an advertising campaign against illegal drug use.

On Tuesday, the Democratic working group I appointed to focus on anti-drug and substance abuse initiatives brought to the Democratic conference a plan, including enhanced penalties and education initiatives, to deal with the abhorrent drug "crack."

Crack, a form of cocaine, is the newest scourge on the streets. It is a frightening, low-cost substance which is drawing more and more attention because of its superpotency. Its use often results in death. It is extremely addictive—dependence can be established in as few as two or three episodes. And it is affordable and therefore available to America's youth. With schools opening soon, the need to stem the flow of crack to our youth is truly an emergency. Distributors will have a "field day" when the students are back in school, and their markets are thus concentrated.

Our "crack" emergency bill was unanimously endorsed by the Democratic conference, as was the working group's proposal to create a Cabinet-level official to coordinate national drug abuse policy. Both measures have been introduced this week.

I know I speak for all my colleagues when I invite the advice and assistance of all Senators in helping to move this vitally needed emergency legislation through the Congress this session.

No task before us is more important and deserving of our immediate attention. Drug abuse is taking the lives of thousands of Americans. Its targets are not selective. America's teenagers, adults, and, Mr. President, America's young children are caught in its deadly web.

The Congress must act and act soon. I intend to do everything in my power to see that it does act and act soon.

Mr. President, I yield the floor.

## OFFICER KEVIN WELSH

Mr. MATHIAS. Mr. President, last Monday, D.C. Police Officer Kevin Welsh of Charles County, MD, died while trying to rescue a woman who had jumped off the 11th Street bridge in a suicide attempt. Today funeral services are being held at the Holy Family Catholic Church for this fine young man, who exemplifies the best that Maryland and Washington and this Nation can offer.

He will be missed—by those who knew him as husband and father and relative, by those who knew him as colleague and friend, and by those of us who only know him by his example of courage and bravery under stress.

He was a hero in the finest sense; he sacrificed his life to save another. He acted quickly without considering his own safety. He simply saw a person in trouble and acted to save her. This is the stuff of true grit and courage.

Police Chief Maurice Turner said that Officer Welsh was "always willing to take the initiative to help a victim of crime or to apprehend a wanted suspect." He added that Officer Welsh's last action was "the ultimate example of the type of officer he was."

There is no way to make up for the great loss of Officer Welsh to his wife, Judith, who is pregnant, and their two young children. But they will be able to carry with them always the knowledge that their husband and father was an example of valor. Montaigne wrote almost 400 hundred years ago that the strongest, most generous and proudest of all the virtues is true courage. I hope that thought will bring some comfort to his family. Mrs. Mathias joins me in offering our deepest sympathy to Mrs. Welsh, her children, and their friends.

Mr. President, I ask unanimous consent that a moving editorial about Officer Welsh's life and accomplishments that appeared in the Washington Post today be included in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE SACRIFICE OF KEVIN WELSH

A hero will be buried this morning. Officer Kevin Welsh of the D.C. Police Department died Monday trying to rescue a woman who had jumped off the 11th Street Bridge in a suicide attempt. The woman, a 64-year-old St. Elizabeth's patient, survived. But the 34-year-old officer, who leaves a pregnant wife and two children, did not.

The tragedy in this case is compounded because, according to Officer Welsh's colleagues, this city has lost an exemplary law enforcement officer. In his seven years on the force, he had received 39 commendations from the police chief and from his commanders for outstanding performance in the line of duty. Equally impressive, more than 60 citizens had written to the department to praise his performance. His arrest record far exceeded the average and, according to his partner, "he lived and breathed his job. . . . He was 100 percent policeman."

Police families are not strangers to tragedy. Officers are frequently injured and occasionally killed in the line of duty, usually when a crime is interrupted or an arrest thwarted. This was not the case on Monday. Officer Welsh chose to risk his life for a stranger—as did the other policemen and fire department paramedics who jumped with barely a second thought into the muddy Anacostia River to resuce the woman. Not one of them had to act with such quick courage, for a harbor patrol boat had been called and was coming. The river near the 11th Street Bridge is dangerously fast, and the rescuers could see only a foot down into its 30-foot depth. But they went without hesitation, and they did their best.

Officer Welsh's family, which includes two brothers who are policemen, will be consoled today at church and graveside by city officials, close friends and by his colleagues in the D.C. police force and delegations of officers from other cities. No matter how large the gathering is, it will represent only a fraction of those in this city who respect Officer Welsh's sacrifice and appreciate his service.

## CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

## NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 1987

The PRESIDING OFFICER. The clerk will report the pending business.

The legislative clerk read as follows:

A bill (S. 2638) to authorize appropriations for military functions of the Department of Defense and to prescribe military personnel levels for such Department for fiscal year 1987, to revise and improve military compensation programs, to improve defense procurement procedures, to authorize certain construction at military installations for fiscal year 1987, to authorize appropriations for national security programs of the Department of Energy for fiscal year 1987, and for other purposes.

The Senate resumed consideration of the bill:

Pending:

Byrd (for Kennedy and Weicker) Amendment No. 2414, to set forth a comprehensive and complete framework to guide the efforts of the United States in helping to bring an end to apartheid in South Africa and lead to the establishment of a nonracial, democratic form of government.

Dole Amendment No. 2417 (to Amendment No. 2414), of a perfecting nature, to promote economic and political development, peace, stability and democracy in Central America, to encourage a negotiated resolution of the conflict in the region, and toward these ends, to enable the President to provide additional economic assistance for the Central American democracies as well as assistance for the Nicaraguan democratic resistance, subject to certain terms and conditions.

Wilson modified Amendment No. 2595, to provide funding for the Rolling Airframe Missile program.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. GOLDWATER. Mr. President, before we recessed last night, we made agreements on amendments with two of our Members; one was Senator ROTH of Delaware, who has five amendments which he will offer, and the other was Senator KERRY of Massachusetts, who has one. I am wondering if my good friend from Delaware would be willing to agree to time on his amendments.

Mr. ROTH. Yes.

Mr. GOLDWATER. What would the Senator like?

Mr. ROTH. I suggest on the first amendment that we agree on 40 minutes to be equally divided.

Mr. GOLDWATER. Is that the OTE amendment?

Mr. ROTH. Yes. If that is satisfactory.

Mr. GOLDWATER. I am afraid that we cannot agree to that because Senator LEVIN would oppose it, but let us get started anyway and we will discuss it as we go along. Is that all right?

Mr. ROTH. That is satisfactory.

Mr. GOLDWATER. The bill is open to amendment.

Mr. BYRD. Mr. President, will the distinguished Senator yield?

The PRESIDING OFFICER. There are three amendments that must be laid aside.

Mr. BYRD. Will the distinguished Senator yield?

Mr. ROTH. I would be happy to yield.

Mr. BYRD. I want to thank both the manager and the distinguished Senator who has the floor for not pursuing the unanimous consent further at this moment. Senator LEVIN, as the distinguished manager has said, does want to be on the floor before any such agreement is reached.

Mr. ROTH. Mr. President, I ask unanimous consent that we lay aside the three pending amendments.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator is recognized.

AMENDMENT NO. 2647

(Purpose: To provide that the Director of Operational Test and Evaluation reports directly to the Secretary of Defense)

Mr. ROTH. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Delaware [Mr. ROTH], for himself, Mrs. KASSEBAUM, and Mr. PRYOR, proposes an amendment numbered 2647.

Mr. ROTH. Mr. President, I ask unanimous consent that we dispense with reading of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 126, line 11, strike out "He" and insert in lieu thereof "except as provided in section 136a of this title, the under secretary".

Strike out section 914 of the bill and insert in lieu thereof the following:

SEC. 914. DIRECTOR OF OPERATIONAL TEST AND EVALUATION TO REPORT TO SECRETARY OF DEFENSE.

Section 136a of title 10, United States Code, is amended—

(1) in subsection (b)—

(A) by inserting ", the Under Secretary of Defense of Acquisition," in clause (2) after "Secretary of Defense"; and

(B) by strking out Secretary of Defense and to" in clause (5) and inserting in lieu thereof "Secretary of Defense, the Under Secretary of Defense for Acquisition and";

(2) by striking out subsections (c) and (d) and inserting in lieu thereof the following:

"(c) Each report of the Director required under subsection (b)(5) shall be submitted to the Secretary of Defense, the Under Secretary of Defense for Acquisition, and the Committees on Armed Services and on Appropriations of the Senate and the House of Representatives without intervening review or approval and without any change or revision by any other officer or employee. The Under Secretary of Defense for Acquisition may submit such comments regarding the report as he considers appropriate to the Secretary of Defense and the Committees referred to in the preceding sentence. The Secretary of Defense may also submit such comments regarding the report as he considers appropriate to such Committees.

"(d) The Director reports directly, without intervening review or approval, to the Secretary of Defense. The Director shall consult with, but the Director and the Director's staff are independent of, the Under Secretary of Defense for Acquisition and all other officers and employees of the Department of Defense responsible for acquisition or research and development. The Director shall keep the Under Secretary of Defense for Acquisition fully and currently informed of his activities with respect to his duties under this section and any recommendations made in carrying out those duties."; and

(3) in subsection (g)(1)—

(A) by inserting ", the Under Secretary of Defense for Acquisition," after "Secretary of Defense" in the second sentence; and

(B) by inserting "of Defense and the Under Secretary of Defense for Acquisition" after "Secretary" in the last sentence.

Mr. ROTH. Mr. President, this amendment will preserve the independence and honesty of weapons testing by providing the Director of Operational Test and Evaluation to continue to report directly to the new Under Secretary of Defense for Acquisition, as provided in the legislation before us.

Before I discuss my amendment, Mr. President, I strongly agree with the recommendation of the Packard Commission that we create the position of Under Secretary for acquisition. As a matter of fact, I introduced my own bill on that matter.

I also played an instrumental role in creating the Packard Commission. I congratulate the commission on their fine work, and I am pleased to see many of their recommendations being implemented. The Commission's recommendations should contribute toward bringing more efficiency and better military equipment to building this Nation's defense.

Nevertheless, I have read the bill language in S. 2638 no longer requiring the Director of OT&E to report directly to the Secretary of Defense but to the new Acquisition Under Secretary. I know the Armed Services Committee accepted an amendment requiring that reports from the Director go to the Secretary of Defense and the Congress without intervening review by the Under Secretary. As I understand it, the committee's intent with this amendment was that there be no loss of independence and objectivity previously enjoyed by OT&E.

However, the committee's amendment does not go far enough and it remains my concern that despite the change in reporting requirements, the same pressures before Public Law 98-94 are going to bear on the Director of OT&E. In 1983, Congress agreed by a vote of 91 to 5 that decision makers need a bias-free view on operational test and evaluation and created OT&E. The law removed operational test and evaluation oversight from the Defense Department development and acquisition organization. Strong arguments were made then that an independent operational test and evaluation oversight office is the essential check and balance to unavoidable program advocacy of the development/acquisition organization. Having just recently established this important

policy guidance, we should not now reverse it.

Mr. President, the strongest and best way to ensure real independence is to keep the position of Director where it is in current law. I, along with Senators KASSEBAUM and PRYOR, have written twice to the Senate Armed Services Committee expressing our concerns about subordinating the Director of Operational Testing. I ask unanimous consent that those letters be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON GOVERNMENTAL AFFAIRS,
*Washington, DC, June 17, 1986.*

Hon. BARRY GOLDWATER,
*Chairman, Committee on Armed Services, U.S. Senate, Washington, DC.*

DEAR BARRY: It has come to our attention that the Senate Armed Services Committee will be marking up legislation regarding acquisition policy this week that will be included in the fiscal year 1987 Defense Department authorization bill.

As you remember, we wrote you in early May indicating our concerns about language to create an Under Secretary of Defense for Acquisition (USD(A)). Our letter explained that the language would subordinate the Director of the Office of Operational Test and Evaluation (OT&E) and undermine the Director's independence as established in current law (10 U.S.C. 136a).

We are concerned that the organizational structure envisioned in the bill could deprive decision makers, including the Congress, of a truly independent assessment of weapon system operational effectiveness and suitability. Certainly we believe the new USD(A) should receive all the necessary information from OT&E to carry out the duties of the position. However, the provision eliminating the relationship between the Defense Secretary and the Director of OT&E, and giving the USD(A) complete control over operational testing and testing policy would end independent oversight of operational test and evaluation. We strongly object to these provisions and urge that they be removed from the bill.

In 1983, the Senate overwhelmingly agreed to create the OT&E and remove it from powerful program advocacy in the development/acquisition community inside the Pentagon. It is important now that a fundamental principle of weapons testing reform stay intact.

Sincerely,

WILLIAM V. ROTH, JR.,
*Chairman.*
DAVID PRYOR,
*U.S. Senator.*
NANCY L. KASSEBAUM,
*U.S. Senator.*

---

U.S. SENATE,
COMMITTEE ON GOVERNMENTAL AFFAIRS,
*Washington, DC, May 6, 1986.*

DEAR ——: It has come to our attention that the Senate Armed Services Committee will be marking up an omnibus acquisition bill this week.

We are particularly concerned about bill language to create an Under Secretary of Defense for Acquisition (USD(A)). The language as it now stands would subordinate the Director of the Office of Operational Test and Evaluation (OT&E) to the USD(A) thus undermining the Director's independence as established in current law (10 USC 136a).

We understand the congressional intent behind the language and that some modification has already been made at the subcommittee level. However, as presently written, the provision would still send a message to the Defense Department, military Services, public, and media that independent oversight of operational test and evaluation is no longer a priority.

As you remember, Congress agreed that decision makers need a bias-free view on operational test and evaluation and created OT&E in 1983 (PL 98-94) removing operational test and evaluation oversight from the Defense Department development and acquisition organization. Strong arguments were made then that an independent operational test and evaluation oversight office is the essential check and balance to unavoidable program advocacy of the development/acquisition organization. Having just recently established this important policy guidance, we should not now reverse it.

The bill language creating the USD(A) would give an official in charge of development and acquisition complete control over operational testing and testing policy. This provision, even as modified in the subcommittee draft, reestablishes the principle that the "students should grade their own final exams" and it potentially could deprive decision makers, specifically the Defense Secretary and the Congress, of a truly independent assessment of weapon system operational effectiveness and suitability.

It is our hope that OT&E remains as is, with the modification that the new USD(A) receive all the necessary information from OT&E needed to carry out the duties of the position. We hope you will agree that a fundamental principle of weapons testing reform that passed the Senate by a vote of 92-5 should not now be reversed.

Sincerely,

WILLIAM V. ROTH, JR.,
*Chairman.*
DAVID PRYOR,
*U.S. Senator.*
NANCY L. KASSEBAUM,
*U.S. Senator.*

Mr. ROTH. Subordinating the Director of OT&E no longer provides the position total independence from the powerful development and procurement bureaucracies in the Pentagon. The organizational structure envisioned in the bill could deprive decisionmakers, including the Congress or a truly independent assessment of weapons system operational effectiveness and suitability. I agree with the Senate Armed Services Committee that the new Under Secretary should receive all the necessary information from OT&E to carry out the duties of the position. Our amendment will therefore require the Director to consult with, inform, and fully cooperate with the new Under Secretary while remaining organizationally independent. It is important to note that the General Accounting Office supports continuing the Director's independence.

Let me read a letter from the General Accounting Office evaluating the section of the bill subordinating the Director of OT&E:

[The bill] . . . Would require the Director of Operational Test and Evaluation to report to the Secretary of Defense through the Under Secretary of Defense for acquisition. As you know, the Congress mandated the Director to be the Principal Adviser to the Secretary of Defense on OT&E matters and report directly, without intervening review or approval, to the Secretary. We recommend deleting this section because it could either in practice or preception adversely impact on the independence and objectivity that the Director was established to ensure.

I ask unanimous consent that the entire text of the letter from GAO be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. GENERAL ACCOUNTING OFFICE,
*Washington, DC., April 7, 1986.*

Hon. WILLIAM V. ROTH, JR.,
*Chairman, Committee on Governmental Affairs, U.S. Senate.*

DEAR MR. CHAIRMAN: At the request of your staff, we reviewed a proposal to establish in the Department of Defense (DOD) the position of Under Secretary of Defense for Acquisition. We have long emphasized the need to improve DOD's decisionmaking process and we support the major thrust of the proposal, namely consolidating the acquisition function within the Office of the Secretary of Defense. In recent testimony, before the Subcommittee on Defense Acquisition Policy, Senate Committee on Armed Services, we noted that an advantage of this approach is that accountability for all acquisition phases would be found in one place.

Section 104 of the proposal would require the Director of Operational Test and Evaluation (OT&E) to report to the Secretary of Defense through the Under Secretary of Defense for Acquisition. As you know, the Congress mandated the Director to be the principal adviser to the Secretary of Defense on OT&E matters and report directly, without intervening review or approval, to the Secretary. We recommend deleting this section because it could either in practice or perception adversely impact on the independence and objectivity that the Director was established to ensure.

One additional comment we have deals with the Office of the Assistant Secretary of Defense for Acquisition and Logistics. The proposal does not mention the functions currently performed by the Assistant Secretary. We assume that there would continue to be an Assistant Secretary for Acquisition and Logistics who would report to the new Under Secretary. This relationship should be addressed in the proposal.

We are currently conducting a review on the feasibility of establishing a centralized civilian acquisition agency. The results of our review should be useful in evaluating proposals for making organizational adjustments to the defense acquisition function. We will keep your staff informed of the progress of our review.

We have enclosed an annotated copy of the proposal which suggests other changes intended to clarify the language. We appreciate the opportunity to comment on this proposal. If we can be of further assistance, please let us know.

Sincerely yours,

FRANK C. CONAHAN,
*Director.*

Mr. ROTH. Mr. President, I think it is important, as the Senate proceeds with this reorganization, to recall what I consider the three essential purposes when we created the position of Director of OT&E in 1983.

As Senators will recall, the purposes were:

First. To give the Director total independence from any influence by other areas of the weapons acquisition process in analyzing operational test and evaluation results.

Second. To make the Director individually accountable for realistic operational testing and testing policy of major weapons systems; and

Third. To require the Director to inform and consult with the Secretary of Defense on his analysis of operational test and evaluation results.

I believe that it is critically important for the proper functioning of this Office that we maintain and keep intact the direct line of authority from the Director of OT&E to the Secretary of Defense. I think this is the only way that we can indeed assure the continued independence of the testing authority.

It will maintain the necessary degree of emphasis for the testing function when the Director prepares his budget and staffing requirement as well as when he reviews the budget and staff of the operational test agencies in the military services.

At the same time, as I mentioned earlier, I believe a working relationship can be created between the new Under Secretary and the Director of OT&E that keeps these essential purposes intact while satisfying the recommendations of the Packard Commission report.

The Director of OT&E should be instructed to keep the Under Secretary fully informed, to advise him where appropriate and provide him with copies of the same report he is instructed to submit to the Defense Department. This arrangement would assure that the three purposes which helped convince the Senate to approve the Office by a vote of 91 to 5 remain intact.

Mr. President, as I have mentioned, Congress created the Office of Operational Test and Evaluation in 1983. I think it deserves to be fully tested. The proposal that was adopted in the Senate in 1983 is a well-conceived one, it is one that had been proposed many times for many years. The General Accounting Office endorsed and continues to endorse the concept in reports to Congress. Other people who have held high office in defense, both Republicans and Democrats, have said there was a need for an independent office of operational test and evaluation totally independent from the development and procurement communities.

All I suggest now is let us test the office, let us give it adequate time. I would recommend a minimum of 5 years; then, if it is not working well, a new approach should be studied.

I think it would be a mistake to change operational testing in midcourse. The problem, if you reverse now, is that it is going to be difficult indeed to ever reverse course again. I think we have seen some progress being made here, and we ought to let the people in the new Office of Operational Test and Evaluation show the stuffing they are made of and I do not think it does any particular violence to the reorganization which, as I said, I applaud.

Mr. President, you can make a strong argument that everything ought to be under the new Under Secretary. Strictly from the organizational point of view, a lot of people would support it, but I think our concern here is that in military procurement there are constituencies that come to bear.

I do not mean to suggest that these constituencies are necessarily nefarious, evil people because in many cases they are well motivated. There is the urgency of getting on with the job and getting the weapons into the field. I am not necessarily casting aspersions as to their motivations.

The fact is that once you start a weapon system, it does develop a constituency of its own, and within the family of the development and acquisition, it does develop what I call a life of its own. Then, of course, you do have the outside pressure of the contractors who, for whatever reasons—and they can be just as well motivated as those within the Pentagon—want to see the weapon system proceed.

I think it would be a serious mistake to subordinate this Director to the Under Secretary. I think it would undercut the goals for which the Office was created. It would bring about the same kinds of conflict of interest and downgrading of the testing authority or it would run the risk that occurred in the past and that led to the creation of the Office of Operational Test and Evaluation in the first place.

As I have stated, the pressures that develop to move a new weapon system into the field can be considerable. It does not take long for a new weapon system to create its own constituency. The testing function is subject to intensive lobbying from weapon constituencies, both in the Pentagon and in the larger defense establishment who would prefer to circumvent operational testing in order to speed the deployment of new weapons.

The best way to protect the Director of OT&E from these pressures is to provide him with independent authority so that he will be able to help service test agencies with assaults on their independence and funding and will be able to support efforts to add statute to operational testing.

In the vote approving OT&E in 1983, the Senate made several critical decisions. It made the Director of OT&E independent. It made him accountable and it made him report directly to the Secretary of Defense. Then, as now, the Congress wanted to create a safeguard against billion-dollar weapons being produced with insufficient operational testing, to safeguard against weapons being produced despite poor operational test results, and safeguard against insufficient operational test plans for weapons being developed and produced.

I think these safeguards would be defeated if we were to subordinate the Director to a DOD official other than the Secretary of Defense.

For that reason, Mr. President, I urge the adoption of this amendment.

Mr. PRYOR. Mr. President, I am pleased this morning to join my friend, the distinguished Senator from Delaware [Mr. ROTH], in offering this amendment.

I imagine there will be a lot of Members of this body who think this is one of those dog-and-cat amendments that we start looking at during this part of the process, especially in a major authorization bill such as we have been considering for the last several days and nights. I can assure every Member of this body that that is exactly what this amendment is not.

The issue is whether decision makers in the Pentagon and in Congress will have independent, hopefully honest, operational tests of weapons and reports on those tests, or whether those tests and reports will be tainted. Put more bluntly, the issue is whether, for testing weapons, the students will grade their own exams.

□ 1000

It is operational testing that tells us whether a weapon will work in combat. We have heard all the horror stories: about the M-16 rifle, about American torpedoes and bazookas in World War II, and about the DIVAD air defense gun. The issue here is whether Congress will go the extra mile to insure that the weapons we give American soldiers, sailors, and airmen will be proven winners or improperly tested or untested losers.

This debate is a repeat of one we had in 1983. Then, we decided by a vote of 91-5 to make operational testing independent. Before then, operational testing was controlled by the same man who controlled research, development, and acquisition. And we had problems. We had cheating in tests; we had rigged tests; sometimes we had no tests, and often we had self-serving test analysis and reports influenced heavily by those who did not

71-059 O-87-23 (Pt. 14)

want to see their own handiwork objectively assessed.

Having opposed that bill that we adopted on the floor of this Senate in 1983, the Defense Department took 18 months to appoint a Director of Operational Test and Evaluation. But now, just as the new office is beginning to establish itself, here we are talking about removing that office's independence. At a bare minimum, we should give this new office a chance to prove itself.

There are other, certainly more important, reasons why the Senate's 1983 reform of operational testing should not be undone, as the Armed Services Committee recommends.

The dangers of disregarding the need for independence in weapons testing was brought home to the Nation very painfully on January 28, 1986. It was then that seven lives were lost in the space shuttle disaster.

In its report on the disaster, the Rogers Commission found that NASA "Organizational structures * * * have placed safety and reliability and quality assurance offices under the supervision of the very organizations and activities whose efforts they are to check."

The Commission went on to find that "an effectively functioning safety, reliability, and quality assurance organization could have taken action to prevent the 51-L [Challenger] accident."

And it recommended that "NASA should establish an Office of Safety, Reliability and Quality Assurance * * * reporting directly to the NASA Administrator * * * [with] direct authority for safety, reliability, and quality assurance throughout the Agency * * * and [it] should be independent of other NASA functional and program responsibilities."

What is safety, reliability, and quality assurance for NASA is operational testing for DOD. If putting those NASA functions "under the supervision of the very organizations and activities whose efforts they are to check" cost the Nation the lives of seven astronauts, imagine the thousands of lives it might cost our armed services in war if operational testing is supervised by the very office whose work it is to check.

The present Director of Operational Testing and Evaluation, Mr. Jack Krings, has testified in Congress against the Armed Services Committee's recommendation. He appreciates very well and certainly very fully what will happen to his office. In his testimony, Mr. Krings said of the Armed Services Committee's recommendation: "It will be perceived—and rightly—not as a reform, but as a retreat from reform."

The GAO agrees; it says that putting the Under Secretary for Acquisition in charge of operational testing "could either in practice or perception adversely impact on the independence and objectivity that the Director [of operational testing] was established to insure."

With all of these arguments against removing independence from operational testing, why are we even having a debate? The answer, Mr. President, is very simple. It is because the Packard Commission recommended this change.

The Packard Commission performed a good service for all of us. I support its recommendations, but we do need to exercise our own, independent judgment. It is entirely possible that in this one limited area, the Packard Commission may have recommended something that we should think more carefully about.

The Packard Commission recommended creating an Under Secretary of Defense for Acquisition. That may be a good idea. I may support that idea. But this one aspect of it would have us repeat one of history's mistakes. We appreciated the need to make operational testing independent in 1983 only 3 years ago, and we should appreciate that need now.

The Armed Services Committee presents the argument that we need the Under Secretary for Acquisition because we need accountability in defense procurement; we need clear lines of authority, and we need to give one man authority to clean up the mess. I could not agree more.

The Armed Services Committee also says we need independence in operational testing. Here we find a very major contradiction. The need for independence is recognized, but the organizational structure to grant it is denied. The committee report says their bill "does not in any way affect the independence and objectivity demanded of and by the Office of Operational Test and Evaluation." But what does the committee's bill actually do?

Mr. President, here is what the committee's bill actually does:

It gives the Acquisition Under Secretary, not the Director of Operational Testing, control over all Pentagon policies for testing.

It gives the Acquisition Under Secretary all supervisory powers over the Director of Operational Testing and his staff.

It requires the Operational Testing Director to report directly to the Acquisition Under Secretary.

It also removes almost all of the Operational Testing Director's access to the Secretary of Defense.

The Armed Services Committee added a requirement that reports from the Director of Operational Testing are to be submitted to the Secretary of Defense and to Congress without intervening review or approval from the Under Secretary for Acquisition or even any one else.

Does that provision grant independence, Mr. President? No, it does not. It only says written reports cannot be altered. This provision does not affect in the least the independence of the author who writes these reports. He will still be an underling, a subordinate, and a nonindependent Director within the Under Secretary's office. The appearance of independence is offered but not the substance.

The committee cannot have it both ways; it cannot create accountability and pretend it has preserved independence. Underneath the rhetoric, the committee made a choice; it chose control and discarded independence for operational testing.

Finally, Mr. President, I want to make clear what our amendment does. First, we do not unravel the authority and accountability of the new Under Secretary for Acquisition. We leave to him all things that he should control, and control completely. We release from him that which he should not control: the operational testing function. Our amendment is also careful to provide for consultation between the Director of Operational Testing and the new Under Secretary, and the amendment requires operational testing reports to go to the Under Secretary to keep him fully informed of information he must have.

With all the reforms of the Defense Department that the Senate has passed—reform of the Joint Chiefs of Staff, reform of procurement, reform of the civilian component of the Pentagon—we need to be careful not to change for the mere sake of change, not to ignore lessons from the past, and not to reverse one of the most enlightened reforms that we enacted 3 years ago. If the Senate decides to return to the mistakes of the past for operational testing, we will not be engaging in reform; we will be engaging in deform.

Our language in 1983, Mr. President, was very, very clear and very explicit. This body, by a 91-to-5 vote, said that the Director of Operational Testing should have direct, not indirect, but direct access to the Secretary of Defense, and this Armed Services Committee proposal would take that access away.

Mr. President, I know of no man who in the period of time that I have been involved in State and Federal Government that I have admired and respected any more than the gentleman by the name of Col. James Burton. Col. James Burton with the U.S. Air Force has been an operational tester for a good number of years. He is the individual who in fact forced decent tests and honest test assessment on several weapons, including the Bradley armored vehicle. He

knows that producing these weapons when they do not work is very, very counterproductive, and certainly expensive, and certainly does nothing to increase our military strength.

On August 3, Mr. President, I received a letter from now retired Colonel Burton, addressed to me, and, if I might, I would like to just read a few sentences from that letter.

For the past four years I have had the privilege of serving as a tester on the staff of the Secretary of Defense. I have served under both arrangements, when the chief tester (Director of Defense Test and Evaluation) was subordinate to the acquisition executive (Under Secretary of Defense, Research and Engineering) and the current arrangement where the chief tester works directly for the Secretary of Defense. I can assure you the difference is like night and day. I have witnessed, and shared, the frustrations of former chief testers under the old arrangement, as decision after decision was made by the acquisition executive to procede with a program in spite of unfavorable test results, and some times in the absence of test results.

When Congress created the independent Director of Operational Test and Evaluation, shock waves passed through the acquisition community. Recall how vigorously USDR & E resisted that legislation. Those shock waves were then magnified when the Secretary of Defense cancelled the DIVAD program because of poor performance in an operational test. Coupled together, those two actions generated within the Department of Defense a greater concern and regard for adequate testing and more emphasis on test results as a basis for acquisition decisions. This is a far healthier situation than before. I urge you and your colleagues to preserve the current relationship between tester and acquisition executive.

Mr. President, I ask unanimous consent that immediately following my statement the full text of the letter of Colonel Burton be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. PRYOR. Finally, Mr. President, let me say in closing I strongly support the amendment offered by Senator ROTH, Senator KASSEBAUM, and myself this morning.

This is a very, very important amendment. We are on the verge of undoing something that we did in 1983 which was a meaningful and constructive reform which speaks directly to the airmen, to the sailor, to the GI. It is my opinion, Mr. President, respectfully, what the Committee on Armed Services has done in this legislation this morning, although well meaning, is going to be a retreat from true military reform in the area of independent, honest testing and evaluation of our weapons.

Mr. President, I yield the floor.

EXHIBIT 1

*August 3, 1986.*

HON. DAVID PRYOR,
*U.S. Senate, Washington, DC.*

DEAR SENATOR, I understand that the Senate, in response to the recommendations of the President's Blue Ribbon Commission on Defense Management, is considering legislation that would create the new Under Secretary of Defense for Acquisition and subordinate the Director of Operational Test and Evaluation under the new Under Secretary. While I support the creation of the new Under Secretary of Defense for Acquisition, I believe it would be a serious mistake to subordinate the Director of Operational Test and Evaluation under the new Under Secretary.

I am familiar with the arguments that the proposed legislation provides adequate safeguards to preserve the independence of the chief tester, that he will be separate from and therefore independent of the chief's developer, that administratively he will continue to have access to the Secretary of Defense and the Congress and finally that the new acquisition executive, not the Secretary of Defense, is the appropriate individual to receive the tester's recommendations and make the final, balanced acquisition decision. These arguments sound good on paper, but do not hold up in reality.

For the past four years I have had the privilege of serving as a tester on the staff of the Secretary of Defense. I have served under both arrangements, when the chief tester (Director of Defense Test and Evaluation) was subordinate to the acquisition executive (Under Secretary of Defense, Research and Engineering) and the current arrangement where the chief tester works directly for the Secretary of Defense. I can assure you the difference is like night and day. I have witnessed, and shared, the frustrations of former chief testers under the old arrangement, as decision after decision was made by the acquisition executive to procede with a program in spite of unfavorable test results, and some times in the absence of test results.

The Air Force AIQ-131 Jammer Pod is a prime example where decisions to procede with the acquisition could not be justified by the long history of test failures and performance deficiencies, yet procede they did. For almost ten years, the program went through a continuous cycle of test, fix, and retest without ever passing a realistic operational test. Meanwhile the production line continued to spit out units like popcorn. DDT & E tried unsuccessfully to constrain the production until tests demonstrated that the serious deficiencies revealed by previous tests had in fact been corrected. Constraints were finally achieved in 1985 by DOT & E.

There are many other examples, where, under the old arrangement inadequate emphasis was placed on test results. Decisions to procede with a program were based more upon faith and promise than upon demonstrated performance and track records. The 1982 DSARC decision to procede, against the advice of the chief tester, with the AMRAAM development and test schedule is a classic example. The program is now years behind the promised schedule and will cost hundreds of millions of dollars more than promised.

I attribute the lack of emphasis on test results in the decision process to the subordination of the chief tester to the acquisition executive. On paper DDT & E had direct access to the Secretary of Defense, but in reality he did not. The heavy hand of USDR & E was always on his shoulder.

From my own personal experiences of the past two years on the Bradley live fire tests, I can attest to the tremendous pressures that can be brought to bear by the development/acquisition community when they fear that a particular test will place their acquisition program in jeopardy. At the crucial point of my negotiations with the Army to get them to agree to actually conduct live fire tests on the Bradley, my job was eliminated. Six months later, when the Bradley tests began, there was an attempt to send me to Alaska. After the tests were finished last fall, I wrote an independent report on the results, and both USDR&E and the Army tried to say that I had not written a report, merely "rough draft observations". The night before I was to testify on the Bradley tests before a Congressional Subcommittee, there was an attempt to censor my testimony. Then, after I signed my retirement papers this spring, I was given an offer to stay on the Bradley tests until they were finished. My own experiences were not unique. I have witnessed similar pressures placed upon other testers who have tried to ensure that thorough, realistic tests were conducted and that all results, both the good news and the bad news, were considered openly and objectively in the final assessment.

When Congress created the independent Director of Operational Test and Evaluation, shock waves passed through the acquisition community. Recall how vigorously USDR&E resisted that legislation. Those shock waves were then magnified when the Secretary of Defense cancelled the DIVAD program because of poor performance in an operational test. Coupled together, those two actions generated within the Department of Defense a greater concern and regard for adequate testing and more emphasis on test results as a basis for acquisition decisions. This is a far healthier situation than before. I urge you and your colleagues to preserve the current relationship between tester and acquisition executive.

Sincerely,

JAMES G. BURTON.

The PRESIDING OFFICER (Mr. GORTON). The Senator from Indiana.

Mr. QUAYLE. Mr. President, first, I pay my respects to the Senator from Delaware, the chairman of the committee, and the Senator from Arkansas for their diligence in this entire issue. They are the ones who created the Office of Test Evaluation. They are the ones who have pursued to make sure that the integrity of this office is carried out. They are the ones who really have pushed the idea that we need to know what in fact is going on before we get to full-scale production.

Certainly, it is an idea that we all strongly support.

There are two points that I wish to make, Mr. President.

□ 1010

One is that in the Armed Services Committee, in conjunction in working with the Packard Commission, we do maintain the independence of the director of Operational Test and Evaluation. And I will show how that independence is maintained.

Two, we feel quite strongly that the new Under Secretary for Acquisition is going to be a very important person in

this whole scheme of acquisition matters.

I mean, he is the person that is going to be responsible for policy, for procurement. When something now goes wrong and we want to find out what has gone wrong in the procurement process, we have somebody to go to. When we want to see some changes, particularly through policy and direction, we know where to go.

But I believe that the sponsors of this amendment have dwelled upon the point that somehow we are unraveling or undoing the current situation. I would like to point out to both of my colleagues that under the current situation today, under the current law, the way that the system works right now, is that the OT&E, Mr. Krings, reports to the Deputy Secretary of Defense, Mr. Taft.

That is the practical way it works. The Secretary of Defense has designated Deputy Secretary Taft to handle acquisition matters.

Now, with the new law, that is going to change. Mr. Taft is no longer going to be in charge of overall policy for acquisition matters. It will be a new person. Mr. Godwin has been recommended by the President to fill this position. If he is confirmed, he will take Mr. Taft's position of acquisition matters. In effect, the way that we will have our provision, instead of reporting to Mr. Taft, the Director of OT&E, he will now report to Mr. Godwin if he is confirmed. No substantive change of law. The independence, the integrity of the OT&E is maintained.

As a matter of fact, the critical point of the law that the Senator from Delaware wrote and the Senator from Arkansas, we do not even touch. We do not even bother that because we thought it was good law. What they put in a couple of years ago, we wanted to maintain it. Let me read it:

> There is a Director of Operational Test and Evaluation in the Department of Defense appointed from civilian life by and with the advice and consent of the Senate. The Director shall be appointed without regard to political affiliation and solely on the basis of fitness to perform the duties of the office of Director. The Director may be removed from the office by the President.

Let me read that again:

> The director may be removed from office by the President. The President shall communicate the reasons for any such removal to both Houses of Congress.

In other words, if the President is going to remove this person from the office that has its independence, he is going to have to report that to the Congress.

So, Mr. President, we in fact do maintain this independence. We do not want to unravel or undo the good work that the Senator from Delaware and the Senator from Arkansas and others have done. As a matter of fact, we applaud that work.

But what we are attempting to do is to get a good working relationship and to have an understanding of where the Under Secretary for Acquisition is going to fit into the scheme of things. We really feel that having that information, having that availability, and working with the Director of OT&E is very important. If we are going to give him authority and then start to slice up his responsibility, I am just not so sure how effective that is really going to be. We are not really, in effect, changing anything.

Of course, this Director of OT&E has access to the Secretary. He is a very important person. He is a very important person to this Congress. Believe me, if someone wanted to deny access of the OT&E to the Secretary of Defense, they probably would not get two votes; probably would not get any, because it would not be offered. Nobody, nobody is trying to deny any kind of access, particularly of the Director of OT&E to the Secretary of Defense.

What we are doing, and what we did with the Packard Commission in hours and hours of hearings, is to try to come up with the best working relationship that we can have to improve procurement policy, procurement management, and procurement efficiency within the Department of Defense.

We believe that this amendment, if approved by the Senate, would undo that carefully crafted situation. Either we are going to have the trust, the confidence, and the responsibility in the new so-called czar of acquisition or we are not. I mean, if we are not going to give him that authority, responsibility, and I might add, Mr. President, accountability, then why create it?

But the Office of the Under Secretary for Acquisition was the No. 1 priority of the Packard Commission. The whole Packard Commission, all the procurement reforms focus around this acquisition czar. I mean, he is the person under this newly created procurement system. And if he is the person, then we must give him the responsibility and I say also the accountability.

I believe, though well intentioned—and I know exactly where my colleagues are coming from, and they have my strong support in making sure that we get that information to the Office of Operational Test and Evaluation, that that independence is preserved—I think by carving it up and making this something more than what it should be, changing it from what the current situation is today, I think would be doing an injustice to a very important and, as I say, carefully crafted, long-worked-upon product that will improve the procurement process from what we have today.

The bottom line, and finally, Mr. President, if we believe that this is the answer, that we ought to have this Under Secretary for Acquisition, that he ought to be numero uno in acquisition, let us give him the responsibility, and let us give him the accountability. Let us not take that away.

Furthermore, we do not change that independence. That independence is there. It is not changed one iota from the practical effect of what we are doing today.

Mr. LEVIN. Mr. President, I rise in opposition to this amendment. I participated in lengthy hearings in front of the Procurement Subcommittee, of which Senator QUAYLE serves as chairman with such distinction.

This is an important issue. It is a technical issue, but it is an important issue. We have had three or four different acquisition policies in this country. We have had each service handle their own acquisitions and advocate for their own weapons systems. We have had duplication. We have waste.

Along comes the Packard Commission and says:

> We are going to end that. We are going to have an acquisition czar who has the responsibility and the accountability for weapons procurement for all the services.

Now, that is not easy to do. And there is a lot of resistance to that that comes from the services, because the services have, obviously, run their own show and wanted to run their own show and wanted to continue to do things the way they have.

In order to put this new omelet together of a new procurement system with focused responsibility, we had to break some eggs. We took that upon ourselves in the Armed Services Committee. We had the pressures from the services to continue doing things the way they have always have and we said, "No, we are going to resist that kind of pressure and we are going to adopt a new procurement system with one person having one policy for the entire Military Establishment." We said that we are going to take the procurement powers that have existed theoretically in the Secretary of Defense and carve them out, in effect, and give them to a new procurement czar.

Now, obviously, the Secretary of Defense is still above that czar. But it was the powers of the Secretary of Defense that we have put together in a full-time procurement czar because the Secretary of Defense has never had the time to put in the kind of effort on procurement system.

So we have taken these powers and we have identified them in the statute. And we said to a new procurement czar: "You have this authority over procurement. You even have authority over the services."

And that is pretty revolutionary. That is something, by the way, which I know that the Senator from Dela-

ware and the Senator from Arkansas have supported, because they have been deeply involved in reforming this procurement system, as deeply as anybody I know in this Senate. And their instincts are exactly right, that we have got to reform this system and that we have got to give authority to a procurement czar.

□ 1020

And I believe they support strongly the recommendation of the Packard Commission that we have a procurement czar. I think they were two of the strongest supporters as a matter of fact of the recommendations of the Packard Commission.

Now we have a czar. We have resisted the pressure from the services. Listen to the authority we have given them in this statute. This czar is going to supervise the performance of the entire Department of Defense acquisition system. Those are pretty strong words. This new person, I will repeat it, is going to supervise the performance of the entire Department of Defense acquisition system. That is just the beginning. That czar is going to establish all policies for acquisition procurement, research and development, logistics, testing, contract audit, and contract administration for all entities of the Department of Defense. Those are pretty strong words.

This czar is going to establish all policies for maintenance of the defense industrial base of the United States. This czar is going to serve as the senior procurement executive of the Department of Defense.

Do we want that czar to head the evaluation office, and are we going to deny that person the day-to-day inputs of that evaluation office? I do not mean just getting a copy of the report. But does it make any sense to create a new czar with all those procurement functions and then have that critical evaluation office report to somebody else? That is an absolute disconnect.

There is no logic in saying that we want the person to have all of that authority over procurement but when it comes to the critical evaluation function have that function report to somebody else, and that somebody else by the way happens to be above the procurement czar but that is not the issue in terms of the importance of evaluation.

I could not agree with Senator ROTH and Senator PRYOR more in terms of the independence and importance of the evaluation office. It is because of that importance that you want to make them relevant. If you want to make them relevant have them report to the people who are going to be making the relevant decisions. That person is going to be our new Under Secretary for Procurement.

That is really the question. It is not independent of the evaluation office. My friends could not be more right. We want that office to be independent. I could not agree with my friend from Delaware and my friend from Arkansas more. We want that person to be independent whether they report to the Secretary of Defense or whether they report to the new procurement czar. The issue here is not the independence of the Evaluation Office. We want that Office to be exercising independent judgment, whoever the Office reports to, but we also want that Office to be relevant. That is the issue here, not the independence of the Office, but the relevance of the Office, and for that Office to be relevant that Office should report to the decisionmaker in procurement. And that decisionmaker is our new Under Secretary for Procurement, the procurement czar.

Mr. President, we have asked Dave Packard precisely his position on this matter because it is obviously important what Dave Packard's position is. This is what he wrote me just a few days ago.

One question in which you have expressed interest is whether the Operational Test and Evaluation function should report to the Undersecretary of Defense for Acquisition. The Commission believes that OT&E should be clearly independent of the other functional areas such as R&D, C3I and production, but should report to the U.S.D.A. so the U.S.D.A. has the whole of the acquisition function under his authority. It is essential that the U.S.D.A. have all of the inputs necessary to make the objective program assessment the Commission believes necessary to insure that weapon systems are operationally suitable and cost effective. This does not mean that OT&E reports should not be made available to the Secretary of Defense or Congress independent of the U.S.D.A. The scope and methodology of testing would be the responsibility of the Director of OT&E.

May I say, Mr. President, that we have taken steps in our language to be sure that the reports of the test Office in fact go to the Secretary of Defense.

If you want to know what Dave Packard and the Packard Commission feel about this issue, it is set forth in their letter to me dated August 5, 1986.

I ask unanimous consent that a copy of that letter, Mr. President, be made part of the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

PRESIDENT'S BLUE RIBBON COMMISSION ON DEFENSE MANAGEMENT,
*August 5, 1986.*

Hon. CARL LEVIN,
*U.S. Senate, Washington, DC.*

DEAR SENATOR LEVIN: I appreciate your contacting me for further clarification of certain recommendations made by the Commission in the area of acquisition.

One question in which you have expressed interest is whether the Operational Testing and Evaluation function should report to the Undersecretary of Defense for Acquisition. The Commission believes that OT&E should be clearly independent of the other functional areas such as R&D, C3I and production, but should report to the U.S.D.A. so the U.S.D.A. has the whole of the acquisition function under his authority. It is essential that the U.S.D.A. have all of the inputs necessary to make the objective program assessment the Commission believes necessary to insure that weapon systems are operationally suitable and cost effective. This does not mean that OT&E reports should not be made available to the Secretary of Defense or Congress independent of the U.S.D.A. The scope and methodology of testing would be the responsibility of the Director of OT&E.

Thank you for the interest and hard work you have put forth on our recommendations and the Commission's work as a whole. It has been a pleasure working with you and your staff. I trust that the Commission's views on this issue will assist in your consideration of the role of the Undersecretary of Defense for Acquisition during deliberations on the FY 1987 Defense Authorization bill. Let me know if there is anything further I can do.

Sincerely,

DAVID PACKARD.

Mr. LEVIN. I thank the Chair.

I yield the floor.

Mr. ROTH and Mr. QUAYLE addressed the Chair.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. QUAYLE. I wonder if we might get some feeling about how long we are going to proceed. I know the chairman of the Senate Armed Services Committee would like to vote as soon as possible. I know the Senator from Delaware would like to respond and the Senator from Arkansas would like to respond.

Mr. ROTH. I do not think it will take very long after the Senator's statement.

Mr. PRYOR. Mr. President, before I respond to the Senator from Indiana about the possibility of some time limitation, I would like, if I might, Mr. President, to address a question to the Senator from Michigan about whether there will be second-degree amendments proposed to the Roth-Kassebaum-Pryor amendment. So I think that might be a factor in answering that question.

Mr. LEVIN. I do not intend to offer that amendment.

Mr. PRYOR. I thank the Senator from Michigan.

Mr. QUAYLE. I think at the conclusion we would have an up-or-down or a motion to table, but I point out to our colleagues who are coming in, it will probably be in about 10 minutes that I presume it will go to vote.

Mr. PRYOR. I would like a brief opportunity to respond.

Mr. QUAYLE. I am not trying to cut anybody off. I want to speed it up.

I yield the floor at this time.

Mr. PRYOR. Mr. President, I know the distinguished chairman of this

committee, Senator GOLDWATER, whom I have nothing but praise for, has tried to move this bill along. The remarkable amount of patience that our distinguished friend from Arizona has is absolutely astonishing to me. I am very appreciative to him for his leadership. I am sorry from time to time we see a little *differently* what we think might be best for our country's military preparedness.

Having said that, let me just quote, Mr. President, my friend from Indiana, Senator QUAYLE, who stated that the director of operational testing, in this case Mr. Krings, is "a very important person," "very important position," In fact, Mr. President, he is so important and this Office is so important that the Department of Defense opposed the 1983 creation of this Office. Mr. Krings is so important and the man who heads up our testing operation is so critical to the defense of this country that the President and the Secretary of Defense waited 18 months, a year-and-a-half, 18 long months to fulfill the mandate of this Congress in appointing a Director of that Office. That is how important the Defense Department thinks it is.

Mr. President, in fact, I think they would like to take this Office and move it somewhere, maybe to Alaska, or maybe somewhere even further away than that so they would not have to deal with someone that we feel should be as independent as this particular Office should be.

Mr. President, my great friend, Mr. LEVIN, the Senator from Michigan, a member of the Armed Services Committee, I have no dearer friend, no one I respect more in this body, he says "We want independence" for this job.

Mr. President, how can the Director of Operational Testing be independent if we take away his immediate access to the Secretary of Defense, as the 1983 law mandated, and move it to the new Acquisition Secretary that we are creating in this bill? I think all we have to do in a situation like that is to look at Webster's New Collegiate Dictionary, the definition of independence—one, "not subject to control of others," "self-governing," "not affiliated with large controlling unit," "not relying on somebody else," "not looking to others for someone's opinion." That is exactly, maybe not intentionally, what the Armed Services Committee today is recommending we do away with.

□ 1030

Take away that direct access to the Secretary of Defense and put him under the procurement czar, Mr. President. Make him subordinate to that czar, and make once again testing subordinate to acquisition.

It is our opinion, the opinion of Senators ROTH, KASSEBAUM, and myself, that the czar and the Testing Director should be two separate, and I underline separate, entities.

Mr. President, this change today is very simple. It is going to be sent out, whatever we decide, as a message to the Department of Defense and to the defense contractors of this country as to whether or not we are about to retreat on how independent we want our testing officer to be.

In 1983, by 91 to 5, we said we wanted that independence. That was the vote on this floor. We wanted an independent tester.

We want someone who will not be controlled by someone else. We want someone who will have direct access to the Secretary of Defense. We want someone who will have no one looking over their shoulder in making honest operational tests and evaluation of those tests.

I respect Mr. Packard, of the Packard Commission. I respect my colleagues here in this body who see this differently than I do, but also, Mr. President, I respect Col. Jim Burton, now retired, one of the greatest testers the Department of Defense has ever had, a man who was such a great tester he was forced into retirement. He was given the option of going to Ohio, removed from any involvement in testing, or retirement; he chose retirement.

The letter that I submitted, Mr. President, for the RECORD this morning will indicate the degree of caring, of concern, of Colonel Burton and too few other people who want to make certain that these weapons work before we buy them and before our sons and daughters have to use them in battle.

Mr. ROTH. Mr. President, we made this reform only 3 years ago when we established the independent Office of OT&E. In my judgment it would be a serious mistake to reverse ourselves on this matter before it is adequately tested.

Two or three years is not an adequate time. Frankly, the same conditions that existed back in 1983 exist today as to the need.

Why do we want an independent Office of Operational Test?

For the same reason that years and years of experience have shown that weapons systems develop constituencies of their own. Some are within the Pentagon; some are without. But, nevertheless, experience has shown that once you begin down the track of developing a new weapon, it becomes nigh on impossible to stop it.

The one check, the one balance that we have created in recent years, that will remedy this situation, is an independent Office of Operational Test.

What do we mean by operational test? What we want is before a weapon is put into production, a weapon is tested as to whether or not it will work as was intended in the field; whether or not the American soldier can find this particular weapon effective as proposed in its creation.

What happened is that in the hurry to get the job done, both within the Pentagon and without, there are those who want to proceed. They say, "Even if it does not meet the requirements, even if it does not meet the specifications, we should go ahead and begin production of this equipment."

In many cases, this is a waste of time, it is a waste of money, and costs the taxpayers hundreds of millions if not billions of dollars.

What we did back in 1983 was to create this independent office which has responsibility for this kind of operational test. He reports directly to the Secretary of Defense, who has ultimate responsibility for everything that happens in the Pentagon. It helps control the constituencies of the contractors on the outside, who want to proceed, who want to produce, for whatever reason, and gives the kind of balance and check that I think is needed in the system.

I say nothing has changed with the proposed reform in this legislation.

Let me say, Mr. President, I strongly support the creation of a czar. I think it is a much needed reform. As a matter of fact, the Packard Commission was created in part because of my recommendations to the President and the Secretary of Defense on the need of a blue ribbon commission.

But I would also point out that you cannot have it both ways. My distinguished friend from Indiana argues that this legislation does not change it, that the Director of OT&E would be independent.

The fact is he reports to the czar. His funding, his operations, are all under the authority of the czar and not the Secretary of Defense.

This is a new concept which has now been in place for 3 years. We ought to continue it and see how it works.

There is broad authority that urges that. The General Accounting Office, the watchdog of the Congress, has urged that we push this amendment we are proposing today.

The New York Times has come out in support of the concept.

Let me say the creation of this independent office dates way back to the days of 1970 when a blue ribbon commission came out in support of this concept.

Mr. Harold Brown, a former Secretary of Defense, tried to bring about this reform.

It has been fought tooth and nail. We finally won a battle by an overwhelming majority. I urge that the Senate today reaffirm its dedication to an independent OT&E.

Mr. PRYOR. Mr. President, I ask unanimous consent that Senator CRANSTON be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Illinois.

Mr. DIXON. Mr. President, I will be brief because I sense my colleagues are prepared to have a rollcall vote on this issue.

I would like to point out that while this issue is perhaps a reasonably close question, I think Members of the Senate ought to understand that the Armed Services Committee spent a very substantial amount of time on this issue. I was the sponsor of the amendment to the DOD reorganization bill that set up the Under Secretary of Defense for Acquisition.

The committee itself spent many, many hundreds of hours on the entire question of the DOD reorganization bill. My distinguished friend from Indiana, the chairman of the Subcommittee on Acquisition, and my friend, the Senator from Michigan, the ranking member of the Subcommittee on Acquisition, held innumerable subcommittee meetings—I do not know how many, but very many subcommittee meetings—at which all of those issues were carefully evaluated.

Mr. Packard made it very, very clear to our subcommittee that he felt that the proper way to handle this was to keep the Office of Operational Test and Evaluation under the Under Secretary of Defense for Acquisition, but with absolute independence.

I would point out to the Members of the Senate that in the report on our bill, we say at page 256:

> The committee has chosen the Packard Commission recommendation to give the Under Secretary responsibility for testing and the committee is absolutely clear that this reorganization does not in any way affect the independence and objectivity demanded of it by the Office of Operational Test and Evaluation.

I would just like to say in conclusion I have heard what my distinguished friends advocating this amendment have said. They have said "this is a new thing, we have had it just a little while, let us not change it now."

But I would suggest to everybody in the Senate that the Under Secretary of Defense for Acquisition is a brand-new thing, an idea whose time has come, an idea advocated by the Armed Services Committee, which is taking a firm step to do away with all of the outrageous mismanagement that has taken place in procurement policies in the past.

We have a new czar now. We are going to give that person the power to do the job. I would suggest that we do not want to adopt this kind of amendment that will send the wrong signal in connection with this very fine, new idea that is just being undertaken by the Department of Defense. I urge my colleagues to support the committee and the subcommittee in connection with their position on the DOD authorization bill.

Mr. NUNN. Mr. President, I congratulate the Senator from Arkansas and the Senator from Delaware for the role they played in creating this post. I was one of their cosponsors. They were the leaders in creating an independent Office of Test and Evaluation. I think it is important. I think it is important substantively and in terms of the perception of having some independence in that office.

Having said that, let me say had I not been through the last 3 years on reorganization, I would probably be here arguing for this amendment. But having been through that procedure and having a much better understanding now about the way the Pentagon works or fails to work, I just want to acquaint my colleagues with the reality of this situation. Let me start with the conclusion.

The conclusion is that the question of whether this individual is independent is going to depend on two main things: One, his own courage and fortitude; and second, congressional oversight. Whether this amendment carries or does not carry is not going to guarantee his independence. I do not think the committee bill guarantees his independence; neither do I think the amendment would. Let me tell you why. These are the practical facts of life.

All of us as Senators in this body think we are as busy as anybody can be. Some days we are, a lot of days we are, this week we have been. Let us think to ourselves how many people we have reporting to us. I do not know about your office but in my office, I have the press secretary, I have my administrative assistant, my legislative assistant; I try to keep in touch with the people who head up my case work, try to keep up with the people in my Georgia office. I have at least three or four people in key committee positions that report to me, sometimes five, six, or seven. If you add it all up, it is maybe 15 or 20 staff people who have immediate access, who really report to me.

Mr. President, let me show you what the Secretary of Defense has. This is why I say this amendment, whether it passes or fails, is not going to guarantee his independence.

The Secretary of Defense, in addition to appearing on Capitol Hill, in addition to Cabinet meetings, in addition to flying all over the world meeting with allies, all of that enormous part of his job, let us look at his span of control. This has been ignored too long in Congress. We tried to address it in the organization bill. These are the people who report directly to the Secretary of Defense.

When I get through this list, I defy anyone to tell me any human being can have this kind of span of control and have this kind of access with subordinates. I know it is impossible. I know the corporate executives of America would recognize this is impossible. One of the good features of corporate management is to reduce the span of people at the top so they can focus on the people who report to them and get a broad view of what is happening.

The Secretary of Defense first has the Deputy Secretary, then the Under Secretary of Defense for Policy. Then he has the Assistant Secretary of Defense for International Security Affairs.

A lot of these are mandated by law. Every time we see a big problem in the Department of Defense, we say whoever is at the bottom of that, go straight to the top. This is an accumulation of years, what we have done over there.

Then we have the Director of Net Assessment, the fifth major individual that reports to him. Next the Assistant Secretary of Defense for Acquisition and Logistics. All of these are very important. Next we have the Assistant Secretary of Defense for Health Affairs. We have a lot of problems in that area now, just getting a lot of the attention at the top.

Next is Assistant Secretary of Defense for Reserve Affairs. We all know how much we emphasize the Reserve here. We want all of that to go directly to the Secretary of Defense.

Next, we have the Director of Program Analysis and Evaluation. That is a sort of think tank over there. Next the Assistant Secretary of Defense, Comptroller. The Comptroller reports directly to the Secretary.

Next, the Assistant Secretary of Defense for Legislative Affairs; next, the Director of Operational Test and Evaluation. That is what we are talking about here now. I just want to let you know how many folks the Secretary is going to see in a week in addition to this individual who is going to run in there and say, "Hey, Mr. Secretary, we had a test out there yesterday and it did not work well." How is he going to get in the office? He is going to have to go get in line.

Next, Assistant Secretary of Defense for Intelligence; next general counsel, in charge of legal matters, Very important. Next, Assistant Secretary of Defense for Command, Control, and Communications.

I remember that one. We put in that one, saying we have to have a guy directly reporting to the Secretary. He is going to walk in and talk. He is about No. 40 every morning when he walks in there.

Next, Assistant Secretary of Defense for Public Affairs. A minor post, just handles all the Defense Department public relations. The news media never give him any trouble. He just walks in and reports to the Secretary.

Next, Defense Adviser, the U.S. Mission to NATO. Very important position.

Next the Director of Small and Disadvantaged Business Utilization. That was another one created by Congress. We said this is so important; we have to have him go right in and see the Secretary any time he wants to.

Next, Under Secretary of Defense for Research and Engineering. That minor post only handles all the research and development for the Defense Department.

Next, Assistant Secretary of Defense for Research and Technology, another important position.

Next is Assistant Secretary for Atomic Energy, another important post.

These are just assistants that go directly in to see the Secretary. We do not let them go through any of that bureaucracy over there; right to the Secretary's office.

Next, we have the defense agencies, only minor agencies. National Security Agency, a minor agency with thousands and thousands of employees. I am saying that facetiously.

Next, Defense Intelligence Agency, running all the intelligence for the Pentagon. Next, the Office of Defense Inspector General. We all know about the Inspector General's reports. They are looking into all sorts of problems all the time.

Then the Uniformed Services University of Health Sciences; then Strategic Information.

Then finally, that little organization over there we call SDI. We have talked about that. That is another one that goes directly to the Secretary. General Abrahamson goes in any day he wants to see the Secretary.

Then we go to other positions that are going directly to the Secretary. We have a Secretary of the Navy, a Secretary of the Army, a Secretary of the Air Force. They all go directly to the Secretary, do not go through anybody else.

Then, when we get through that, what do we have left? Only the Joint Chiefs—first the Chairman of the Joint Chiefs goes directly to the Secretary. Nobody else any higher than him.

Then we have the Chief of Naval Operations, who goes directly, head man of the Navy. Then Chief of Staff of the Army, then the Commandant of the Marine Corps.

When you get through all of that, all these people now going directly to the Secretary anytime a problem comes up, what do we have left? We have only the commanders in chief out in the field. How many of them are there? Nine. These are just the people who control the forces in Europe, the Pacific, the Atlantic, the Southern Command.

So what we have here is a few positions over there—the law says everybody goes to see the Secretary of Defense. Now we are debating whether we are going to have another individual who goes directly to the Secretary. Let me tell you, Mr. President, he has a long line before he gets in there and sees the Secretary of Defense and tells him what the results of that recent test was.

I understand the purpose of the amendment; I understand the importance of independence. But this amendment will not guarantee independence because there is no human being we have had in that Department of Defense, in the history of that Department, that can manage this kind of span of control. No one can do that. We all know it. We all realize that when we look at it, what we do is look at each individual part through a telescope and say, that is important, that is important, that is important.

They are all important. But you have to have an organization that will facilitate the management of the largest single defense establishment in at least the free World, perhaps the world. I do not know whether the Russians have a larger one or not. I have a hard time visualizing how anybody can have a larger bureaucracy than we do in the Department of Defense.

□ 1050

What I am saying is what we did in reorganization, that bill is now in Congress, we try to cut this span of control down. We tried to cut it down to 24 individuals. We cut it down to 24 individuals. Maybe this individual should be one or maybe he should not. But I believe my colleagues on the committee have looked at it at great length. The Senator from Indiana and the Senator from Michigan have looked at it in depth. The Packard Committee looked at it in depth. I submit what we are really debating now is not going to determine whether this individual is independent. That will only be determined by congressional oversight, by a conscious and a sensitive Congress when there is interference with this indiviudal, whoever he or she is, their individual judgment and by an individual in that position that is courageous and has a lot of fortitude, that is willing to take on the bureaucracy.

We are not going to solve that with this amendment, so I urge our colleagues not to support the amendment. But I again congratulate the Senator from Delaware and I also congratulate the Senator from Arkansas, because they have indeed helped to create an office in that Department that was needed and that I believe is doing a good job. But we are going to have to keep watching it, and whether you succeed or fail with this amendment, the intention of the Senator from Delaware, the Senator from Arkansas, and many of our other colleagues, the primary ingredient is whether or not this individual remains independent.

Mr. ROTH addressed the Chair.

The PRESIDING OFFICER. The Senator from Delaware.

Mr. ROTH. I do not intend to extend the debate much longer. I would just like to make a very brief comment on the observations by the distinguished Senator from Georgia, for whom I have the greatest respect. I think he is absolutely right when he says that the degree of independence is going to depend on the actual relationship and not upon what we write into the law. There is no question that you can have the most complicated, extensive requirements in the law and if the individuals who hold the relevant jobs ignore them, it will not make much difference unless Congress intervenes. But I would not agree that how we create it makes no difference, because I think it is important that if there is to be any degree of independence on the part of the director of operations he does have to have access. I think he has to have access to the Secretary.

Now, I agree with the distinguished Senator from Georgia again that undoubtedly there are many, many people reporting to the Secretary of Defense, and it is difficult to get in to see him. But at least he has that right under our amendment. He can go to the Secretary. But unfortunately I think it will be much more difficult for the director of operational testing to carry his battle, if he is a strong-willed man, and he has to be effective, if he has no right to go directly to the Secretary.

I think it is not only what the facts are but also what perceptions are, and to me it is important that the people within the Pentagon establishment, the contractors on the outside, understand the right of access of the head of the OT&E to go directly to the Secretary of Defense. I think that is what creates some independence.

Now, let me just make one comment that at least one Secretary of Defense, Harold Brown, under the Carter administration, who of course likewise just the same as this Secretary, had many individuals report to him, supported the concept of an independent OT&E with the director reporting to the Secretary of Defense. So there is at least one Secretary who thought this was a valuable reform.

Let me also point out that under the current legislation, the policy, the career of the individual who is the director of the OT&E, the budget, all go to the czar. It makes it pretty clear that he is subordinate to that individual and reduces very, very substantially his independence. As I said, it seems

to me from past experience that we should try to create the situation where, before we begin producing weapons upon which the lives of our soldiers are dependent, we have some balance and check. I hope that the Senate would agree with my distinguished colleagues who are sponsoring this amendment and vote its support. I ask unanimous consent that Senator EAGLETON be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEVIN. Mr. President, I have in hand a letter from Michael Rich, vice president of National Security Research for the Rand Corp. on this issue, and let me quote just from his conclusion. It reads as follows:

It would be underproductive to isolate OT&E from the authority of the new Under Secretary. The "independence" that is needed for testing is a strong OSD testing commitment, independent of the services, not an OSD test office independent of an otherwise integrated acquisition authority.

Mr. President, I ask unanimous consent that the letter from Mr. Rich, vice president of Rand, be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

RAND,
*Santa Monica, CA, August 5, 1986.*

Hon. CARL LEVIN,
*U.S. Senate,*
*Washington, DC.*

DEAR SENATOR LEVIN: Ken Schreier of your staff passed along your request for my views on the preferred relationship between the Office of the Director, Operational Test & Evaluation, and the proposed Office of the Under Secretary of Defense for Acquisition. I am pleased to provide my best judgments but must note that the observations in this letter do not represent a formal position of The Rand Corporation or any of its research sponsors.

As I understand it, the OT&E Directorate was established within OSD at the direction of the Congress to provide independent oversight and evaluation of the operational testing conducted by the Services. The OT&E Director report directly to the Secretary of Defense and to the Senate and House Armed Services and Appropriations Committees; he is thus not only independent of the Services, but, at present, he is substantially independent of the Under Secretary of Defense for Research and Engineering, and the Assistant Secretary of Defense (Acquisition and Logistics), to name only two closely related functional areas. It is no reflection on the OT&E Director when I say that this arrangement does not appear to have worked very well. Responsibility and authority have been too fragmented, and the OT&E office has not been able to fulfill expectations.

The President's Blue Ribbon (Packard) Commission on Defense Management recommends that the proposed Under Secretary of Defense for Acquisition should develop and implement DoD-wide acquisition policy, including policy for testing; and that he should directly supervise the oversight function for test and evaluation, including both development and operational T&E. I believe this is the preferred organizational arrangement.

There are two reasons for this conclusion. First, there are the fragmentation arguments put forth by the Packard Commission. The various components of the acquisition process need to be pulled together more effectively at the top, with clear lines of authority. The authority of the new Under Secretary would be seriously impaired if it did not include supervision of the T&E function at OSD level.

The second reason has to do with the effectiveness of the T&E function itself. As we argued in our February 1986 Report, "Improving the Military Acquisition Process," testing should begin early with full-scale demonstration prototypes. In addition, a strategy of iterative testing and redevelopment for critial subsystems should be adopted more frequently so as to achive high reliability and maintainability, and the results of testing should be more fully exploited before the decision to go to high-rate production.

In other words, testing is (or should be) an integral part of the acquisition process, a continuous activity beginning well before the start of full-scale development and extending well into the production phase. We think this view of development and operational testing is much more likely to be adopted and carried out effectively if testing is made a clear responsibility of the new Under Secretary, and he is given the authority over the whole testing function as well as the rest of the acquisition enterprise. It would be unfortunate if responsibility for development and operational testing were divided, and even worse if OSD's concern with testing focused only on operational testing late in the acquisition process—a result seemingly encouraged by the present organizational arrangements.

Thus, as I view it, it would be counterproductive to isolate the OT&E office from the authority of the new Under Secretary. The "independence" that is needed for testing is a strong OSD testing commitment, independent of the Services, not an OSD test office independent of an otherwise integrated acquisition authority.

I appreciate the opportunity to share my views on this important issue. Please contact me if I can of any further assistance.

Sincerely,

MICHAEL D. RICH,
*Vice President, National Security Research, Rand Corporation.*

Mr. EAGLETON. Mr. President, 3 years ago the Office of Operational Test and Evaluation, or OT&E as it is called, was created with the idea that it would be rigorously independent of the perverse forces at work in the Pentagon's acquisition process. The Director of the Office was to report solely and directly to the Secretary of Defense.

At issue in this amendment is whether the Testing Director should continue to report directly to and act under the auspices of the Defense Secretary or begin to report and be subordinate to the new Under Secretary for Acquisition created in title 9 of the DOD authorization bill.

The drafters of the new Under Secretary provision acknowledged, as did the Packard Commission, the importance of operational testing. To its credit, the provision states that reports from the Director of OT&E shall go directly to the Defense Secretary, without intervening review or approval.

At first blush, Mr. President, this may seem to protect the objectivity and independence OT&E, but it clearly does not.

Under the proposed reorganization, whenever the Director of Testing issues an honest report on a thoroughly rotten weapon system, he will, in effect, be saying that his direct boss, the Under Secretary of Defense, has miserably failed in his administration of the system's development. In the world of the Defense Department, the Testing Director will be charging that his superior is responsible for wasting hundreds of millions of dollars.

No one can tell me that such will not be the case and that placing the Testing Director in a position subordinate to the man directly responsible for all acquisition, procurement, research, and development will not affect the objectivity and candor of operational testing reports.

Mr. President, I applaud the good work that the Armed Services Committee has performed in creating the much needed Defense acquisition post. However, I strongly disagree with the committee's treatment of operational testing.

It is absolutely crucial that the Office of Operational Testing and Evaluation remain insulted from those whose careers and reputations depend on satifactory test results. Mr. President, the pending amendment would serve this purpose and I urge its adoption.

Mr. LEVIN. Mr. President, the issue again is not independence. I admire the proponents of this amendment for their determination that this Office come into existence and that this Office be independent. We are with them. We want an independent test office. We want a revelant test office as well. The function is too important to be isolated from the procurement day-to-day activities. It is simply too important to put out in limbo and be reporting to an office which does not make the decisions from day to day, from month to month.

My friend from Arkansas made an interesting point, and here I will conclude. He said that the Secretary of Defense opposed the creation of the Testing Office for about 18 months, that the Secretary would like to see the Office disappear, as I remember him saying, go to Alaska, and yet they would have this person report to that same Secretary. That somehow or other is going to assure independence? No. What assures independence is the powers we give to the person and congressional oversight, and as my friend

from Georgia says, the courage and integrity of that person. We want independence no matter who they report to. The access to the Secretary of Defense is always there. The reports in this bill language must go to the Secretary of Defense unimpeded, uniterrupted by anybody, so we have assured the continuity of independence. We want to make sure that that Office, though, is not only indpendent but relevant.

Mr. QUALYE. Mr. President, very briefly, this amendment is not necessary because it is not going to restore any additional independence. Indpendence is already maintained. Second, we have to have responsibility and accountability in the new Under Secretary for Acquisition as recommended by the Packard Commission. And finally, Mr. President, if in fact we separate this out and have him report to the Secretary of Defense rather than the Secretary of Acquisition, what I am fearful of is that you are going to get bad decisions. We need that Under Secretary of Acquisition to have all the information to work with this person, to have that input. If he does not have that input, then there is a better possibility of having bad decisions made in procurement. We have already had bad decisions. We need better decisions, better policy. I move to table the amendment and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON, I announce that the Senator from Oklahoma (Mr. BOREN), is necessarily absent.

The PRESIDING OFFICER (Mr. D'AMATO). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 51, nays 48, as follows:

[Rollcall Vote No. 191 Leg.]

YEAS—51

NOT VOTING—1

Boren

So the motion to table the amendment (No. 2647) was agreed to.

□ 1120

Mr. GOLDWATER. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. LEVIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, if I could have the attention of my colleagues.

The PRESIDING OFFICER. The majority leader is recognized. Senators please cease their conversations.

The majority leader.

Mr. DOLE. Mr. President, I have had a number of inquiries from my colleagues from both sides of the aisle on what is going to happen. I said that I know the managers have worked hard on this bill. This is their fifth day of long, hard work on this bill and they would like to finish it. They would like to finish it today.

I think many of my colleagues would not like to be here again tonight until midnight. It would be the fourth night in a row. I think we are going to look forward to the same kind of week next week and I think there is a level at which we are not very productive doing that every evening.

The question is, well, if we are not going to stay late, what about tomorrow? I am not trying to threaten or cajole anyone, but I am just suggesting—and I think the managers are going to make the statement here now—that there are still about 70 amendments floating around.

What I have said to the managers is this: If we do not complete action on this bill this week, I am not certain when it will be back again before the Senate.

So we have invested 5 days of good, hard work, with barely a quorum call all week long. I commend the managers and all those who have been participating. There has been no wasted time.

It is a very serious bill. It is a very important piece of legislation. We are talking about nearly $300 billion so it is very, very significant.

So I would hope that all of us could cooperate with the managers and maybe some of these amendments may not be offered. But I yield the floor so the managers can indicate their desires. And, from what I can understand, rather than stay all night tonight, it might be better for everyone to come back tomorrow, but maybe that is not necessary.

I am happy to yield to the managers.

Mr. GOLDWATER. Mr. President, as the leader has said, we have been on this bill nearly 5 days. We have about 58 amendments left. In the way of floor work, we have the labor provisions discussion that will take place today.

I would ask that my colleagues get their amendments on the floor and bring them up. I am going to insist on time agreements if we can on the remaining amendments. But we are faced, this committee is faced with a conference next week. And it is going to be almost impossible for us to continue debating this bill and try to have a conference at the same time.

So, Mr. President, I have no compunction about lateness. I think we ought to go today as long as it takes. If it takes all night, fine, And if we have to come back tomorrow, I am going to recommend to the leader that we come back tomorrow. This bill has to be finished and we have many amendments left. We have amendments that frankly have nothing to do with the defense of this country. And I would appreciate it if my colleagues would sift these amendments carefully so that we have only ones that apply to the defense of our country. We have had very few that actually do that, and that is the job of this committee.

So that is all I am going to say, Mr. President. I think our colleagues have had the warning. I will do all I can see that that warning is carried out.

Mr. NUNN. Mr. President, first let me thank the majority leader, the minority leader, and all of our colleagues for making this much time available. Earlier this week, it did not look like we were going to have this much time. We have taken up most of what I considered, to begin with, major amendments. We have made, I think, as much progress as we could. Everyone has cooperated. We have done it in good faith. I do not know of any delay on either side of the aisle.

But we are faced with a reality, and the reality is we are either going to finish this bill tonight or tomorrow or we do not get a defense bill this year, in my view. Because if we do not finish it now, we know what the schedule is next week. The majority leader is not going to find much, if any, time next week. If we do not get through this bill next week, we are going to be here in September and the schedule is going to be full.

We are bound to have at least 2 weeks of conference on this bill, bound to have 2 weeks.

We are bound to have 2 weeks. I have never seen a defense authorization bill without 2 weeks. What we have right now is we have to finish it

today or tonight or tomorrow. The managers are perfectly willing to stay here tomorrow and tomorrow night. I hope we do not go until midnight tomorrow night. I hope we can finish. But the way I count amendments, we think there are about 79 amendments left. Nine amendments we believe we can accept from what we know of them. We have 37 amendments that we think we will have to oppose—37 amendments. We think there are about 20 of those that will be withdrawn. I am hoping on those amendments we think are going to be withdrawn we do not have to have a speech before they are withdrawn because if we have 20 amendments and it takes 10 minutes for each, or 15 minutes for each before you withdraw them, you can compute the number—hours.

So if you are going to withdraw amendments, I urge you to do it quietly. Slip up at the desk and take it back. We would not say anything. We will agree to any unanimous consent to withdraw amendments.

[Laughter.]

I hope those amendments that you know are going to be opposed you would find some other bill to put these on unless they really relate to defense. If they do, we have no quarrel.

So I thank my colleagues for the cooperation thus far. I was hoping we could today get through at 4 or 5 o'clock this afternoon. Right now, it looks like afternoon, tonight, and all of tomorrow. Something will have to change before that could be.

Mr. KENNEDY and Mr. STEVENS addressed the Chair.

Mr. NUNN. I am glad to yield to the Senator from Alaska.

Mr. STEVENS. Mr. President, I appreciate the comments of my good friend from Georgia. But I say this to him, and to the distinguished chairman, and to other Members. I have never seen a defense bill before that engaged so many other areas of jurisdiction. For instance, we have some very serious amendments coming with regard to civilian employees in the Department of Defense. This bill encompasses now all of the civilian employees of the DOD. It puts them under a different system than the other civilian employees of the Federal Government. There are several labor provisions in this bill that are going to take a long time.

Mr. NUNN. I say to the Senator from Alaska I did not favor putting the labor provisions in this bill. When you put labor provisions in this bill, you are asking for what we are getting. That will be a major obstacle. If we can get over that obstacle, I think we can get on with the others. The Senator from Alaska is correct on that.

Mr. KENNEDY. Will the Senator yield on that point? The Senator from Alaska in entirely correct about the areas of the labor provisions which are outside the jurisdiction of the Armed Services Committee. I will offer an amendment to strike those different provisions.

But I want to give the assurances both to the floor manager, to the majority and minority leaders, and the Democratic floor manager that we will be more than glad to enter into a time agreement of an hour, or even less. We have debated these issues. We know what they are. But we have been unable to get that kind of agreement. I want to give the assurance to the majority leader that we would from our point of view be quite prepared to enter into a time agreement of an hour evenly divided. This legislation absolutely is entirely inappropriate to be on this defense authorization. The chairman of the committee understands it. The membership understands it. We can take whatever time we want to debate it.

But I would hope since these issues are well known, we can get a time limit. But we have been unable to. I have been unable to get an agreement from the Senator from Texas on these particular provisions, but the Senator from Alaska and others are right. This has absolutely nothing to do with our defense authorization. I am hopeful we can get a time agreement. I will continue to work with the floor managers to do so.

Mr. GOLDWATER. Mr. President, the Senator from Massachusetts has been most agreeable on this matter. We have been working with the Senator from Texas in an effort to get him to agree to an agreement but he has not yet agreed. So we will keep after it, though, and I hope shortly we will be able to announce that there is an agreement.

Mr. BYRD addressed the Chair.

The PRESIDING OFFICER. The Democratic leader.

Mr. ROTH. I would like to ask a question if I might of the manager.

Mr. BYRD. Mr. President, I have the floor, do I?

The PRESIDING OFFICER. The Democratic leader has the floor.

Mr. BYRD. I yield the floor for that purpose with the understanding I will retain my right to the floor.

Mr. ROTH. I thank the Democratic leader.

What was said about personnel or labor policy also is true in the area of real estate. Under this act provision is made for the Department of Defense to sell certain lands. This is a change. Currently this is a responsibility of the GSA.

I hope that we reach some kind of agreement that this would be a matter looked at immediately by the Senator's committee as well as the Governmental Affairs Committee because I think this is a significant change of policy that should not be in this particular piece of legislation.

Mr. GOLDWATER. I believe the Senator from South Carolina understands what the Senator is saying on this issue.

Mr. THURMOND. Yes. I know exactly what the Senator is talking about.

Mr. BYRD. Mr. President, I have the floor.

The PRESIDING OFFICER. The Democratic leader has the floor.

Mr. BYRD. I would be glad to yield to the distinguished Senator from South Carolina if he wishes to speak at this moment without losing my right to the floor.

Mr. THURMOND. Mr. President, in some cases the Defense Department can lease certain pieces of property, and provided in this bill is the procedure where it is recommended by the Assistant Secretary of Defense that we follow this procedure. They can dispose of certain property and use that money for facilities in other places, and turn the rest of the money back to the Treasury. We think it is good for the Government, we think it is good economy, and it should pass.

Mr. BYRD addressed the Chair.

The PRESIDING OFFICER. The Democratic leader.

Mr. BYRD. I will be brief. I cannot commend too highly the manager and the ranking manager on this bill. I cannot commend too highly the Members of the Senate who have called up their amendments. We have had good debates. This is what the Senate is here for. We have seen some substantive deliberations. We have not had a lot of quorum calls just chewing up time. It has been a very orderly procedure here in connection with this bill. There has been a great deal of progress.

I must say that I have been getting to bed at 2 or 2:30 in the morning every day this week. I am one of the leaders who has to stay around here and help to kind of close up the Senate. We have been working hard, trying to get some time agreements on the Contra aid and South Africa matters. These are tough agreements. They are very complex. They deal with highly emotional issues. They are not easy by any means.

The distinguished majority leader and I have met, and other Senators have met back and forth. We keep exchanging proposals—which is perfectly proper. But in exchanging these proposals, sometimes he does not get our proposal until 6 o'clock, we get his back at 10 o'clock, and we agree then to go over to the next morning. But when I get agreements like that, it takes time to look at those agreements and determine what it all means. It is much worse than a game of checkers or a game of chess. I have never

played chess, but I have played checkers. You have to figure what is this move, what is the next move, what is his move, and what can be opened up here or there. It is pretty dull, but it is quite time consuming.

I just hope that we do not stay in tonight. If it means coming in tomorrow, let us do it. We do not have to begin the August recess next Saturday. There is entirely too much talk about an August recess here. We were out in July for 2 weeks. Now we are talking about a 3-week recess in August. This is an important bill. If we do not finish today, and we do not finish it tomorrow, then let us cancel as much of that August recess as necessary to finish this bill and these two other issues. This is not a popular thing to say here. I do not say it to be popular. But I must say, we have to have some rest. I do not mind a late night once or twice a week.

Mr. BROYHILL. Some of us are running.

Mr. BYRD. What was that, running what? I am not running this year. Running for office is important, but the people's business comes first. There is such a thing as keeping one's health. That is important to the people, too, whom we represent in the Senate here.

I am not in favor of going on night after night after night grinding away when we do not have to do it. We do not have to be out tomorrow. We do not have to be out the next Saturday. I would hope we would consider that. I do not say it to imply anything concerning the good work, the good intentions of all Senators on this matter. I just think we ought to stay right here, though, and if we are not going to finish this today by 6 or 7 o'clock, we should go home tonight and come in tomorrow.

I yield the floor.

AMENDMENT NO. 2648

(Purpose: To amend the Foreign Missions Act regarding the treatment of certain Communist countries, and for other purposes)

Mr. ROTH addressed the Chair.

The PRESIDING OFFICER. The Senator from Delaware.

Mr. ROTH. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Does the Senator from Delaware ask consent to set aside the amendment of the Senator from California?

Mr. ROTH. I make that unanimous-consent request, Mr. President.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEVIN. Mr. President, reserving the right to object, I wonder if we know what the amendment is before that is set aside—whether we might have a description of that before that unanimous-consent request.

Mr. ROTH. The amendment involves the Foreign Mission Act.

Mr. LEVIN. I thank my friend from Delaware.

The PRESIDING OFFICER. Is there objection? Without objection, the clerk will report.

The legislative clerk read as follows:

The Senator from Delaware [Mr. ROTH] (for himself, Mr. DIXON, Mr. DENTON, Mr. HATCH, Mr. NICKLES, and Mr. RIEGLE) proposes an amendment numbered 2648.

Mr. ROTH. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place, insert the following:

That (a) the Foreign Missions Act is amended by adding at the end thereof the following new section:

"APPLICATION TO CERTAIN COMMUNIST COUNTRIES

"SEC. 214. (a) Notwithstanding any other provision of this title, the Secretary shall apply to each foreign mission in the United States of the German Democratic Republic, Hungary, Czechoslovakia, Poland, Bulgaria, Rumania, and Cuba the same terms, limitations, restrictions, and conditions which are applied under this title to the foreign mission in the United States of the Soviet Union unless the Secretary determines and so reports to the Select Committee on Intelligence of the Senate and the Permanent Select Committee on Intelligence of the House of Representatives that national security and foreign policy circumstances require that this seciton be waived in specific circumstances with respect to such country.

"(b) The Secretary shall prepare and transmit to the Select Committee on Intelligence and Committee on Foreign Relations of the Senate and the Permanent Select Committee on Intelligence and Committee on Foreign Affairs of the House of Representatives a report describing—

"(1) not later than thirty days after date of the enactment of this section, the plans of the Secretary for implementing this section; and

"(2) not later than six months thereafter, the actions taken pursuant to these plans.".

(b) Section 202(a)(4) of the Foreign Missions Act is amended—

(1) in the text above clause (a) by inserting ", including Government activities involving international trade," after "governmental activities "; and

(2) in clause (A), by inserting "or any instrumentality thereof" after "foreign government".

□ 1140

Mr. ROTH. Mr. President, the purpose of this amendment is to deal with the problem of theft of valuable, technical information.

Mr. President, at the close of this debate, we will be asked to vote on the authorization of many billions of dollars for the Department of Defense. That sum often appears appallingly high. Unfortunately, it is the price we must pay if we are to fulfill our primary duty of protecting the national security of this great Nation.

However, I must point out to my colleagues that there is little point in voting for sensitive, classified projects such as the strategic defense initiative, the Stealth bomber and the Midgetman missile if the highly classified technology associated with those projects if not secure from the attention of hostile, prying eyes.

The past 18 months have brought before our eyes a plethora of espionage cases. Ronald Pelton, Jerry Whitworth, John Walker, John Walker, Jr., Arthur Walker, and the infamous duo, the "Falcon and the Snowman" all betrayed to the Soviet Union major military-technological secrets. Last year, an employee of Northrop Co., was even apprehended trying to sell blueprints of Stealth bomber technology to the Soviets.

Mr. President, the technological secrets which these traitors sought to sell cost the U.S. taxpayer billions of dollars to research and develop.

We cannot, in all conscience, keep asking the taxpayer to dig into his/her pocket for highly sensitive, expensive projects if we cannot first assure the taxpayer that every effort has been made to prevent the leakage of this technology to our enemies.

Failure to act in this regard constitutes nothing less than a diversion, of U.S. taxpayer funds into the pockets of the Soviet military. If anyone believes that I am exaggerating, let me refer them to Jane's analysis of the new Soviet Flanker fighter-bomber. According to that auspicious publication, the Flanker constitutes one of the very best aircraft aloft today, comparable with the front line aircraft of the U.S. Air Force.

The Flanker is a fine plane because it was built with the very best aeronautical technology—U.S. technology, technology subsidized, and often paid for, by the taxpayers of Delaware, Arizona, Georgia, and every other of the 50 States and District of Columbia.

I hope every Member in the Chamber will agree with me when I state that we should build no more planes for the Soviet Union. The question is now—how do we stem this outflow of our vital national security secrets?

The senior Senator from Georgia and I have been trying, through the Permanent Subcommittee on Investigations, to promote major cutbacks in the number of security clearances issued, the number of permanent documents classified while calling for regular reviews of security clearances.

These measures are directed against those Americans who would betray their country for financial gain or ideological motivation. But this constitutes only one half of the security problem; it takes two to pass a secret. What are we doing to clamp down on

those foreign nationals who traverse the United States buying and stealing classified information? The answer, I fear is, not enough.

The State Department originally used the authority granted it under the Foreign Missions Act only to restrict the movements of Soviet diplomats. They may only move more than 25 miles from their base of operations after first notifying State's Office of Foreign Missions. In addition, they may not enter certain restricted areas such as Newport News, Virginia Beach, Silion Valley containing sensitive military or technical facilities.

A series of hearings in the Permanent Subcommittee on Investigations quickly revealed that these regulations have had little or no beneficial effect. Judge Charles Webster, Director of the FBI testified that the Soviets have circumvented the restrictions of the Foreign Missions Act by farming out their espionage activities to the intelligence services of their East bloc satellites. Those services, incidentally, are controlled directly by the KGB and GRU, not by the national governments of Eastern Europe. Judge Webster's testimony was underwritten by the chairman and vice-chairman of the Senate Select Committee on Intelligence, by the senior Senator from New York, who enjoys a distinguished record in this field, and by the Department of Defense.

Unfettered by the restrictions placed upon their Soviet masters, East European spies, posing as diplomats and trade representatives, have traveled the length and breadth of the Nation, purloining national security data and even going so far as to set up permanent so-called trade missions in areas such as Silicon Valley. In case any Member was wondering, this probably explains why we always seem to find Polish so-called business representative involved in most of our own spy scandals.

The Permanent Subcommittee on Investigations decided that this situation simply could not be allowed to continue. Senators NUNN, COHEN, GLENN, and I joined together in an effort to draw up bipartisan legislation to deal with the Eastern Bloc Espionage Program. The product of that consultation was S. 1901, which was reported out by the Governmental Affairs Committee in December 1985. I am now offering S. 1901 as an amendment to the DOD fiscal year 1987 authorization bill.

The purpose of S. 1901 is clear and simple. It takes all restrictions currently placed upon the Soviet Union and places them with equal force upon the Governments of the German Democratic Republic, Hungary, Czechoslovakia, Poland, Bulgaria, Rumania, and Cuba. The bill provides for the usual flexibility by allowing the Secretary of State to allow any National Government or Government agency to be exempted from these restrictions provided that the reasons for such exemptions are reported to the House and Senate Select Committees on Intelligence.

Together with S. 1900 and S. 1947, both of which have already been incorporated into the intelligence authorization bill, this legislation will greatly restrict the Eastern bloc's ability to steal U.S. classified military information and technology.

Mr. President, I am happy to say that the 4 original cosponsors of S. 1901 have since been joined by 31 of our colleagues: Senators EXON, HART, WALLOP, SYMMS, BOREN, MATTINGLY, RUDMAN, CHILES, RIEGLE, SPECTER, KENNEDY, HECHT, DOLE, BUMPERS, BURDICK, FORD, DIXON, WARNER, WILSON, KASTEN, PROXMIRE, QUAYLE, MITCHELL, ARMSTRONG, BOSCHWITZ, HEINZ, MOYNIHAN, GORE, BINGAMAN, DENTON, and HATCH all have entered their names as cosponsors of this legislation.

The State Department sought to preempt our legislative effort by implementing some limited restrictions upon East Germany, Poland, Bulgaria, and Czechoslovakia, making them subject to the 25-mile rule. These measures are inadequate. First, State can remove them wholesale, whenever it wishes without consulting the Congress or even its Intelligence Committees. Second, the deletion of Rumania and Hungary from the list has no acceptable intelligence rationale and will only place them under heavy Soviet pressure to take up the slack by expanding their espionage activities. Third, State's new regulations allow all East European diplomats, business representatives and so forth, to move freely in and out of all restricted areas. Thus, they will remain Moscow's eyes and ears wherever sensitive military and technical research is taking place.

In closing, Mr. President, let me point out that the State Department asserts that enactment of this legislation could damage our dipomatic relations with Eastern Europe. I reject this reasoning on three grounds: First, espionage is not the price of diplomacy. Second, it makes a false equation between the United States and Eastern Europe; we have far more to lose to espionage than does Bulgaria or Cuba; we are not spying on their hitech facilities; they do not have any. Third, we all know the price of espionage, and when I say "We," I am referring to Eastern Europeans as well as Americans—they have had a good run at American secrets and classified technology and like any rational being they knew that the party had to end some day. I propose that the Senate vote and that that day be today.

Mr. President, I will say that this is an important piece of legislation, important to our defense effort to protect American secrets and classified information. I urge that the Senate adopt this amendment.

Mr. GOLDWATER. Mr. President, I am very happy to announce there has been an agreement reached between the Foreign Relations Committee and the Armed Services Committee over this piece of legislation. I have to say, Mr. President, after having served on the Intelligence Committee for so long, that this is long, long overdue.

I know the figures that I might use today are not as accurate as I could have used a few years ago, but when we think of the Russian Embassy on one of the highest hills in this town, with over 1,200 people, when we look at San Francisco with about 1,400 people, they have the ability to intercept telephone conversations, not just official conversation but any.

□ 1150

Also, there has been a part of our law that says that we can limit the number of people in a foreign embassy to the number of our people who are allowed in their own countries. This has not been accomplished.

So, Mr. President, I am very happy to accept this amendment. I speak, I am sure, for the Senator from Georgia, who told me before he left that it is agreeable to him also.

Mr. LEVIN. Mr. President, first, let me ask unanimous consent that I be listed as a cosponsor of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEVIN. I understand that Senator PELL is on his way over and I would like to reserve some time for him. I do not know if we are on a time limit or not. I understand he would like to speak on this amendment. If there is nobody else who wants to speak, I wonder if we could temporarily lay it aside and take up another amendment or put in a quorum call until he can be here.

Mr. President, I understand now that Senator PELL does not intend to come. Therefore, without objection on this side, we accept this amendment. I think it makes a very valuable, long-overdue contribution. I congratulate my friend from Delaware for his leadership in this area.

Mr. ROTH. Mr. President, I appreciate that statement on the part of the Senator from Michigan.

I ask unanimous consent to add Senator DECONCINI's name as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROTH. I move adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2648) was agreed to.

Mr. ROTH. I move to reconsider the vote.

Mr. LEVIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GOLDWATER. Mr. President, the bill is open for further amendment.

Mr. GRAMM. Mr. President, I am sorry I was not on the floor when the Senator from Massachusetts was here to discuss his amendment to spend over $1 billion in savings. There seems to be some confusion about an inability to get a time agreement. That inability stems from an unwillingness on the part of the distinguished Senator from Massachusetts to divide the amendment so we might vote on one set of reforms related to an antiquated law that forces the Federal Government to spend as much as a 30-percent premium to purchase labor. Another provision of law forces high wages upon the service industry that services the Defense Department and, in the process, costs the Federal Government $961 million over a 5-year period, according to CBO.

Let me assure my colleagues that I am willing to enter into a unanimous-consent agreement to limit debate if these two issues are separated so we can debate both savings so that Members of this body can look at savings and decide whether or not they want to undertake them.

Should the distinguished Senator from Massachusetts seek to divide the two issues so they may be voted as free-standing, I shall enter into any time agreement within reason that he deems prudent. Failing that, I do not intend to enter into a time agreement, though I am ready when the distinguished Senator from Massachusetts is ready to debate the issue.

Mr. GOLDWATER. Mr. President, the Senator from Massachusetts is not here. Did I understand the Senator from Texas to say that he has changed his mind and is willing to agree? I do not think I did but I do not hear well.

Mr. GRAMM. No, Mr. President, what I said is that the Senator from Massachusetts has an amendment that strikes two separate provisions of our bill at once. That amendment is nondivisible. If the distinguished Senator from Massachusetts would divide it and offer two amendments, one on one section, one on the other, I would happily agree to a time limitation. Failing that, I am certainly willing to begin debate on it, but I am not willing to give a time limitation given some question as to our ability to vote on these two important saving measures independently of one another.

Mr. GOLDWATER. I thank my friend.

Mr. President, the bill is open to further amendment. Does the Senator from Delaware have another amendment?

Mr. ROTH. Yes, Mr. President.

ESPIONAGE—DEATH PENALTY

Mr. ROTH. Mr. President, the great Roman statesman, Cicero, said a nation can survive its fools, and even the ambitious. But it cannot survive treason from within. An enemy at the gates is less formidable, for he is known and carries his banners openly. But the traitor moves among those within the gate freely * * * he speaks in accents familiar to his victims * * * he appeals to the baseness that lies deep in the hearts of all men. He rots the soul of a nation, a murder is less feared.

Though these words have warned great civilizations down through history, and while we have even learned the lessons of republics that have fallen in the past, espionage continues to grip our Nation's political and defensive infrastructure and threaten our security.

Last year, 1985, was called the year of the spy by our national media. Twelve Americans and one foreign national were charged with conducting espionage against the United States. In comparison, only eight individuals were arrested for similar crimes in 1982 and 1983 combined.

It might be said that America is seeing a new breed of spy, one whose evolution was described when I held hearings on the activities of hostile foreign intelligence officers in the United States. It was then that my Permanent Subcommittee on Investigations heard from convicted spy James Harper, a man who sold highly classified military secrets to the Soviet Union through a Polish go-between.

Unlike the common criminals in any society, the spy, as Harper testified, is cunning and intelligent. His acts are born not of passion or ignorance, but of avarice and cold-blooded disregard for the safety of his countrymen. Easily, his betrayal could place the lives of literally hundreds of millions of Americans in extreme danger. And what's even more horrible is that those actions are almost always premediated. He knows the consequences to his countrymen before he turns his back on his county.

Mr. President, with these facts in mind, it is incumbent upon this distinguished body to act in the defense of our countrymen, in the defense of our liberty, and in the defense of our Constitution and empower our courts with the possible sentence of death upon the conviction of espionage.

To this end I am proposing an amendment that delineates several categories of classified information of which betrayal would render the convicted spy liable to the imposition of the death penalty. These categories include: nuclear weaponry, military spacecraft or satellites, early warning systems, war plans, communications, intelligence, cryptographic information, sources or methods of intelligence or counterintelligence or any other major weapons system or major element of defense strategy.

It must be clear that I am not proposing to make the imposition of the death penalty mandatory in all cases where this classified information is betrayed. Rather, I am proposing that we give our courts the power to impose such a penalty upon persons convicted in any one of these areas. The decision rests entirely with our judicial system.

However, the crime of espionage is so serious that Congress should mandate a minimum sentence, and this amendment does exactly that. In cases where the courts do not see fit to impose the death penalty, this amendment calls for a minimum 20-year prison sentence, with no eligibility for parole.

We know that the current espionage statute does include a death penalty provision, but we are also aware that the provision does not meet the requirements that the Supreme Court imposed in its 1972 decision on Furman versus Georgia. My amendment, however, does include the provisions to allow the imposition of the death penalty in a constitutional manner.

Mr. President, I am the first to agree that the subject or action of this amendment is not pleasant. It is not the nature of advanced civilization to willfully and wantonly impose such penalties upon its people but the greatest, and sometimes most difficult, responsibility democracy has is to hold constant vigil over itself. We must be willing to take the steps necessary for the security of our people as a whole. And we must begin now.

This amendment will demonstrate our desire to fulfill our responsibility. It will demonstrate our society's outrage and concern about such treasonous offenses. In that the traitor or spy is most always an intelligent, cunning sort of individual, I believe this measure will act as a deterrent. His traitorous acts are not committed in passion, and he will carefully weigh the potential gain against the potential loss—the reward against the risk—and the choices will be clear.

In closing, Mr. President, let me say that this proposal is a long time in coming. The amendment closely resembles language already reported out by the Senate Judiciary Committee in S. 239, a much larger piece of legislation dealing with applicability of the death penalty in many different types of criminal cases. That bill is the product of several committee hearings. Therefore, my colleagues can see the amount of time and involvement that went into this proposal. It has been carefully considered, and I hope the

Senate will choose to move forward on this vital step to protect our national security.

□ 1200

Mr. President, I send an amendment to the desk and ask unanimous consent that we set aside the measures before the Senate.

The PRESIDING OFFICER. Is there objection?

Mr. LEVIN. Reserving the right to object, Mr. President, this amendment has no place on this bill. It is a complicated, lengthy subject to make sure that we meet the constitutional requirements of Furman. There is a death penalty bill which is on the Senate calendar. This has some differences from that bill, and therefore we would object to that unanimous-consent request.

The PRESIDING OFFICER. Objection is heard.

Mr. ROTH. Mr. President, I hope that the distinguished Senator from Michigan would permit this amendment to come up for consideration. I would only point out that as I have already stated in my opening statement this is a matter of gravest concern to the military defense of this Nation. It does little good for this country to spend billions and billions of dollars for defense, for research and development only to have the products, the fruit of that research and development, stolen and given to the enemy.

I point out that my amendment only involves espionage. It does not involve anything else. I think it is a matter that deserves the careful attention of this body because, as I said, we are going to vote hopefully today to spend billions of dollars for the Nation's defense. It makes no sense to me that we do not at least have the opportunity to consider whether or not the death penalty is appropriate to those who would betray our Nation. I would urge the distinguished Senator to permit this matter to come up for consideration.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. LEVIN. Mr. President, I think everybody in this Chamber agrees there is no more heinous crime than espionage. Last year, we amended the Code of Military Justice to provide for a death penalty in the military. This amendment raises significant constitutional issues which have been the subject of days and days and days of debate on other bills, different from this bill. This bill differs in a significant way, and maybe a number of ways, from the bill which is on the Senate Calendar for the death penalty, and because it is going to take days of debate to go over these issues, this is the wrong bill. Clearly the right bill is a death penalty bill which is on the Senate Calendar; I would object.

The PRESIDING OFFICER. Objection is heard.

Mr. ROTH addressed the Chair.

The PRESIDING OFFICER. The Senator from Delaware.

Mr. ROTH. Of course, the Senator is obviously within his rights, but I would also point out that once these amendments are duly considered and dealt with, then the opportunity will come up again for consideration of this proposal. This legislation has been modeled and adheres exactly to what the Judiciary Committee recommended be incorporated with respect to espionage. I think it is very unsatisfactory that we do not have the opportunity to give this matter careful consideration. As I said, this has been called the year of the spy. We know that there are going to be a few opportunities to bring up new pieces of legislation. All I am asking is that we have an opportunity to debate it, to consider whether or not it is desirable. Obviously, I think it is. Those who oppose it would have that opportunity. But let us give the Senate the opportunity, the chance, to work its will on a matter of critical importance to the security of this Nation.

Mr. LEVIN addressed the Chair.

The PRESIDING OFFICER (Mr. HEINZ). The Senator from Michigan.

Mr. LEVIN. The Senate is in the middle of the defense authorization bill. This is a death penalty bill. It will take days of debate because the Senate has gone into these matters very carefully. This, may I repeat, is a different bill in a significant respect from the bill which is on the Senate Calendar. That bill, just to give you an example, has an expedited, accelerated appeal process in death penalty cases. That provision has been debated for hours and days. This is not the right bill for this amendment. I believe that both the chairman of the Armed Services Committee and the ranking member of the Armed Services Committee, in whose seat I am sitting at the moment, would agree this is not the right bill for this amendment, and given that position, I would object.

Mr. FORD addressed the Chair.

The PRESIDING OFFICER. The Senator from Kentucky.

Mr. FORD. Mr. President, I commend my distinguished friend from Michigan. What is happening to this bill is, it has become a Christmas tree. Everybody is trying to get an amendment on it that really is not germane. It has nothing to do basically with defense authorization. We heard commendations from the leadership of the floor managers for this bill. I would hope that those other amendments—some 79, I understand—that are questionable as to whether or not they belong on the defense bill—they belong on other bills—I would hope that we would look at our amendments, find out if they really are germane to the defense authorization bill, to the defense of this country, and then we would pull those amendments down. Therefore, we may, just may be able to complete this bill this evening rather than going out, say, early evening and coming back in tomorrow. So I hope my colleagues would do that and I again commend my distinguished friend from Michigan.

Several SENATORS addressed the Chair.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. GOLDWATER. Mr. President, I have the same feelings about this as my friend from Delaware. I also have the same feelings about it as my friend from Michigan. We have been through this many, many times, and I do not believe this bill is the proper place. I urge my friend from Delaware to withdraw the amendment so that we might get on with the business.

Mr. ROTH. Yes; I will temporarily withdraw it. They objected anyway.

The PRESIDING OFFICER. The amendment is not pending.

Mr. GOLDWATER. Mr. President, last night before we adjourned, we agreed to take up the amendments on ASAT this morning, and I see the Senator from Massachusetts has arrived. We will proceed. There is a time limit on this discussion of 1 hour, 40 minutes to my friend from Massachusetts, and 20 minutes to my side.

The PRESIDING OFFICER. It will take unanimous consent to lay aside the pending amendment.

Mr. GOLDWATER. I assume it will be done by the proponents, but I ask unanimous consent that the conflict amendment be withdrawn temporarily.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2650

(Purpose: To prohibit the testing of an anti-satellite weapon against an object in space until the Soviet Union has conducted such a test)

Mr. KERRY addressed the Chair.

The PRESIDING OFFICER. The Senator from Massachusetts is recognized.

Mr. KERRY. Mr. President, I send the following amendment to the desk and for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Massachusetts [Mr. KERRY], for himself and others, proposes an amendment numbered 2650.

Mr. KERRY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 19, between lines 18 and 19, insert the following new section:

SEC. 206. PROHIBITION AGAINST ANTI-SATELLITE WEAPON TESTING.

None of the funds are authorized in this Act to carry out a test of the Space Defense System (anti-satellite weapon) against an object in space until the President, using existing authority, certifies to Congress that the Soviet Union has conducted, after the date of the enactment of this Act, a test against an object in space of a dedicated anti-satellite weapons.

Mr. KERRY. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. KERRY. Mr. President, I send this amendment to the desk on behalf of myself, Senator CHAFEE, Senator MATHIAS, Senator SIMON, Senator HATFIELD, Senator STAFFORD, Senator HART, Senator LEAHY, Senator CRANSTON, Senator MITCHELL, Senator PROXMIRE, Senator METZENBAUM, Senator RIEGLE, Senator KENNEDY, Senator SARBANES, Senator BURDICK, Senator PELL, and Senator HARKIN.

This amendment does not seek to do anything new. It does not seek to change the current regime of arms control. It does not seek to impose a new moratorium.

□ 1210

This amendment seeks simply to preserve the status quo, to stay where we are. I believe that upon close examination, my colleagues will agree that this amendment seeks to do so in a way that is more than favorable to the United States.

Last year, in the conference committee, having failed in the Senate to pass the moratorium, the Senate receded to the House; and we passed the moratorium, which is in place today, and there has been no allegation, that either side has broken the moratorium since.
